The trade is principally with the United Kingdom. Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony; rice plantations have been started and steps have been taken to improve the coco-nut industry, and to develop the kola and sisal hemp plantations. The principal exports in 1923 were cocoa, £6,566,973, gold and gold dust, £850,671, kola nuts, £319,805, lumber, £156,308 and manganese, £327,377. The chief imports are textiles, building materials, cotton goods, provisions, kerosene, and hardware. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters, and has established schools of its own, and there is a University College at Achumota, 8 miles from Accra. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1923 was 3,297,869 (British 1,977,364), 2,600 miles of telegraphs have been established in the colony, of which 290 miles are in Ashanti and 203 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Takoradi, the centre of the gold-mining industry, to Kumasi (268 miles). Another line runs from Accra to Comassie (192 miles).

The seat of government is Accra (population 38,049). The other principal towns are Cape Coast (14,921), Adidadi (1,620), Elmina (5,262), Sekondi (9,500), Takoradi (2,671), Quittah (9,839), Axim (3,781), Comassie (20,268), Saltpond (6,322), and Winneba (6,980). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 12 official and 9 unofficial

members, for the Colony, excluding Ashanti and the Northern Territories

ASHANTI

Ashanti was placed under British protection on Aug. 7, 1806, and a English Resident was appointed to Coomassie. Under Orders in Council of Sept. 25, 1902, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though the laws and Ordinances of the Gold Coast do not apply to the annexed

territory. It is divided into two provinces under Provincial Commissioners—the Eastern Province, headquarters Coomassie, and the Western Province, headquarters Sunyani. The population (census 1902) was 406,193. Coomassie, the chief town, has about 20,000 inhabitants. There are Government schools at Coomassie, Sunyani and Juaso, and a number of mission schools. Agriculture is extending, cocoa and rubber plantations are being formed. In the Western parts of the Gold Coast Colony and especially of Ashanti are rich forests with excellent timber trees (mahogany, cedar, &c.), trees yielding fruits, rich in oil, rubber-bearing plants, and species yielding gum copal. The country is well watered, and with proper restraints on wasteful native farming and on over-exploitation, would contain inexhaustible supplies of valuable forest products. On the Eastern side the forests are sparser, though timber and oil trees are common and game plentiful, the products there are chiefly maize, kokoyams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

Chief Commissioner, John Maxwell, C.M.G. £1,600

Provincial Commissioners, H. J. Hobbs, ...

NORTHERN TERRITORIES

In 1902 the Northern Territories lying to the north of the parallel of 8° N lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. The country is divided into two provinces under Commissioners, the Southern Province, with headquarters at Tamale, and the Northern Province, with headquarters at Navarrog. By the census taken in 1902 the population was about 530,360. The Mohammedans have substantial mosques, there is a Roman Catholic mission. Government schools have been established at Tamale, Gambaga, Lohia, and Wa. Good permanent roads are being made. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous areas.

Accra is distant from Liverpool, 3,920 miles; transit, 14 to 30 days.

HONG KONG

The Crown Colony of Hong Kong consists of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10'—22° 34' N. lat. and 113° 52'—114° 30' E. long., and of a portion of the mainland.

Hong Kong is an island about 10 miles long and from 2 to 6½ miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lycenoon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; British Kowloon was subsequently acquired by the Peking Convention of

* Inclusive of expenditure from loans.

1860, and the New Territories, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population (1921) of 662,200. The non-Chinese residents, excluding naval and military, numbered about 15,200.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor and tobacco the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1922) 23,283,382 tons, (1923) 26,701,120 tons. A railway, of which 23 miles belong to the Government, runs from Kowloon to Canton, the length north of the Sham Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tan-kok, a distance of 7 miles. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,860 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 84 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flax, gunnies, hides and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1923 there were 820 schools subject to Government supervision, attended by 42,452 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42'—18° 32' North lat. and 76° 11'—78° 23' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,207 square miles, and a population, in April, 1921, of 858,118 (males, 401,973, females, 456,145), whites, 14,476, coloured, 157,223, blacks, 660,420, East Indians, 18,610, Chinese, 3,696, not specified, 3,693.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509, but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south.

* The Government publishes annually a *Handbook of Jamaica*, full of information respecting the history and personnel of the island.

shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 300 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages, the number of accounts open in the Govt. savings banks was 62,140 (1923). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported, the latter is still counted the best in the world, and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dyestuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members, the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census 1921) 62,707, the next in importance are Spanish Town, pop. 8,694, Montego Bay, 6,580, and Port Antonio, 6,272. Chief exports (1923) sugar, £674,769, fruit, £2,458,863, coffee, £242,000, cocoa, £60,204.

KENYA.

Kenya Colony and the East Africa Protectorate include the whole of the coast from the Umba to the Juba River, as also the vast territories in the interior bounded in part by international conventional lines. The eastern boundary was defined along the Juba and north-east by an agreement with Italy (1891), and on the north by an agreement with Abyssinia in 1908. On the west the Colony adjoins Uganda, and on the south the mandated Tanganyika Territory. The population of the Colony at the census of 1921 was 2,529,333. Its area is approximately 200,000 square miles.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Colony is divided for administrative purposes into eight provinces, which are subdivided into districts and sub-districts.

The districts most suitable for settlement by Europeans are those of Kyambu, Nyeri, Nakuru, Naivasha, Lumbwa, and Uasin Gishu. There is also a considerable region still undeveloped, and not yet included in any administrative district.

Kenya also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana. Witu is regarded for administrative purposes as part of *Tanaland*.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 32,339, of whom 653 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions radiating from the main Uganda Railway telegraph system to Taveta, Fort Hall, West Kenya, Archers Post, Southern Masai Reserve, Eldama Ravine, Kericho, Uasin Gishu, Machakos, Kisili and Mundias, also telegraph connexion between Mombasa and Tanga. Radio-telegraph stations exist at Mombasa and Kisumu. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,722 feet in length. There are also about 40 miles (under Uganda Railway management) from Nairobi to the Fort Hall District, and about 90 miles from the main line at Uganda junction to the Magada Soda Lake.

Nairobi, the capital of the Colony, and central station of the Uganda Railway, has a population of 24,378, of whom 2,920 are Europeans. There are also some 600 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are coffee, fibre, carbonate of soda, grain, and hides and skins, the principal imports are piece-goods, rice, grain and flour, building materials, European provisions, petroleum, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

The problem of admitting or excluding immigrants from British India has exercised the attention of the Government, and discussions have taken place at the Colonial Office in London on the subject. Delegates from Kenya and from British India have stated their views, which are in direct conflict one with the other.

LEEWARD ISLANDS

The Leeward Islands of the West Indies under British administration consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St.

Christopher and Nevis, with Anguilla, (3) Dominica, (4) Montserrat, and (5) the Virgin Islands, with Sombrero, under Commissioners, all, except the latter, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The population of the federal colony at the Census of 1921 was 122,242. The General Legislative Council consists of 10 ex officio and 10 elective members, with the Governor as President.

(2) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence

of the Governor-in-Chief. It lies in 17° 6' N lat

and 61° 45' W long, and is about 70 miles in di-

ameter. Its area is nearly 108 square miles,

equal to 68,980 acres, of which nearly 17,000 are

under cultivation. The population (with Barbuda)

in 1921 was 29,767, including 12,542 males and

17,225 females. Settled by the English in 1632,

and granted to Lord Willoughby by Charles II.,

the island has always been more distinctively

English. It is much less hilly and wooded than

the other Leeward Islands, and is largely given

up to the cultivation of sugar, for which two

central sugar factories have been erected. Cotton

is being planted, and the island also exports

molasses, tamarinds, pine-apples, and arrowroot.

In March, 1898, the Crown Colony system of

government was instituted.

Barbuda is situated 30 miles N of Antigua, of which it is a dependency, in lat $17^{\circ} 35' N$, long $61^{\circ} 42' W$. Area, 62 square miles. Population, 900. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Magistrate, Capt G Downing

Redonda, is a small island with a phosphate industry.

(2) ST KITTS NEVIS (WITH ANGUILLA).

The islands of St Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population at the Census of 1921 of 38,214 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 78° to 85° .

St Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat $17^{\circ} 18' N$ and long $62^{\circ} 48' W$, and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,712 feet (Mount Misery). The capital, Basseterre, pop. (1922) 7,837, is a port of registry, and had 60 vessels of 888 tons in 1923.

Nevis (separated from St Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1922 of 11,569. Sugar cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1922), 1,308.

Anguilla is about 60 miles N W of St Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1922) 4,275. Salt is the principal product, and small stock are raised.

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situated between $15^{\circ} 20' - 15^{\circ} 45' N$ lat. and $61^{\circ} 13' - 61^{\circ} 30' W$ long, 95 miles S of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85° . The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, and fruit. The population was estimated at 38,632, on Dec 31, 1923, included in this total are 400 Caribs, of whom 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population about 7,000, and Portsmouth, population about 1,000.

(4) MONTSERRAT

is situated in $16^{\circ} 41' N$ lat and $62^{\circ} W$ long, 26 miles S W of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of $32\frac{1}{2}$ square miles, with a population (Census 1921) of 12,120. Discovered by Columbus in 1493, it was settled by Englishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles, it contains three active soufrieres and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The chief exports during the year 1920 were cotton, cotton-seed oil, onions, limes and its products, sugar, papaine and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709.

(5) THE VIRGIN ISLANDS.

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666, the principal one—Tortola (the largest), situate in 18° 27' N lat and 64° 40' W long, Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasturage for cows, sheep, and goats. Sugar, cotton and coconuts are grown in increasing quantity, fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola, population (1921), 463.

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Strait Settlements*, the *Federated Malay States*, the *Non-Federated Malay States*, and the *Protected State of Johore*. The total estimated population of BRITISH MALAYA (1922) was 3,437,841 (as compared with 2,672,754 in 1911). Of the 1922 total, 2,110,606 were males and 1,327,235 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1921 was 14,954. The total trade of British Malaya was valued in 1923 at £67,072,040 for Imports (£9,235,508 from U.K.), and at £77,878,265 for Exports (£10,884,525 to U.K.).

(5) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan. These Settlements have an entire area of about 1,600 square miles, with an estimated population (1923) of 235,220.

The Government consists of a Governor, assisted by an Executive Council of 22 members, and a Legislative Council of 23 official and 13 un-

official members, appointed by the Crown. Of the unofficial members 12 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok.

The principal exports are Para rubber, tin, preserved pineapples, tapioca, gambier copra, pepper, sago, coco-nut oil, tanned hides, raw hides, rattans, coffee, spices, gums and dye-stuffs (cutch, mangrove, bark, &c.). The rubber exports amounted to 206,889 tons in 1922 and 204,812 tons in 1923. The chief imports are dried fish, rice, milk, sugar, cigarettes and tobacco, coal, cotton piece-goods, machinery, ironware, opium, petroleum, sarongs, slendangs and kains.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width, its length is about 27 miles, and its breadth 14 miles. It comprises, with the adjoining islets, an area of 217 square miles, and an estimated population (1923) of 457,571. It was first occupied, in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E., with 350,355 inhabitants in 1921. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. The railway from Singapore to Bangkok was open for passenger traffic on July 1, 1928.

The number of merchant vessels entered and cleared in 1922, exclusive of native craft, was 12,479, with a tonnage of 20,512,572. The total for the whole colony was 18,712, with a tonnage of 29,936,949. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 59,238 (tonnage, 2,174,942). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of \$29,000,000. The Kings Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep, its cost was \$3,500,000.

Singapore is a free port, no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The trade returns aggregate for 1923 (including inter-settlement trade), amounted to \$1,110,649,129 (including the value of bullion and specie), the value of exported tin being \$46,726,616, and of Para rubber \$158,185,090.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north west coast of Borneo, in 5° 16' N. lat. and 115° 15' E. long., and forms part of the Settlement of Singapore. Its area is about 28 square miles, and its estimated population is 5,972. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a

cable station of the Eastern Extension Telegraph Company on the island. Imports (1923), \$1,674,369; exports, \$2,283,122.

Resident, H. S. Eley (actg.)

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The estimated population is 881, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Duction Island.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 56 square miles and an estimated population of 750. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1923 was 70,433 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (est. pop. 1923, 166,880) on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (est. pop. 1922, 130,478), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India, now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1923 (including inter-settlement trade) amounted to \$404,144,447, the export of tin from the port being \$73,822,417 in 1923.

Province Wellesley is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kédah in 1798, with some land of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, and rubber plantations.

The Dindings Territory (area 183 square miles, est. pop. 1923, 13,283) is at present little developed, but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N. W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1828, when it was restored to the Dutch; it finally became a British possession in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The estimated population in 1923 was 160,886.

Aggregate trade, 1923 \$66,709,382
(Including Para rubber, \$35,710,364, exported)
Singapore, distant 2,700 miles, transit, 22 days
Penang, 20 days, and Malacca, 23 days

(a) THE FEDERATED MALAY STATES

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements, they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Lumpur (Sel), pop 80,424, Ipoh (Pk), 36,860, Taiping (Pk), 21,111, Kampar (Pk), 12,325, Seremban (N S), 17,272, Klang (Sel), 11,655, and Teluk Anson (Pk), 10,859.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above mentioned control.

There are 1,044 miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (120½ miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besai (on the Siamese frontier), where it is connected with the Siamese State Railways, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 23 hours, and that between Ipoh (Penang) and Bangkok 34 hours (compared with a sea journey of 6 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan and Pahang as far as Chagar Perak. This line will eventually connect with another running South through Kelantan, now under construction. Through communication between F.M.S. and Kelantan via the Siamese State Railways is in operation. There are 2,494 miles of metalled road, 140 miles of unmetalled roads, and 1,794 miles of bridle-paths, while the principal rivers are navigable for small boats.

One of the regions contributing largely to the raw products of the British Empire is the Malay Peninsula, and the most productive portion of the peninsula is that embraced by the four Federated Malay States. The territory is greatly endowed by having tin and plantation rubber as its two richest products, but the figures given below show that it has other exports of great value.

With the growth of the rubber industry, there has been a tendency to neglect some of the older products of the country, such as indigo, coffee, sugar, and pepper; gold has always been found in small quantities, chiefly in Pahang, and the export in 1923 amounted to 8,602 oz.

The following table shows the relative importance of the exports from the Federated Malay States over a period of three years.—

	1921 tons	1922 tons	1923 tons
Rubber	94,510	128,462	101,311
Tin and tin ore	46,238	35,286	37,650
Copra	36,211	55,275	49,049
Rice and padi	8,415	6,387	6,580
Taploca	787	891	2,062
Alca nuts	710	1,027	1,108
Gambier	289	309	292
Wolfram and scheelite	110	95	38

The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 92°, and the minimum 68°.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

	1922	1923
Public revenue	\$52,494,110	\$63,952,132
Public expenditure	49,811,007	52,825,572

Kuala Lumpur is distant 8,500 miles from London; transit, 22 days (via Penang).

* All salaries are exclusive of allowances.

(3) THE NON-FEDERATED MALAY STATES

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 21, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British official called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadism.

JOHORE, with an area of 7,678 square miles and a population (Census, 1921) of 282,234, occupies the southern extremity of the Malay Peninsula. Capital, Johore Bahru, population, 25,322. The rubber estates and tin mines are important.

	1922.	1923.
Revenue	\$8,625,223	\$11,094,954
Expenditure	8,785,273	7,064,166
Public Debt	800,000	800,000
Imports	24,407,531	27,869,594
Exports	37,861,597	56,779,727

Sultan, H. H. Ibrahim, G. C. M. G., K. B. E.; born, 1873; succeeded his father, 1895.

General Adviser, H. Marnott, C. M. G.

Chief Minister, Dato Abdullah bin Jaafar

Deputy State Secretary, Dato Ismail bin Bachok

Judge, A. V. Brown

KEDAH, between 5° 5' - 6° 35' N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1921 was 338,544, and the approximate area 3,800 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 22,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 40 British officials, employed in the Public Works, Survey, Police, and Medical departments.

	1922	1923
Revenue	\$4,956,904	\$5,081,138
Expenditure	5,290,239	5,311,741
Public Debt	1,500,000	1,500,000

Sultan, H. H. Sir Abdul Hamid Halimshah, K. C. M. G.

Regent, H. H. Tunku Ibrahim, C. M. G., C. V. O.

British Adviser, W. Peel.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is 40,090. The capital is Kangai, a few miles up the Perlis River. Rice is the principal crop.

	1923.	1924.
Revenue	\$397,187	\$453,432
Expenditure	322,668	441,156
Public Debt	400,000	300,000

Raja, H. H. Syed Alwi, C. B. E.

British Adviser, J. W. W. Hughes (acting).

KELANTAN lies between 4° 38' - 6° 15' N. and 102° 26' - 102° 45' E. on the east coast of the peninsula, with a total length of about 120 miles and a breadth of 50 miles. The northern

portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and barren. The capital, Kota Bharu, 8 miles from the mouth of the Kelantan River, has a population of 20,833.

	1922	1923.
Revenue	\$1,310,020	\$1,396,855
Expenditure	1,536,318	1,271,887
Public Debt	3,567,895	3,441,345

Sultan, H. H. Ismail, K. C. M. G.

British Adviser, A. F. Worthington

TRENGGANU, between 4° 30' - 5° 45' N. and 102° 15' - 103° 30' E. lies south of Kelantan on the east coast of the peninsula. Area, about 5,000 square miles. Population (1921), 153,092. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports in 1923 were dried fish (\$996,716), tin ore, copra, Para rubber, wolfram ore and gambier cube. The capital, Teengganu, on the river of that name, contains 12,000 inhabitants.

	1922	1923.
Revenue	\$669,763	\$642,679
Expenditure	858,303	788,902
Public Debt	Nil	300,000

Sultan, H. H. Suleiman, K. C. M. G.

British Adviser, J. L. Humphreys.

MALTA.

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24½ square miles. COMINO—the site of the Sultan's disaster in 1890 and now a sanitary station—and several islets. The civil population of the whole group, on Dec. 31, 1922, was 218,510. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A. D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops,

compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1921 (June, July, August and September) was 76°. In winter the mean temperature was 55°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes, figs and honey are plentiful. The principal occupation of the people is in connexion with shipping, about 8,000 females being occupied in making lace.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary, its population has now dwindled to about 500, but its suburb, Rabato, had about 10,000 inhabitants in 1921-22. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world, it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum, 101 elementary and infant schools, 2 secondary schools, and 40 night schools, maintained at a total cost to the Government of £56,405 in 1921-22, in addition there are garrison schools, a Dockyard school, and 59 private schools which receive no grants-in-aid from the Government.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry.

In 1922 the Port of Valletta was entered by 1,626 vessels (tonnage 2,746,280).

	CAPITAL, Valletta	Population (1921), 22,392.

Malta is 2,280 miles by sea, and via Naples about 1,995; transit, 3½ days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E long and 8 lat 19° 58'–20° 33', and comprising an area of 720 square miles. The permanent population at the Census of 1921 was 376,474, of whom 265,455 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1725 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 205,627 acres, 171,227 are under sugar, 20,000 under fibre, and 14,400 under other crops, the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1923, amounted to 928,548 tons, of which 65 per cent was British. In 1923 there were 144 miles of railway (120 of 4 ft 8½ in gauge and 24 of 2 ft 6 in), 61 post-offices and 54 telegraph offices in the island, with 416 miles of telegraph, including block telegraph for the railway, and 170 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1922–23 amounted to Rs. 1,209,999. Of the pupils in the Government and aided schools, 59 per cent are Roman Catholics, 2 per cent Church of England, 1 per cent other Christian denominations, 11 per cent Muhammadans, and 27 per cent Hindus and others.

CAPITAL, Port Louis. Population (1921), 50,308.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1921), 6,584. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.
Magistrate, W. J. Hanning (*Acting*)

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 28 to 30 days.

MESOPOTAMIA (IRAQ).

King of Iraq, Faisal, elected King of Iraq Aug. 10, 1921, *acceded* Aug. 23, 1921.
President, Council of State, the Naqib of Baghdad, G.B.E.

Iraq, or Mesopotamia, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approxi-

mate position being between $37\frac{1}{2}^{\circ}$ to $48\frac{1}{2}^{\circ}$ E. long, and from $37\frac{1}{2}^{\circ}$ to 30° N lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Peace with the Allies (1920) Turkey renounced the sovereignty over Mesopotamia and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set-up by the High Commissioner in Nov, 1920, and in Aug, 1921, the Emir Faisal (son of the King of the Hedjaz) was elected King of Iraq, to be enthroned on Aug 23, 1921. By Treaty between Great Britain and Iraq (Oct 30, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admission has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated, by a protocol signed April 30, 1923, the duration of the treaty was cut down from 20 years to 4. In March, 1924, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Iraq, and passed an organic law and an electoral law for the summoning of an electoral assembly. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and an elective Assembly chosen by the people.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of Mosul, Baghdad and Basra. At the Census of 1920 the population was ascertained to be 2,849,282, as under —

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378
Total	2,849,282

The Baghdad vilayet include the Baghdad, Samarra, Diyala, Kut, Diwaniyah, Hillah and Dulaim Divisions. Basra vilayet include Basra, Amara and Muntadik, and Mosul include Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of Assyria, the ruins of the Assyrian capital being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,304 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected, the Irrigation Department is at present confining itself to small and immediately remunerative schemes. The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, peas and Indian corn; wheat averages 45 lb. per acre, barley 62 lb., and rice over 1,000 lb. In 1928-29 there were 1,547,000 acres (deriving

their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The following table shows the approximate annual net revenue obtained by the Iraq Customs Administration during the years of British occupation —

1915-16	£114,839	1919-20	£1,388,233
1916-17	358,573	1920-21	1,426,288
1917-18	410,510	1921-22	1,622,232
1918-19	388,333	1922-23	1,412,935

The Euphrates (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzerum in the Dumlupinar Dagh. The Tigris has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains in Kurdistan, uniting at Til where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Koneh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, via Baghdad, a total length of 1,550 miles, with a single track of 4 ft 8½ in gauge. Its projected course was from Koneh to Adana thence S E to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Koneh-Erceh-Bulgurlu (124 miles) was opened in Oct 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation with caps in important sections (notably in the hills N W of Aleppo, and in the Mesopotamian desert W & S of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims' line from Medina (through Damascus and Hama to Aleppo) and if it is completed, the railway will be served by the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan 13, 1920. The total length of line open at that date was 925 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Harun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 170,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

CAPITAL, Baghdad

Baghdad is 840 miles by air from Cairo, Egypt. Official Mails between London and Baghdad are sent by fortnightly Air Mail Service via Cairo—Helopolis—Ramlah—Amman—Kasi Asrak—Ramadi, with a saving of about 14 days in transit over the normal service. A motor service runs twice weekly between Damascus and Baghdad.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benue, between Dahomey on the west and the Kameruns on the east. The Protectorate (Headquarters, Lagos) is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The area of the whole territory is about 336,000 sq. miles, and the population is estimated at 18,000,000.

By Order in Council of Nov. 1922 there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 26 official members, 3 elected members representing the municipal area of Lagos (J. Egerton Shynge, Eric C. Moore and Dr. C. C. Adeniyi Jones), 1 elected member representing Calabar (Atu Anomni) and 13 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides and skins, and the export of ground-nuts is steadily increasing. A considerable industry has arisen in connexion with tin-mining in the Northern Provinces. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation between Lagos and Kano, a distance of 705 miles. Branch lines run from Minna to Bano (on the Niger), and from Zaria to Bukuru. Another railway line runs from Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (150 miles) and on to Makurdi, on the River Benue (190 miles). Further railway extensions are in progress. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

land telegraphs to all important places.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambezi.

The population of the Protectorate is 1,200,000, including about 1,500 Europeans and 600 Asiatics, and it has a total area of 40,000 square miles.

The principal exports are cotton, tobacco, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of cotton and tobacco are considerable. Ivory and rubber are also exported in small quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindilo (the terminus of the Central Africa Railway) on the Zambezi (61 miles) was opened in 1915. The Trans-Zambezi Railway, from Beira to Muraça (on the southern bank of the Zambezi River) was opened in April, 1922; the terminus

is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Fort Johnston, on Lake Nyassa, is projected. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,500.

Mails to and from England are despatched every week via Cape Town and Beira. Between Beira and Europe the means of communication are the Union Castle Mail S.S. Co., Messrs. Rennie's Line via Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape *via* Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

The chief towns are Blantyre (population about 300 Europeans and 7,000 natives) and Zomba, the headquarters of the Government.

Revenue	1922-23	1923-24

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir Cecil Hunter Rodwell, K.C.M.G. £1,200

(In addition to £3,000 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific)

Secretary to High Commissioner and Registrar of the Court, (vacant) £600

Chief Judicial Commissioner, Sir A.K. Young 350

(In addition to £1,000 as C.J. of Fiji.)

(1) *The British Solomon Islands*, protected since 1893, consist of Guadalcanal, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 11,000 square miles, and a population, 1919, of 675 Europeans, 75 Asiatics, and about 150,000 natives. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899, and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1923-24 was £64,330, and the expenditure £52,656. Exports, 1923-24, £289,032, imports, £233,531. The seat of government is Tulagi.

Resident Commissioner, R.R. Kane, M.C. (and £150 allowance) £800 to 1,000

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them, and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 18° W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 6° 52' S. and long. 169° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles, population (1921), 264 Europeans, 348 Asiatics, and 29,285 Pacific Islanders. Revenue (1922-23), £44,473, expenditure, £51,808; imports (1922-23), £137,128, exports, £201,086. The Union of Tokelau Group, Fakaofu, Nukunono and Atau, were included in the Protectorate in 1909, and annexed to H.M. Dominions in Feb. 1916 as part of the Gilbert and Ellice Islands colony, including Christmas Island.

Panning Island, in lat. 3° 30' N., long. 150° 13' W., and Washington Island, 66 miles N.W. by W. of Panning Island. Pop. 21 Europeans in connexion with Pacific cable station, and about 400 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916.

Resident Commissioner, H.R. McClure

(and £100 allowance) £700 to 800

(3) *The Tonga or Friendly Islands*.—A protectorate over the Tonga Islands Kingdom was proclaimed May 19, 1900. These islands are situated in the southern Pacific to the E.S.E. of Fiji, and 300 miles therefrom, with an area of 385 square miles, and a population (1921) of 571 Europeans, 235 half-castes, 23,759 Tongans, and 370 others. Total 24,935. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Nukunono, on the island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tubou II in 1918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared owing to a tidal wave, in June, 1919. Revenue, 1923-24, £81,023, expenditure £61,796, imports (1923), £195,021, exports, £257,586. The total shipping entered and cleared in 1923 was 206,864 tons, of which 146,109 tons were British.

Agent and Consul, Islay Mcowan .. £800

(and duty allowance £200)

(4) *The Phoenix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phoenix, Canton, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. $25^{\circ} 3' 30''$ S., long. $130^{\circ} 8' 30''$ W. Pop. (April, 1907), 144. Descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported. *Deputy Commissioner*, Dr W. J. Williams (H.M. acting Consul for the Society Islands.) *Chief Magistrate*, Richard Edgar Christian.

(6) *The New Hebrides Group*, about 500 miles west of Fiji and 250 miles north-east of New Caledonia is under the administration of British and French officials as provided for by an Anglo-French Convention of 1906 and a protocol of 1914. Native pop. about 60,000. Principal products, copra, coffee, cotton, cocoa, maize, wool, sandalwood and shell. Joint revenue, 1923, 864,000 francs; expenditure 479,650 francs. Imports from Great Britain 1,664,972 francs, from France 4,798,749 francs, total exports 16,000,000 francs. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia, there is a three monthly service with France, via Panama.

British High Commissioner, Hon T. E. Fell (acting).

French High Commissioner, M. d'Auboussier.

British Resident Commissioner, G. B. Smith-Rewse. £940

French Resident Commissioner, M. de la Vassière. £1,200
President of Joint Court, H. H. T. Goeman-Borgesus (acting).

British Judge, R. S. de Vere.

French Judge, M. G. Sachon.

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judah (which forms the backbone of the district) and, on the E., the depression through which the Jordan winds its way from the Sea of Galilee (Tiberias) to the Dead Sea. The Dead Sea, 1,292 feet below the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet above mean sea level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (Oct. 3, 1922), of 757,182, of whom 590,800 are Muhammadans, 73,024 Christians, 83,794 Jews, and 9,474 members of other faiths. Since 1919 about 28,000 immigrants (mostly Jews) have settled in the country, in 1923 the Jewish immigrants came principally from Poland (28 per cent), Ukraine (13 per cent), Rumania (4 per cent), and Russia (23 per cent).

Palestine is divided into 3 administrative districts, under District Governors. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct., 1922, of 62,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Gaza (17,480), Acre (6,420), and Haifa (24,634).

The railway system of Palestine consists of five sections. *Rafa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara, *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandatory territory of Syria; *Jaffa-Lydda-Jerusalem*, *Rafa-Beersheba*, and *Nablus-Afula-Tulkaram*. The main junction of the Government Railways is at Lydda, the general offices being at Haifa.

The chief ports are Jaffa, Haifa and Acre. There are branches of the Anglo-Egyptian, Anglo-Palestine, Banco di Roma, Crédit Lyonnais, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. In 1923 there were 312 government schools and 2 training colleges, with a total of 668 teachers and 19,195 pupils.

	1925-1924.
Estimated revenue	£1,787,200
Estimated expenditure	1,783,400
Imports	4,935,300
Exports	1,554,400
Imports from U.K. (1922-23)	1,390,475
Exports to U.K. (1922-23)	226,639

Southern District (Gaza), A. Abramson, O.B.E.

RHODESIA.

The total area of Rhodesia is about 440,000 square miles and the total population is 1,882,726 (1922). The territory is named after Cecil Rhodes, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south.

SOUTHERN RHODESIA

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambezi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N., the Transvaal and Bechuanaland on the S and W., and Portuguese East Africa on the E. The total area is 149,000 square miles, and the population (1922) 899,187, of whom 33,620 are Europeans. The native population is 862,319, with 3,248 Asiatics and other coloured persons, including those of mixed race.

Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor, appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, *via* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (302 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portu-

gnese), a total distance of 374 miles. The section from Bulawayo *via* the Waukie coalfields to the Victoria Falls (282 miles) was completed in June, 1904. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (78 miles), and has been extended to Sinona (4 miles). A standard-gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (73 miles). A line connects Gwelo with Selukwe (24 miles), another runs from Bulawayo *via* Gwanda to West Nicholson (104 miles), opening up the mining district to the south-east, another connects Bulawayo with the Matopo Hills, where the founder of Rhodesia and Sir Starr Jameson are buried, and a branch line from Gwelo to Unyama has been extended to Fort Victoria (123 miles). The African Transcontinental Telegraph Line ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 3,250 miles from the Cape.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1923, was of the value of £57,500,000. The output for the year ended December 31, 1923, was valued at £4,300,652. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. Cattle (1,921,000 on Dec. 31, 1923) thrive well, and the annual show at Bulawayo is regarded as the premier show of beef cattle in South Africa. Land is cheap and may be had on favourable terms.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided, in 25 public and 50 farm schools, and in 80 aided private schools, and in 7 Government high schools and 4 aided secondary schools. The European pupils in 1924 numbered 6,600, of whom 1,700 were boarders. There is an agricultural and technical school in the Matopos district, with a farm attached (3,000 acres). There are six schools for children of mixed race, with 360 pupils, and native education conducted by mission agencies with Government aid, is provided in 1,100 schools, with 70,000 pupils. Grants in aid of native education in 1923 amounted to £19,400, the total educational expenditure being £222,000 in 1923.

	1922-23	1923-24.

SALISBURY, the seat of government, is situated on the Mashonaland plateau, 4,880 ft above sea-level (white population, census, 1921, 5,134). BULAWAYO, the largest town in Matabeleland, 4,460 ft above the sea-level, had a white population of 7,462 (1921). Other centres are Victoria, Umtali, Gwelo, Enkeldoorn, Melsetter, Hartley, Selukwe, Gwanda and Gatooma.

NORTHERN RHODESIA

Northern Rhodesia lies to the North of the Zambesi, its political neighbours being Tanganyika and the Belgian Congo on the north, Nyasaland on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 202,000 square miles, and with the exception of the Luangwa, Zambesi and Kafue Valleys the altitude exceeds 4,000 feet. The permanent European population in 1923 was 3,750, the native population is estimated at about 1,000,000. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 1,000,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, cotton, fibre, wheat, oil seeds, and citrus. Stock raising is carried on by many farmers. The native owned cattle in the territory is estimated at 400,000, and European-owned 74,000. Extensive mineral deposits have been discovered, lead and copper predominating. Gold, zinc and coal are also present. In the year 1923, 12,353 tons of lead were mined, valued at the mine-head at £386,967. Many species of game are to be found, and good sport at a moderate cost is available for the big game hunter. The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambesi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 37 post offices, 11 of which are money order offices. A telegraph line exists alongside the railway line throughout its whole length in the territory. The African Trans-Continental Telegraph system extends to Abercorn and Fort Jameson in the north-east. The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 13 members, with a majority of official members. The seat of Government is at Livingstone on the Zambesi.

The country is divided into ten magisterial districts for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Kasama, Fort Rosebery, Ndola and Mongu-Lealui.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S of the Equator, 760 S W of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S America and 4,477 from Southampton, in 15° 55' S lat and 5° 42' W long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1912) of 3,350. St Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trade" keeps the temperature mild and equable. The thermometer goes up to 84° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 52°, and the total rainfall (1922) 45.8 inches. St Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on

May 21, 1502 (St Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circa* 1645. The English East India Company seized it in 1651, but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II, until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phumum (flax fibre) and lace-making industry have been established. St James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension, an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,800 feet, situated 7° 55' 55" S lat., and 14° 25' 5" W long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St Helena, and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay then eggs in the sand. The sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month. *Resident Magistrate*, W. Haining.

The government of St Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a State on the north-west coast of the island of Borneo, with a seaboard of 400 miles, an area of about 42,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkaug, and Batang-Lupar mountains, the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Sarawak (navigable for about 200 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 50, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. The country produces sago, gutta-percha, india-rubber, beeswax, illipe nuts, birds'-nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice,

rattans, coal, gambier, and pepper. A large petroleum field has been discovered at Miri and Bekong, in the Baram district, and is now a valuable asset, oil exports (1923) 511,438 tons.

CHIEF TOWN, Kuching Population (1921), 30,000. Distance from London, 8,700 miles, transit, 25 to 30 days. There are 9 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday in normal times, a temporary service being now maintained 3 times a month. There is also direct communication with Sibü and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. By letters patent of Sept 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 156 square miles, of which Mahé occupies nearly 56 square miles. The population was estimated (Dec 31, 1923) at 25,700, an increase of 1,177 since the Census of 1921, when the total was 24,523 (Mahé 19,426, Praslin 1,999, La Digue 1,302, other islands 1,795). Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, it is an Admiralty coaling station. Although only 4° 8' of the Equator, the islands are healthy, the death-rate in 1923 being 11.79 per 1,000, the lowest yet recorded in the islands. There are 19 Roman Catholic and Church of England primary schools, there are also 2 secondary schools.

The principal exports are copra, vanilla, coconuts, coconut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (2 *ex-officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles. In 1921 its population was 85,163, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N lat., and the extreme breadth from east to west is 180 miles, between 10° 40' and 13° 21' of W long. Its estimated area is 27,000 sq miles, and its population about 1,456,148. For administrative purposes it is divided into 3 Provinces, under Provincial Commissioners, assisted by 14 District (and 10 Assistant District) Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, and palm oil, but ginger, piassava, hides, and rice are also exported. The value of the palm kernels exported in 1923 reached £968,797. The chief imports are cotton goods, opal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 104 miles in length extends in a north-easterly direction from Roia to Kamabai. By the extension of the railway and the development of a system of roads in the Protectorate, it is estimated that the output of Sierra Leone products into the European market is capable of being more than doubled. There are 827 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND

(The Somaliland Protectorate)

In 1884 a Protectorate was declared over part of Somaliland, a region where the coast is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 344,000. The boundaries are defined by treaties with Abyssinia, France and Italy. The northern coast as far as 49° E and the 8th parallel of N. latitude are the limits on the north and south. The Protectorate garrison is now confined to a Camel Corps, 400 strong, the Dervish power having been finally broken in 1920. The chief products of Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, The Earl of Athlone, G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C. (also receives £10,000 as Governor-General of the Union of South Africa) £3,000
 Imperial Secretary and Accountant, Capt. Hon. B. E. H. Clifford, C.M.G., M.V.O. 1,700
 Asst. Imperial Secretary and Chief Clerk, Shiley Eales, O.B.E. 1,000

The High Commission—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner, by a similar Commission issued in 1905 in Lord Selborne, since 1910 it has been vested by a separate commission in the successive Governor-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland. He exercises in the Colony of Southern Rhodesia certain powers and functions in regard to native administration which were granted or reserved to him by the Southern Rhodesia Constitution Letters Patent, 1923, and under the Letters Patent, the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect.

BASUTOLAND

(The Territory of Basutoland)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,726 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, income tax on Europeans, Post-office, and licences. Tele-

graph offices have been opened at Leribe, Maseru, Teyateyaneng, Mochija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 522 native schools, with over 28,400 native scholars on the roll, a large proportion being in the schools of the French Protestant Mission, there are also 8 white schools, with 133 pupils. The amount spent on education in 1923-24 was £34,812. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

Maseru is distant from London 7,668 miles, transit, through the Cape, about 20 days.

BECHUANALAND

(The Bechuanaland Protectorate)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces, of the Union, on the north and north east by Rhodesia, Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles, the *Caprivi Zipelet* was attached to the Protectorate for administrative purposes by Proclamation (1922). The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kafir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 226,344 at the Census of 1921. Much of the country is thick bush. The

High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Sekgoma (Baniangwato), of Lushwe (Bakgata), of Sebele II (Bakwena), of Tshosha (Bangwaketse), of Seloko, Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, via Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lohatsi, Gaberones, Francistown, and Senowe, whither the late Chief (Khama) and all his people moved in 1901 from Palmyre. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

	1921-22	1922-23	1923-24

SWAZILAND

(The Swaziland Protectorate)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). The total area is 6,678 square miles, and the population (1921) 112,951, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet, the Middle Veld, about 2,000 feet lower, and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the

Resident Commissioner The Paramount Chief is Sobhuza, son of the late Paramount Chief Bunu.

The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 230,000 head of cattle in the Territory at the end of March, 1924.

In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the sub-tropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended Dec. 31, 1923, 151 tons of cassiterite tin, valued at £20,240, were exported, a few gold mines were being worked on a small scale.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremeisdorp, the old head quarters of the Territory. There are fifteen schools for Europeans at various centres, and the Government has established a school for natives at Zombode. There are two schools for coloured children. Giants are also made to the various native missions for educational purposes.

There is bi-weekly communication by motor-car between Mbabane and Carolina (82 miles) and between Mbabane and Bremeisdorp (23 miles), and between Piet Retief and Hlatikulu (50 miles). Elsewhere the communication is by cart or runners. There are 14 post offices, and telegraph and telephone offices at Mbabane, Pigg's Peak, Bremeisdorp, Ezulweni, Hlatikulu, Mahamba, and Dwaleni.

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N lat., to the northern boundary of Uganda, 3° 36' N lat., and reaches from the French Sahara about 18° 15' E (at 22° N) to the north-west boundary of Eritrea (Italian) in 38° 30' E, (at 18° N). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,800 miles. The northern boundary is the 22nd parallel of North latitude, on the east lie the Red Sea, Eritrea and Abyssinia, on the south lie the British Protectorate of Uganda and the Belgian Congo, and on the west French Equatorial Africa. The total area is about 1,024,600 sq. miles, with a population of about 6,000,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The

Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The Lado enclave, which had been leased to Leopold II., King of the Belgians, reverted at his death to the Sudan administration, and now forms part of Mongalla. The total area of the enclave is estimated at 15,000 sq. miles with a Negro population of about 250,000. The Gambela enclave (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post.

Hydrography.—The Nile enters the plains of Lado, in the Mongalla Province of the Sudan, as the *Bahr el Jebel*. At Lake No the stream effects a confluence with the *Bahr el Ghazal*, from the South-west, and further east with the *Sobat*, from the south-western highlands of Abyssinia. From the Junction with the *Bahr el Ghazal* the stream is known as the *Bahr el Abiad* or *White Nile*. At Khartoum, 535 miles N of the Sobat confluence, the river is reinforced by the *Bahr el Azrak*, or *Blue Nile*, from the south-east, and near El Damer, 200 miles further north, by a confluence with the *Athara*, from Abyssinia. Thence the river flows north-west to Abu Hamed, and makes a great south-westerly bend, across the Nubian Desert, before resuming its northward course through Dongola to the northern frontier at Wadi Halfa. From the *Athara* confluence to the Mediterranean the Nile has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. From the Ripon Falls (on the northern shore of Victoria Nyanza) to Rosetta (on the Mediterranean) the length of the waterway is stated to be 3,475 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan.

Government.—After the reconquest of the Sudan an Agreement, signed on Jan. 19, 1899, between Egypt and Great Britain, defined the boundary between Egypt and the Sudan, and provided for its administration. The Sudan is administered by a Governor-General, aided, since 1920, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *via* the Red Sea ports may not exceed those levied in Egypt. The import and export of slaves is prohibited.

Local Administration.—The Sudan is divided into 15 provinces (*mudiyas*) under governors (*mudis*), under whom are British District Commissioners in charge of two or more districts (*manamias*), a Soudanese or Egyptian official is in charge of each *manamia*.

Legal System.—*Civil Justice* is administered by a Chief Justice and four other judges of High Court of Justice at Khartoum, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court. The system of the law administered is

"justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Malikama) Court at Khartoum presided over by the Grand Kadi. The Kadis are all either Egyptians or natives of the Sudan.

Criminal Justice is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to whom also appeals lie. The Sudan Penal Code is an adaptation of the Indian Penal Code, and the Code of Criminal Procedure is based partly on the Indian Code of Criminal Procedure and partly on the procedure of Courts Martial. Certain Nomad Chiefs have petty Civil and Criminal jurisdiction and courts of Native Chiefs have been instituted in the Southern Provinces.

Defence—All Sudanese and Arab troops of the Egyptian Army are stationed in the Sudan, together with some Egyptian units. A small garrison of British troops is quartered at Khartoum under the command of the Governor-General. The *Police* are locally enlisted, and are under Provincial administration.

Education—In addition to *kuttabhs* (vernacular schools) there are 8 primary schools at Khartoum, Omdurman, Wad Medani, El Obeid, Suakin, Atbara, Halfa, and Rufaa where instruction is given in English as well as Arabic, attended by about 1,200 pupils. A secondary school at Khartoum (Gordon College), and a training college (also at Gordon College), and technical trade schools at Khartoum and Omdurman. The central authority is the Education Department.

Production—The Sudan is the chief source of the world's supply of gum and ivory, 22,425 tons of gum were exported in 1923. The Gezira Irrigation Scheme (by means of the Sennar Dam on the Blue Nile at Makwar, about 170 miles south of Khartoum) will enable 100,000 acres to be put under cotton every year. Cotton area 1923-24, 61,588 acres, crop 1923-24 estimated at 184,000 kantars of 335 rotules, mainly from Tokar, 70,000 kantars, Blue Nile Province, 74,000 from irrigated land and 10,000 from rainfall, Kassala, 10,000, and Berber and Dongola Provinces, 16,000 kantars. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, salt, and gold. The principal grain crops are *dura* (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bul-

rush millet). Average annual yield of *dura* in the principal *dura*-growing areas (Blue Nile, The Fung, White Nile, and Kassala Provinces) 1919-1923, 278,000 tons. The cattle and sheep trade of the Sudan is capable of great development. For some years Egypt has depended to a great extent on the Sudan for its meat supply. The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. On the White Nile the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, the rubber creeper, and the sudd in the upper reaches are composed of an inexhaustible quantity of papyrus. The finest gum forests are in Kordofan, and the best rubber in the Bahi-el-Ghazal. Gold is being successfully exploited in the Sudan, a mine being worked at Gabati in the Red Sea Province. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country and considerable quantities are exported annually to Abyssinia. The output of these salt fields is capable of great expansion. (Note—Oneottle= approximately 99 lb.)

Transport—In 1924 there were 1,716 miles of railways open for traffic. A bridge has been constructed over the Blue Nile at Khartoum, and the railway runs to El Obeid, the chief town of Kordofan Province, crossing the White Nile by another bridge near Hillet Abbas. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. The new line to Kassala, 216 miles in length, connects with the Red Sea line at Italiya Junction, 126 miles W of Port Sudan. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahi-el-Ghazal, and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 4,353 miles in 1920. There are 65 stationary and 11 travelling Post and Telegraph offices, and 11 wireless telegraphy offices.

Finance—The revenue is derived mainly from land tax, annual tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadans, a cathedral, and the Gordon College, with extensive government buildings. Population about 23,000. Opposite Khartoum, on the Blue Nile is Khartoum North (16,000), and on the White Nile is Omdurman (60,000), the former Mahdist capital. Other towns are Berber, El Dameri, Atbara, Abu Hamed, Merow, Dongola, Wadi Halfa, Port Sudan, Sukum, Sinkat, Kassala, Kamilu, Sennar, Singa, Makwa, Wad Medani, Roseneh, Gallabat, Gedaref, El Obeidi, El Duenim, El Fasher (Darfur), Kodok, Mongalla, Kosti and Rejaf.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY, formerly "German East Africa," was attacked by British and South African forces and conquered in 1918, the German forces surrendering near Abercorn in North-east Rhodesia on Nov. 23, 1918. Civil Administration was established *pari passu* with the conquest of the territory, and the whole Colony passed under the effective control of the present Administration at the beginning of 1919.

Tanganyika Territory has a coast-line of about 500 miles and an estimated area of 365,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (Jan. 1, 1913) at 7,659,898, the coloured population (other than native) being 14,898. The thickly populated provinces

of Ruanda and Urundi are now under Belgian administration, so that the native population of Tanganyika Territory is about 4,507,000. The total white population is 2,447. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education is not compulsory, but considerable progress has been made with the reorganization of a system suitable to the needs of the natives. In 1923 there were 65 Government schools, 1,455 Roman Catholic schools, and 737 Protestant schools, with a total roll exceeding 119,500 pupils. There are also three schools for the children of Dutch settlers in the Arusha district, but no other schools for European children have yet been established.

The total area under forests is about 2,700,000 acres, of which about 2,170,000 are included in the Government Forest Reserves. There are a number of plantations of coco-palms, coffee (on the higher lands), ground nuts, castor-oil, sugar, cotton, cardamom and cinchona, while fibre plants (especially sisal) are successfully cultivated. In 1921 there were 3,147,442 cattle, and 3,405,103 sheep and goats in the Territory. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt. Agates, topaz, moon-stones, tourmalin, and quartz crystals are found, and garnets in large quantities.

The chief exports in 1924 were Sisal, cotton, hides, skins, copra, coffee, ground nuts, ghee and grain. The chief imports in 1924 were cotton piece goods, foodstuffs, kerosene, cigarettes, tobacco, spirits, wines and beer.

	1922-23	1924-25
Estimated Revenue	£1,200,474	£1,324,670
Estimated Expenditure	2,009,474	1,952,280
	1922	1923
Imports	£1,386,212	£1,733,229
Exports	1,441,584	1,799,038

The chief seaports are Dar-es-Salaam, Tanga, Bagamoyo, Pangani, Kilwa, Lindi and Mikindani, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. There are three railway lines in the Territory—the Tanga railway from Tanga to Moshi (219 miles), commenced in 1905 and completed in Feb., 1912, the Central railway (772 miles), from Dar-es-Salaam to Kigoma (completed in Feb., 1914), and the Voi-Kake Railway from Moshi to Voi (52 miles) on the Uganda Railway. Dar-es-Salaam is in telegraphic communication with the coast towns, Zanzibar, Mombasa, and many inland centres. There are 75 post offices and telegraph stations. Two Battalions of the King's African Rifles are stationed in Tanganyika Territory.

In 1923, 417 steamers (exclusive of coastal boats) of 957,934 tons and 2,638 vessels (dhows) of 125,674 tons entered the various coast ports from places beyond the Territory.

TOGOLAND.

(Joint Franco-British Administration.)

The former German colony of Togoland was conquered by Franco-British forces during the war of 1914-18, and its administration has been entrusted to France and Great Britain jointly by the Supreme Council of the Allied Powers.

Togoland is situated on the Gulf of Guinea between the Gold Coast (British) and Dahomey (French), and is bounded on the south by the Atlantic and on the north by (French) Upper Senegal-Niger, and lies between $0^{\circ} 15' W$ — $2^{\circ} E$ long and $6^{\circ} 10' N$ lat. at its extreme limits, the coast line being only 28 miles in extent ($1^{\circ} 14' 1' 38' E$ long.)

In 1920 the whole territory was divided into a British Sphere and a French Sphere.

The British Sphere consists of an area of about 13,040 sq. miles with an estimated population of 187,940. No portion of the coast is included in the British area. The mandated sphere is administered by the Government of the Gold Coast, and the revenue and expenditure are included in the totals for the Gold Coast. A trade school has been established by the administration at Yendi.

TRINIDAD AND TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between $10^{\circ} 3' 10''$ — $10^{\circ} 50' N$ lat and $60^{\circ} 55' 61''$ — $56' W$ long, and is about 60 miles in length by 54 in breadth, with an area of 1,866 square miles (541,682 acres cultivated), and a population at the Census of 1921 of 365,913 (including Tobago). The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 62,564), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 11,005), about 30 miles south of the capital, Princetown (pop. 5,132), and Arima (pop. 4,347). A remarkable phenomenon

is the asphalt lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply, in 1923, 168,260 tons (£377,814) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1923) were cocoa £1,419,499, sugar £1,113,319, petroleum £1,238,460, and coconuts £47,539. Coal is found in Manzanilla, and is indicated in other parts of the island. The petroleum industry has made considerable advance, boring operations being carried on by 16 different companies. There are 124 miles of railway open, electric lighting and tramway service, and waterworks and sewage operations have been established. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara, Guayaquil, Martinique, St. Thomas, &c. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

	1921	1922	1923
Revenue	£1,867,944	£1,661,607	£1,633,552

Exports	5,193,976	4,229,403	4,785,594

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between $11^{\circ} 9' N$ lat and $60^{\circ} 43' W$ long, about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados, is 26 miles long, and from 6 to $7\frac{1}{2}$ broad, and has an area of 114 square miles, with a population (Census 1921) of 23,390. It is one of the most healthy of the West Indies, the temperature varies from 81° to 88° . There are two towns in the island, viz., Scarborough (pop. 1,463) and Plymouth (pop. 430).

TRISTAN DA CUNHA.

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S and long. 12° 2' W, discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

Resident Chaplain, Rev. H. M. Rogers, M.A.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length, the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{2}$ m wide, and rises in two peaks, 960 and 1,105 ft above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (of Diego Alvarez), in 40° 20' S and 9° 44' W, lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

TURKS AND CAICOS ISLANDS

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1893 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles. The population in 1921 was 5,612, of which the principal island, Grand Turk, contains 1,568. Salt is the principal industry of the islands, and Sisal hemp and sponges are exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica

has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

UGANDA.

(The Uganda Protectorate)

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows—On the north, the Uganda-Sudan boundary, on the east, a line drawn down the middle of Lake Rudolf, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria, on the south, by Tanganyika Territory (late German East Africa), and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert the whole of Lake Kioga, the whole of Lake Salisbury, part of Lake Rudolf, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 110,300 square miles, including 16,377 square miles of water.

For administrative purposes, the Protectorate is divided into 5 Provinces—

(1) *Eastern Province*, comprising the districts of Busoga, Bugweni, Bugisla, Budama, Teso, Lango, and Karamoja.

(2) *Rudolf Province*, comprising the districts of Turkwel, Turkana, and Dabossa (this province, at present, only partially administered, and arrangements for its transfer to the administration of Kenya Colony are in progress).

(3) *Northern Province*, comprising the districts of Buoyoro, Gulu, Chua, and West Nile.

(4) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(5) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubendi, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts, but the work of repopulating these islands has been taken in hand as a result of experiments, and natives and then cattle are being repatriated.

With the exception of the Rudolf Province the whole Protectorate is now under direct administration, but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a *Kabaka* (H.H. Daudi Chwa, grandson of the celebrated

Mutesa He is assisted in the government by three native ministers and a *Lukiko*, or native assembly. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by native "Kings"), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to higher courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor who (with the assistance of the Executive and Legislative Councils), makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyassaland and Zanzibar. In 1923 there were 3,509 criminal cases tried. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan 1922. The former consists of 4 appointed members and the latter includes the former, with 2 unofficial members, and is presided over by the Governor.

The total population of Uganda (December 1923) is given as 3,127,455, composed as follows: Natives, 3,119,645, Asiatics, 6,522, Europeans, 1,289 (including 422 females). Among the natives approximately 640,000 belong to the intelligent, civilised Baganda, a race converted to Christianity by British and French missionaries. Educational work is undertaken by the various Missionary Societies, who receive grants amounting (1923) to £11,986 towards scholarships, &c., for students and teachers. About 1,700,000 natives speak Bantu languages, there are a few Congo pygmies living near the Semliki river, the rest of the natives belong to the Masai, Nilotic, and Sudanese groups.

In 1923 total exports, £2,393,678, the import figures are now merged in those of Kenya. The export trade is mainly in cotton (£2,026,822), coffee, chillies, oil-seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

	1922	1923.
Revenue ..	£820,365	£999,750
Expenditure (excl loans)	920,228	938,999

In 1923 the poll-tax amounted to £401,000 and Customs to £272,000.

The headquarters of the British administration is at ENTEBBE, the native capital of Buganda is at MENDO (Kampala). Nile steamers ply to Rejaf, which is about eight days' march from Nimule, the Sudan port of the Lake Albert Marine Service. A regular steamer service is maintained by the *Uganda Railway Administration* between Kisumu, the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine*, which, with the *Busoga Railway*, is controlled by the *Uganda Railway*, deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft ply on Lake Albert and the Nile between Butiaba, Nimule and Belgian port of Kasenye at the south of Lake Albert. The *Busoga Railway*, of the same gauge as the *Uganda Railway*, 62 miles in length, runs

from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga, connecting that lake with Lake Victoria. A railway is to be built from Mbula-muti (on the Jinja-Namasagali Railway) to join up with the *Uganda Railway* via Tororo, Turbo and Eldoret. There is a railway from Port Bell to Kampala, 7½ miles in length. There is a fleet of Government motor vans. The length of telegraph line in the Protectorate is (1923) 1,188 miles, with 25 telegraph offices.

WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37°30' N., longitude 122°10' E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 20 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1921 of 154,416, in which are included about 300 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 122°40'—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the ports of Shanghai, Hong Kong, Chefoo, and Tientsin.

Administrator, W. Russell Brown.
Judge of the High Court, Hiram Parkes Wilkinson.
Crown Advocate, Allan G. Mossop.

* Members of Executive Council

Sensor District Officer and Magistrate, S. Wyatt-Smith.

Junior District Officer and Magistrate, A. A. L. Tison.

Senior Medical Officer, M. C. Cooper, M.C.

Financial Secretary, W. R. Haller.

Inspectors of Police, A. Whittaker, F. Forcey, G. H. Jennings.

WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands, but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir

Frederick Peyton James, K.B.E., C.M.G.

(1924) £2,500

Secretary, C. N. Rice £400 to 500

Auditor, M. I. Flanagan £500 to 600

GRENADA

(AND THE GRENADINES)

Grenada is situated between the parallels of 12° 30'–12° 58' N lat and 61° 20'–61° 35' W long, and is about 21 miles in length and 12 miles in breadth, it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres, population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1922	1921
Public revenue	£103,414	£103,823
Expenditure	117,849	113,095
Public debt	223,670	223,670
Total imports	266,452	284,706
Total exports	271,392	257,728

Colonial Sec., Herbert Ferguson, C.B.E. £840

Treasurer, H. W. Shaibe £500 to 600

Chief Justice, G. O'D. Walton 1,100

Attorney-General, N. J. Paterson, K.C. 800

Colonial Surgeon (vacant) 800

Magistrates, T. M. Commission, W. Dist.;

T. W. S. Garraway, Esq. Dist., each £500.

H. Allan Otway, District Commr. of

Carriacou, (and quarters) £350 to 420

Postmaster, C. L. Wilson £350 to 420

Chief of Police, Maj. O. C. Heidenstam

(and quarters) £420 to 500

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N lat and 60° 58' W long, at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles with a population (Dec. 31, 1923) of 53,847. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1923) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, logwood, molasses and syrup. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 2,480).

Port Castries, one of the finest in the W. I., is a coaling depot. In 1923, 246 steamers (tonnage 505,284) entered Port Castries.

	1921	1922	1923

Ion G. Wakeley, M.C. 300

ST. VINCENT,

an island about 95 miles west of Barbados, situated in 13° 10' N lat and 60° 57' W long, is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAPITAL, Kingstown. Population (1921) 3,836.

WRANGEL ISLAND.

Wrangel Island (or Long's Island), in the Arctic Ocean off the N.E. coast of Siberia, was discovered by James Long in 1849, and was occupied by shipwrecked members of Stefansson's Arctic expedition in 1914. On Sept. 21, 1921, the British flag was hoisted on the island by an expedition despatched to the island by Stefansson, the annexation being notified to the Government of the Dominion of Canada on March 17, 1922. A relief expedition was dispatched to the island in 1923, but the party left on the island is assumed to have perished. The Russian government vessel Krasny Oktiabr is reported to have hoisted the Russian flag on the island on Aug. 20, 1924. The island is the resort of polar bears, and its highest point is Berry Peak (2,300 ft.), in the centre of an arctic plain.

ZANZIBAR.

(The Zanzibar Protectorate.)

Sultan, H H Seyyid Khalifa bin Haub, K C M G, K B F, succeeded his brother-in-law, Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tughli Bay and north as War-sheikh, but since the cession of the coast-line from Ruwma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa. The Zanzibar dominions on the mainland are under the administration of H M Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £1,127,000 in 1923) and produce quantities of copra (exports in 1923 £327,000). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed.

Of late years the importance of Zanzibar as a port of transhipment and distributing centre has largely decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island, in spite of losing the main transhipment trade, will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, hardware, petroleum and piece-goods, the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1921) was 216,790, the area of the former 640 square miles, and of the latter 380 square miles.

The number of ocean-going steamers which entered the port in 1923 was—British 158, Italian 25, French 56, Norwegian 2, others 35, the total tonnage being 859,941, and 5,042 dhows (95,863 tons) entered the port in 1923.

Trade of the Port of Zanzibar in 1923 —

BIRTH RATES AT HOME AND ABROAD.

The birth-rate in England and Wales for 1921, at 22 4 per 1,000 persons living, was the lowest recorded (except for the war years 1915-19), since civil registration was instituted in 1837. The death-rate was 12 1 per 1,000, and the excess of births over deaths, or natural increase, was 390,185, or 10 3 per 1,000 of the population.

The records from the British Dominions show wide variations in birth, death, and marriage rates. The highest birth-rate was 30 3 in Manitoba and the lowest 20 3 in British Columbia. Below are the aggregate figures for the principal Dominions.—

	Population.	Birth Rate.	Death Rate.	Marriage Rate.
Australia	5,455,426	24 25	9 91	17 18
Canada	6,417,000	26 02	10 06	15 08
New Zealand	1,223,901	23 24	8 73	17 38
South Africa	1,526,468	26 33	11 07	16 50

BIRTHS AND DEATHS

The annual compilation of mortality statistics for that part of the United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40.5 per cent of the total population, and in 1921 82.2 per cent. The birth registration area was established in 1915. It included at that time 31.1 per cent of the total population, and in 1921, 65.3 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1915 to 1921—

CALENDAR YEAR	BIRTHS *		DEATHS *	
	Number	Rate per 1,000	Number	Rate per 1,000
1915	776,304	25.1	909,155	13.6
1916	818,983	25.0	1,001,921	14.0
1917	1,353,792	24.7	1,068,922	14.3
1918	1,363,649	24.6	1,471,307	18.1
1919	1,373,438	22.3	1,096,436	12.9
1920	1,508,874	23.7	1,122,558	13.1
1921	1,714,281	24.3	1,032,009	11.6

* Exclusive of still-births.

IMMIGRATION

From 1820 to 1920, 33,630,104 alien immigrants landed in the United States, the arrivals in 1917 being 1,197,892, and those from 1918 onward being (1918) 116,618, (1919) 141,132, (1920) 430,001

MARRIAGE AND DIVORCE

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are qualifying offences.

YEAR	MARRIAGES		DIVORCES GRANTED	
	Total	To Wife	To Husband	Total
1905	804,787	45,756	22,220	67,976

PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25° – 49° North and longitude 67° – 124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah, of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles, to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads, west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut, and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminium, the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

HISTORY.

Early Colonisation.—A natural factor, the great expanse of ocean which divides the American continent from Asia, has saved America from Asiatic domination, and it required many centuries of progress before the European adventurer dared to attempt the passage of the narrower Atlantic. The aboriginal inhabitants were comparatively few in number, and being generally backward in development, except in Mexico, have left few permanent traces of their presence.

Although Columbus discovered America in the 15th century (Oct. 12, 1492), American history may be said to commence with the colonising expeditions from Europe in the 16th and 17th centuries. No definite European settlement was attempted until the last quarter of the 16th century, when England, Holland, Sweden, France, and Spain made determined efforts to bring into account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount

influence, through their natural aptitude for colonisation, which continues to distinguish that race (and in a greater degree the Scots) amongst the nations of Europe. In the 17th century a chartered company founded *Jamestown* (1607), and many Royalist settlements were established in the district which had been named *Virginia*, after Queen Elizabeth, in the previous century. But step by step with the Church and Royalist foundations in the South a similar series of Puritan and Separatist centres was established in the North. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire and other east coast English towns, and *New England* became rapidly prosperous. Between these two settlements the Dutch had established themselves in *New Netherlands* (1621), and the Swedes in *New Sweden* (1638). Other English foundations were *Maryland* (1632), *Carolina* (1663), *New York* (1664), *New Jersey* (1665), and *Pennsylvania* (1681). From that date Continental enterprise may be said to have ceased for half a century, and *Georgia* (1732) was the last of the English settlements.

Anglo-French Wars.—A continuous struggle was waged between the English and French settlements in America, but until the War of 1754-1763 little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. It secured the possession of the Pacific coast for the inhabitants of the Atlantic slope, and roused the interests of the British Government in the possibilities of its American colonies. The Home Government endeavoured to recover from the colonies part of the cost of the war by which their existence had been secured, but "taxation without representation" was bitterly resented. In December, 1773, some English ships laden with tea arrived in the harbour of Boston, where a non-importation agreement was strictly enforced. A band of colonists, disguised as Indians, boarded the vessels and threw their contents into the sea. This *Boston Tea Party* of December 16, 1773, remains as an outstanding incident in the quarrel between America and Great Britain.

The War of Independence.—In spite of the counsels of Chatham, the King persisted in repressive measures. The colonists resisted in arms, and bloodshed ensued at the first engagement at *Lexington*, April 19, 1775, and continued until the *Capitulation of Yorktown*, October 19, 1781, when *Lord Cornwallis* surrendered with the whole of his forces to *General Washington*. When peace was concluded between America and Great Britain (Sept. 3, 1783), no vestige of territory over which the dispute had raged remained under British rule.

The Declaration of Independence.—On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence. "We, the representatives of the United States of America, in Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, solemnly publish and declare that these United Colonies are, and of right ought to be Free and Independent States." This Declaration was at length acknowledged by Great Britain, and the United States of America from this beginning has become one of the greatest Powers of the world. The Declaration of Independence was followed by the framing of a *Constitution*, which was ratified in 1787 to 1790 by the 13 *Original States* (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). This Constitution established a legislature of two houses, and vested the executive power in an elective President, and on April 30, 1789, *George Washington* entered office as the first of a line of Presidents of the United States of America.

War of 1812.—The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connexion with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost invariably victorious on the sea. A land engagement at *Chateaugay* on October 26, 1813, gained lasting glory for the troops of Canada, and earlier in the same year—June 1, 1813—a duel at sea between the *Chesapeake* and the *Shannon* did much to restore the prestige of the British Navy. Peace was concluded by the *Treaty of Ghent* on December 24, 1814, after a purposeless war, which Canada alone has reason to remember with satisfaction.

* On April 30, 1829, the Raleigh (N.C.) Register published the following document, said to have been adopted by the Committee of Mecklenburg County, North Carolina, on May 20, 1775, the day after the receipt of the news of the battle of Lexington. "In the third session of the Second Continental Congress, Richard Henry Lee proposed, and John Adams, of Massachusetts, seconded, a resolution declaring the United Colonies free and independent States, and Thomas Jefferson, John Adams, Roger Sherman, and Robert Livingston were appointed a committee to draw up a Declaration of Independence. This famous document, composed almost entirely by Jefferson, was adopted unanimously on July 4, 1776."

The Gold Rush.—In 1846 a dispute arose between the United States and Mexico in connexion with the boundaries of *Texas*, recently (1845) admitted as a State of the Union, and after hostilities of several months the war ended in the *Treaty of Guadalupe Hidalgo* (1847). Under this treaty Mexico surrendered the disputed portions of *Texas* and *New Mexico*, part of *Arizona*, and *California*. In 1848 a great rush of goldseekers entered the newly acquired territory, which remains the principal gold-producing State of the Union.

The Civil War.—Among the industrial classes of America in 1860 nearly 4,000,000 were negro slaves, descendants of those planted in the Colonies by Britain. The question of their emancipation led to a bitter dispute between the Northern and Southern States of America, the latter seceding from the Union in 1861. Two years earlier *John Brown*, an advocate of emancipation, had embittered the relations between the North and South by a raid upon the Government arsenal of *Harper's Ferry*, which he captured and held until forced to surrender; and although he was hanged by the State of Virginia his object was eventually achieved by President Lincoln's *Emancipation Proclamation* of January 1, 1863. The *Secession of the Southern States* was followed by hostilities, which included many pitched battles, fought with astounding tenacity and prolific slaughter on both sides. Hostilities ceased soon after the surrender of *General Lee* at *Appomattox* on April 9, 1865, and the bitterness engendered by the war was buried in a lasting peace. By a careless observance of the Foreign Enlistment Act, Britain permitted the departure from Liverpool of the *Alabama*, which committed depredations upon United States shipping, and was also guilty of other acts of negligence, for which, under the *Treaty of Washington*, May 8, 1871, Britain was called upon to pay £3,250,000 damages to the United States. In the four years' war the Confederate (Southern) States lost over 200,000 men by death and disease, while the victorious Federal (Northern) States lost close on 350,000 from the same causes.

War with Spain.—The continuous misgovernment of the neighbouring island of *Cuba* brought America into conflict with Spain in 1898. A succession of revolts, which the Spanish forces were unable to suppress, left *Cuba* the prey to anarchy, and induced the United States to despatch to *Havana* the warship *Maine*. By accident or design that vessel was destroyed by an explosion (Feb. 15), and the United States declared war against Spain on April 25, 1898. The outcome of the hostilities was the freedom of *Cuba* and the acquisition by the United States of the Spanish possessions in the *Philippine Islands*, in addition to *Guam* (Pacific) and *Porto Rico* in the West Indies.

The Panama Canal.—On June 28, 1902, Congress appropriated the sum of \$40,000,000 for the purchase of all outstanding rights in the work inaugurated on the *Panama Canal*, and on April 28, 1904, a further sum was granted for the purchase of a strip of territory on each side of the proposed waterway from the Republic of *Panama*. Operations were immediately undertaken, and the Canal was completed in 1913, and was opened to traffic with no inaugural ceremony on August 1, 1914.

Anglo-American Arbitration.—A Treaty of Arbitration between the United Kingdom and the United States was signed at Washington, August 3, 1911. The Treaty contained seven Articles (see 1912 Edition of WHITAKER'S ALMANACK). An Anglo-American Peace Commission Treaty was signed by Mr. Bryan and the British Ambassador on Sept. 15, 1914.

The World War.—On April 6, 1917, the United States, after fruitless endeavours to obtain guarantees from Germany that the rights of neutrals on land and sea would be observed, entered the World War on the side of France, Great Britain and the Allied and Associated Powers. The first shot by U.S. troops (Oct. 27, 1917) was followed by a full participation in the campaigns of the Allies, and the Armies of the United States contributed very largely to the defeat of the Central Powers. At the date of the *Armistice* (Nov. 11, 1918) 3,670,888 troops had been placed under arms, and 77,459 were numbered amongst the killed or died of disease, accident or other causes. U.S. troops also figured amongst the armies sent to the assistance of Russia against the Bolshevik régime, but these were withdrawn, in accordance with the plans of the Allies, in 1919.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress, but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the second Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States, Calvin Coolidge, of Massachusetts, born at Plymouth, Vermont, July 4, 1872, graduated from Amherst College in 1895, practiced law at Northampton, Mass., councilman; city solicitor; clerk of courts, chairman Republican City Committee, member General Court of Massachusetts, Mayor of Northampton; member Massachusetts Senate; Lieutenant-Governor of Massachusetts 1916-18; Governor of Massachusetts 1919-20, elected Vice-President Nov. 2, 1920, became President (on the death of Warren G. Harding) Aug. 3, 1923, re-elected for further term, Nov. 4, 1924. *Republican*.

Vice-President, Charles Gates Dawes, of Ohio (born Aug. 27, 1865), elected Vice-President Nov. 4, 1924. *Republican*.

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

1. *Secretary of State*, Charles Evans Hughes, of New York (born 1862), appointed March 4, 1921.
2. *Secretary of the Treasury*, Andrew W. Mellon, of Pennsylvania (born 1855), appointed March 4, 1921.
3. *Secretary of War*, John Wingate Weeks, of Massachusetts (born 1860), appointed March 5, 1921.
4. *Attorney-General*, Harlan Fiske Stone, of New Hampshire (born 1872), appointed April 7, 1924.
5. *Postmaster-General*, Harry S. New, of Indiana (born 1858), appointed Feb. 27, 1923.
6. *Secretary of the Navy*, Curtis D. Wilbur, of Iowa (born 1867), appointed April 7, 1924.
7. *Secretary of the Interior*, Hubert Work, of Colorado (born 1860), appointed Feb. 27, 1923.

Secretary of Agriculture (vacant).

Secretary of Commerce, Herbert Clark Hoover, of California (born 1874), appointed March 5, 1921.

Secretary of Labour, James J. Davis, of Pennsylvania (born 1873), appointed March 5, 1921.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote, and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The Senate consists of 96 members. The salary of a Senator is \$7,500 per annum, with mileage at 20 cents per mile, coming and returning, for each regular session. The House of Representatives consists of 435 representatives and territorial delegates. The salary of a Representative is \$7,500 per annum, with mileage as for Senators.

THE SIXTY EIGHTH CONGRESS

President, Charles Gates Dawes, Ohio	\$12,000
Speaker of the House of Representatives, Frederick H Gillett, Mass	\$12,000

LIBRARY OF CONGRESS

(National Library),

Capitol Hill, Washington, D C

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now \$100,000), (2) by deposits under the copyright law, (3) by gifts and exchanges, (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is now the largest in the Western Hemisphere and third in the world, it comprises 3,089,841 volumes (gain in 1922-23, 88,933). The floor space of the building (erected at the cost of \$6,347,000, and first occupied in 1897) is 430,255 square feet, or nearly 10 acres. The book stacks, including the new stack built over the southeast interior court, contain about 103 miles of shelving, affording space for 3,540,000 octavo volumes and 84,000 volumes of newspapers. The library is maintained by Congress, the appropriation in 1923 being \$928,790.

Librarian of Congress, Herbert Putnam, LL.D.	\$7,500

NATIONAL COMMISSION OF FINE ARTS,

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress 17 May, 1920, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, Detroit, Mich.

Vice-Chairman, James L. Greenleaf, N.Y.

Members, James E. Fraser, N.Y., Henry Bacon, N.Y., Louis Ayres, N.Y., H. Siddons Mowbray, Conn., Milton B. Medary, Ill., Pa.

Secretary and Executive Officer, H. P. Caemmerer

THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The Circuit Courts of Appeal, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The District Courts, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT

(The Capitol, Washington, D.C.)

Chief Justice, William Howard Taft, Conn., born 1857, apptd. 1921	\$15,000
Associate Justices (each \$14,500).

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

Under the provisions of the Act of Congress, approved June 4, 1920, the enlisted strength of the Regular Army, including the Philippine Scouts, must not exceed 280,000, except in time of war or similar emergency, when the public safety demands it; the commissioned strength being placed at 17,726, however, recent legislation (Act of Congress of June 30, 1922) has limited the authorised enlisted strength, exclusive of the Philippine Scouts, to 225,000, and requires that the number of commissioned officers on the active list of the Regular Army and the emergency officers of the late war who are still in service undergoing treatment for physical reconstruction shall be restricted after Jan 1, 1923, to 12,000. The actual strength of the Army of the United States on September 30, 1923, included 11,520 commissioned officers, 1,084 warrant officers, and approximately, 116,000 enlisted men, including the Philippine Scouts. The Army is made up entirely of volunteers.

PRINCIPAL WARS OF THE U.S.

Name of War	Troops Engaged
War of Independence, 1775-1784	300,000
North Western Indian, 1790-1795	8,983
War with France, 1798-1800	4,593
War with Tripoli, 1801-1805	3,330
War with Britain, 1812-1815	528,274
Creek Indian, 1813-1814	13,781
Seminole Indian, 1817-1818	6,911
Black Hawk Indian, 1832	6,465
Cherokee Indian, 1833-1839	9,494
Seminole Indian, 1835-1842	41,122
Creek Indian, 1836-1837	13,418
War with Mexico, 1846-1848	107,631
Texas & New Mex Indian, 1849-1855	6,465
Oregon Indian, 1851-1856	7,229
Civil War, 1861-1866	2,128,948

World War, 1917-1918	4,060,000

U.S. WAR PENSIONS.

Year	Number of Pensioners on Roll			Total Payments
	Invalids	Widows &c	Total	
				\$
1900	752,510	241,019	993,529	138,462,130
1918	340,318	306,582	646,895	179,835,329
1919	313,140	311,287	624,427	222,159,292
1920	285,110	307,080	592,190	213,295,314
1921	267,622	298,424	566,053	258,715,843
1922	256,918	290,098	547,016	253,807,583
1923	253,686	286,070	539,756	263,012,500

The total disbursement in pensions since the War of Independence is \$6,606,256,621, of which \$6,224,106,621 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year 1923, includ-

ing the cost of medical examinations and special field examinations, amounted to \$2,563,626

World War Pensioners

Disbursements in claims arising out of service in the World War subsequent to Oct. 6, 1917, are not included in the above totals, as such claims are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters (See "Ordinary Expenditures" under "Finance," *post*.)

THE NAVY OF THE U.S.

No new construction has been authorised for the U.S. Navy since 1918. The three-year building programme initiated in the Act of August 29, 1916, provided for the following construction —

	1916	1917	1918	Totals
Battleships	4	3	3	10
Battle Cruisers	4	1	1	6
Recon Cruisers	4	3	3	10
Destroyers	20	15	15	50
Fleet Submarines	—	—	9	9
Coast Submarines	30	18	10	58
Fuel ships	1	—	2	3
Repair ship	—	—	1	1
Transport	—	—	1	1
Hospital ship	1	—	—	1
Destroyer Tenders	—	1	1	2
Submarine Tender	—	1	—	1
Ammunition ships	1	—	1	2
Gunboats	1	—	1	2

Of the "all big gun" battleships the *Colorado* was completed during 1923. These ships carry eight 16-in guns (with secondary batteries of 12 5-in and eight 3-in anti-aircraft guns), and are 624 ft long, 97 ft wide, and displace 32,600 tons. They are driven by four electric-drive turbines of 28,900 h.p. This leaves the *West Virginia* as the only remaining battleship under construction, as the other seven battleships will be disposed of in accordance with the terms of the *Washington Treaty* limiting naval armaments.

Of the vessels which were authorised in the 3-year programme, the following remain not ordered — 12 destroyers, 6 fleet submarines, and 1 auxiliary. Under the terms of the Naval Act of July 1, 1922, no part of the funds available may now be used toward the construction of these vessels. On July 1, 1922, the following vessels were under construction — 9 battleships, 6 battle cruisers, 10 light cruisers, 3 fleet submarines, 34 submarines, 1 gunboat, and 4 auxiliaries. Under the terms of the *Washington Treaty* limiting naval armaments work has been suspended on 7 of the battleships and 4 of the battle cruisers, the remaining 2 battle cruisers are being converted into aircraft carriers. The following were completed during the fiscal year ended July 1, 1923 — 3 light cruisers, 13 submarines. Since July 1, 1923, 1 battleship, 1 light cruiser and 4 submarines have been completed. The following vessels, therefore, now remain under construction — 1 battleship, 1 aircraft-carrier, 6 light cruisers, 3 fleet submarines, 17 submarines, 1 gunboat, and 4 auxiliaries.

Information as to characteristics, costs, &c., available for publication concerning naval vessels, may be found in the *Ships' Data Book*.

EDUCATION

State School Systems, 1919-1920.

In 1919-20 the total number of children in the United States 5 to 18 years of age was 27,728,788, of whom 21,576,316 (10,774,511 boys and 10,801,805 girls) were enrolled in public elementary and secondary schools, and 2,034,642 were estimated to be enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 16,150,035, the average length of school term was 161.9 days, and the average number of days attended by each pupil enrolled was 121.2 days. In 1919-20, 679,533 teachers (95,665 men and 583,867 women) were employed. The average annual salary of all teachers was \$871. The total number of buildings used as school houses was 271,319, and the estimated value of all public school property was \$4,409,719,120.

The total money received for school purposes, excluding balances on hand, was \$1,155,506,640. Of this amount, \$26,036,098 was received from permanent school funds and from the rent of school lands, \$134,278,753 from State taxes or State appropriation, \$758,806,551 from local tax or appropriation, \$2,474,717 from the Federal Government, and \$233,820,521 from all other sources, State and local. The total payments, excluding payments of bonds, were \$1,036,151,209. This amount includes expenditures for general professional and business control aggregating \$36,752,216, salaries of teachers, supervisors and principals, \$590,119,516, text-books and other instruction supplies, \$424,435,820, instruction in evening schools, \$3,276,593, miscellaneous current expenses, \$210,024,112 (composed of operation of school plant, \$115,707,229, maintenance of school plant, \$30,432,039, auxiliary agencies, \$36,387,302, fixed charges, \$9,285,711, and interest on indebtedness, \$18,211,831), and outlays—sites, new buildings and equipment, \$153,542,852.

Compulsory Attendance Laws, 1922.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1919-20

Of the 670 universities, colleges, and professional schools, 153 were for men, 117 for women, and 400 were co-educational. There were 109 public institutions and 561 under private control or management. The total number of instructors in both private and public institutions was 42,882 (34,111 men and 8,771 women). The public institutions enrolled 156,626 undergraduate and graduate students (102,711 men and 53,915 women). The private institutions enrolled 200,066 undergraduate and graduate students (119,531 men and 80,535 women). In general engineering, 10,231 students were enrolled; in chemical engineering, 5,743, in civil engineering, 8,899; in electrical engineering, 9,469, in me-

chanical engineering, 11,789, and in mining engineering, 3,048.

The total number of baccalaureate degrees conferred in 1919-20 was 38,552 (23,272 men and 15,280 women), altogether 4,853 graduate degrees were conferred (3,457 men and 1,396 women), 989 honorary degrees were conferred.

The schools of theology enrolled 7,216 students and reported 588 graduates, law schools, 20,992 students and 3,273 graduates, schools of medicine, 14,242 students and 2,806 graduates, schools of dentistry, 8,809 students and 865 graduates, schools of pharmacy, 5,026 students and 1,023 graduates, and schools of veterinary medicine, 908 students and 219 graduates.

Teachers' Colleges and Normal Schools, 1919-20.

In 1919-20, 371 teachers' colleges and normal schools reported to the United States Bureau of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 138 are State institutions, 45 are teachers' colleges (schools granting a degree after four years' work beyond high school), 33 are city normal schools, 95 are county normal schools, and 60 are private normal schools. The 45 teachers' colleges were separated from the State normal schools, which accounts for the number of State normal schools in 1920, smaller than in 1918 when they were included. The total number of instructors in all teachers' colleges and normal schools was 9,587. The total number of students enrolled was 162,796 (29,149 men and 133,647 women). Of this total enrollment, 135,418 students are in normal training courses. The number of graduates from the normal training courses was 2,151 men and 18,861 women, making a total of 21,012. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrollment in these model schools, so far as reported, was 92,446. The total receipts for normal schools were \$31,395,389. The total number of volumes in the libraries was 2,385,238.

Nurse Training Schools, 1919-20.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1920 the number of such schools reporting was 1,775. The number of pupils enrolled in these schools in 1920 was 54,953, and the number graduated 14,980. Of the schools reporting, 88 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 321,619 beds, and the average daily number of patients is 252,823. In 1920 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 539 schools required 8 hours of duty daily, 474 schools required 9 hours of duty, and 439 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Twenty-two schools required 12 hours of duty, and 9 required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 54 per cent of the schools pay under \$100, and 41 per cent pay from \$100 to \$199; in the second year 35 per cent of the schools pay under \$100, and 56 per cent pay from \$100 to \$199, in the third year of the course 29 per cent pay under \$100, and 66 per cent pay from

\$200 to \$399. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 76 per cent. of the schools pay \$400 or more; in the second year of the course 79 per cent. of the schools pay \$400 or over, in the third year of the course 81 per cent. of the schools pay \$400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About 10 per cent. offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 70 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. Almost 43 per cent. of the general nurse training schools require one year of high school work for admission, 21 per cent. require two years of high school work for admission, 26 per cent. require a full high school course, and 10 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1919-20.

In 1919-20, 14,326 public high schools reported to the Bureau. The total number of teachers in these secondary schools was 97,654 (34,396 men and 63,258 women). The total number of pupils enrolled in these schools was 1,999,106 (891,469 boys and 1,107,637 girls). The total number of coloured pupils included in the preceding figures is 30,223. In the first year of the course 742,320 pupils were enrolled, in the second year 498,796, in the third year 346,684, and in the fourth year 269,355 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 141,951 pupils were enrolled. The number of graduates reported by 12,326 schools was 230,902 (90,516 boys and 140,386 girls).

There were 10,821 high schools that reported a four-year curriculum. In these four-year high schools there are 80,864 teachers, and 1,678,823 pupils are enrolled (745,477 boys and 933,346 girls). In addition, in 402 three-year senior high schools, there are 3,651 teachers and 63,630 pupils (27,802 boys and 35,828 girls).

Private High Schools and Academies, 1919-20.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. The increase has been about proportional to the increase in population. In 1900 the number of students enrolled in these schools was 110,797. In 1919-20 the number enrolled was 184,153. The number of schools reporting in 1900 was 1,978, and the number reporting in 1920 was 2,093. The total number of instructors in these private high schools in 1920 was 14,946 (5,668 men and 9,248 women). In this group of schools more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the 2,093 schools reporting in 1920, 385 were for boys only, 728 were for girls only, and 980 were co-educational. Altogether, about one-tenth of the schools had military drill in 1920, enrolling 24,056 students. Of this number 3,823 were girls.

In 1916 the number of boys taking this work was 10,324. Within the past four years the enrolment in military drill in these schools has been doubled. The number of coloured students enrolled in these schools in 1920 was 9,526. The total number of graduates from private high schools and academies was 24,166. The average size of the faculty was 7.1. The average number of students to a school was 88.0. The average number of students to a teacher was 12.3.

The number of students enrolled in the first year of these private high schools was 36.1 per cent. of the total number, in the second year, 26.8 per cent., in the third year, 20.5 per cent., and in the fourth year, 16.6 per cent.

566 of these private schools were non-sectarian, and 1,527 were denominational (976 Roman Catholic).

Of the total number of students enrolled, 45.7 per cent. were boys and 54.3 per cent. were girls.

The number of Negro girls enrolled in these schools was about twice as large as the number of Negro boys, 6,341 coloured girls were enrolled, and 3,185 coloured boys.

Private Commercial Schools, 1919-1920.

In 1920 reports were received from 902 private commercial and business schools. These schools are of two types (1) those which are non-denominational, and which are run on a commercial basis, (2) those which are maintained by certain denominations and by Young Men's Christian Associations. The private non-denominational schools reporting were 841, the denominational and Young Men's Christian Association schools reporting were 61. The total number of instructors in these 902 schools was 6,165 (2,976 men and 3,189 women). The number of students enrolled was 336,032 (139,551 men and 196,481 women). The average daily attendance in these schools was 164,662. Altogether 902 schools reported 214,606 students enrolled in day courses. In night courses 121,426 students were enrolled in the 675 schools which reported such courses. In the commercial or bookkeeping course 106,852 students were enrolled, stenographic, 126,055, combined courses, 53,430, telegraphic (wire), 2,804, (wireless), 2,384, accountancy, 11,889, secretarial, 23,073, and in the salesmanship course, 15,167.

In 755 schools in which shorthand was taught 130,927 students or 56 per cent. of the shorthand students reported studied the Gregg system of shorthand, 35 per cent. of the shorthand students, or 81,618 students, studied some Pitmanic system of shorthand.

Schools for Feeble-minded and Sub-Normal Children, 1917-18.

Nearly all States provide schools for feeble-minded children. 43 schools of this type reported in 1918, 32 private schools also submitted a report. Altogether 121 cities have organised classes for the teaching of sub-normal and backward children. The children in these schools are not usually feeble-minded, but are retarded in their school work. The number of instructors in State institutions was 425, in private institutions 121, and in public day school classes of city schools 1,134. The total number of inmates in State institutions was 35,968 (18,353 boys and 17,615 girls); in private institutions, 983 (467 boys and 516 girls), in public day school classes of city schools, 18,133 (11,937 boys and 6,196 girls).

In State institutions 11 per cent of the pupils take music, 26 per cent home economics, 19 per cent manual training, 11 per cent agriculture, and 13 per cent trade training courses. In city day school classes, 90 per cent of the pupils take music, 27 per cent home economics, 86 per cent manual training, 10 per cent agriculture, and 12 per cent trade training courses. In private schools 43 per cent take music, 24 per cent home economics, 34 per cent manual training, 14 per cent agricultural courses, and 4 per cent trade training courses.

NOTES.—Agreements have been concluded for the funding of the obligations of Great Britain and Finland into long-time bonds in the amounts of \$4,600,000,000 and \$2,000,000,000 respectively. The funded bonds of Great Britain have been delivered to the Treasury. The remaining \$20,500,000 due from Great Britain represents balance due on obligations regarded as having been given for Pittman Silver advances which is to be paid in the spring of 1924.

Cuba has paid its indebtedness in full.
No interest due on Nicaraguan notes until maturity, as is also the case with certain Belgian obligations aggregating \$2,264,151.40.

Payment of principal and interest on obligation of Austria extended for 20 years from June 1, 1923.

PUBLIC DEBT

The total interest-bearing Debt of the U.S. from 1916 1923 was as follows

June 30	Interest bearing debt	Interest paid during fiscal year (on basis of daily Statements of Treasury)
1916	\$971,562,590	\$22,900,869
1917	2,712,549,477	24,742,702
1918	11,985,882,436	189,743,277
1919	25,234,496,274	619,215,569
1920	24,661,095,361	1,020,251,622
1921	22,737,352,080	999,144,731
1922	22,711,035,587	991,000,759
1923	22,007,550,754	1,055,923,690

The Public Debt on June 30, 1923, was as follows:—

Bonds	
2 per cent (1930)	\$599,724,050
4 per cent (1925)	118,489,900
2 per cent Canal (1916-36)	48,924,180
2 per cent do (1918-38)	25,947,400
3 per cent do (1961)	49,800,000
3 per cent Conversion (1916-47)	28,894,500
2½ per cent Postal (1st to 24th)	11,560,200
1st Liberty Loan (1932-47)	1,951,764,200
2nd do (1927-42)	3,199,036,800
3rd do (1928)	3,407,787,250
4th do (1933-38)	6,328,565,650
4½ per cent Treasury Bonds (1947-52)	763,954,300
Notes	4,104,195,150
Certificates	1,031,418,500
Saving Certificates	337,198,674
Total Interest-bearing Debt	22,007,590,754
Matured debt on which interest has ceased	98,172,160
Debt bearing no interest	243,924,844
Total Gross Debt	22,349,687,758
Matured Interest	176,085,461
Less Cash in Treasury	22,525,773,219
	369,286,816
Net Debt of U S A	\$22,155,886,403

ment in the amount of \$4,889,241.91 and to the Navy Department in the amount of \$2,652,303. Similar allotments in the fiscal year 1922 to the Treasury Department were \$26,350,668.66, to the War Department \$4,866,363.40, and to the Navy Department \$1,209,277.84. Expenditures under these allotments however appear as expenditures of the respective departments and not of the Veterans' Bureau. In the fiscal year 1922, payments on account of Veterans' relief made prior to August 11, 1922, by the War Risk Insurance Bureau are included under Treasury Department, while similar payments made prior to that date by the Federal Board for Vocational Education are included under other independent offices and commissions.

a Add

b Deduct excess of credits

NOTE.—The analysis of expenditures for the fiscal year 1923 is on the same basis as the Budget with necessary adjustments to cover receipts credited to appropriations, including particularly proceeds of railroad securities. The analysis for the fiscal year 1922 is on the Budget basis without adjustment. The figures given for operations in special accounts are net figures, and make allowance for receipts and deposits credited to the account concerned.

PRODUCTION AND INDUSTRY.

Agriculture—The total land surface, excluding Island possessions and Alaska, is 1,903,215,360* acres, of which in 1920 955,883,715 were farms (503,073,007 acres improved). The total number of farms in 1920 was 6,448,343, of which 2,456,107 are between 100 and 500 acres, 1,474,745 between 50 and 100 acres, and 1,503,732 between 20 and 50 acres. The gross value of farm products of the United States in 1919 was \$21,425,623,614, as compared with \$8,494,230,307 in 1909. Crops in 1919 were valued at \$14,755,364,894, live-stock products (including animals sold or slaughtered) at \$6,178,122,273, and miscellaneous products at \$492,136,447.

Wool—The total number of animals shorn in 1919 was 31,591,840, producing 228,795,354 lb.

Minerals—The total value of metallic minerals produced in 1922 was estimated at \$985,800,000 (pig iron, \$668,144,858, copper, \$127,443,000, gold, \$49,096,000, and silver, \$55,510,859), and of non-metallic minerals the total value was \$3,662,500,000 (bituminous coal, \$1,294,000,000, Pennsylvania anthracite, \$273,700,125, petroleum, \$900,200,000, in 1922 the production of oil was 551,197,000 barrels, as against 472,183,000 barrels in 1921, clay products (1921), \$270,397,754, stone, \$118,500,000, natural gas, \$196,000,000, cement, \$208,464,028, and mineral paints (lead and zinc pigments), \$22,205,400. The exports of bituminous coal sent to Europe in 1921 amounted to 4,944,472 tons (of 2,240 lb) while 11,961,405 tons went to Canada.

Manufactures—The manufacturing establish-
* Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connection with irrigation projects in Montana

ments enumerated at the biennial Census of 1921 numbered 196,267, the value of their products being \$43,653,282,833, as compared with a value in 1919 of \$62,418,078,773. The figures for 1921 do not include data for 53,999 establishments with products valued at \$136,926,075, each establishment reporting products under \$5,000 in value, but such data were included in 1919. The leading manufacturing States are New York, Pennsylvania, Illinois, Ohio, and Massachusetts. The principal industrial centres are New York (clothing, printing and publishing, bread and other bakery products, millinery and lace goods, tobacco, slaughtering and meat packing, sugar-refining), Chicago (slaughtering and meat packing, printing and publishing, clothing), Philadelphia (textiles, printing and publishing, clothing, sugar refining, petroleum refining), Boston (printing and publishing, sugar refining, clothing, confectionery and ice-cream, foundry and machine-shop products, boots and shoes), Putt-
burg (iron and steel, slaughtering and meat packing), Detroit (automobiles, automobile bodies and parts, printing and publishing), St. Louis (slaughtering and meat packing, boots and shoes, tobacco), Cleveland (automobiles, iron and steel, electrical machinery, apparatus and supplies), Baltimore (clothing, smelting and refining copper, slaughtering and meat packing, printing and publishing, fertilizers), Cincinnati (slaughtering and meat packing, clothing, printing and publishing), Buffalo (flour-mill and grist-mill products, automobiles, slaughtering and meat packing), Minneapolis (flour-mill and grist-mill products, automobiles, printing and publishing), San Francisco (printing and publishing, automobiles, coffee and spice)

Automobile Industry—The value of the cars and lorries manufactured in 1921 was \$1,671,386,976, of parts and accessories, \$408,016,532, and of tyres and tubes, \$446,075,960. The number of cars produced was 1,406,257, of lorries, 106,088, while 27,884,034 tyres were also manufactured in 1921. The automobile factories gave employment to 248,027 persons, who received \$406,491,414 in 1921. The number of automobile vehicles registered in 1921 in the U.S.A. was 10,465,995. The petrol produced in 1920 amounted to 4,882,546,699 gallons, and that consumed to 4,256,428,005 gallons. The taxes levied on the motor industry amounted to \$316,720,000. The number of motor vehicles exported in 1921 was 30,776.

FEDERAL EMPLOYMENT BUREAUS

The following figures show the work done by the Federal Employment Bureaus during the past six fiscal years ending June 30—

Statistics for fiscal year ended June 30	Number of applications for help	Number of persons applied for	Number of applicants for places	Number referred to employment	Number actually employed

PUBLIC ROADS—On Dec 31, 1922, the total length of public roads was 2,930,000 miles, approximately 415,000 miles of which were surfaced roads. In 1922 the total expenditures for construction and maintenance were approximately \$900,000,000.

SHIPPING—On June 30, 1923, the mercantile marine of the U.S. consisted of 812 sailing vessels of 1,029,049 gross tons, 2,826 steam vessels of 12,322,247 gross tons, a total of 3,644 vessels of 13,351,296 gross tons. In the year ended June 30, 1923, sailing and steam vessels of 66,888,006 tons entered at the various ports of the U.S., of this total 30,702,396 tons were American and 36,185,700 tons foreign. The tonnage cleared from the various seaports was 66,601,435, of which 30,591,002 tons were American and 36,010,433 tons foreign.

POSTS AND TELEGRAPHS—On July 1, 1923, there were 51,613 post offices in the U.S. dealing (in 1922) with 22,978,894,140 "pieces" of mail matter of all kinds (letters, postcards, newspapers, packets, etc.). The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are shown on page 437. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 cents. The rate of exchange on certain dates in 1924 will be found on p. 428.

INDIAN POPULATION

In 1922 the Indian population of the United States, exclusive of Alaska, was 314,930 by blood (Oklahoma containing 93,171, Arizona 43,327, New Mexico 21,569, S. Dakota 23,448, California 17,725, Montana 12,648, North Carolina 11,853, Washington 10,920, and Wisconsin 10,498, and the 38 remaining States less than 10,000 each). Total disbursements authorized for the fiscal year ended 30 June, 1924, for Indian Service were \$11,317,655. In addition to this the sum of \$22,700,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1922, amounted to \$727,746,397, of which \$198,065,171 was tribal, and \$529,681,226 individual.

RECLAMATION

Commissioner, David W. Davis, Interior Dept. Building, 19th and E. N. W., Washington, D.C. Employees—Washington Office, 77. Field, 3,000 to 5,000. Expenditure per year about \$10,000,000.

The Bureau of Reclamation was organized as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the far West. Twenty-five primary projects, comprising about 3,000,000 acres, and three Indian projects (384,000 acres) are under construction or operation, and the major works aid in serving an additional 1,100,000 acres under private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and more recently from royalties from oil and gas-leases and other mineral operations and Federal power permits, and the money expended is returned to the fund by easy payments of settlers, usually in twenty annual instalments without interest, in accordance with the Reclamation Extension Act of August 13, 1914.

The Service has built about 14,400 miles of canals, ditches and drains (including 125,500 canal structures), involving the excavation of 216,000,000 cubic yards of materials. In connection with this work there have been constructed 100 storage and diversion dams with an aggregate volume of 15,500,000 cubic yards, including the *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (206 feet high), New Mexico, on the Rio Grande. The Bureau has built 103 tunnels, 1,000 miles of road, 83 miles of railroad, 3,200 miles of telephone line, 30 power plants and 1,150 miles of transmission lines. It is mining coal, and has manufactured over 1½ million

materials of cement and sand cement. The net construction cost to June 30, 1923, was \$135,000,000.

Over 450,000 persons are living on the 33,000 acres irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, water was furnished in 1922 to 1,227,900 acres, and of this area 1,169,100 acres were irrigated in 1922, producing crops worth over \$50,000,000, or an average of about \$43 per acre. The additional lands using stored water yielded crops worth \$33,000,000 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right to enter these farms, and at recent openings such soldiers have taken practically all units.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept of the Interior, Washington, D C.

The Bureau issues the "Reclamation Record," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 5,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations and is available for consultation by those interested.

GOVERNMENT PRINTING OFFICE, North Capitol Street, Washington, D C

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The present buildings, having a floor space of 15 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately \$8,000,000. The annual cost of operation and maintenance is about \$10,000,000. There are about 4,000 persons annually employed in the various divisions of the office at a total yearly compensation of \$7,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 100 linotype machines, 100 monotype key boards and 126 monotype casting machines, which produced about 2,000,000,000 lines of type in fiscal year 1923. The 165 presses of the office are credited with 2,151,000,000 chargeable impressions, not including 180,000,000 on money order forms and 1,181,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,353,000 square inches of electrotypes and stereotypes, and manufactured its own printing and writing inks, rollers, glue, type and type metal. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Dependencies of the U.S.A.

THE PHILIPPINE ISLANDS

are situated between $4^{\circ}40'-21^{\circ}10'$ N lat and $116^{\circ}40'-126^{\circ}34'$ E long, and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 115,026 square miles, of which total 94,946 square miles are contained in the eight largest islands, the 3,130 other islands having a combined area of 14,572 square miles. At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom 7,790,937 are Roman Catholic, 1,417,448 are Aglipayan, 124,575 are Protestant, 443,027 are Muhammadan, 508,566 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactán. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, then conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

Sept. 1, 1923, the Philippine Scouts, which form a part of the United States regular Army, consisted of 104 officers (28 being citizens of the Philippine Islands), and 7,010 enlisted men. On the same date the regular Army in the Philippines (other than the scouts), consisted of 500 officers and 4,071 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Sept., 1923, consisted of 376 officers and 5,642 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1921 the income of the Philippine Government was \$34,001,101 and the bonded indebtedness \$34,750,000. The expenditure on education in 1921 amounted to \$7,058,502 64, the University had an enrolment of 4,718 students, and there were 943,364 pupils enrolled in the public schools. The principal exports are hemp, coconut oil, sugar and tobacco, the imports being cotton manufactures, and iron and steel manufactures. During 1922 the trade was valued at \$65,583,298 for exports, and at \$80,197,645 for imports, 56 per cent of the imports being from U.S. and 67 per cent of the exports being taken

by the U.S. Sugar was the principal article of export in 1921, being valued at \$25,013,310, Manila hemp \$19,540,915, coconut oil \$15,734,186, and leaf tobacco \$2,273,117.

Towns.—(Capital, Manila, in the island of Luzon, population (Dec. 31, 1918), 283,613. The next largest towns are Cebu (63,500), Albay (53,105), and Iloilo (49,808), there are several others with populations from 25,000 to 40,000.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in $13^{\circ}26'$ N lat and $144^{\circ}39'$ E long, at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population on July 1, 1923, of 16,224, of whom 14,911 are classed as native, 811 of the naval station, and 502 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apia.

PUERTO RICO

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ}50'-28^{\circ}30'$ N lat and $65^{\circ}30'-67^{\circ}15'$ W long, with a total area of 3,435 square miles and a population of 1,299,800 at the census of 1920. Almost all the inhabitants are Roman Catholics. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West. Sugar is grown in the low lying districts, and tobacco and coffee on the slopes of the hills, fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 460 miles of railroad were in operation in June, 1922, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 71,443 inhabitants in 1920, other towns being Ponce (41,912), Mayaguez (19,124), Aiebo (10,039), Bayamon (10,411), and Aguas (12,149). The legislative functions are vested in a legislature which consists of 2 elective houses, the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

TUTUILA, AMERICAN SAMOA

Under an agreement between Great Britain, the United States and Germany* (proclaimed Feb. 19, 1900), the first-named Power abandoned all claims to the islands of the Samoan Archipelago, which were then divided between the United States and Germany, the islands east of 171° W long being taken over by the U.S. The territory thus acquired consists of the island of Tutuila, Annuu, Ofu, Olosega, Tau, and Rose

* Under the *Treaty of Versailles*, 1919, the German Samoan Islands were allocated to New Zealand.

Islands, with a total area of about 56 square miles and a population of 8,058 in 1930.

Tututla, the largest of the group, has an area of about 40 square miles and a population of 6,185, and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles and a population of about 2,000, Rose Island being uninhabited. Copra is the only export of importance.

WAKE AND JOHNSTON ISLANDS.

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Midway).

ALEUTIAN ISLANDS

The *Aleutian Islands*, or Catherine Archipelago (also known as the Santa Barbara group), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°–53° N lat and 172° E–165° W long. They have a population estimated at 2,000. The principal settlement is at Iliuluk, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

VIRGIN ISLANDS

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq miles, with a population in 1927 of 26,051. *St. Thomas* (28 sq miles) has a population of 10,191, *St. Croix* (34 sq miles) has a population of 14,901, the capital being Christianstad (or Bassin), *St. John* (20 sq miles) has a population of 960, the capital being Cruz Bay. St. Croix exports sugar and cotton.

The revenue is derived from customs, income tax, ground and building tax, trade tax, &c. The estimated revenue for year ending June 30, 1924, francs 1,370,000. There is a regular weekly service from New York to St. Thomas, and from Porto Rico to St. Thomas and St. Croix. The islands of St. Thomas and St. Croix possess wireless installations.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, a commodating vessels of large draught, and has a large coaling and oil refueling station.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 20, 1882. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness,

interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the canal controversy. The independence of Panama was recognised by this treaty.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force, after which operations on a large scale were begun on all parts of the canal.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1923, were \$458,992,097. Tolls and other revenues, from its opening until June 30, 1923, amounted to \$75,063,503.

The canal is fifty statute miles long (43.84 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

The administrative organisation for the canal is known as "The Panama Canal," with the Governor of the Panama Canal (Col. Jay J. Morrow, U.S.A., retired) at its head.

Vessels plying between the Atlantic and Pacific Coasts of the United States handled over two-fifths of the total cargo shipped *via* the Canal, and the intercoastal trade is the most important part of the traffic at present. The routes next in quantity of cargo are those between the Atlantic Coast of the United States and the west coast of South America (handling about one-tenth of the total) and traffic between the east coast of the United States and the Far East. Cargo originating on the west coast of the United States showed a very large increase, being 7,455,582 tons for the year ending June 30, 1923, as compared with 2,867,819 in the previous year. A considerable part of this increase is in crude petroleum from California in the form of tanker-traffic, the tonnage shipped (1923) being 3,689,049, as against 32 tons for 1922.

The following table shows the number and tonnage of commercial vessels which have passed through the Panama Canal. The Canal was

(a) Via Jamaica (b) Via New York (c) Via Tahiti
(d) Via Wellington (e) Via San Francisco (f) Via Honolulu (g) Liverpool to Valparaiso *via* Strait of Magellan 8,830.

opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

THE PRESIDENTIAL ELECTION OF 1924.

THE quadriennial election to decide among other offices the Presidency of the United States for the next four years took place on Nov. 4 last under unprecedented circumstances. In addition to the candidates chosen by the two regular parties, the Republicans and the Democrats—respectively Mr. Calvin Coolidge, who, elected as Vice President four years earlier, had become President on the death of Mr. Warren Harding in 1923, and Mr. John W. Davis, the former United States Ambassador in London—Senator La Follette, of Wisconsin, conducted an energetic campaign as an Independent Progressive, and his intervention left politicians puzzled as to the outcome of the fight.

It was not the first experience of a third party candidate in the Presidential election, as in 1912 Colonel Theodore Roosevelt divided the Republican forces, but he remained a Republican although opposed to the candidate selected by the National Convention, whereas Senator La Follette appealed equally to the members of both recognised parties and sought support from those dissatisfied with the programmes of his two opponents. Although Mr. Coolidge was regarded as holding a strong position, and was so confident of success that he did not undertake a tour, and although Mr. Davis, who had only been chosen by the Democratic Convention after

over a hundred ballots had been taken, was considered to have jeopardised what chance of election he possessed by his denunciations of Ku Klux Klan, the most experienced observers hesitated to forecast the result. It was even suggested that, until the days immediately preceding the poll, no candidate would secure the absolute majority of the Electoral College that is required by the Constitution of the Republic.

This anticipation was not borne out, and Mr. Coolidge swept the country and obtained a huge majority, both in the Electoral College—the members of which were elected for one day for the sole purpose of choosing the President—and in the plurality. The third candidate polled unexpectedly badly, and his appearance in the field had little, if any, effect upon the result, while Mr. Davis made a comparatively poor show. The electors in the College pledged to vote for Mr. Coolidge—and General C. G. Dawes as Vice President—numbered 379, those returned to support Mr. Davis (whose colleague was Mr. Charles W. Bryan) totalled 139; while Senator La Follette secured only 13 votes, giving the Republican nominees an absolute majority of 227. The new President's plurality amounted to over 18,000,000, that of his chief opponent was about 9,000,000, and that of the Senator some 4,000,000.

Consuls	300-600	100-150	100-200
Commercial Secs., Grade III			
Vice-Consuls			

ABYSSINIA or ETHIOPIA.

Empress, Wazzeru Zauditu (daughter of late Emperor Menelek), born 1876, elected Sept 27th, 1916

Heir, H.H. Ras Tafari Makonnen, G.C.M.G. (Cousin of the Empress), born 1891

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 11 millions, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth, iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot, the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish, in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated, and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake, the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Domestic slavery is general and has legal recognition.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The form of govern-

ment is a feudal despotism. There is no popular literature, and little education. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, but it continues to suffer severely from the prevalent depression. The import duty on all goods at Gambela is 10 per cent *ad valorem*, and at Dire-Dawa and Harar 8 per cent *ad valorem*, in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital, *md* Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa (the capital of Tigre), Gondar, Debra-Markos, Saiyu, Aksum, Antalo, Ankoher, Goré, Demebecha, Ijube, Imma, and Harar. There are ancient architectural remains at Aksum, Gondar, and Ankoher; modern architecture is very poor.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 50,000). Harar, in Eastern Abyssinia, has a population of about 45,000.

Imports from U.K. (1923) £7,800

Exports to U.K. (1923) 5,000

FLAG Green, red, yellow.

BRITISH LEGATION

Envoy Extraordinary, Minister Plenipotentiary and Consul General, C. F. W. Russell

(1920) £3,150

Oriental Secretary, Ph. P. C. Zaphiro, C.M.G.

Secretary to Minister, E. W. Thomas

BRITISH CONSULAR OFFICERS.

Addis Ababa—Consul, G. H. Bullock

" Vice-Consul, E. W. Thomas (acting)

Harar—Consul, C. H. F. Plowman

N.W. Ethiopia (Dangula)—Consul, A. D. Home

Southern Ethiopia (Mega)—Consul, Maj. A. T.

Miles, D.S.O.

Western Ethiopia (Gore)—Consul, Craven H.

S.W. Ethiopia (Maji)—Consul, Capt. Arnold W.

Hodson, C.M.G.

Addis Ababa is 500 miles from Zalla, *md* Harar;

letters from London are from 20 to 24 days in

transit if the mail connects with steamer service

from Aden, train from Djibouti takes 3 days;

caravans take from 35 to 45 days.

AFGHANISTAN (see p. 634).

ALBANIA.

(Shkiperia.)

Regent, Sotir Pecl, July 1, 1924.

President of the Council of Ministers, Monseigneur Fan Noli, Archbishop of Darazzo, June 17, 1924.

Minister of Foreign Affairs, Suleiman Delvino.

Minister in London, H.E. Mehmed Konitsa,

127, Beaufort Street, S.W. 3.

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina,) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic, total area about 20,000 sq miles, total population estimated (1922) at 1,000,000. The political neighbours are, on the north and east Yugo-Slavia, and on the south-east and south Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the Treaty of London of Dec. 30, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, and during the Great War the country was invaded by troops of the Central Powers and of the Allies. After the Armistice (Nov. 11, 1918) a National Council at Durazzo established a provisional government. The independence of the country was guaranteed by the Supreme Council of the Allies. The government is exercised by Regents, representative of the various religious bodies, the executive being entrusted to a council of Ministers, responsible to the elected diet (cattle rearing and agriculture (grain and tobacco) are the principal industries and there is some mineral wealth.

CAPITAL, Tirana (pop. 12,000), other centres are Scutari (pop. 32,000), Elbasan (pop. 13,000), Berat (pop. 8,500), Korytza (pop. 18,000), Durazzo (pop. 5,000), and Valona (pop. 7,000).

British Envoy Extraordinary, Minister Plenipotentiary and Consul General, Harry Charles Augustus Eyles (1922), Durazzo (and local allowance, £500) £1,200.
Durazzo—3rd Secretary and Vice Consul, Robert Parr (acting).

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq miles, and a population of 5,500, it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E long and 12° 45'—34° 50' N lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000.

The organisation of the Native States of Arabia is to be developed under British auspices, the principal rulers (the King of the Hejaz and the Imam of Yemen) being subsidised under certain conditions (control of foreign relations by British advisers and maintenance of internal peace by native rulers). The various Arab States are shown below—

THE KINGDOM OF THE HEJAZ.

King of the Hejaz, Ali ibn Hussein, assumed throne on the abdication of King Hussein, Oct. 1924.

On June 5, 1916, the Grand Sherif of Mecca (hereditary Keeper of the Holy Places) threw off the Turkish allegiance and declared the independence of the former vilayet of Hejaz. On March 7, 1924, following the deposition of Sultan Abdul Mejid and his expulsion from Constantinople, King Hussein of the Hejaz was proclaimed Caliph of the Muhammadan world by the Moslems of Transjordan and the Hejaz. In October, 1924, after an unsuccessful war with the Sultan of Najd, King Hussein abdicated in favour of his son, but shortly after assuming the throne his successor evacuated the capital which was occupied by the Sultan of Najd. The kingdom extends from Asir in S to Palestine and Syria in N and from the Red Sea, the Gulf of Akaba, and Palestine in the W to the ill-defined boundaries of Central Arabia. The total area is about 112,500 sq miles, with a population of from 350,000 to 400,000, including many nomad tribes.

Parallel with the Red Sea coast runs the Tehama range (Jebel Shar, or Mount Sen, 7,000 feet, and Jebel Radiwa, 6,000 feet). On the coast are the small ports of Muwela, Damgha el Wih, Yambo, Rabigu and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed 'tomb of Eve, the mother of mankind', and inland are many settlements through which runs the Hejaz Railway. The Oasis of Khubar, east of the railway, contains a considerable population, descendants of former negro slaves, with a Jewish centre at Kasr el Yahudi. The importance of the Kingdom of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (*Al Medina*, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Jeddah, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets.

The Hejaz Railway runs from Medina in S through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

CAPITAL, Mecca (pop. 60,000).

THE SULTANATE OF NAJD.

Sultan, H H Abd-el-Aziz al Saud, C O I R

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present ruler threw off Turkish rule and captured from the Turks the Province of Hassa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms. The capital of the Sultanate is Riyadh, and the principal trading centres are Hassa, Bulaideh and Analzeh. The only ports are Qatif and Ojair, which are suitable only for sailing craft. In 1924 the Sultan defeated the King of the Hejaz in several engagements and advanced against Mecca, which was occupied by the Wahabite forces in October, 1924. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hassa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

THE PRINCIPALITY OF KUWAIT

Ruler, Sheikh Ahmad al-Jabir as-Subah, C I E

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Nejd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop 50,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903.

Political Agent, Major J. C. More, D.S.O.

THE SULTANATE OF OMÂN

Sultan, Seyyid Taimur bin Faisal bin Turki, C S I, born 1886, suc. 1912.

Omân (area 82,000 sq. miles, estimated pop. 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omân, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Omân proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1921-22 to £611,997. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 22,000.

Muscat—British Consul and Political Agent, Major R. G. Hinde, I.A. per annum Rs 2,250.

THE IMAMATE OF ASIR.

Imam, Ali ben Muhammad, succeeded March 21, 1923.

The territory of the Idrisi (who claims the

Imamate of Asir and part of Yemen), extends along the Red Sea littoral, approximately from Hali Point to Lohela. It includes part of Asir, part of Yemen and the Farsan Islands, and extends inland to the Dahna Desert. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

THE IMAMATE OF YEMEN

Imam of Sana'a, Yahya Muhammad Hamid ed-Din.

Yemen occupies the S.W. corner of the Arabian peninsula, between the Imamate of Asir and the British dependency of Aden, with an estimated area of 74,000 sq. miles and a population of 600,000 to 700,000. It was formerly divided into the vilayets of Sana'a, Tais, Asir and Hodeida, and it extends inland to the Dahna Desert and to the tribal territories of Hadramut. Part of Yemen is now included in the territories of the Idrisi (Imam of Asir), and of the remainder the greater part is under the rule of the Imam of Sana'a. On the plateau between the coast and the Dahna Desert (a district known as *El Jebel*) are the most fertile parts of Arabia, where wheat, barley, millet and coffee are extensively grown. The sea port of Mocha has become associated with the coffee export trade, but in this trade (and in all others) it is of secondary importance to Hodeida. The trade of Yemen probably exceeds that of the remainder of Arabia. The capital is the walled city of Sana'a (pop. 20,000), and about 70 miles to the S. of the capital is Dhahar, an ancient seat of learning, and the headquarters of the Zaidi sect of the Muhammadans.

THE HADRAMUT TRIBES

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadrami, an ancient people of Arabian stock (Hadrami was the son of Joktan, *Genesis* x, 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Kabr Hud) and Shubam (Kabr Sâlih). The eastern districts, known as Mahia and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shaki and Mokalla*, C.O.I.E., who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sey yem and Termi. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Ka'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

ARGENTINE REPUBLIC. (República Argentina.)

President (1922-28), Dr. Marcelo T. de Alvear, assumed office, Oct. 12, 1922. \$56,000
Vice-President (1922-28), Dr. Elpidio Gonzalez 36,000

Minister of the Interior, Dr. Vicente C. Gallo.
Foreign Affairs, Dr. Angel Gallardo
Finance, Dr. Rafael Herrera Vegas
Justice and Public Instruction, Dr. Antonio Sagarna
Agriculture, Dr. Tomás A. Le Bieton
War, General Agustín P. Justo
Navy, Adm. M. Domecq-García.
Public Works, Dr. Eufasio S. Loza.

Minister in London, Señor Dr. J. Evaristo Urburu, 26 Park Lane, W. 1
Counsellor of Legation, Señor Don Paulino Llambi Campbell

First Secretary, Señor Don Carlos Miguens
Naval Attaché, Capt. Don Jorge A. Games
Military Attaché, Lt.-Col. Mones Ruiz
Consul-General, Dr. Peirez, 7 Gower Street, W. C. 1
Asst. Consul, Don Horacio Fernandez Beschteldt

There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport, and Glasgow, and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough and Swansea.

Argentina is a wedge shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles, its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries, on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro, and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandul Hills (about 1,000 ft) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River flows through the north-eastern states into the Atlantic, and is navigable throughout its course, the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000

square miles, with a population of 8,668,216 in 1921. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1920 the immigrants numbered 155,322 and the emigrants 104,711, a net influx of 50,611. The climate is moderate and healthy. Spanish is the language of the country.

Government—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 Spanish rule was overthrown, and in 1818 the independence of Argentina was complete, although not acknowledged by Spain until 1824. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive \$9,000 per annum.

Production—Of the total area about one third is suitable for agriculture and cattle raising, and vast tracts are held by the Federal Government for sale or lease to colonists. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were in 1920 27,392,126 cattle, 45,303,479 sheep, 9,366,455 horses, 600,000 mules, 4,670,130 goats and 3,227,346 pigs. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1923 the exports of wheat were 3,726,000 metric tons, oats 456,000, linseed 1,072,000, maize 2,870,000 metric tons, butter 1,081,000 cases, wool 330,000 bales, sheepskins 35,000 bales dried oxhides 2,435,000, salted oxhides 5,065,000 frozen beef 2,546,000 quarters, chilled beef 3,997,000 quarters, frozen lamb 1,468,000 carcasses, frozen mutton 1,761,000 carcasses. In 1920, there were 4,500 registered wine presses, handling about 600,000 tons of grapes, the output in 1919 being over 4,000,000 hectolitres (88,212,000 gallons). The export of wine to neighbouring South American States is increasing annually, and the importation of wine has almost ceased. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Province of Patagonia.

Communications—There were (1922) 21,935 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000* of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are several aeroplane services between Argentine centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahía Blanca. In 1923 2,231 ships of a total tonnage of 7,672,521 (45 per cent. British) entered the port of Buenos Aires.

Defence—The Navy consists of a super-Dreadnought battleships, a river monitors, 4 armoured cruisers, 3 cruisers (old), 4 torpedo

* A total of about £400,000,000 British capital is invested in the Argentine.

gunboats, 7 destroyers, and a first class and 6 second class torpedo boats. Strength about 740 officers and 12,000 men. There is a naval port at Puerto Belgrano, near Bahía Blanca. The National Militia has a peace footing of about 30,000, with reserves of 250,000, on a war footing the Army would comprise 5 divisions of 20,000 each.

Education—Primary Education is secular free and nominally compulsory from the ages of 6 to 14, but only some 45 per cent of attendances are secured. Secondary Education is controlled by the Federal Government in lyceums and normal schools, with an average attendance of 6,000. There are also *Special Government Schools*—1 naval, 1 military, 1 mining, and 1 agricultural. There are *National Universities* at Córdoba and Buenos Aires, and *Provincial Universities* at La Plata, Santa Fé, and Paraná.

Revenue (Budget Estimate)	1923 \$665,000,000
Expenditure (Budget Estimate)	645,000,000

The Argentine Debt

According to official figures the Public Debt at Dec 31, 1922, stood as follows—

Federal (<i>Paper Pesos</i>)	\$2,187,712,000
Provincial (<i>Paper Pesos</i>)	483,383,000
Municipal (<i>Paper Pesos</i>)	171,923,000
Total	\$2,843,018,000

The total was divided as follows—

Federal—	
Unconsolidated \$892,824,000
Consolidated	
Internal	\$759,151,000
External	535,737,000
	1,294,888,000
	\$2,187,712,000

Provincial (Consolidated)—

Internal	323,459,000
External	159,924,000
	\$483,383,000

Municipal (Consolidated)—

Internal	85,284,000
External	86,639,000
	\$171,923,000

The Unconsolidated Debts of the Provinces and Municipalities are estimated at \$150,000,000, which gives a total of approximately \$3,000,000,000.

	1922	1923
Total Imports (gold \$)	\$689,645,000	\$868,430,000
Total Exports (gold \$)	676,008,000	771,361,000
Exports to U.K.	£56,620,803	£66,084,755
Imports from U.K.	22,688,618	28,164,835

CAPITAL, Buenos Aires. Pop (1922), 1,721,500. Other large towns are Rosario (270,000), Córdoba (160,000) and La Plata (160,000).

AUSTRIA

(Oesterreich.)

President of the Federation, (Nov 20, 1920), Dr. Michael Hainisch.
Federal Chancellor, Monsignore Dr. Ignaz Seipel.
Vice-Chancellor and Interior, Dr. Felix Frank.
Foreign Affairs, Dr. Alfred Grunberger.
Education, Dr. Emil Schneider.
Finance, Dr. Victor Kienbock.
Justice, Dr. Leopold Wabe.
Agriculture and Forestry, Rudolf Buchinger.
Social Welfare, Richard Schmitz.
Commerce and Communications, Dr. Hans Schlörf.
War, Karl Vaugin.

Minister in London, Baron George Franckenstein, 18 Belgrave Square, S.W. 1.
Counsellor, Adolph Kunz.
Secretary, Walter Braunl.
For Debt Clearing, Dr. Felix Weiser.

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary by the identity of sovereigns, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat and 9° 30'–26° 20' E. long. It embraced an area of 240,455 sq miles, and a population (1914) of nearly 53,000,000, and included Upper and Lower Austria; Bohemia; Bukovina; Carinthia, Carniola, Dalmatia, Görz and Gradiska, Istria, Moravia, Salzburg, Silesia, Styria, Trieste, Tyrol and Vorarlberg, with Bosnia and Herzegovina as administered territories. At the conclusion of the War, the territories of the Austrian Republic comprised an area of 31,755 square miles, with a population (1920) of 6,067,000.

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914-18. Before the armistice of Nov. 11, 1918, Hungary had seceded from the "Dual Monarchy," and a Republic was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918).

Under the *Treaty of St. Germain* (Sept. 10, 1919) the political neighbours of the Austrian Republic are the Republics of Germany and Czecho-Slovakia on the N., the Kingdom of Italy, and the Yugo-Slav Kingdom on the S., Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov. 1, 1920), Austria became a Republican Federation of eight Provinces—Lower Austria and Vienna, Upper Austria, Carinthia, Styria, Salzburg, Tyrol, Vorarlberg and Burgenland (West Hungary), the Bundesrat and Nationalrat were constituted, a government formed, and a President elected. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in favour. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1923, and the same Government was returned.

Complete religious liberty is one of the fundamental laws of the new Republic. The prevailing religion is Roman Catholic.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct. 1, 1922, the exchange value of the crown had sunk to about one fifteen-thousandth of its nominal value, £1 being equal to 225,000 crowns (in place of 24'25).

The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czecho-Slovakia agreeing to guarantee four-fifths of a loan of 500,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The remainder of the big loan will, it is expected, be sufficient to cover the diminishing deficit until the end of 1924. The High Commissioner, Dr. Zimmermann, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec. 1, 1922. Great progress has been made since in reducing Government expenditure

and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of July, 1924. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown has been stabilised at about Crs 300,000 = £1. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic.

The following appointment of the pre-War Debts of the Austro-Hungarian Monarchy has been suggested (1924)—

To	Austrian Debt	Hungarian Debt
Austria	38 827	1'581
Czecho-Slovakia	41 7	15 945
Fiume	..	0 748
Hungary	..	45 733
Italy	4 087	..
Poland	13 733	0 075
Rumania	7 61	21'802
Yugo-Slavia	2 043	14 116
Total	100 0	100 0

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

Communications.—In Sept. 1, 1919, there were about 3,800 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914 but the new Republic is land-locked.

Defence.—During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

	1922	1923
Total Imports	£66,344,000	£77,122,000

A Kingdom of Central Europe, with a total area (1920) of 11,322 square miles and a population (Census of 1919) of 7,577,027. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, the Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £1,000,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 1918, at the great turn of the tide, Antwerp was re-occupied by the victorious Belgian army, and

Brussels and the remainder of Belgian soil a few days later. About 20,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 556 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120 senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers, widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected, i.e., to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber is to be elected in 1925. Deputies receive 12,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live stock to replace the animals seized or destroyed during the War of 1914-1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgy (Mons, Charleroi, Liege, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1914 the Army on a peace footing consisted of about 500,000, all ranks. In the War of 1914-1918 over 500,000 passed into the armies, which were reorganised on French territory during the defensive period of the campaigns. An organised force of 800,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 108,382. In 1923 a new Recruiting Law was passed, entailing compulsory service for 12 months, with certain exceptions. The yearly intake of recruits is fixed at 40,500, and the Army consists of a First Army of 4 Corps and 8 Divisions, and a Second (Reserve) Army of 8 Divisions. Belgium has a small force of torpedo boats.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State, those of Brussels and Louvain are free institutions. Louvain University is to be rebuilt. After considerable opposition, and by way of a compromise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

	1924
Revenue ..	Francs 3,345,672,000
Expenditure ..	3,354,224,000
Debt (Dec 31, 1922)	37,790,665,862
Imports (1923) ..	12,550,387,000
Exports (1923)	8,856,490,000
Imports from U.K. (1923)	£35,453,000
Exports to U.K. (1923)	27,483,000

The imports in 1923 were, manufactured articles (3,510,829,000 francs), raw materials (5,509,831,000), foodstuffs and beverages (3,416,871,000), and live animals (112,856,000); the exports were raw materials (2,595,138,000 francs), manufactured articles (5,370,543,000), and foodstuffs and beverages (806,712,000).

COMMUNICATIONS.—In 1923 there were 4,823 kilometres of State railways (normal gauge) and 4,314 kilometres of narrow gauge. In 1919 there were 15,160 miles of telegraph wire and 2,295 offices. The navigable rivers and canals have a length of 1,231 miles (1919), and there are 6,177 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1924) of 183 vessels (381,650 tons), in addition to which there were 453 fishing boats. In 1923, 13,806 vessels entered at Belgian ports (tonnage 20,453,438). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since reopened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population

(Dec 31, 1923) of 807,922 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (300,677), Ghent (163,877), which has large cotton and flax spinning mills and is the second port of importance after Antwerp, while its flower shows are famous, and Liège (165,096) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency Maurice Lippens, G.C.V.O.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1924) at 12,000,000. The total European population (Jan., 1923) was 10,037, of whom 5,853 were Belgians, 704 were British, 365 Americans, 527 Italians, 724 Portuguese, 120 Swedes, 66 Russians, 267 French, 235 Dutch, 115 Swiss, 381 Greeks, 40 Luxemburgers, 33 Danes, 26 Norwegians, 22 Spaniards, and 566 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and re-charge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Lukula to Boma, the cocoa planting district of Mayumba. Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthéville (225 kilometres),

and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1926, connecting the West Coast of Africa with Belgian East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1918, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway have been constructed, 200 of which have been laid during the war. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway, a portion of the latter, between Bukama and the Kasai river, being now under construction, at Bukama a temporary bridge over the Lualaba was opened for traffic in 1924 and considerable progress has been made. In addition, there are many carriage and motor roads. The most important motor road is the *Route Royale Congo-Nil*, 900 kilometres in length, from Djanba, on the Rubi, to Redjaf, on the Nile, 500 kilometres of this road being now in use. Another runs from Bukama (via Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai, a distance of 1,000 kilometres, which can be covered in 5 days by touring car as against 40 days by porter. A telegraph line connects Banana to Coquilhatville (805 miles); Boma with Tshela (84 miles), Stanleyville with Ponthierville (79 miles), Kasongo with Uvira (265 miles), Kindu with Kongolo (219 miles), Kabalo with Albertville (760 miles), Sakania with Bukama (448 miles), and Buta with Bambili (138 miles), a total length of 2,298 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels. The West Coast District has a rather scanty rainfall (40 inches), but on the Maimbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts, oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Park and Ceara rubber and cotton are successfully planted. Mines are very extensive. Extensive radium deposits have been discovered in the Katanga. The copper district of Katanga has enormous deposits of copper ore, and the smelters at the Lubumbashi produce about 6,000 tons of copper monthly (1924); plant has also been erected at Panda for the extraction of nickel. A rich tin-belt extends from Bukama towards Lake Tanganyika. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south.

The exports are mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold, and diamonds. Capital, Leopoldville (Leopoldville-Kinshasa) (pop. 2,100 whites, 27,000 natives). Principal towns, Boma (pop. 400 whites, 2,300 natives), Elisabethville (Katanga) (pop. 2,100 whites, 12,500 natives); Stanleyville, Eastern Province (270 whites, 7,500 natives), Coquilhatville (300 whites, 10,000 natives).

Revenue (1922)	£s. 700,425
Expenditure (1922)	3,204,422
Debt (1919).	14,000,000

	1920	1921
Imports ..	£9,501,390	£5,520,544
Exports	12,609,820	4,359,601
Imports from U K (1922)		1448,000
Exports to U K (1922)		428,000

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (see "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. Ruanda and Urundi formed the N W corner of German East Africa from 5° S lat to the S borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W of the Victoria Nyanza and N E of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live stock and hides. The administrative capitals are Niassa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

 Consul-General, 20 Cophall Avenue, E C 2.

The Republic of Bolivia extends between lat. 8° and 23° S and long. 57° 30' and 73° W., and its area is about 597,460 square miles*, with an estimated population of 2,825,439. The Republic was formerly comprised in the Spanish Vice-Royalty of *Alto-Peru*, and derives its

* The country has not been completely surveyed, and the area is officially estimated at 599,460 square miles. Other estimates give an area of 708,292 square miles.

present name from its liberator, Simon Bolívar, (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosí are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes, the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, Indian rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony, the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are about 1,775 miles of trunk lines of railways in operation, and 205 miles under construction, and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitani (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also (with a gap of 125 miles) to Buenos Aires (5 days), branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosí. Construction on the railway between La Quaca (on the Argentine frontier) and Atocha (in Bolivia), which, when completed, will allow through railway communication with Buenos Aires, is, after many delays, now being pushed forward by an American corporation. The gap between Tupiza and La Quaca is crossed by an automobile service, taking six hours. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosí to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Army amounts to about 5,000, all ranks, the War

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela, on the west by Peru, Bolivia, Paraguay, and Argentina, on the south by Uruguay, and on the east by the Atlantic Ocean, and extends between lat. 5° 10' N. and 33° 45' S. and long. 34° 40' and 73° 15' W., being 2,620 miles from north to south, and 2,500 from west to east, with a coast-line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 29,632,605.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the

extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra do Mantiqueira* (Itatiaia, 9,000), and the *Serra do Espinhaço* (Itacolumi, 6,000 feet), in the south-east of Minas Geraes, the *Serra do Paranaíba*, between Goyaz and Minas Geraes, the *Serra dos Amores*, which divide Espírito Santo from Minas Geraes, and the *Serra da Gurgueia*, *Branca* and *Araripe*, which envelop Piauí.

Brazil is unequalled for the number and extent of its rivers. The *Amazon*, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingu* meets it within 100 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Mato Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguaçu, which unites with the Uruguay at the Argentine boundary, are the majestic Falls of the *Iguaçu*, and on the São Francisco are the no less famous falls of *Pau d'Áfonso*.

GOVERNMENT—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was deposed and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write, they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members, members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order.—French, Italian, English, German and Spanish.

PRODUCTION—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monazite and low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief

products of the country are coffee, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, herva maté, rubber and tobacco. The rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus, coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *Herra-mate* (tea). The imports consist principally of every description of manufactured articles, but the annual production of home industries is estimated at £45,000,000, of which about half were textiles (1922). Foreign capital to the amount of £200,000,000 has been invested in Brazilian undertakings in the ten years 1908-1917. The protective duties were again increased in 1889, 1893, 1896, 1906, and 1916. In 1922 the exported merchandise was classified (1) animals and their products, £5,398,269, (2) minerals and their products, £1,000,076, (3) vegetables and their products, £68,119,265.

In 1922 the foreign trade of Brazil was shared

as under	Exports to	Exports to
Europe—	America—	USA—
France	U S A	£36,437,000
U K	Uruguay	2,447,000
Italy	Argentina	4,594,000
Belgium		
	All countries	£68,577,600

DEFENCE—The peace effective of the Army is about 50,000 all ranks. The Navy consists of 2 Dreadnoughts, 2 old battleships, 5 protected cruisers, 2 scouts, torpedo boats, and some small vessels and aircraft.

EDUCATION—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy, there were over 1,000,000 pupils in 1920. Secondary and Technical education is carried out by Federal, State and Municipal authorities, with 42,000 pupils in Federal schools and 40,000 in State and Municipal institutions in 1920. Higher education (12,000 students in 1920) is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University colleges at Manaus (Amazonas) and Curitiba (Paraná) and other private colleges.

COMMUNICATIONS—In December 1922, there were 18,110 miles of railway open. Length of telegraph wires, 55,000 miles. In 1922 steam and sailing vessels of 27,450,075 tons (of which 6,344,712 were under the British flag) entered Brazilian ports, the principal harbours being Manaus, Pará, Maranhão, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 40,000 square miles, with a population (1922) of 4,861,439. The prevailing religion of the Bulgarians is the Orthodox Greek Church, with a Gregorian (Western) Calendar (since 1916).

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878), and in 1885 Eastern Rumania was added to the newly-created Principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the Treaty of Neuilly which ceded the S. Dobrud to Rumania and E. and W. Thrace to Greece.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranie* of 246 representatives, elected for a maximum term of four years by adult manhood suffrage. Metropolitan members receive 15 leva, and others 20 leva, a day and travelling expenses.

PRODUCTION.—Agriculture is the principal industry of the people and employs over half the population, the principal crops being wheat, rye, barley, oats, tobacco and fruit. The live stock includes sheep, goats, cattle, pigs, horses, asses and mules. Coal of good quality is mined at Pernik and Trevna, and stone, iron, gold, silver, lead, manganese and copper are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco, the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peac footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 550,000 passed into the ranks of the Army, and of those over 250,000 became casualties. By the Treaty of Neuilly the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good, the number of illiterates in Bulgaria is very small. There are few technical schools. Sofia has a University.

COMMUNICATIONS.—There were 1,845 miles of railway open in 1919 and about 250 miles under construction, 4,000 miles of telegraph line and 1,254 of telephone line. In 1921 there were 932 post and telegraph offices. The principal Black Sea ports are Varna and Bourgas, and Rustchuk, Sistor and Vidin on the Danube. In 1922 the vessels entered at Black Sea Ports numbered 3,034 (1,345,353 tons), and at the Danube ports 4,193 (587,182 tons).

	1922-23	1921
Budget revenue	4,033,120,000 = £5,931,058	
Budget expenditure	3,970,670,997 = £5,836,279	
Public debt (Jan 1, 1923)	£27,027,524,003	

	1919	1921
Total Imports	£3,860,000	£6,491,398
Total Exports	2,209,000	4,927,618

CAPITAL, Sofia, at the foot of the Vitoshka Range, on the River Isker, about 340 miles from the Black Sea port of Varna, and 125 miles from Lom-Palanka, on the Danube. Sofia is the most modern city in the Balkan Peninsula, and an important station on the Vienna Constantinople railway, with a population (1920) of 154,431; other towns are Philippopolis (63,418), Varna (50,819), Rustchuk (41,574), Shvino (28,695), Plevna (27,779), Shumla (23,975), Stara Zagora (25,491), Burgas (22,272), Jambol (19,921), Haskovo (19,458), and Pazardjik (19,452).

FLAG Three horizontal bands white, green, red.

Military Attaché, Major Don Guillermo Zavala

Attaches, Don J. Bittencourt, Don S. Monk, Don A. R. Edwards

Consul, Vicente Echeverría L., 2 York Gate, Regent's Park, N.W. 1

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15' and 55° 50' S., and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth north of 42°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea, but numerous summits attain a great height—the highest being, in Aconcagua Province, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,798 square miles.

The population (June 1, 1924) was 3,885,966. Included in the population are four distinct racial divisions, (a) the Spanish settlers and their descendants, (b) the indigenous Araucanian Indians, Fuegians, and Changos, (c) mixed Spanish Indians, and (d) European immigrants, who were represented in 1920 by 20,000 Spaniards, 15,000 Italians, 14,000 British and Irish, 11,000 Germans, and 10,000 French. In 1923, the births numbered 151,805 (39 a per 1000), marriages, 25,912 (6.7 per 1000), and deaths, 126,877 (32.8 per 1000).

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1820, when a revolutionary war, culminating in the *Battle of Maipo* (April 5, 1818) achieved the independence of the nation. The present constitution bears the date of May 25, 1833. The President is chosen by indirect vote. The National Congress consists of a Senate of 37 members and a Chamber of Deputies of 118 members, elected by direct vote every three years. There is universal adult male suffrage for those who can read and write. From 1879-1882 Chile was at war with Peru and Bolivia, and Peru renewed her application for the return of the provinces of Tacna and Arica which were taken from her by Chile in the "Pacific War." Bolivia also demands an outlet to the Pacific. In 1922 Chile and Peru signed a treaty to submit the Tacna-Arica question to arbitration.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley,

oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish, the exportation of fruit to the United States is still in the experimental stage. The live stock includes (1922) 1,995,538 cattle, 4,569,166 sheep, 399,454 horses, 525,106 goats, and 263,336 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore and iron-ore, the production of copper in 1923 was 128,384 metric tons. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachial in Atacama, and Caracoles in Antofagasta, the centre, copper and silver; and the south, iron and coal (1,164,028 metric tons of coal were mined in 1923, and 146,877 tons of foreign coal were imported). In 1923 the production of nitrate was 1,903,524 metric tons. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woolsens and other textiles, food, and agricultural and mining machinery.

No. of industrial establishments (1922) 3,024, employing 64,740 persons, wage bill \$203,025,898, capital invested \$997,137,740, industrial production \$1,039,031,014, consumption of raw materials \$669,150,052 (including fuel).

COMMUNICATIONS.—There were (1922) about 5,080 miles of railway, of which 1,383 miles are British controlled. In April, 1922, a convention was signed by Chile and the Argentine for the construction of two more Trans Andine lines. In 1922 there were 25,836 kilometres of telegraph, 979 post offices, and 64,357 kilometres of telephone, some worked by English companies, with 4 public wireless stations. The commercial marine numbers (1923) 120 steamers (83,768 tons) and 19 sailing vessels (19,864 tons). In 1923, 3,253 vessels (9,676,919 tons) entered Chilean ports from abroad, and 26,247 coasting vessels (13,038,074 tons), legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 24,062. The Air Force has a peace strength of 2 squadrons, with 60 pilots and 200 mechanics. The navy consists of 1 battleship, 1 ironclad, 6 cruisers, 12 destroyers, 5 torpedo-boats, and 6 submarines, with a complement of 6,560, all ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 64 per cent of the children attended the 3,225 schools in 1923. There is a State University at Santiago. The National Library contains 293,065 volumes. The language of the country is Spanish and the State religion is Roman Catholic.

AREA AND POPULATION

Territory	Square miles	Population
China Proper	1,532,800	414,011,519
Manchuria	363,700	22,083,434
Mongolia	1,367,953	3,000,000
Tibet	463,320	6,500,000
Chinese Turkestan	550,579	2,491,000
Total	4,278,352	448,085,953

The estimated foreign population of China was as follows in 1922: British, 11,855; Japanese, 152,848; Russian, 96,727; American, 9,153; Portuguese, 3,596; German, 1,986; French, 2,300; the total being 282,491. Of a total of 7,921 foreign firms in China, 725 were British, 1,141 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French.

China became a Republic on Feb. 12, 1912, with a President and Vice President and an Executive Ministry, and a Legislature of a Senate (Tsau Yi Yuan) of 264 members and a House of Representatives (Ching Yi Yuan) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (Tuchun) ranking first and holding practically all the powers of government, under them each province is subdivided into circuits superintended by Tsoyuns or intendants, and again into districts. All the territorial officials are appointed by the central government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Kiakhta, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. Mongolia has since developed into an independent self-governing republic, and is in alliance with the Soviet Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

Chinese politics are not easy to understand, as they seem to consist in personal struggles between two or more armed parties, the admitted aim of the victors being personal gain. The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, and since his death in 1916 his subordinates and their successors have been fighting for supreme power. Presidential elections have been held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. In 1924 the military struggle between Wu Pei-fu (the military dictator in Manchuria) and Chang Tso lin, which had turned in favour of the former since the spring of 1922, ended in the defection of the "Christian General," Feng Yü-hsiang, who occupied Peking and declared his intention to put an end to the Civil War, but Wu Pei-fu, who had fled to the south, announced his intention to resist any such attempts, and to make a coalition of the Provinces against the Central Government. The Peking Provisional Government under Feng Yü-hsiang have accepted the resignation of President Tsao-kun, and the Emperor (who had lived in the Imperial Palace since his enforced abdication) has been stripped of his title and driven out of the capital.

EDUCATION.—Many changes in administration and development are under discussion, including a proposal to establish universal compulsory primary education. In 1918-19 there were 124,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows, in *Hankwan taels* (in 1921 the *Hankwan tael*=38 11/2d.)

Year	Imports	Exports	Total
1914	569,241,382	356,226,629	925,468,011
1920	762,250,230	541,631,300	1,303,881,530
1921	906,122,439	641,255,537	1,507,377,976
1922	945,049,650	654,891,933	1,599,941,583
1923	923,000,000		

The import of Indian opium is now prohibited.

External Trade, 1922

Country	Imports from	Exports to
Great Britain (1921)	145,202,550	38,507,874
India	43,139,028	9,816,734
Canada	8,401,444	1,274,037
Hong Kong	239,347,671	169,995,591
Straits Settlements	8,168,720	15,314,245
Belgium	11,154,498	2,349,443
France	4,555,510	40,755,834
Germany	24,744,130	9,804,806
Japan	21,428,885	159,754,351
Korea	9,685,698	21,237,363
Netherlands	7,628,252	5,727,834
... E Indies	13,843,893	9,129,001
Russia	14,270,281	39,244,148
U.S.A.	169,004,534	97,579,046

COMMUNICATIONS.—Railways.—About 7,000 miles were open in Jan. 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtze. In 1922 the total tonnage of the 186,428 vessels and junks entered and cleared at Chinese ports was 124,131,361 tons. Of these ships 40,975 (47,698,139 tons) were British, 111,119 (32,857,745 tons) Chinese, 25,281 (32,961,133 tons) Japanese, and 4,670 (4,846,437 tons) U.S.A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS—The Chinese Maritime Customs is the controlling service, this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the *Inspector-General*. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed, letters can be sent all over the 28 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices (1921) was 2,429 and of postal agencies 8,277. In 1922, 426,363,616 postal packets and 4,791,420 parcels were handled.

BUDGET (July 1919-June 1920)

Ordinary Revenue	Taelis 400,838,021
Extraordinary Revenue	80,581,785
Total	490,419,786
Ordinary Expenditure	Taelis 271,289,205
Extraordinary Expenditure	224,473,681
Total	495,762,888

Chinese Debt (Jan., 1920).

War Loans outstanding	£30,000,000
Boxer Indemnity do	48,000,000
Railway Loans do	40,000,000
General Loans do	50,000,000
Japanese Loans do	30,200,000
Short term Loans do	17,000,000
	£215,000,000

About 200 ad. per head of the population.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was taelis 1,906,000,000, or less than 5 taels (22s.) per head of the Chinese population.

Included in the expenditure is the sum of 224,000,000 taels towards repayment of debt.

MANCHURIA lies to the north of China Proper,

and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000, the desert of Gobi being within its borders. Outer Mongolia, by the Treaty of Kiakhta of 1915, is an autonomous state under Chinese suzerainty, with seat of government at Urga. Its ruler (Khan) has lost practically all political power and Mongolia has become a self-governing Republic, in alliance with the Soviet government at Moscow. A Bolshevik garrison is now maintained at Urga. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, see p. 637.

CHINESE TURKISTAN (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi.

CAPITAL OF THE CHINESE REPUBLIC, Peking. Population (1921), 1,300,000. The population of the principal ports in 1919 is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,000; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kinnghow, 500,000; Nanking, 900,000; Nampo, 2,200,000; Shanghai, 1,600,000; Soochow, 1,100,000; Tientsin, 838,000; Tsingtau, 310,000; Wansien, 752,000; Wenchow, 1,750,000; Winchow, 250,000.

FLAG Five horizontal bands, red, yellow, blue, white, black.

Consul-General in Liverpool, Señor Don Genaro Payau.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of

462,606 square miles, and a population (Census 1918) of 3,355,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Cauquetá and Putumayo. The Patia flows through the famous *Mimma Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumichaca Arch, or *Inca's Bridge* of natural stone. On the Funza is the Great Fall of *Teguedama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1829 *Simón Bolívar* (born 1783, died 1830), established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive, among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in large quantities but is unworked. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of about 6,000 men, the navy has been nearly abolished. Railroads are in their infancy, about 750 miles being open in 1900, with 8,680 (1907) miles of telegraph. There is a bi-weekly passenger and mail aeroplane service (German) between Barranquilla and Girardot, the transit to the coast from Bogotá being thus reduced to two and a half days, a similar service, by same company, is in operation between Cartagena and Barranquilla. The rate of exchange is about \$5 gold = £1 (approximately).

Spanish is the language of the country.

COSTA RICA

(República de Costa Rica.)

President (1924-8), Ricardo Jiménez, assumed office May 8, 1924

Minister of Foreign Affairs, Juan Rafael Argüello de Vais

Treasurer, Tomas Soley (Grell)
Interior, Rafael Castro Quesada
Education, Napoleon Quesada
Works, Carlos Vohlo
Public Safety, Pompilio Ruiz

Minister in London (vacant)

Consul-General, Percy G. Harrison, 7 Crosby Square, E.C. 3

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 12° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1923) of 498,435.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1923) are coffee (£968,865), bananas (£1,066,968), sugar, gold, and silver bullion, cacao, hardwoods, vegetables, skins, and hides. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1923, 59 per cent. from United States, 16 from United Kingdom, 6 per cent. from Germany, 2 from Central America, and 8 from Hispano-America).

The chief ports are Limón, on the Atlantic coast, through which passes the whole of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast. In 1923, 567 foreign vessels (957,722 tons) entered at Costa Rican ports. About 405

miles of railroad were open in 1923. In 1923 there were 299 post offices, dealing with 5,600,000 packets, and 142 telegraph offices (one wireless), with 2,180 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

The island of Cuba (the largest of the "West India" Islands) lies between 74° and 58° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 2,889,004 (Nov. 1919).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886. The government of Spain was marked by a generally corrupt administration, compli-

cated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1903, when the U.S. Government resumed control. On Jan. 28, 1904, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent of these being under sugar cane and 30 per cent under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pine apples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar (sugar crop in 1921-2, 4,047,236 tons; 1922-3, 3,601,056 tons), the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line, there are about 1,500 miles of roads.

Spanish is the language of the island.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the Czecho-Slovak Republic, and ten days later the *Národní Výbor* (National Council) of Czecho-Slovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S., the German and Polish Republics on the N., the German Republic on the W., and the Ukraine Republic on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia, and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Verežka)—a total area of about 54,877 sq. miles with a population (Census of 1921) as under—

Bohemia	6,781,936
Moravia	2,633,027
Slovakia	2,950,824
Silesia	650,442
Ruthenia	596,601

Total 13,688,830
 Of the total population 6,000,000 are Czechs, 3,700,000 Germans, 1,700,000 Slovaks, 1,200,000 Magyars, 300,000 Ruthenians, and 280,000

Poles The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The present Ministry is a Coalition of 5 parties (Social-Democrats, Agrarians, National-Socialists, National-Democrats, and People's Party (Clericals), which (as the result of the 1923 elections, supplemented by the elections in Ruthenia in 1924) control 165 votes in a Chamber of 208. The principal Opposition groups are the various German-Bohemian parties and the Communists. The Constitution guarantees religious and political freedom. About 75 per cent of the people are Roman Catholics.

As regards both natural resources and industrial development, Czecho-Slovakia is one of the richest territories in Europe. By the Peace Treaty it has acquired about 80 per cent of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovaia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead, are all mined successfully, while the whole country is abnormally rich in mineral and thermal springs. Oil is found in Slovakia, and Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Outside of Slovakia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czecho-Slovakia is in a far more flourishing state than most of its neighbours.

Czecho-Slovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, via the Danube, to the Black Sea.

DANUBE COMMISSIONS.

The *International Danube Commission*, with its present headquarters at Bratislava (Pressburg), Czecho-Slovakia, was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czecho-Slovakia, France, Great Britain, Hungary, Italy, Rumania, Wurttemberg, and Yugoslavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Wurttemberg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube*, created by the Treaty of Paris 1856, after the Crimean War, the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal), this canal will be deepened to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the

Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in *Rumania*; Russchuk, Vidin and Iom Palanka, in *Bulgaria*; Belgrade, the capital of *Yugo-Slavia*; Buda-Pest, the capital of *Hungary*; Bratislava (the present seat of the Commission), in *Czecho-Slovakia*; Vienna, the capital, and Linz, in *Austria*; Passau and Regensburg, in *Bavaria*; and Ulm, in *Wurtemberg*.

DANZIG

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the *Treaty of Versailles*, the City of Danzig with the surrounding territory (constituting a total area of about 726 sq miles, with a population estimated at 356,000) was cut off from Germany in favour of the Allies who undertook to set up a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign Affairs. The Free City was constituted Nov 15, 1920, with an executive Senate and an elected Legislature of 120 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan, 1922, the Free City entered the Polish Customs Union. The principal exports are timber and sugar, and the imports beetings, coal, machinery, artificial manures, fats, foodstuffs and textiles. The tonnage of ships entered in 1923 was 1,731,747 tons, and of those cleared 1,710,433 tons.

Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Newcastle-on-Tyne, and Leth

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, &c, the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N lat and 8° 5'—12° 40' E long, with an area of 15,042 square miles, and a population (July 1, 1921) of 3,283,000, an increase of 210,000 since 1920 (164,500 being due to the inclusion of Slesvig). Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1923, 1,270,900 hectares were under corn crops, 464,800 ha sugar and other beets, and 863,400 ha hay crop. In July, 1923, the live stock numbered 561,949 horses, 2,523,080 cattle, 373,684 sheep, and 2,854,854 swine. The crops in 1923 included 6,296,600 qrs of oats, 3,586,200 of barley, 1,786,900 rye, 2,719,600 mixed corn and 1,076,100 qrs of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a sea-going mercantile marine of 622 steamers, with a tonnage of 464,875. There are (1923) 3,087 miles of railway and 9,500 miles of telegraph line.

DEFENCE.—The Army consists of about 12,000 trained men, the vote for 1922-23 amounting to Kr 36,000,000 (including supplementary estimates of Kr 2,000,000). The Navy consists of 4 coast-defence ironclads and 1 completing, 2 small cruisers, 23 torpedo-boats (built and building), 14 submarines (built or building).
Vote, 1922-23, Kr 19,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with close on 35,000 inhabitants. They include the FARØE, or Sheep Islands (515 sq. m., pop. 1921, 21,400), GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1921, 14,400), the trade of which is a Government monopoly.

Consul, Octavio Ventura.

Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the

oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian" tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of 19,322 square miles, with a population of 897,405.

On 29 Nov., 1926, American Military Forces landed in Santo Domingo and a military Government was proclaimed. From Oct. 21, 1922, a provisional Dominican government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of the Foreign obligations, which continue to be administered by an American official. The position of the Sinking Fund is such that it has been possible to remit in advance of payments due over \$8,000,000.

Sugar and cocoa are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton, wax, honey, logwood, turtle-shell, hides, maize, lignum vitae and divi-divi. There are about 150 miles of public railroad, and telegraphic (2 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curaçao, Porto Rico and Cuba. The programme of highway construction is being actively pursued, and in addition to the highway (already completed) across the island, a direct road from Santo Domingo to Port au Prince, the capital of Haiti, is well advanced. Up to Oct. 31, 1924, there were 343 miles of first-class road constructed and opened.

Of the import trade in 1923, 71 per cent. came from U.S. and 5 per cent. from Great Britain. British trade is hampered by lack of resident British merchants, lack of British industrial undertakings in the Republic, and by the slowness of transit by a German line with monthly sailings from London.

ECUADOR.

(República del Ecuador.)

President (1924-1928), Dr Gonzalo S Cordova, assumed office Sept 1, 1924

Foreign Affairs, Señor José Rafael Bustamante
Interior, Señor Alberto Larrea Chiriboga
Finance, Señor Miguel Angel Alborno
Public Instruction, Señor Dr Camilo O Andrade
War and Marine, Señor Leonardo Sotomayor,

Minister in London, Señor Don Gonzalo Zal duñade

Consul-General in London, Señor Don Ernesto Chacon, 23 College Hill, Cannon St, E C 4

Consuls at Liverpool, Birmingham, Southampton, Glasgow, and Cardiff

An equatorial State of South America, extending from lat 1° 38' N to 6° 5' S, and between 60° 20' and 81° W long (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq miles

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822)

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft), Imiza (17,405 ft), Carhuarazo (16,515 ft), Cotacachi (16,301 ft), and Pichincha (16,000 ft) in the Western Cordillera, and Cotopaxi (19,498 ft), Antisana (18,864 ft), Cayambe (19,160 ft), Altar (17,730 ft), Sangay (17,454 ft), Tungurahua (16,690 ft), and Simuloga (16,365 ft) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common

Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, sugar, orchilla weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle, the chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The Galápagos (Tortoise) Islands (2,870 square miles) belong to Ecuador

The language of the country is Spanish

Egypt lies between 22° and 32° N lat and 24° 37' E long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the east, N of Sollum

* The actual External Debt at parity of exchange is only *Sucres* 38,275,487, but at the official rates ruling Sept 1924, it amounted to the sum mentioned above.

(long. 25° E.), inland in a south-westerly direction for some distance and then turns S along a meridian line approximately in long. 24° E. until it meets the parallel of 22° N. lat. which forms the N. boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. Within these boundaries is enclosed an area of about 363,124 sq. miles, with a population (Census of 1917) of 12,718,255, estimated (1923) at 13,885,000.

Physical Features—The Nile valley varies in width from less than half a mile in the southern granitic region to over 20 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouth. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S E to N W are known as Kharga, Dakhla, Farafra, Bahariya, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 185 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 120 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the wadis, and running water (mostly brackish) is found at a few points.

Native Population—There are three distinct elements in the native population of Egypt. The

largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellah*=ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1917 (including 126,432 local subjects of foreign origin). A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (38,663 Bedouins and 107,364 Sudanese and Berberin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswan and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,932 other Europeans and Americans, and 1,496 Persians.

Religions—At the Census of 1917 there were 11,623,753 Muhammadans, 1,026,107 Christians, 59,581 Jews and 8,812 other religions.

Government—From B C 30 to A D 639 Egypt was a province of the Roman Empire, but in A D 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841. *Isma'il* (1863-1879), was granted (by *firman* of May 14, 1867) the title of *KHEDIVE*, the previous rulers having held the title of *Vah*, or Governor. The wild extravagance of Isma'il drove him to raise enormous loans in Europe, which plunged the country into such financial embarrassment that the Governments of France and Great Britain intervened and forced Isma'il to abdicate, appointing his son *Tewfik* (1879-1892) to succeed him. A series of reforms was initiated, but further progress was interrupted by a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arabi Pasha*). The revolt assumed alarming proportions, but the French Government declined to intervene, and a British expedition was despatched to re-establish the authority of the Khedive. The British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam. In 1898 Tewfik was succeeded by his elder son *Abdûl II*, who declared himself an adherent of the Central Powers and was deposed in 1914, Hussein Kamil *Pasha* being appointed in his stead. On November 18, 1914, a British Protectorate was declared over Egypt, which was therefore taken from the suzerainty of the Sultan of Turkey, and the Khedive assumed the title of Sultan. Sultan

Russell Kamil died October 9, 1917, and was succeeded by his brother, the present King. In March, 1922, Egypt was declared to be an independent kingdom. The Constitutional *shar'ia* was elaborated on April 19, 1923, by Royal rescript and general elections took place for a Parliament, consisting of two houses, which assembled March 15, 1924.

Local Government.—The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudiriya*), which are subdivided into districts (*markaz*), each under a *munir*, who controls the head man (*oudda*) of each village in his district. By the law of 1883 provincial councils were instituted consisting of two representatives from each *markaz*, under the presidency of the *munir* (or governor) of the province. These councils were reorganized in 1920 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 9 batteries of artillery, 3 companies of engineers, 7 battalions of infantry and 1 armoured car company. Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot, but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £250, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which consisted of 992 officers and 20,762 men in 1923.

There is no Navy in the proper sense of the term, there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 369 officers and 6,162 men. There are also 60,859 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1923-24 there were 151 *Elementary Schools (Maktabs)* under Government supervision, with 23,996 pupils and 3,710 *Maktabs* under inspection for grants-in-aid with 279,409 pupils, there were also 54,528 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,128 Egyptian institutions with 117,935 pupils and 569 foreign institutions with 56,916 pupils. There are *Colleges of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture* at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture.—The total area of Egypt is esti-

mated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,400,000 acres (1919), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. By these works, and by the construction of a vast network of canals with controlling masonry works, a small part of the excess waters of the river have been stored and distributed at all seasons of the year, and perennial irrigation has been extended throughout Middle and Lower Egypt. The increase in the value of the land has been enormous, and some 2 million acres have been added to the cultivable land of Egypt. Although nearly the whole population is directly or indirectly connected with agriculture, the total given in the census return of 1917, under the headings of proprietors, tenants and labourers, &c., amounts to 4,008,900 persons, representing only 30½ per cent of the population. In 1921 the land was held as to 5,029,919 *faddans* by 1,923,396 native owners, and as to 565,788 *faddans* by 8,021 Europeans. The agricultural land is of two kinds. The first is that which is under the basin irrigation system, by which the land receives one watering only. This watering consists of a flooding at high Nile as the flood decreases, the seeds of the various crops are sown, and the basin fields are left without further watering. Harvests of wheat, barley, beans, clover, vetches and lentils are gathered in due course. The second kind of land is that which is perennially irrigated by means of canals, and receives waterings according to rotations laid down by the Irrigation Department. In these lands, which are for the most part in Lower Egypt, cotton, maize, wheat, rice, beans, barley, sugar cane, clover, vegetables and fruit are the chief crops. The agricultural year is divided into three seasons or periods. *Sayr* (summer) commences about March and ends about October, the exact dates of sowing and harvesting varying according to the crops and to the localities. The principal crops grown during this period are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nih* (flood), part of the preceding one, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chitir* (winter) commences in November and ends in June. The principal crops are cereals, berseem (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. In 1923 there were 1,588,000 *faddans* under cotton, the crop being estimated at 6,531,000 kantars. In 1923 the cotton exports were 7,472,611 kantars, valued at £849,516,359.

Live Stock.—In 1923 the cattle numbered 624,459, buffaloes 626,228, horses 36,573, mules 22,235, donkeys 603,389, and pigs 15,768.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly

situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries—The principal articles of Egyptian manufactures are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, and cigarettes. The principal Egyptian Industries are dyeing, tanning and cement.

Railways—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollüm, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1923, was 1,600 miles. 26,515,000 passengers and 4,055,000 metric tons of merchandise were carried during 1922-3, the net receipts being £11,564,036. The gauge is standard (4 ft 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 818 miles of light railways exploited by public companies.

Caravan Routes—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arabi, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping—For the SUEZ CANAL see pp 832-3 and p 90.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft, the principal are those of Sollüm and Matruh on the Mediterranean, Ioi, Abu Zenma, Zeitia, Jemsa and Hurgada in the Gulf of Suez, and Safage, Qoseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a dépôt at Suez. The principal port is Alexandria, where 1,574 vessels (3,107,966 tons) entered and 1,564 vessels (3,103,481 tons) cleared in 1922. The traffic through Port Said amounted in 1922 to 565 vessels entered and 584 cleared.

Posts and Telegraphs—There were in 1922 2,942 post offices and stations, dealing with a total inland correspondence of 28,010,000 (including letters, post-cards, newspapers, &c.), and a

total foreign correspondence of 36,523,000. There were on March 31, 1922, 126,752 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sandf* (village tax-collector).

	1923-24.	1924-25.
Revenue	£36,252,939	£34,400,000
Expenditure	31,466,479	34,275,483
Total Imports	£43,333,938	£45,276,941
Total Exports	48,716,418	58,367,327
Imports from U K	14,731,622	14,771,823
Exports to U K	23,035,915	28,354,993

Debt—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund, the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1923 and 1924—

	1923	1924
Guaranteed Debt, 3½ per cent	£ 5,405,300	£ 5,271,200
Privileged Debt, 3½ per cent	31,127,780	31,127,780
Unified Debt, 4 per cent	55,971,960	55,971,960
Total	92,505,040	92,370,940

The *Cost of the Debt* (in the Budget for 1923-24) inclusive of £5664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899, which were guaranteed on the Egyptian Tribute, was stated at £4,616,509.

CAIRO, the capital (population about 800,000), stands on the E bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Anf, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalili, the Hamzawi, and the Bazaar Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population about 480,000), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (see p 90). It now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1917 the towns of Tanta (74,195), Port Said (75,192) and Assiut (51,431) also exceeded 50,000 inhabitants. CAPITAL, Cairo.

FLAG: Green, with a white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea and on the E. by Lake Peipus and Soviet Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dagö, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 17,953 sq. miles (within the boundary settled by agreement with Soviet Russia), with a population (1920) of about 1,250,000. A large portion of the surface consists of forests, moors, and small lakes. Agriculture is the chief industry, rye, oats, barley, and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, oil pressing, woollen, cotton, tobacco, cork, soap, and

petroleum. There were (1922) 684 miles of broad gauge and 420 miles of narrow gauge railway in operation.

Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Regent.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent, sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the agitation of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 125,585 square miles, with a population (1923) of 3,205,202 of whom 2,594,228 are Finns, 340,965 Swedes, and 2,602 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. The Åland Archipelago, a group of some 300 small islands at the

* To U.S.A. \$46,502,284; to U.K. \$322,592; to France 6,382,944

entrance to the Gulf of Bothnia (area 210 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsingfors and 2 at Åbo, the university of Helsingfors (founded 1640) has 3,000 students, of whom 700 are women. In addition, there are 1 technical and 2 commercial high schools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (49,400,000 acres) are a great source of wealth, there is no European country so wealthy in forests except Russia, the exports of timber in 1923 being 1,857,273 standards (chief customer U.K. 760,069 standards) dairy produce is also exported, the butter exports (1923) being 6,566 tons (U.K. 5,968 tons). There are (1923) 2,773 miles of railroad and about 3,550 miles of telegraph, with a well developed telephone system. There is railway connection with Sweden and Russia and telephone connection with Esthonia, Russia, Sweden and Norway. The merchant fleet (1924) consists of 4,825 vessels (mostly small), of which 717 are steamers.

Service in the Army is universal and compulsory, the peace effective being about 36,600 all ranks, there is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finnish and Swedish are the official languages

Commercial Attaché, Vicomte du Halgouet.
Financial Attaché, M. Pouyanne.
Consul General (attached to the Embassy), M. J. Knecht.

Secretary Archivist, Comte La Combe.
Consulate General, 51, Bedford Square, W.C. 1.
Consul-General, M. Campana.
Consul at Liverpool, M. de Ledoux.
There are also Consuls at Southampton, Newcastle-upon-Tyne, Cardiff, Glasgow, Dublin, and in Jersey.

The most westerly State of Central Europe,

JEREMY PARSIFORS—M. Doumergue is the eleventh President of the Third Republic. (1) Marshal Mac Mahon (May 24 1873, resigned Jan. 30, 1879). (2) M. Jules Grévy (1879 resigned Dec. 2, 1887). (3) M. Sadi Carnot (Dec. 3, 1887, assassinated at Lyons, June 25, 1894). (4) M. Félix Faure (June 27, 1894, resigned Jan. 15, 1898). (5) M. Paul Bourgeois (Jan. 17, 1898, died Feb. 16, 1899). (6) M. Emile Loubet (Feb. 18, 1899, until Feb. 28, 1906). (7) M. Armand Fallières (Feb. 18, 1906, until Feb. 28, 1913). (8) M. Raymond Poincaré (Feb. 28, 1913, until Feb. 28, 1920). (9) M. Paul Deschanel (Feb. 28, 1920, resigned Sept. 19, 1924). (10) M. Alexandre Millerand (Sept. 20, 1924, resigned June 11, 1924).

extending from $42^{\circ} 20'$ to $51^{\circ} 5' N$ lat., and from $7^{\circ} 45' E$ to $4^{\circ} 45' W$. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 89 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfurt* (May 10, 1871) amounted to 5,602 square miles, that retained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 6, 1921) of 39,209,666 (inclusive of Alsace and Lorraine). In 1922 there were 759,846 births, 383,220 marriages, 27,684 divorces, and 689,257 deaths, in 1920 the excess of women over men was 2,500,000.

France has always been attractive to foreigners, of whom (1921) 1,550,449 were resident there, including 470,873 Italians, 415,546 Belgians, 303,141 Spaniards, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 21, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 20, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the *Senate* of 300 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the *Chamber of Deputies* of 597 members (elected by direct vote for 4 years). Members of the legislature receive 15,000 francs a year and travelling facilities over the railways.

PRODUCTION—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production in 1913, 1921 and 1922 is shown in the following table—

Crop	1913	1921	1922
	Quintals	Quintals	Quintals
Wheat	86,919,050	88,034,200	64,000,000
Rye	12,714,750	11,276,110	9,500,000
Barley	10,437,600	8,342,850	8,600,000
Oats	51,826,010	35,422,950	35,500,000
Potatoes	125,859,652	83,096,550	83,000,000

The extent of land completely devastated by artillery fire in France was 3,306,350 hectares, comprising 4,329 communes. There were 794,000 dwellings destroyed or damaged, of which on Oct. 20, 1922, about 408,000 had been reconstructed. Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. The vine is cultivated to a very great extent (69,250,000 hectolitres of wine were produced in 1922), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important

industry, and the production in 1921 amounted to 482,986,573 gallons. The live stock (1922) included 13,375,840 cattle, 9,782,420 sheep, and 5,196,000 pigs. The mineral resources include coal, pig-iron, copper, lead, silver, antimony, and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a plebiscite whether they will remain French, return to Germany, or become a self-governing community. The coalfields about on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1921 the mines of France produced 30,000,000 tons, but in spite of the damage done to them it reached 31,163,000 metric tons in 1922. Payments already made for the reconstruction of war damage of all kinds amount to 98,000,000,000 francs, and it is reckoned that another 84,000,000,000 francs will be necessary to complete the cost of compensation and reconstruction. Under Annex V of the Treaty, Germany also undertakes to deliver to France 7,000,000 metric tons of coal annually for 10 years, and to make good any deficiency due to war causes in the production of coal in the departments of Nord and Pas de Calais. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk, and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE—The National Army of France consists of the Metropolitan Army, the Colonial Army, the Gendarmes, and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. These forces have a total strength on a peace footing (in 1922) of 356,600 all ranks (exclusive of the Armies of Occupation in the Ruhr, the Saar and in Syria, which absorbed 132,000 all ranks). In the War of 1914-1918 over 20 per cent of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis, and Morocco). Of this total over 1,500,000 were returned as killed or missing. By law of 1919, the French Army consists of 350,000 all ranks on a peace footing, and a reserve (including Territorials) of 2,000,000 all ranks. The French Navy was manned in 1920 by 55,000 officers and other ranks, and consisted in 1923 of 6 Dreadnought and 3 Pre-Dreadnought battleships, 6 cruisers, 5 light cruisers, 51 destroyers, and 47 submarines, 20 airships and 98 aeroplanes.

ARMISTICE MONUMENT—In the Forest of Compiègne is a *Campagne de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Marshal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir*.

EDUCATION—The educational system is highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs,

whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *prefet*, charged especially with primary education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary* *Secular, comp. and free*. Age 6-12. Schools include (a) infants; (b) lower primary; (c) higher do Supplementary courses, and courses for adults Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed (ii.) *Secondary*. State lycées, communal colleges, and many private establishments, 7 yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. Sévres school and the Sorbonne Association well-known (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education) Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse

COMMUNICATIONS—The length of the *Routes Nationales* in 1921 was 23,828 miles in France, and 728 miles in Alsace-Lorraine. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways having a length of (1922) 4,512 miles, with 3,031 miles of canals. The system of railroads in France is very extensive, they are almost entirely *concedés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1923, was 25,776 miles, the total receipts from passenger and goods traffic, &c., being £126,299,380 (£1 = 50 fr.) In 1922 there were 50 fatal accidents on French railways, with 96 killed and 544 injured, in 1921, 72 accidents with 137 killed and 656 injured, and in 1920, 124 accidents with 122 killed and 1,064 injured. The length of telegraph wires is 118,129 miles, and of telephone lines 99,514 miles.

Shipping—The gross tonnage of the French mercantile marine in 1922 was 3,560,000 gross tons, of which 366,000 gross tons were sailing vessels. Under the Armistice clause France has received 109 ex-German vessels (445,543 gross tons). During the year 1923 the tonnage of French and foreign vessels entering French ports amounted to 41,764,014 tons, of which 11,686,253 tons were French, while the total clearings amounted to 30,627,896 tons, of which 8,537,809 tons were French. The chief ports are Marseilles, Rouen, Bordeaux, Le Havre, Calais, Boulogne, Dunkirk, and Cherbourg. A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments.

COMMERCE—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk

tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Alsace-Lorraine—High Commissioner, M. Mulhan (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfurt* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918 the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxembourg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles, the population in March, 1921, was 1,709,749. Principal towns, Strassburg (pop 166,767), Mülhausen, and Metz.

Algeria—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36' W. to 6° 16' E. longitude,

* "Special" Revenue is that recoverable under the Peace Treaties

37° 6' N to an undetermined S. limit, about 30° N, covering an area estimated at 222,120 square miles, with a population (1921) of 5,806,090, of whom 829 were Europeans and 4,976,262 natives. The revenue in 1922 was estimated at francs 707,047,499, and the expenditure at francs 707,326,774. The bulk of the trade is with France, the exports to France amounting in 1920 to francs 934,715,000 (total exports fr 1,355,372,000), and the imports from France to fr 1,291,005,000 (total imports fr 3,072,707,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates (372,019 metric tons in 1921), cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1919 there were 2,228 miles of railroad open for traffic, and in 1921 the number of ships engaged in foreign trade entering and clearing Algerian ports was 4,067, of a net tonnage of 7,685,112 tons. The principal town is Algiers, the capital (population, 1921, 551,949), a most important coaling station and much frequented as a health resort, other large towns are Oran, Constantine, Bône, and Tlemçen. Governor-General, M. Théodore Steeg.

CAPITAL, Paris, on the Seine. Population (1921), 2,906,472, there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000—Marseilles 586,341, Lyons 561,592, Bordeaux 267,409, Lille 200,952, Nantes 183,704, Toulouse 175,434, St Etienne 167,967, Strasbourg 166,767, Nice 155,839, Le Havre 163,374, Rouen 123,712, Roubaix 113,265, Nancy 113,226, and Toulon 106,331. Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000. FLAG The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

FRENCH COLONIES

Colony, &c.	Area	Population
Indo-China	257,000	18,000,000
Asia Minor	150,000	4,500,000
Africa	4,100,200	43,550,000
America	33,200	500,000
Oceania	10,000	100,000
Total	4,550,400	66,650,000

In ASIA—French India includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta, Yanaon, in the Godavary delta; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 266,000. French Indo-China comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898 the port of Kwang-Chow-Wan

was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1922) estimated at 19,983,203, including the civil European population of about 17,500.

In ASIA MINOR—The French mandatory sphere of Syria, Cilicia and Lebanon has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (see also pp. 825-6).

In AFRICA—Algeria (see above) is an integral part of France. Morocco (see p. 806-7) is a French (and partly Spanish) protectorate.

Tunis (Bey of Tunis, Sidi Mohammed ed Habib, acceded 1922) has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq miles and an estimated population of 2,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates. The chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent of the trade is with France and Algeria. Tunis, the capital, has a population of 230,000; other towns are Sfax (84,000), Bizerta (30,000), Susea (30,000), Kairwan (22,000), Gabes (16,000), and Monastir (6,000). French West Africa extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of Senegal (74,000 sq miles, pop. 1,250,500), capital, St. Louis; Upper Senegal Niger (304,000 sq miles), and the Niger Military Territory (533,000 sq miles), which have a total population of about 6,036,200; French Guinea (92,600 sq miles, pop. 1,737,350); Ivory Coast (126,100 sq miles, pop. 1,216,300); and Dahomey (38,000 sq miles, pop. 878,500), adjoining Dahomey is the French Sphere of the former German colony of Togoland (23,400 sq miles, pop. 800,000), while the hinterland of these colonies forms the French Sahara, which has an estimated area of 924,160 sq miles and a population of about 450,000. French Equatorial Africa consists of the French Congo (513,000 sq miles, pop. 9,000,000) and of the French Sphere in the former German territory of Cameroon (267,000 sq miles, pop. 2,750,000). French East Africa consists of the Somali Coast (46,300 sq miles, pop. 208,000) and of the large island of Madagascar (226,000 sq miles, pop. 3,153,500) with its dependencies (Noséi Bé, Sainte Marie, Réunion, and the Mayotte-Comore Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber, the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andoveranto and Vohémar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication

across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St Pierre and Miquelon. In the West Indies, Martinique and Guadeloupe, with Haïme Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St Martin, and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

In AUSTRALASIA.—New Caledonia (7,300 sq ms, pop. 50,500) is a large island with many dependencies, and the Society Islands (Tahiti, &c) and other islands have a total area in the Pacific Ocean of 8,378 square miles, with a population estimated at 81,100. The New Hebrides are under joint Franco-British administration.

GERMANY (Deutsches Reich.)

Place, W C 1.*

The area of Germany is approximately 172,270 square miles, with a population on Oct 8, 1919 of 59,558,284, of whom 28,498,891 were males and 31,359,393 were females. The population on Dec 1, 1910 was 64,925,993. Births in 1921 numbered 1,611,420 and deaths 911,172, births being 26·1 per 1,000 of population, deaths 14·8 per thousand.

Religious confessions in the present area were in 1910—Protestants 38,117,501. Roman Catholics 19,326,306, Jews 538,972, others 472,132.

There are 43 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 1 each in Württemberg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug, 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the *Treaty of Versailles* the "Reichland" of Silesia-Lothringen and the Saar coal basin (temporarily) were ceded to France, parts of Posen and West Prussia to the newly-formed Republic of Poland, North Schleswig to Denmark; and Moreauet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace treaty, resulted

in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq miles in Africa, 96,210 sq. miles in the Pacific, and 2,943 sq miles in Asia—a total of 1,134,239 sq miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France, German East Africa to Great Britain, German S W Africa to the Union of South Africa, the German Pacific possessions N of the Equator to Japan, and those S of the Equator to Australia and New Zealand.

On Nov 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles. In Jan 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb 11, 1919, the first President of the German *Versammlung* was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States. The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschaftsrat*).

PRODUCTION AND INDUSTRY—Germany, up to the commencement of the War, was becoming more and more a manufacturing country. In 1907, 32·6 per cent of the population were supported by agriculture, 37 per cent by industry and mining 11·5 per cent by trade and communications. Of the total area in 1907, 28,632,140 acres were under cultivation, and 24,272,141 acres were woods and forests. The Live Stock (Dec 1, 1922) included 3,650,804 horses, 16,316,725 cattle, and 14,679,030 pigs. Germany supported about nine tenths of her population by her own produce in 1914. The mineral produce was valued in 1912 at £522,250,000, and included 190,109,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore, potash, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-iron producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

Under the stimulus of the falling mark exchange, which favoured competition abroad and induced the home public to convert its depreciating currency into solid goods, Industry

flourished almost uninterruptedly between 1920 and late 1923, since when (in connection with currency stabilisation) business has been depressed. As compared with 1929 production of all industrial goods has recovered, but in most cases remains below that of 1913. Bankruptcies for a time almost disappeared, but increased again rapidly in the first half of 1924.

OLD AGE AND INFIRMITY INSURANCE—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journey-men, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, chairwomen, overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work, old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employees and others above the class of manual workers, became law in 1911. A Bill establishing Federal Unemployment Insurance for industrial workers (not farm labourers or domestic servants), clerks, actors and orchestra musicians, and a Bill providing a Federal Labour Exchange Organization, are before the Reichstag. The income limits within which social insurance is compulsory were constantly changed owing to the currency depreciation. In late 1923 many social insurance organisations were reported to be in financial difficulties.

DEFENCE—By Article 160 of the *Treaty of Versailles* the German Military Forces, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German Naval Forces must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the

previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval Air Forces, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS—The total length of the Railroads at end of 1921 was 55,557 kilometres, of which all except 3,613 kilometres belong to the Republic. Under the *Dawes Reparation Scheme* all state railways are transferred to a joint stock company. The number of registered automobiles (July 1, 1922) was 82,692, and motor cycles 38,048, and motor lorries 43,711. Length of Telegraph Lines (1921) 224,000 kilometres (length of wires, 2,379,000 kilometres); telegrams handled in, 81,522,000, post offices, 35,390, telegraph offices, 47,401, wireless stations, 251, telephone call-stations, 40,795, letters delivered, 4,820,000,000, cash on delivery orders, 19,160 million marks, money orders, 14,588 million marks. The number of employees in the service of posts, telegraphs, and telephones was 475,187. The State postal services were taken over by the Federal Government in 1920. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914-1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17.65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register), number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons, 1920 241,985 tons, 1921 509,064 tons, 1922 575,264 tons, 1923 358,000 tons. On June 30, 1923, shipping had increased to 2,590,073 tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe, Bremen, on the Weser, Stettin, on the Oder, Königsberg, on the Pregel, Kiel, on the Baltic (connected with the Elbe by the Kaiser Wilhelm Canal), and Lübeck, on the Baltic. Kiel is being converted into a free port. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at Hamburg were 1913, 14,195,496 net tons, 1923, 15,344,000 net tons. Bremen shipping traffic also exceeded that of before the War.

FINANCE—Under Articles 248-263 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Elten, on the Netherlands' frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of a milliard gold marks, together with a sum equivalent to 26 per cent of German exports. Of the amounts

thus payable the various shares from 1921-1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety seconds; from 1929-1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths; and for the succeeding 31 years France 126 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts. A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for standard annual payments of 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (2) railway bonds, and (3) bonds imposed on private industry. The total capital Reparations liability was not refixed.

In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *rentenmark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold-mark. These values have since been maintained, but both currencies will be gradually exchanged for new gold-mark notes, to be issued by the Reichsbank as reconstituted under the Reparations settlement. Although the currency reform of 1923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depreciation in the value of the taxes received. For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the last months of the financial year 1923-24 a complete budget balance was attained, and small surpluses remained for extinction of Debt, and the first five months of the financial year, 1924-5 (April-August, 1924), also passed without deficits. The *Budget Estimates for 1924-25* (in which are not included the separately financed *General and Posts*) were—

General Administration Budget —		1,000,000 Gold Marks.
Ordinary revenue	5,144	
" expenditure	4,942	
Extraordinary revenue	130	
" expenditure	130	

Budget for Treaty Executions —		
Revenue	nil	
Expenditure	640	

The above Budgets contain no provision for Reparation payments.

The German Debt

The *New Debt* of the Republic, as contracted in gold or dollars since 1923, totalled (on May 31, 1924) 1,747,000,000 gold marks. The *Old (mark) Debt*, consisting of pre-War and War borrowings (and including Debts taken over from the States in connection with the expropriation of the State railways) totals 70 milliard marks. All this *Old Debt* is regarded in law as a *paper-mark liability*, and has therefore no present value. The Third Taxation decree of Feb., 1924, enacted that bondholders cannot demand payment of interest on, or repayment of the capital of, any part of this *Old Debt* until after all Reparations liabilities have been repaid.

German Trade

	1923	1922
Total Imports	11,654 mill gold marks	6,081 mill gold marks
Total Exports	10,891 mill gold marks	6,079 mill gold marks
Imports from U K	£60,499,693	£53,836,000
Exports to U K	80,411,052	35,001,000

GERMAN FEDERATED STATES.

PRUSSIA

GOVERNMENT (April 28, 1921).

President, Herr Braun
Interior, Herr Severing.
Finance, Herr Richter
Agriculture, Herr Wendorff
Trade and Commerce, Herr Siering
Instruction and Worship, Herr Boehltz.
Minister of Justice, Herr am Zehnhoff.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1919 of 113,750 sq. miles and a population on Oct. 8, 1919 of 35,004,272 (Saar district excluded).

Of the total population 17,250,644 were males and 18,843,668 females. The number of births in 1921 was 1,001,472, against 1,209,500 in 1923. The number of deaths in 1921 was 529,179, against 656,490 in 1923. Marriages were 462,107 against 323,709. The surplus of births over deaths in 1921 was 438,897 or 11.29 per 1000 inhabitants.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Pregel, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,553 feet. The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	Gold Marks
Revenue (Estimate) 1921-22	1,580,000,000
Expenditure do.	2,128,000,000
	Paper Marks
Total debt (floating, April 1, 1921)	3,400,000,000

The whole of the old *Funded Debt* of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some

adjacent rural communes, was created Great Berlin with a population of 3,803,770.

Other largest cities are Cologne, on the Rhine (633,904), Breslau, on the Oder (528,260), Essen, on the Ruhr (439,257), Frankfurt, on the Main (433,000), Düsseldorf, on the Rhine (407,338), Hannover, on the Leine (392,805), and Dortmund on the Emscher (295,006).

BAVARIA

Munster-President, Dr Held

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 34' N lat and 9° 01'—13° 50' E long., the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 square miles, and the population (in 1919) 6,108,703. The rivers are the Danube, Rhine, Main, Isar, Inn. The Bavarian forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax. The chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. The Thuringian State Save-Coburg-Gotha was incorporated in Bavaria in 1921.

Budget, 1924	Gold Marks
Public debt, April 1, 1921	378,910,220
CAPITAL, Munich, on the Isar	213,200,000
(1919), 630,711	Population
Other large towns are Nurnberg, N W of Munich (353,298), and Augsburg, on the Wertach-Lech (154,555).	

SAXONY

The Republic of Saxony has an area of 5,856 English square miles, with a population (1919) of 4,663,298. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality, minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c.), besides marble, porcelain, earth, and various gems; special manufactures of Saxony are—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, fute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroiderys, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop 604,386), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912-13). Plauen (pop 104,928), and Chemnitz (pop 303,775), the Manchester of Saxony.

Budget, 1924	Gold Marks
Debt, April 1, 1921	225,770,019
CAPITAL, Dresden	622,400,000
Pop (1919),	587,748.

WURTEMBERG

The Republic of Württemberg has an area of 7,534 English square miles, and a population (in 1910) of 2,518,773, of whom 30 per cent are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines, the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, nonstone, fireclay, &c., abound in the kingdom. Mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and luen fabrics, stays, beer, wine, &c.

Budget, 1924	Gold Marks
Public Debt, April 1, 1921	127,835,560
CAPITAL, Stuttgart	829,800,000
Population (1919)	309,197

MINOR STATES

Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1919) of 2,208,503. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop (1919) 125,052. Other large towns are Mannheim (229,576), Friburg (87,946), Pforzheim (73,839), and Heidelberg (69,806).

Land Thuringen. The seven Thuringian States, Save-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz and Reuss Gera, have been constituted into a single state under the title Land Thuringen, with an area of 4,541 square miles, a population of 1,508,025, and two seats in the Federal Reichsrat. In size Land Thuringen is sixth among German states. The new state is governed by a "Volksrat". Capital, Weimar (37,232).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1919) of 1,290,988, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop (1919) 82,367. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (107,930), Offenbach (75,580), Worms (44,285), and Glessen (33,402).

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1919) of 657,330. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1919) 45,575.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hanover, has detached territories in Lubeck (between Holstein and Mecklenberg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1919) of 517,765. The chief industries are agriculture, bee-keeping and stock-raising, the principal manufactures are brewing and distilling, tanning, tobacco and corks. Capital, Oldenburg, pop (1919) 32,540.

Brunswick, 1,418 square miles, pop (1919) 480,599, in Northern Germany. Capital, Brunswick, pop (1919) 139,539.

Anhalt, 906 square miles, pop (1919) 331,258; is in Central Germany. Capital, Dessau, pop. (1919) 57,658.

Lippe, 470 square miles, pop (1919) 154,318. Capital, Detmold (15,301).

Mecklenburg-Strelitz, between Mecklenburg-Schweinf, Pomerania and Brandenburg, has a total area of 1130 square miles, with a population (1919) of 106,394. Chief industries are agriculture and wood products. Capital Neustrelitz, pop (1919) 11,246.

Waldeck, 438 square miles, pop (1919) 55,999. Capital, Arolsen (5,793).

Schaumburg-Lippe, 130 square miles, pop (1919) 46,357. Capital, Bückeburg (6,745).

The *Free Hanse Towns* comprise the three cities of **Lubeck**, on the Trave (area 115 square miles, pop 120,568), **Bremen**, on the Weser (area 99 square miles, pop 311,266), and **Hamburg**, on the Elbe (area 160 square miles, pop 1,050,359). Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster).

Square, W. 1

A maritime Republic in the south-east of

Europe, bounded on the N by Albania, Yugo-

Slavia and Bulgaria, on the S and W. by the

Ionian Sea, and on the E. by the Aegean and

Turkey, with an estimated area of 42,000 sq

miles and an estimated population (1922) of

about 6,800,000.

Prior to the Balkan Wars of 1912-13 the area

was less than 25,000 sq miles, the addition of

portions of Macedonia and Epirus, Crete (8,950 sq

miles, pop. 336,151), and certain Aegean Islands

increasing the area to 43,522 sq miles. During

the War of 1914-1918 Greece eventually declared

for the Allies against the Central Powers, and

her territories were increased by the occupation

of Thrace (including the monastic republic of

Mount Athos), and the islands of Imbros and

Tenedos. Under an arrangement with Italy, to

come into effect after the ratification of the

Treaty of Sèvres, the Dodecanese (12 islands)

were surrendered by Turkey, and these were to

be handed over to Greece by Italy with the

exception of Rhodes, for which a special arrange-

ment was made this arrangement was, how-

ever, repudiated by Italy, and the fate of the

island is in abeyance. Greece also received

under the Treaty a mandate for the occupation and administration of the town and district of *Smyrna*, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and *Smyrna* was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the *Treaty of Lausanne* (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Aegean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous, the coasts are elevated, irregular, and deeply indented.

Government—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 40 members, and of a Chamber of Deputies (or *boulé*) elected for 4 years by universal manhood suffrage. Members of the legislature are paid 4,000 *drachmæ* annually.

Production—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesum, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, and sponges. The imports in 1920 were, from Gt. Britain, 320 million *drachmæ*; U.S.A. 287 million; Italy 125 million; France 109 million; and other countries 333 million. The exports were, to U.S.A. 40 million; Gt. Britain, 37 million; Italy 26 million; France, 20 million; and other countries 178 million.

Defence—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consisted (July, 1919) of 6 ironclads, 1 modern cruiser, 14 destroyers, 6 torpedo-boats, and a submarines.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance—The debt in 1912 was 1,040,000,000 *drachmæ*, and the Balkan Wars of 1912-13 added 354,960,000 *drachmæ*, the Great War added 1,088,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*.

Communications—There were (1919) 1,400 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices (in Old Greece) number 1,150, dealing with 36,000,000

postal packets; telegraphs, 4,951 miles. The mercantile marine consists of 110 sailing vessels above 100 tons capacity, and 298 steamers (449,184 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Kalamata, Laurium, Cavalla, and Canea (Crete).

República de Guatemala.

President (1922-1926), José María Orellana, assumed office Dec. 9, 1921.
Min. of Foreign Affairs, Señor Don Roberto Lowenthal.

* The War Expenditure on the disastrous Asia Minor Campaign from 1900-21 to 1923-24 amounted to 7,732,000,000 *drachmæ*.

Minister in London, Dr. Francisco Sánchez Latour

Consul in London, D. Bowman, 11 Queen Victoria Street, E C 4.

Guatemala, the most northerly of the Republican States of Central America, is situated in N lat. from 13° 45' to 17° 45', and in W Long from 88° 12' 45" to 92° 13', 43' and comprises an area of 42,456 square miles, and a population in 1921 of 1,600,535. The Republic is divided into 22 departments, and is traversed from W to E by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea, earthquakes are frequent, and the capital was destroyed by an upheaval in Jan., 1918. The country is well watered by numerous rivers, the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. About 620 miles of railway were open for traffic in 1921. There were 4,543 miles of telegraph working in 1921. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, *chicle* (chewing gum), hides and beans. Spanish is the language of the country.

HAITI

(République d'Haiti.)

President, M. Louis Borno, *assumed office*

May 15, 1922

Foreign Affairs, Léon Dejean. ... £4,800

Minister in London, Jules Lizaire

Consul, J. G. Dalzell, 78, Victoria Street, S W 1.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands.

The island was visited on Dec 6, 1492, by Christopher Columbus, who named it *Espagnola*, the native name being *Haiti* (mountainous) or *Quequua* (vast). The Spaniards explored the island and almost exterminated the 2,000,000 native Indians, whom they replaced with African negroes. By the Treaty of Ryswick (1697) the western portion of the island was ceded to France, and in 1803 the territory was abandoned

by the French, and a republic was proclaimed under the aboriginal name of Haiti. In 1822 the rule of the Haitian President was extended over the whole of the island, the eastern portion having declared its independence of Spain in 1821. Since 1844 the eastern portion has formed a separate republic (see Dominican Republic).

The area of the republic is 10,200 square miles, with a population estimated at 2,500,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits, it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U S A, establishing a virtual protectorate over the Republic, which came into effect in May, 1916. An armed Constabulary, rural and urban, under American officers, has been constituted, and a coastguard service is attached. On Nov 27, 1920, some prominent Haytiens met and formed the "Union Patriotique," an association for raising funds by public subscription all over the country for the purpose of sending delegates to plead the cause of the Haytian people. It was arranged to send a delegation of three members to New York and Washington, and on February 6, 1921, two of them left, the third following two months later. It appears that the Haytian cause has found supporters there, and as a result of the visit of this delegation a Senatorial Commission of enquiry visited the island (Nov-Dec 1921), and in their subsequent report advised the U S Government to maintain the occupation and to appoint a High Commissioner. The Constitution was amended in June 1922, and under its provisions the President is elected for four years, and governs with the advice of a Council of State of 21 members appointed by him. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany, the principal articles imported from Great Britain in 1921-22 were piece-goods, jute bags, hardware, and agricultural tools. French is the language of the country.

HONDURAS.

(República de Honduras.)

*Provisional President, General Vicente Tosta.**Consul-General in London, A B Ryde, 4 Lloyds Avenue, E C 3*

The Middle State of Central America, stretching in N lat between 13° 10' and 16°, and W long between 83° 10' and 88° 40', containing 44,275 English square miles, with a population estimated at 673,408 (1922).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 Hernando Cortes founded the city of Puerto Cortes and from 1539 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba, but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE—Amapala is on Tiger Island, port on mainland is San Lorenzo, 3 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5-6 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Lake Yofoa, and is in fair condition. The journey to the lake takes from 9 to 10 hours in automobile. The lake is crossed by gasoline launch in 2½ hours. From there to the head of the railway at Portorrillos the road is still in very poor condition, but cars travel there on in the dry season, taking from 2 to 3 hours. Portorrillos is 2 hours by rail from San Pedro Sula, and 3 hours from Puerto Cortes. By taking express automobiles and an express car on the railway, it is now possible to make Puerto Cortes from Tegucigalpa in 24 hours, thus reaching New York in 5 or 6 days. There is also an aeroplane service from Tegucigalpa to San Pedro and Tela, connecting up with the direct steamers for Bristol from the latter. The trip takes 2 hours (at present in abeyance owing to revolutions). There are railway connections between San Pedro Sula, and Tela and La Ceiba. The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being bananas, mahogany, fruit, cattle, sugar, rubber, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, indiarubber, cedar, fustic, rose, henequen, and Luma wool (Kapak). There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 500,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great. In 1921 there were 825 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1920-21.	1921-22.	1922-23.
Revenue . . .	£951,491	£923,372	£1,537,974
Expenditure . .	960,546	889,237	1,435,680
*Foreign Debt	5,398,570	...
†Internal Debt	576,000	...

* The external debt remains the same. No interest has been paid since 1872, and arrears of interest amounted on Jan. 2, 1923, to nearly £63,000,000.

† Bearing no interest, owing to revolutions, it is expected that the Internal Debt will be increased by £1 to £1 million.

	1920-21.	1921-22.	1922-23.
Exports . . .	1,357,147	1,346,601	2,002,254

Minister in London, Count Ladislas Szapáry, 9 Prince's Gate, S W 7

Hungary was declared a Republic on Nov 17, 1918, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugo-Slav Kingdom (q v) and of Slovakia and Ruthenia to Czechoslovakia (q v). The area of Hungary is about 36,779 sq miles, with a population (almost entirely Magyar) estimated (1920) at 7,422,000. The political neighbours are Czechoslovakia on the N, Yugo-Slavia on the S, Rumania on the E, and Austria on the W.

On the declaration of Republican institutions in 1918, Count Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workers' Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Feidel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence

of the protests of the Supreme Council in Paris.

On March 21, 1920, Admiral Nikolaus von Horthy of Nagyvárad was appointed Governor of Hungary by vote of the National Assembly, which gave him royal rights, with the exception that his approval is not necessary to the verification of laws made by the National Assembly.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 25 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers. In August 1921 the Serbians evacuated Baranya, which they had occupied since the Armistice. Immediately afterwards Hungary should have handed over the *Burgenland* to Austria, but was prevented from so doing by a band of Hungarian irregulars, who prevented the entrance of the Austrian authorities. The Austrians declined to use force, and the questions at issue have been referred to the mediation of Italy.

All religions are tolerated, the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parceling out of the great estates, which was forcibly attempted during the Karolyi régime, has been continued to a small extent, but on an economic basis and at the initiative of the owners, a land-reform bill aiming at the forced sale of the properties exceeding a given area has been passed.

A single chamber National Assembly (introduced Jan. 4, 1920, in place of the Upper and Lower Houses of the former Parliament) is elected by universal suffrage. The question of providing a Second Chamber from a reformed House of Magnates (which ceased to function after the revolution) is under discussion.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

Prior to the war Hungary imported merchandise to the value of approximately £85,000,000, and exported approximately £75,000,000 annually, in the year 1916 the imports amounted to about K 3,220,000,000 and the exports to about K 2,650,000,000. Taking an average exchange equivalent, based on Zurich quotation for the year 1916, these amounts may be taken as £80,500,000 and £66,250,000 respectively. There is a British-Hungarian Chamber of Commerce at Budapest, and there are openings for trade in chemicals, machinery, hardware, small tools, iron mill products, leather, and textiles. Hungarian (or German) is the language in which business letters should be written.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

The pre-war revenue of Hungary was about 2,200 million *Korona* (£23,750,000), whereas the estimated revenue according to the Budget for the year 1921-2 amounts to 20,296,000,000

Korona (£17,000,000). The public debt stood at 6,000,000,000 *Korona* (£250,000,000), and its present amount may be estimated at about 800,000,000 *Korona*, but this is dependent on exchange conditions and subject to decisions that may be given by the Reparations Commission, which has not yet begun to sit in Budapest.

CAPITAL. Budapest, on the Danube, has a population of 2,184,616 (1921). The other large towns are Szeged (120,000), and Debreczen (102,000), there are 34 other towns with a population over 20,000.

FLAG. Red, white, green (horizontally), arms (without supporters) in centre.

ICELAND

(Island.)

King, Christian X. (see Denmark)

Presidents of Al-thing, H. Steinsen, Benedikt Sveinsson, Johannes Johannesson

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 62° 23' to 66° 23' N lat., and from 13° 22' to 24° 35' W long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was 94,866 in 1920.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1915 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1922): estimated, £1,698,215; exports, £1,733,928. Iceland is in direct telegraphic communication with Great Britain.

CAPITAL, Reykjavik. Population, about 20,000. Other towns are Isafjörður, Akureyri, and Seydísfjörð.

Vice-Consul, Cavaliere P. Righetti

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N by the Republics of Switzerland, Germany, and Austria, on the S by the Mediterranean, on the E by the Adriatic and Istria, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 120,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

By a treaty signed at Rome (Jan. 27, 1924), the *Free State of Fiume* came to an end. Yugoslavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Fiume, together with a narrow strip of hinterland. Italy agreed to lease to Yugo-Slavia the Thaou di Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The total area of the Kingdom of Italy was estimated (Jan. 1920) at 120,450 square miles, with a population of about 38,500,000. There is a large settled and floating population of Americans and English.

The Italian peninsula is traversed throughout its length by the chain of the Apennines, the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo Slavia. *Mont Blanc* (15,782 feet), the highest

* Signor Mussolini is the accredited leader of *Fascism*, the *Fascists* representing a revolutionary movement against the alleged inactivity of post War Italian states men. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (*cf.* the *fascia* of the Roman Victor) in which the movement was organised.

peak of the Alps, is in the French Peninsular Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots Mazzini (born 1805, died 1872) and Garibaldi (born 1807, died 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1850 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government is that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 520 members (elected by adult manhood suffrage). The maximum duration of Parliament is 5 years, Deputies receive 25,000 lire annually.

PRODUCTION—Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Fuscany, Liguria, and the province of Bari, while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silvers found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. In 1922 the produce of the vines amounted to 782,782,800 gallons, and that of the olive crop (1922) to 5,202,100 centals. The principal exports are cotton, silk, and woollen tissues, motor cars, olive oil, wine, candied citron, sienna earths, pastes, coral, razes, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, flesh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE—The *Army* consists on a peace footing of 320,000 all ranks. On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 milliards of lire (£1,520,000,000). During the War of 1914-1918, over 15 per cent of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The killed and missing amounted to 650,000. The *Navy* includes 5 modern and 6 pre-Dreadnought battleships, 5 armoured cruisers, 30 destroyers, 100 torpedo boats, and

80 submarines. The peace personnel of the Italian Navy is about 40,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified.

EDUCATION—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On June 30, 1922, there were 9,800 miles of railway open for traffic, 435 being electrified, the post-offices (1919) numbered 11,314, and there were 35,328 miles of telegraph line. The sea-going commercial marine (1922) consisted of 1,016 steamers (2,698,722 tons) and 397 sailing vessels (167,613 tons). In 1921 (including coasting traffic) 34,406,285 tons entered and 33,696,401 tons cleared at Italian ports.

	1921-22.
Revenue	Lire 24,927,859,000

ITALIAN COLONIES, &c.

Libia—The Turkish vilayet of Tripoli and

the mutessarifat of Benghazi on the northern

coast of Africa, were occupied by Italy in

1911-12, and under the Treaty of Ouchy (Oct.

1912) the sovereignty of the province was transferred to the King of Italy, the spiritual head-

ship over the Muhammadan population being retained by the Caliph. Tripoli is the most

easterly of the Barbary States, extending from

the frontiers of Tunis to those of Egypt, a

distance along the coast-line of nearly

1,200 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces of Mutesarriflik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 820,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, i.e. at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, and cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 50,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Cyrenaica, General Bongiovanni

Governor of Tripolitana, Count Volpi

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2' N., to Ras Demona, 10° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on S.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 380,000, of whom about 3,000 are Europeans. The capital is Asmara, Massawa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, Dr. Jacopo Gasparini

Somaliland—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. French and British Somaliland lie between Eritrea and Italian Somaliland. The total area is about 193,000 sq. miles, and the population is estimated at 300,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadishu, on the Indian Ocean.

Governor of Italian Somaliland, Cesare de Vecchi

Trenten—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

The Dodecanese.—These 12 islands (occupied by Italy in 1912 during the war with Turkey) are Stampalia, Scarpanto, Cazo, Piscopi, Nisiro, Callinico, Liro, Patino, Cos, Simi, Calchi, and Lipsi. The total population is about 100,000.

JAPAN.

(Nippon.)

Emperor, Yoshihito, K.G., born Aug. 31, 1879, succeeded July 30, 1912, accession ceremony, Nov. 10, 1915, mar. Princess Sadako, May 10, 1900, and has issue 4 sons.

Heir Apparent and Regent, Prince Hirohito, G.C.B., G.C.V.O., born April 29, 1901, married (1924) Princess Nagako, daughter of Prince Kunyoshi Kuni, (appointed Regent, Nov. 25, 1921).

CABINET (June 11, 1924)

Prime Minister, Viscount Takaaki Kato, G.C.M.G.
Minister of Foreign Affairs, Baron Kijuro Shidehara, K.B.E.

Minister for Home Affairs, Reijuro Wakatsuki.

Minister of Finance, Yuko Hamaguchi.

Marine, Admiral Hyo Takamae.

Consul-General (London), Yoshitaka Hori,

1, Broad Street Place, E.C. 2.

Consul (Liverpool), Saizo Mashiko.

" (Glasgow), A. Scott Younger.

" (Middleborough), Wayman Dixon.

" (Cardiff), E. H. Trimby.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all about 4,223, the principal of which are Honshu, Shikoku, Kiu-shiu, Hokkaido or Yezo, situated to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing

ing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 335,886 square miles, with a population (Oct. 1922) of 74,471,000. The islands are eminently volcanic, and 18 of the summits are still active, the chief of these, Fuji-san, or Fujino-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale, while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*, the *Paulownia* imperialis is largely used for fancy boxes and works of art, the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated, rice is the staple food of the people, 345,622,252 bushels being consumed annually (in 1923 the home grown crop amounted to 274,983,000 bushels). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat, European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn, matches, paper, glass, lacquer ware, porcelain, earthenware, mats, matting, hemp-brands, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while ship-building is an important industry in the yards, the cotton-spinning factories increased from 152 in 1913 to 165 in 1923. The chief imports are raw cotton from India, U. S., Egypt, and China, flour from the U. S., and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U. S. A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa, indigo from Germany, British India and Dutch East Indies; kerosene oil from U. S. and the Dutch Indies; beans, peas, and pulse from China, Kwantung Province, and Korea, and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, and marine products.

Communications.—There were 9,255 miles of

railroad open in Dec., 1923, in addition to 1,452 miles open in Korea, 810 miles in Formosa and 138 in Saghalien, while the South Manchurian Railway in China (686 miles) is under Japanese control. The mercantile marine of Japan and Her dependencies consisted in 1923 of 3,306 steamers above 20 tons (902 of them over 1,000 tons), and 2,604 sailing vessels over 100 tons. The total tonnage entered and cleared at open ports in 1923 was 142,686,963 (89,736 vessels). The three great ports are Kobe, Yokohama and Osaka, the first named having a large transshipment trade, in addition to direct imports and exports. In March, 1923, there were 9,492 post offices dealing with 4,469,038,980 postal packets, and 179,833 miles of telegraph line carrying 79,475,299 messages outward.

Defence.—Service in the Army is universal and compulsory between the ages of 20 and 40. The peace strength was reduced in 1922 to 222,731 all ranks, there are 21 Divisions, of which 2 are stationed in Korea, and 1 in the Manchurian leased territory. The Navy includes 11 battleships (5 to be scrapped), 7 battle cruisers (3 to be scrapped), 18 coast defence (5 to be scrapped), 15 light cruisers, 103 destroyers, 10 torpedo boats and 43 submarines (July, 1923). Japan declared war against Germany on Aug. 23, 1914, and captured the German fortress of Tsingtau in November, 1914. Her fleet was active throughout the war, while her troops took part in the operations in Siberia.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kiushu (at Fukuoka), and 5 medical universities.

Estimated Revenue — 1923-24		1924-25
Ordinary	Yen 252,926,359	Yen 265,283,448
Extraordinary	123,246,610	348,116,577

Ordinary	Yen 991,585,197	Yen 1,054,476,237
Extraordinary	384,587,672	558,963,788

Debt (June 30, 1924) —		
Internal	..	Yen 632,969,800
External	..	1,865,468,071
Total		4,498,437,817

Trade —		1922	1923
Imports	Yen 1,890,308,232	Yen 1,199,680,000	
Exports	1,637,451,818	1,497,305,000	
Imports from U. K.	230,310,383	237,134,000	
Exports to U. K.	54,437,542	40,410,000	

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with 3,904,692 inhabitants (1922). Imports, Yen 36,921,874, exports, Yen 30,563,489, in 1922. The colony has been self-supporting since 1906. Estimated rev. and exp (1923-24), Yen 99,883,642. Capital, Taihoku; pop (1922), 180,362.

Saghalien (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1922) of 133,900. The Japanese Government is encouraging the settlement of agriculturists,

and there is a large fishing industry. Estimated revenue and expenditure (1923-24) Yen 18,098,256.

The *Kwantung Peninsula* (capital, Dairen, formerly Daini), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,220 sq. miles; population (1922) 666,893. Dairen provides Japan with a mainland port, ice free all the year round, and the peninsula is fertile. Imports (1922), Yen 88,827,843; exports, Yen 221,603,422. Estimated revenue and expenditure (1923-24), Yen 15,809,485. Capital, Dairen, pop (1922), 142,156.

The *Pescadores* (Bokoto) consists of about 63 islands, with a total area of 85 square miles, and a population of (1922) of 59,384.

Korea (Cho-sen)—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long, and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is *Quelpart*. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population estimated at 17,626,761 (Dec. 1922), there are 386,493 (Dec. 1922) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp, the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of *Pyeong-An*, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, fish, livestock, cowhides, ginseng, wheat, barley, non oles, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is (1922) 1,453 miles. Estimated rev. and exp. (1923-24), Yen 146,007,225. Capital, Seoul (Keijo-fu), pop (1922) 271,414.

Imports into Korea, 1922

Yen 256,044,807

Exports from Korea, 1922

215,404,403

Pacific Islands—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German *Pacific Islands* N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are the Pelew, Caroline, Marshall, and Ladrone groups, with a total area of about 800 sq. miles, and a population of 47,713 natives and 3,310 Japanese (1922).

CAPITAL OF THE JAPANESE EMPIRE, *Tôkiô*, formerly called *Yedo*, the residence of the Emperor; population estimated at 2,265,300 (Sept. 1923). On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of *Tôkiô* and *Yokohama*. Other cities are—*Osaka*, 1,324,700; *Kiôto*, the ancient capital, 657,800; *Nagoya*, 625,200; *Kobé*, 594,900; *Yokohama*, 446,600; *Hiroshima*, 268,700; *Nagasaki*, 185,000; *Hakodate*, 167,500; *Kanazawa*, 145,200; *Kure*, 150,000;

Senda, 128,400; *Otaru*, 123,900; *Kagoshima*, 117,300; *Sapporo*, 117,300; and *Yahata*, 121,600. FLAG: White, charged with rising sun (red).

KERAK, OR TRANSJORDANIA.

Emir, H. H. Abdullah, second son of King Hussein of Hejaz, appointed April, 1921.

Kerak (or *Transjordan*), bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, has an Arab population of about 500,000 of whom almost all are Muhammadans. The area is unknown as the boundaries are not definitely determined, but in 1922 Akaba and Tebuk were transferred from the Hejaz and form a provincial government with Maan as capital. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway connects Maan with Amman, the latter being an important station on the Cairo-Baghdad air route.

CAPITAL, Amman.

KURDISTAN.

Kurdistan is a mountainous district of Eastern Asia Minor, between Armenia (N.), Syria and Mesopotamia (S.), Persia (E.), and Turkish Anatolia (W.). The Kurds are a semi-nomadic tribe inhabiting the mountainous regions of Turkish Asia Minor and of NW Persia. They are believed to be the Karduchoi of Xenophon's *Anabasis*, and for centuries they lived in quasi-independence, punctuated by raids and subsequent punitive expeditions. In 1922 the

autonomy of Kurdistan was recognised by Turkey and Persia, and by the Supreme Council of the Allied Powers.

The area of the country is estimated at 65,000 to 70,000 square miles, with a population of 2 to 3 millions. The chief centres are Diarbekr, Bitlis, Van (to the east of Lake Van) in the former Turkish dominions, and Urmia (to the west of Lake Urmia) and Kermanshah, in the Persian dominions. *Lake Van* (2,000 sq miles in extent) occupies the central portion of the former Vilayet of Van. *Lake Urmia* (1,600 sq miles in extent), across the Persian border, is about 4,000 feet above sea level, and its waters are so salt that fish cannot live therein.

The climate is severe, with a short hot summer and long and severe winter, but cereals, vines and fruit are abundantly cultivated on the slopes of the mountains, rice is grown in the hot, well-watered plains while the rich pastures of the slopes and valleys support large herds of horses, mules and sheep. The mineral wealth of the country is almost entirely undeveloped, but it is believed to be very great, and there are numerous hot and cold mineral springs, salt is obtained in large quantities in the neighbourhood of Lake Van.

The Kurds are Muhammadans and fierce persecutors of the Christians in their districts and in the neighbouring territory of Armenia.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire. Latvia was proclaimed an independent state on Nov 18, 1918. Its frontiers are common with Estonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (*Saeima*) consists of a single chamber of 100 members. The area being about 41,000 sq miles, with a population of about 2,000,000.

The surface of the country is generally flat with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass, chief imports are agricultural machinery and implements and wood and metal machinery. The tonnage of ships entered in 1922 was 1,293,525 tons. The chief ports are Riga, Libau and Windau. In 1923 there were 1,807 miles of railway in operation.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S E, and Mano, N W, a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory and kola nuts. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry, there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fifteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The control of the

804 Foreign Countries—*Liberia, Liechtenstein, Lithuania, Luxemburg.*

customs is in the hands of a General Receiver (who is also Financial Adviser) lent by the Government of the U.S.A. There are 10 ports of entry along the 350 miles of coast and 12 interior ports. In 1921, 263 vessels (622,668 net tons) entered and cleared at Monrovia, of these 82 (249,228 net tons) were British.

and Sec., K. Gieritis.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. by the German district of Königsberg and Poland, on the E. by Poland, and on the W. by the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,000,000. Memel Territory was occupied by Lithuania in Jan. 1923, and negotiations as to its final status took place between the Lithuanian Government and the Conference of Ambassadors. An agreement was not arrived at and the Conference

referred the question to the League of Nations. A committee appointed by the League drew up a Convention which has been signed by the four Great Powers and by Lithuania. Lithuania ratified the Convention in Aug. 1924, and similar action by the other signatories is expected.

The legislature consists of a single chamber Assembly (*Seim*) of 78 members, elected by universal adult suffrage, the Executive being entrusted to a council of ministers. A new currency was issued in Oct. 1922 to supersede the depreciated German mark. 1 Lit. of 100 cents = one tenth £ s gold \$ Rate of exchange (Sept. 1924) lit. 45 10 = £1.

LUXEMBURG.

(Grand-Duché de Luxembourg.)

Grand Duchess, H. R. H. Charlotte, born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919, married, Nov. 6, 1919, Prince Felix of Bourbon-Parme. Her Apparent, Prince Jean, born Jan. 5, 1921.

Minister of State, M. Reuter.

Charge d'Affaires, M. A. B. Pescatore.

Consulate-General in London, 37 Bedford Square, W. C. 1.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France, it formed part of the German Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose cession, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918. U.S. troops entered the capital on Nov. 22. By the Treaty of Versailles, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1916) 263,824, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1924 was estimated at 102,674,000 francs, expenditure 104,345,700 francs, debt (Jan. 1, 1921) 128,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 45,676), is a dismantled fortress.

FLAG. Red, white, blue.

 " *Pro-Consul*, Etienne Victor.

MEMEL

(See also Lithuania.)

Under the *Treaty of Versailles* Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory is to be transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924). The total area administered is 945 square miles, with a population of about 150,000, of whom about 42,000 inhabit the town of Memel.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a population of (1910) 15,063,207.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepete on the east, the intermediate and highest peaks being Ixtaccihuatl (17,879 feet) and Popocatepetl (19,784 feet). The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate

region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala*, some 50 miles in length, and *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*. Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1827. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1820 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Diaz*, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec 1, 1920, General Obregon, whose *coup d'état* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian govern-

* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

ments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, has called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration.

Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific, and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,804 miles of railroad open on Sept. 16, 1912, and 40,687 miles of telegraph. The railroads have in a large measure been built by American and English companies.

The principal agricultural crops are maize, wheat, barley, chilli-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The magnety, or Mexican aloe, yields a favourite beverage, "pulque", other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great, silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent consist of silver and gold, sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

The monetary system has recently been placed on a gold basis, with a gold peso=50 cents U.S. currency. In Sept. 1912, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold pesos in 1913, rising by 5 million gold pesos annually to 50 million gold pesos in 1917. The total of the debt in Sept. 1912, was stated at 508,830,300 gold pesos (= \$524,415,150 U.S.) of which about one half was raised for railroad purposes.

The language of the country is Spanish.

French and Spanish Protectorate.

Sultan, Mulai Yusef, O.C.M.G., proclaimed Aug. 18, 1912.

Morocco, the largest of the Barbary States, is situated in the north-west of the African Continent, between 27°-36° N. lat. and 1°-11° 40' W. long, with a total area estimated at 314,000 square miles, and a population of about 7,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the

north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well-wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsular of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N and 36° N is the headland Ghir, which encloses a bay containing the port of Agadir formerly known as the "Gate of the Sudan." This port formed the bone of contention between France and Germany in 1912-1913.

The climate is generally good and undoubtedly healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from October to May. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—From the end of the 8th century A.D. until the year 1912 Morocco was ruled by a despotic Amir or Sultan of various dynasties, that of Filali having reigned since 1649. The imperial umbrella (the symbol of sovereignty) was passed on by nomination, and the rule was arbitrary and unchecked by any civil limits. The country was subject to European intervention at many periods, and during the closing years of the nineteenth century the dominant power in the country was France, whose Algerian territory formed the eastern boundary. By the Anglo-French Convention of 1904 Great Britain had recognised the predominance of French rights, but in 1905 Germany exhibited an interest in Moroccan affairs, and at the *Algeiras Conference* in January, 1906, an attempt was made by the Powers to define the various interests, and to establish order in the country by means of an organised police force. Between 1906 and 1912 there were frequent conflicts between French troops and Moroccan tribesmen, and in 1908 internal dissensions led to the defeat and deposition of the Sultan Abd el Aziz IV. by his brother Hafid, who eventually triumphed and was recognised by the Powers in 1909. In 1912 Sultan Hafid abdicated and accepted a pension from France, and was succeeded by his brother Moulay Yusef.

France is the paramount power in Morocco, and the Government of the greater part of the country is administered by the French Republic, which is recognised as the "protecting power." In addition to France, the kingdom of Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence." In this Spanish zone (which extended over the whole of Northern Morocco, with the exception of the International zone round Tangier) there were tribal risings in 1902, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood

of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. In 1924 the military forces of Spain met with further reverses, and were withdrawn to a line running west from Rio Martin (on the Mediterranean) to within fifteen miles of the Atlantic Coast, and thence southwards to the French zone, near Alcazar el Kebir. Ceuta (on the Mediterranean Coast, opposite Gibraltar), in $35^{\circ} 54'$ N lat. and $5^{\circ} 18'$ W long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucema and Zaffarin islands are Spanish possessions. A special international régime was designed for Tangier before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention has been agreed upon by the 3 Governments, but pending its application the town and zone are administered by the Sultan's representative and the diplomatic body.

Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges and dates, the latter growing also on the southern slopes and in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the poultry and egg industry is of increasing importance. Antimony, iron, coal, copper, lead and tin (the last three in considerable quantities) are known to exist, and gold and silver are also found. Rock salt and brine are exported in large quantities. The trade of Morocco is chiefly with France and Algeria, Great Britain and Spain, the chief imports being cottons, sugar and soft goods, the exports being grain, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the franc, while in the Tangier zones the franc, the Spanish and the *Hasnani peseta* are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French have built some narrow gauge military railways from Casablanca to Rabat, to Kinitra and Mequinez, and to Settet, while the Franco-Spanish treaty provides for a line from Tangier to Fez. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Tarifa and Oran, and there are wireless stations at Tangier, Rabat, and Casablanca; inland lines have been built by the French to Fez and to some of the ports, as well as to the borders of the Spanish zone, and the latter line will shortly be extended to Tangier. Roads have also been constructed in the French zone, and it is now possible to go to Fez or Marrakesh by motor-car.

The principal Harbours are Tetuan, Tangier, El Araish, Rabat, Casablanca, Mazagan, Safi, Mehedia, and Mogador. In 1922 the number of vessels entered at Tangier was 1,834 (995,744 tons).

Vice-Consul, Dr H G von Oven

A maritime Kingdom of Central Europe, situate on the North Sea, in lat 50° 46'—53° 34' N and long 3° 22'—7° 14' E, consisting of 12 provinces, and containing a total area of 12,761 square miles, with a population in August, 1922, of 7,029,881. The majority, about three-fifths, belong to the several Reformed Churches, and the remainder are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfume, sugar, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liquors. Diamond-cutting employs numerous hands in Amsterdam.

Communications—The total extent of canals is about 2,000 miles. There were 2,117 miles of railroad open in 1918, and 5,249 miles of telegraph line. The mercantile marine, on Dec 31, 1922, consisted of 570 steam and motor vessels and 330 sailing vessels, &c. In 1922, 14,074 vessels (48,307,000 cubic metres) entered, and 14,138 vessels (46,504,000 cubic metres) cleared at the various ports. An Act for the damming and draining of the Zuyder Zee was passed in 1918.

Defence—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 251,000, or (including reserves) 327,000 all ranks. The Royal Navy consisted, on July 1, 1921, of 90 ships (4 of them non-combatants, and 1 protected cruiser).

Education—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal universities are at Amsterdam, Groningen, Leiden, and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Utrecht (veterinary).

NETHERLANDS COLONIES

TOTAL AREA, 832,473 square miles.

POPULATION (1920), 49,514,038

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop. about 140,000) are very considerable, comprising the whole of the SUNDA ISLANDS and *MOLUCCAS*. *Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (115,000 sq. miles), *Celebes Island* (72,000 sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles); with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA. JAVA and MADURA have a population (1920) of 34,984,271,

and furnish sugar (29,272,203 piculs produced in 1922), tobacco, tea, coffee, tin, and other products for exportation (customs receipts, 1922, 43,367,388 fl.). The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1922) a colonial army of 1,349 officers and 31,695 men. The colonial revenue for 1921 was about 769,689,000 guilders and the expenditure about 1,055,173,000 guilders. The exports, for private account, amounted in 1921, for Java, Madura, and the other outlying islands, to 1,193,709,000 florins, while the imports for the same year amounted to 1,117,428,000 florins.

In South America the colony of SURINAM, or Netherlands Guiana (imports, 1921, 13,150,025 guilders, exports, 6,562,014 guilders), embraces 49,845 square miles and contains (1922) 108,221 inhabitants, and in the West Indies, CURAÇAO (imports, 18,566,036 guilders, exports, 12,763,971 guilders, population, 33,222) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,731 (imports, 1,811,924 florins, exports, 627,321 florins).

Trade of Colonies with U.K.

	1920	1921
Exports to U.K.	£35,020,944	£35,504,167
Imports from U.K.	23,661,768	25,073,000

NICARAGUA.

(República de Nicaragua)

President, Señor Dr. Carlos Solórzano
Minister of Foreign Affairs, Dr. José Andrés Vitecho

Charge d'Affaires (London Legation), Señor Don Eduardo Pérez Triana, 49 St. James's St., S.W. 1
Consul in London, Señor Dr. Noel E. Pallais, 16 Wornwood Street, E.C. 2

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'–15° N. lat. and 82° 40'–87° 38' W. long., containing an area of 51,660 English square miles and a population (census of 1920) of 638,119, of whom about three-quarters are mixed blood and the rest Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy General of Guatemala until 1821 when its independence was secured. The present constitution rests on the fundamental law of Nov. 10, 1921 (amended 1923) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are 146 miles of railway, 2,500 miles of telegraph and 1,240 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May–Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 75 per cent of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 50 per cent of the population being illiterate.

The official language of the country is Spanish.

Vice-Consul, Th. V. Aass.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united

* CS = Córdoba, worth \$1 U.S.

with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. The Parliament of 150 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,130 sq. miles with a population (1920) of 2,649,775. The coast-line is extensive, deeply indented with numerous fjords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country, forests cover nearly one-fourth, the rest consists of highland pastures or uninhabitable mountains.

Agriculture gives employment to a large part of the population but is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. Fishing and forestry are important industries and manufactures are aided by great resources of water power, calculated at 12 to 13 millions of horse power, of which about 10 per cent are utilized. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of fish, oil, and other products of the fisheries, timber, matches, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, saltpetre, &c. Norway voted for prohibition of alcoholic beverages in 1919 (385,000 for prohibition, 275,000 against).

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 60,000 all ranks, and the war effective is about 360,000 of all ranks. In time of war all males between the ages of 18 and 55 are liable for service. The Navy consists of 4 ironclads, 27 torpedo-boats, 1 gunboat, 3 destroyers, 8 submarines, and several minelayers.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Christiania was attended in 1922 by 2,300 students.

Communications.—The total length of railways open in 1923 was 2,128 miles, of which 271 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1923, was 17,210 miles. The mercantile marine, Jan. 1, 1924, consisted of 3,668 vessels, of 1,573,530 net tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1923 to about 423,000,000 kroner.

SPITSBERGEN AND BEAR ISLAND (Svalbard)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen Archipelago was recognised by the Great Powers and other interested nations.

The Spitsbergen ("Pointed Mountain") Archipelago lies between 76° 36'–80° 50' N. lat. and between 20° 20'–32° 40' E. long., with an estimated area of 25,000 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,500 sq. miles), North East Land, closely adjoining and separated by Hinlopen Strait, the Wiche Islands, separated from the main land by Olga Strait, Barents and Edge Islands, separated from the main land by Stett

Fjord (or Wybe Janes Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S., with many similar islands in the neighbourhood of the main group.

The principal mineral is coal. In 1924 the coal export was about 440,000 tons. The wintering force in 1923–24 was about 1,200 strong, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour (the postal station, with a high-power Telefunken wireless station) 2½ to 3 days; from Aberdeen 5 to 6 days.

OMAN. See Arabia.

PANAMA

(Republica de Panama.)

President (1924–1928), Rodolfo Chiari, assumed office, Oct. 1, 1924.

MINISTRY (Oct. 1, 1924)

Secretary of Government and Minister of Justice, Señor Carlos L. Lopez
Foreign Affairs, Señor Horacio F. Alfaro
Finance, Dr. Eusebio A. Morales
Public Instruction, Señor Octavio Méndez Pereira.
Public Works (Fomento), Señor Tomas Gabriel Duque.

Minister in London (vacant)

Consul-General, Don Enrique Ruiz Vernaacci,
Cooper Building, Church Street, Liverpool
Consul in London, Don Demetrio Porras, 232 Finsbury Pavement House, E.C. 2
Consul in Birmingham, S. Sauri

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and established a separate Government. The area of the Republic is 31,800 square miles, the population 442,486 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

	1922 '23	1923 '24
Revenue	£1,100,783	£2,039,842
Expenditure	1,257,426	1,513,635
Imports	£2,053,709	£2,534,875
Exports	497,496	477,946
Imports from U.K.	220,893	274,051
Exports to U.K.	65,504	19,993

The total value of supplies purchased for the Canal Zone Commissions for the fiscal year ended June 30, 1924, was \$5,159,529 (U.S. \$).

The language spoken is Spanish.

CAPITAL, Panama. Population (1921), 59,458. Colon had a population in 1921 of 31,803.

FLAG Quarterly, white with blue star, red, blue and white with red star.

PAPACY, The.

Sovereign Pontiff (260th), His Holiness Pope Pius XI. (Achille Ratti), born at Desio, March 31, 1857, elected Pope (in succession to Benedict XV.) Feb. 6, 1922

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the Papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire, which is neither claimed nor paid) by the Italian Government

British Envoy Extraordinary & Minister Plenipotentiary, Hon. Sir Odo Russell, K.C.V.O., C.B. (1922)

1st Secretary, J. F. Doimer, M.V.O.
Temporary Secretaries, R. Thynne

Interior, Señor Belisario Rivarola

Minister in London, (vacant)

Chargé d'Affaires and Consul-General in London, Dr. Venancio B. Galeano, 14 Chiswell House, Finchbury Pavement

An inland State of South America, situate between 26°-6' 30" S lat and 54°-62" W long. The area of Paraguay (exclusive of the Chaco) is computed at 75,700 square miles, and it contains a population of about 800,000

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840-1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years

after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members

Paraguay proper consists of a series of plateaus, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion, but is liable to shrink unduly with drought. The plateaus are covered with grassy plains and dense forest, the soil being marshy in many parts and liable to floods, while the hills are covered for the most part with immense and valuable forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucú," or endless, is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Brazil, forms the subject of a long standing dispute with Bolivia, it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, yerba maté, oranges, timber, quebracho extract, hides and cassava (manioc), maize, rice, sugarcane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of Yerba (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Tram ferries enable the run to be accomplished without break of bulk. The language is Spanish.

	1921-2	1923-4
Revenue (Estimate)	£801,066	£665,426
Expenditure (do)	820,574	665,390

Consul, Morteza Gazvini, 4 Broad Street Place, E.C. 2

Persia—called by the natives Irân—comprises an area of 630,000 sq. ms., with a population estimated at 10,000,000.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are only 8 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals. The cost of carriage is, therefore, very heavy. An option for the construction of a railway from Khanikin to Tehran *via* Kermanshah and Hamadan (with a branch to Enzeli on the Caspian) was granted in 1900 to the Persian Railways Syndicate.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shiah Muhammadans, but there are many adherents of Bahlism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration

and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzafer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914). The authority of the Persian Government has been re-established over the whole of Persia by means of a disciplined army of 8,000 cavalry and 22,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars.

The revenue (£1,480,780 in 1913-14) is derived from land tax, Crown lands, customs, opium, salt, and lease of monopolies. The foreign debt of Persia amounted (Dec. 31, 1916) to £6,325,700. British commercial interests in Persia much exceed those of any other country, the trade between the British Empire (including India and Mesopotamia) and Persia amounting to more than 80 per cent. of the total trade of the country. The sea-borne trade of Persia passes chiefly through the ports of Bushire, Bunder Abbas, and Mohammerah, and *via* Baghdad and Durdap. The shipping of the Persian Gulf is principally British.

Persia's Foreign Trade

	(In thousands of krans.)		
	Imports	Exports	Total
1913-14	647,165	455,840	1,103,005
1914-15	496,323	366,058	865,381
1921-22	609,775	502,044...	1,111,820
1922-23.	613,009	786,643	1,339,652

The value of the krans has varied (since 1900) from 18 to 70 krans to £1 sterling, in 1922-23 the exchange value was about 4½d.

In 1921-22 the leading imports into Persia were cotton fabrics, sugar, iron and steel goods and tea, the principal exports were heavy oils, benzine, petrol and fruits.

Foreign Relations—By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

In March, 1921, Persia signed a treaty with the Russian Soviet Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Firozeh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

In 1922 the Persian Government engaged a number of American advisers (under Dr. Mills Paugh) for the supervision and direction of the country's finances. Considerable strides have been made by the country under this new régime, a balanced budget and a programme for gradual development of the country's resources having been evolved.

Peru is a maritime Republic of South America, situated between $10^{\circ} 31' 29''$ and $19^{\circ} 13' 8''$ S. latitude and between 69° and $81^{\circ} 19'$ W. The territory between $19^{\circ} 47' 8''$ S. and $19^{\circ} 13' 8''$ S. is occupied by Chile, as the result of the Pacific War of 1879-1882, in 1922 this "Tacna Alica" question was submitted to arbitration by treaty between Peru-Chile and the result is expected to be made known towards the end of 1924. The area of the Republic is estimated at 532,000 square miles, and the population (1922) at 5,550,000. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin, on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821-1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 28, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being Huancaran (22,050 feet), Huandoy (21,100 feet), Arquipu (or Misti) volcano (20,013 feet), Huancan (20,000 feet), and Larua, Tocora, and Saracama, all over 19,000 feet. There are four distinct regions, the coast, west of the Andes, the sierra or western slopes of the Andes, the punas or mountainous wastes below the region of perpetual snow; and the inward slopes (montaña) and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current, its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civiliza-

tion Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The gold production in 1921 was valued at £326,458, and in 1920 at £265,972. The Lobos and other islands on the Pacific coast provide guano.

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are cane sugar, cotton, petroleum and copper. In 1923 the U.S.A. sent 41 per cent. of the imports and took 40 per cent. of the exports, while the U.K. sent 20 per cent. and took 33 per cent.

The total length of the railways open (1924) was about 2,067 miles, of which 1,084 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 5,000 of all ranks, the Navy includes two cruisers built at Barrow, and a destroyer bought from the French Government. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancón.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

Vice-Consul, J. L. Bysszewski.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This state extended in the year 1772 over an area of 740,000 sq. kilometres, and included a population of about 13,000,000. The political neighbours of the Republic are the Baltic Sea, the German Republic (Prussian Königsberg District), and the Republic of Lithuania, in the N.; the Republic of Czechoslovakia in the S.; the Kingdom of Rumania in the S.E., Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 386,273 sq. kilometres, with a population, at the 1921 census, of 27,160,000 (of whom 18,660,000 are Poles, and 8,500,000 other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign. Poland was enabled to conclude peace on favourable terms, and

claimed the renunciation by the Soviet at Moscow of about 120,000 sq. kilometres, containing a population of about 3,610,000 (1,048,000 Poles).

Government—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislative consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal.

Production—Mining, cotton, metal work, agriculture, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar beet. The live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia), zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields, the output of crude oil (1923) was 679,295 tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports in former years were principally agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

Education—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno, Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

Communications—There are about 10,000 miles of railway and over 25,000 miles of telegraph line, with well developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed.

CAPITAL, WARSAW, on the Vistula (which is spanned by three magnificent bridges) contains many fine buildings, population 1921, 931,176. Other large towns are Lodz (451,000), the centre of the textile industry, Lwow or Lemberg (239,000), Posen, on the Warta (170,000), Cracow, on the Vistula (182,000), Vilna (199,000), Bialistok (77,000), and Sosnowice (86,700).

Ambassador in London, His Excellency General José Mendes Ribeiro Norton de Mattos, G.C.M.G., 12 Gloucester Place, Portman Square, W. 1

Minister Plenipotentiary, Counsellor Senhor J. A. de Bianchi, O.B.E.

2nd Secretary, Senhor H. G. da Silva

Commercial Counsellor and Consul-General (London), Senhor O. G. Potter, 12, Tavistock St., Gordon Square, W.C. 1

Portugal lies in 37°—42' N. lat. and 6° 15'—9° 30' W. long, being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1920 of 6,399,355, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts, in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry, the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen,

and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent of wine, which is the chief industrial product of the country, others are oak, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1917) numbered 104 steam and 102 sailing vessels, with a tonnage of 122,726. In 1920, 9,909 steam and sailing vessels, of 16,101,695 tons, entered the ports of the Republic. Railways 1,827 miles in extent were open for traffic in 1917, and there were 5,351 miles of telegraph line in 1917. For many years the national income was considerably less than the expenditure, this deficiency has added to the national debt.

Defence—Service in the militia is universal and compulsory. The peace effective is about 32,000. War strength, about 150,000. The Navy consists of a few small ships of old pattern.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and over 75 per cent of the population above 7 years old are illiterate. Secondary education is conducted in State lycæums. There are also military, naval and other special schools. The University of Coimbra (founded A.D. 1259) had 1,100 matriculated students in 1910.

Revenue (estimate)	1923-4
Expenditure (estimate)	\$666,576,163
External debt (1922)	802,415,872
Internal debt (1922)	\$37,403,693
	\$1,284,286,408

Imports	1920
Exports	\$691,002,000
Imports from U.K. (1923)	222,150,000
Exports to U.K. (1923)	\$5,461,000
	3,941,000

CAPITAL, Lisbon. Population (1920), 486,372. Oporto had a population (1920) of 203,092.

FLAG Green and red, with arms in centre.

 Netos, Funchal, Madeira).

Lisbon, distance 1,120 miles, transit, 50 hours.

PORTUGUESE COLONIES

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 605,000, and includes Goa, Damann, and Diu. Revenue, 1909-10, £223,000, imports, £1,316,000, exports, £220,000.

MACAO, in China, on the Canton River, has an area of 3 square miles and a population of 80,000. Revenue, 1920-21, \$5,631,981.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 300,000. Revenue, 1920-21, \$803,859, expenditure, \$803,859.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,475 square miles and a population of 150,000. Revenue, 1919-20, \$2,783,196.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 400,000. Revenue, 1921-22, \$3,698,000, expenditure, \$2,939,846.

SÃO THOMÉ AND PRÍNCIPE ISLANDS, in the Gulf of Guinea (area 442 square miles, population 45,000). Revenue, 1920-21, \$1,586,597, expenditure, \$1,373,660.

PORTUGUESE WEST AFRICA (Angola and Kabinda) has a total area of 480,000 square miles, with a population of 3,000,000. Revenue, 1921-22, \$22,507,000, expenditure, \$22,507,000.

PORTUGUESE EAST AFRICA (Delagoa Bay, Gazaland, Inhambane, Mozambique Nyassa, Quilmane, and Tete) has a total area of 300,000 square miles, with a population of 3,200,000. Revenue, 1921-22, \$13,749,636, expenditure, \$13,749,636; total trade, 1917-18, (imports and exports), \$8,600,000. A scheme for a trans-continental railway from Benguela (Lobito Bay)

in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira is being developed under British, Belgian and Portuguese control.

Trade of Colonies with U.K.

Imports from U.K. (1923)	£3,916,000

Commercial Attaché, M. Gr. Michalescu

Rumania is a kingdom of South Eastern Europe in the classical *Dacia* and *Scythia Pontica*, the territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The territory is known as Wallachia, Moldavia, Bessarabia, Bukovina, Transylvania, with parts of the Banat, the Dobruja, Crizana and Maramuresh. The kingdom has its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under the Treaty of Paris (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexander John Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the Treaty of Berlin (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the Dobruja (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1913-14. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobruja) frontier in 1923. In the War of 1914-1918, Rumania fought on the side of the Allies from Aug. 27,

1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the ante bellum area of the Kingdom (53,000 sq. miles) was more than doubled by the inclusion within its borders of Bessarabia, Transylvania, Bukovina, and part of the Banat of Temesvar. The area of the enlarged Kingdom of Rumania may thus be estimated at 122,282 sq. miles, and the 1914 population of 7,000,000 has been increased to 17,000,000. The dominating religion is that of the Greek (Orthodox) Church.

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 8 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe, and it was stated in August, 1921, that "from a comparative point of view Rumania would probably be one of the first war convalescents to attain complete recovery." The wheat crop for 1922 was 2,504,045 metric tons. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (11,838,792 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica, the workers in the oilfields number about 50,000 and are the largest single unit of workers in any one industry, the production of petroleum was 1,885,225 tons in 1913, 1,168,414 tons in 1921, and 1,366,099 tons in 1922. Manufactures are in their infancy, and the imports are chiefly the manufactured goods of Western Europe, the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All estates over 100 hectares have been expropriated and divided among the peasants.

DEFENCE.—Service in the Army is universal and compulsory. In the War of 1914-1918 over 900,000 All ranks passed into the Armies of Rumania, and of this number over 25 per cent were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumanian-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small Navy on the Black Sea (30 vessels) and on the Danube.

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,622,263 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and

Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS—In 1919 there were about 7,131 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 19,715 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza, the latter is linked with the interior by a railway.

	1923	1924

The Union of the Socialist Soviet Republics—The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Russian Union. The total area of the Union is approximately 7,519,315 square miles, with a population (partly enumerated and partly estimated) in 1923 of 138,000,000, the rural population forming 80 per cent and the urban 20 per cent. Prior to the War of 1914-18 the Russian Empire of the Tsar Nicholas II covered more than 8,500,000 square miles, with a population of about 183,000,000.

The constituent Republics of the Union are—			
Republic	Sq miles	Population	
I R.S.F.S.R.	7,238,533	103,000,000	
II Ukraine	183,655	28,000,000	
III Transcaucasia	74,105	5,769,400	
IV White Russia	23,022	1,650,000	
	7,519,315	138,419,400	

The R.S.F.S.R. consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces, constituted on the principle of national autonomy. *Autonomous Republics* are Bashkir, Tatar, Kirghiz, Mountain, Daghestan, Turkestan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces* are Chuvash, Kalmyck, Mari, Votjak, Zyrian (Komi), Orad, Kabardian-Balkarsk, Karachai-Circassian, Adighe-Circassian, Tchetchen.

The Transcaucasian Federation consists of three Socialist Soviet Republics, namely

Republic	Sq miles	Population
Azerbaijan	33,570	2,997,000
Armenia	15,065	1,300,000
Georgia	25,470	2,378,400
	74,105	5,769,400

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhazia and

* At par as 205 lei = £1 (for 1923 values see p. 428)

Adjaria), and one Autonomous Province (Southern Ossetia).

The federal system of Russia was adopted by the 10th All Russian Congress of Soviets on the 31st of December, 1922, and did not embody within its scope the *Khiva* (Khorezm) and *Bokhara* republics. The independence of the National Khorezm Soviet Republic has been recognised by Soviet Russia by treaty of September 30, 1920, and the independence of the Bokhara National Soviet Republic was recognised by treaty of March 4, 1921.

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee ("TsEK") of the Union once a year. The Council of the Union consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. The Council of Nationalities is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of 1 representative thereof. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhazia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the TsEK meet three times a year, and in the intervals the supreme authority is vested in its *Presidium*, formed by the TsEK of the Union, of 21 members, amongst whom are included the whole of the Union Council Presidium and the Presidium of the Council of Nationalities. The TsEK of the Union elects, in accordance with the number of republics, 4 Chairmen of the TsEK of the Union from members of its Presidium.

Chairman of Presidium, M. T. Kalinin, G. T. Petrovsky, A. G. Tcherniakov, and N. N. Narimanoff.

Secretary, A. S. Yenukidze.

Representatives are elected to the Soviet Congress of the Union by indirect voting, each village Soviet sending representatives to a *Volost Soviet*, the *Volosts* to *Uyezds* (district) *Soviets*, the *Uyezds* to Government *Soviets*, and the last-named to the Congress of Soviets of the Union. The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of a deputy for each 25,000 electors, whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants.

The principal executive and administrative organs of the TsEK of the Union are: The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) Federal People's Commissariats for the entire Union, and (2) Joint People's Commissariats of the Union. Federal People's Commissariats of the Union are: (1) War and Marine, (2) Foreign Affairs, (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The Joint People's

Commissariats are: (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection. The Federal Commissariats have their representatives in the constituent republics, who are directly subordinated to them. The Joint Commissariats exercise their functions through corresponding Commissariats of the several constituent republics on their territories.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*TsEK*), and Council of People's Commissaries (*Sovnarkom*), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (1) Chairman, Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinated to the People's Commissaries of the Union), (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (10) Justice, (11) Internal Affairs (the latter six independent), and also including with an advisory or deciding vote, according to the decision of the respective *TsEK*, the representatives of Federal Commissariats of the Union, i.e., of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The Council of Labour and Defence (*Somet Tsuda* = *Sobornoy*, or *S.T.O.*) is attached and subordinated to the *Sovnarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts. The Chairman of the S.T.O. is L. B. Kameneff.

The Supreme Court of the Union is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obedinennoye Gosudarstvennoye Politicheskoye Upravleniye*), which is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated. The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney-General of the Union in accordance with a special decree issued by the TsEK.

The Chairman of the O.G.P.U. (*Tcheka*) is F. E. Dzerzhinsky.

I. SOVIET RUSSIA.

The Russian Socialist Federal Soviet Republic.

President of the Council of the People's Commissaries of R.S.F.S.R., A. I. Rykoff.

Chairman of Supreme Council of National Economy, P. A. Bogdanoff.

Finance, M. K. Vladimiroff.

Agriculture, A. P. Smirnov.

Internal Trade, Kalmanovitch.

Labour, A. M. Bakhtoff.

Internal Affairs, A. G. Beloborodoff.

Justice, D. T. Kurshki
Education, A. V. Lunacharski.
Health, N. A. Semashko
Social Welfare, V. G. Yakovenko
Workers and Peasants' Inspection, V. Shvernik

Area and Population—The area is 7,238,533 square miles, with a population (1923) of about 103,000,000, representing 87 per cent of the total area of the Union and 80 per cent of its population. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea, while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural.

The R.S.F.S.R. arose out of the "November Revolution." The discontent of all strata of the Russian people had already found vent in the revolution of 1905, but was then put down by military force. The Tsar Nicholas II. proclaimed a new governmental and state order, on a constitutional basis, by his manifesto of Oct. 30, 1905, but the promises therein contained were not entirely kept, and although the period 1905-1917 is marked by an obvious development of industrial life, it may at the same time be characterised as very turbulent, with a systematic struggle of the Liberal *Duma* against the autocratic tendencies of irresponsible Cabinets and agrarian agitations among the peasantry, while strikes of workers did not cease up to the outbreak of the Great War. Involved in the war from Aug. 1, 1914, the forces of the Tsar fought against the Central Powers with varying success. On March 12, 1917, a second revolution was followed by the abdication of Nicholas. The Grand Duke Michael, nominated by him to be his successor, was not admitted to power, and a Provisional Government was set up under Prince Lvov. On May, 1917, this administration was taken over by the Cabinet of Alexander Kerensky, but Kerensky failed to establish a settled Government, and on Nov. 7, 1917, the "Military Revolutionary Committee" of the Petrograd Soviet seized the authority of Government and transferred it to the All-Russian Congress of Soviets. The Tsar Nicholas II. with the Tsaritsa, Tsarevitch Alexis (heir-apparent), and the Princesses (and such faithful adherents as remained to them) were arrested by order of the Kerensky Cabinet. They subsequently fell into the hands of the Bolsheviks, and on July 16, 1918, the Tsar and his family and attendants were shot in cold blood in Ekaterinburg.

The Russian peasantry had never reconciled itself to the serfdom established as a system at the end of the 16th century. Some of the malcontents preferred to take to the prairies of Southern and East-Southern Russia (the basins of the Dniepr, Don and lower part of Volga), and here they established half-independent military Cossack republics. Among those who remained, agrarian tumults were unceasing, now and then bursting out into formidable risings, which threatened the very existence of the Russian State, the most turbulent periods being the years 1810-13, before the accession of the Romanoffs to the throne; the riot of Stephen

Kazin in the middle of the 17th century, and the Pugatcheff riot of Cossacks and peasants during the reign of Catherine II. (1770-74). From the end of the 18th century, especially after the French Revolution and Napoleonic Wars, and during the 19th century, Liberal and Socialist ideas began to penetrate the Russian educated classes. Free masonic lodges and secret military organisations spread all over the Empire, and on Dec. 26, 1825, they even tried to seize the supreme power. Nicholas I. succeeded in putting down the mutiny (Movement of the Decabristy), but the sullen under-current of unrest continued. The abolition of serfdom by Alexander II. and an agrarian reform (1861) did not soothe the ferment among the peasantry, who had to pay by instalments high prices for their allotments, the distribution of which developed into a hidden form of economic serfdom, while the educated classes demanded constitutional guarantees against arbitrary administration. In consequence of the irreconcilable position of the reactionary Government and the Emperor himself, on one hand, and the inhuman methods with which the antagonists of the Government were treated, the party *Narodnaya Voliya* (=Liberty of the People), representing the bulk of the original *Zemlya i Volya* (Land and Freedom) party, resolved to have recourse to terrorism and assassination, and on March 14, 1881, Alexander II. was murdered by terrorists (the term *Nihilists*, set in circulation by I. S. Turgeneff in quite another sense, was afterwards wrongly applied as a nickname for Russian revolutionaries, who were credited in Western Europe with a desire to reduce rule to anarchism and substitute for existing authorities "nothing"). During the reign of Alexander III. the activity of the *Narodovolitsy* was almost destroyed by the secret Imperial police (*okhranka*), and political movements did not revive until the end of the 19th and the beginning of the 20th centuries. In the year 1893, under the influence of the Socialist theories of Karl Marx, was established the Russian Social-Democratic Workers' Party, which at the Conference of 1903 split into two factions—*Bolsheviks* and *Mensheviks* (from the words *bolshe*=more, and *menshe*=less, the nicknames originating in the precarious majority of Lenin's adherents at that conference). The *Bolsheviks* are of the opinion that the proletariat must seize and retain the supreme political power and that no collaboration with other classes may be admitted; they demand from their party comrades absolute obedience up to the annulling of their individuality. The *Mensheviks* admit of compromises with the *bourgeoisie* on the basis of preserving control over the trade unions and workers' movement, and are against autocratic tendencies within the party itself. The Russian party of "Socialist-Revolutionaries," successors of "Narodovolitsy," aimed chiefly at nationalisation of all land estates for distribution in allotments among the peasants without any compensation, in their political tendencies they were embittered antagonists of the autocratic system, and all terrorist acts in the period 1898-1912 were executed by their *Bogolyova Bruchina* (military detachment), including the assassination of the ministers Bogolyeff, Saipigachin, Plehve, the Grand Duke Sergius, &c. Until 1917 all these parties played a clandestine part and were but little known to the masses, though it is quite certain that they

contributed largely to the organisation of industrial strikes. In the wake of the March revolution they appeared in the open and overwhelmed the more moderate political parties. The Duma Cabinet of Prince Lvov was soon replaced by the Cabinet of the Socialist Revolutionary Kerensky, who in his turn was accused by the *Bolsheviks* of betraying the proletariat. In July, 1917, the *Bolsheviks* made their first attempt to obtain the supreme power by means of revolt, but the attempt was abortive. In the autumn of 1917 they succeeded in gaining a majority in the *Soviets* (Councils of Workers' and Soldiers' Deputies) of Petrograd, Moscow, and some other places, and on Nov. 8, 1917, after severe street fighting in Petrograd and Moscow, they achieved their aim. In Jan. 1918, they dispersed the Constituent Assembly, where the Social Revolutionaries enjoyed an absolute majority.

The *Bolsheviks* claimed to act in the name not only of the Russian people, but of the "Proletariat of the World," and formed plans for a world revolution.* The military revolution of 1917 was accompanied by a *débâcle* in the field, and many of the soldiers abandoned their arms and returned to their homes, while the armies of the Central Powers advanced victoriously into Russian territory, and, after granting an armistice, they imposed on the Soviet Government the crushing conditions of the *Treaty of Brest-Litovsk* (March 3, 1918), which remained effective until the military strength of Germany and Austria was broken by the Allies. The *Bolshevik régime* had been fostered by the Central Powers and was opposed by the Allies, who sent such naval and military help as could be afforded to various bodies who were stemming the tide of Bolshevism in Siberia (Admiral Kolchak), South Russia (Denikin), and North Russia (Tchaikovsky), mainly with a view to create a diversion on the eastern German-Austrian front, and in response to a declaration of war by the *Soviets* against Governments which were held by them to be representative of *Menshevik* rule and of the *bourgeoisie* they had pledged themselves to eradicate. But the victorious close of the European War caused a growing reluctance among the allied nations for further military adventures, and the reinforcements sent in 1918 were withdrawn during the autumn and winter of 1919 from Archangel and Murmansk in the north, from Odessa in the south, and from Vladivostok in Siberia. The withdrawal preceded a collapse of the "White" resistance to the "Red" (*Bolshevik*) armies. In 1920 war broke out between the Republic of Poland and the Soviet armies, in conjunction with operations under General Vranghel, the successor of Denikin in the south. After initial successes the Polish armies were driven back, and Warsaw appeared to be in imminent danger, when a dramatic recovery saved the Polish capital and brought about negotiations for peace on terms favourable to Poland, under the *Treaty of Riga* (March 19, 1921).

Government.—The Central Government of the former Russian Empire developed out of a primarily autocratic system, in virtue of which

* *Bolshevik* propaganda work has been extensively carried on in Europe and the United States, chiefly through the Third International (*Comintern*), but has raised few adherents in democratic countries. In 1920 the sum of £75,000 was offered by the Soviet Government as a subsidy to the London Labour organ, *The Daily Herald*, but was refused by the directorate.

the country was regarded as the patrimony of the autocrat and the State's revenues as his private income, from which the expenses of administration were met. In the 19th century the property and revenues of the State were separated from the private property and incomes of the Tsar. Other reforms of various kinds were introduced from time to time. The peasants, who constitute 80 per cent of the inhabitants, were freed from the condition of serfdom in 1861 by the Tsar Alexander II, and land was allotted to them in communal ownership. The unsuccessful war with Japan offended all classes, and the Government was accused of responsibility for the military disasters. Partial strikes in the capital and in the country culminated in a general strike of railwaymen, which paralysed the life in the Empire and compelled the Tsar Nicholas II and the Camarilla to issue a manifesto promising the establishment of a parliament and constitutional guarantees. But the new parliament, called *Gosudarstvennaya Duma*, opened in 1906, never played any authoritative rôle, and its recommendations were usually ignored, while it was liable to be dissolved at the will of the Tsar. The Government in force at the outbreak of the war of 1914 was "constitutional" in name alone, as the limits to the power of the ruler were subject to the possibility of an immediate and complete resumption of the former autocracy at the will of the autocrat.

The Soviet Government, although composed of representatives indirectly elected by the masses, cannot be called representative, as no provision is made for "the opposition" to the executive power, and although the rural population (i.e., 80 per cent of the population) elects usually a very small number of Communists (*= Bolsheviks*), nevertheless the Congress of the *Soviets* consists almost entirely of Communists. As to the cities and towns, only candidates nominated or approved by the *Bolsheviks* can succeed in these elections. Under Soviet rule individual liberty is considerably less than in the time of Tsardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

Local Government was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*), they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective councils (*zemets*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*), but in many cases the local authority of such municipalities and local land councils (*zemets*) was overshadowed by the superior authority of the *bourgeois* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double repre-

sentation from their own *soviet* and from that of the province (or district) in which the municipalities are situated.

Education was not widespread in the Tsar's dominions. Primary schools afforded only the most elementary instruction and the attendance was voluntary, while they were closed in rural districts during the summer months. Gymnasias, commercial colleges, technical and "real" schools (with not less than 300,000 pupils) existed in all provincial capitals and a great number of district (*uyezd*) towns. The eleven universities had only 40,000 students of both sexes. Fully 90 per cent of the peasants (*i.e.*, 72 per cent of the people) were illiterate. A rural *starosta* (mayor) who could neither read nor write was in no way unusual, and accounts were frequently kept for the local branch of the co-operative society by the village school-mistress, or by the priest. Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the Soviet Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching; but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. Generally speaking, only children of workers and officials are allowed to attend the primary schools in towns, and only those who belong to the Communist youth or are members of the Communist party may enter secondary school and universities, exceptions to this rule are reduced to the minimum. The average salary of a village schoolmaster does not exceed £2 a month, which very often is not paid regularly. Very often professors of universities and higher schools get a remuneration of £4 to £7 a month. Only schools established by the Communist party for special party purposes are well supplied in every regard. According to the data of 1923 there existed in the R S F S R alone more than 1,200 Communist party schools, beginning from primary institutions and including the universities. In 1922 there were stated to be 5,000,000 pupils in the 55,000 elementary and secondary schools, and about 300,000 in 4,000 advanced and technical schools; while there were (in 1922) two universities in Moscow and one in each of twenty other large cities.

Religion.—The Orthodox Church was disestablished by the Bolsheviks and all its property confiscated. All ecclesiastical schools, seminaries and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. Communism declared war on religion, which it described as "opium for the people," and endeavoured to provoke discord in the Orthodox Church. "The Living Church," "The Renewed Church," and other dissenting bodies, have little hold upon the people, and contribute to the chaotic state of the Orthodox Church. But the law does not forbid the exercise of religion, and churches remain open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers

of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1928, the Soviet Government adopted the Gregorian (Western) Calendar.

Finance.—The Bolsheviks had at their disposal after the November Revolution (1) a gold reserve in the State Bank of about 1,000,000,000 roubles, (2) paper currency left over by the previous Imperial and Provisional Governments, (3) cash, foreign securities, and jewels confiscated in banking-houses, (4) all the nationalised industries, and (5) immense stocks of raw materials and supplies inherited from the old *régime*. But the nationalisation of industrial plant has almost paralysed industry. According to official figures their exploitation caused (in 1920) a commercial loss of about 63,000,000 gold roubles. At the same time, the income from customs and from the State liquor operations (*i.e.*, 30 per cent of the Tsarist budget) disappeared. Normal taxes could not be collected at all. The revenues of the Bolshevik Treasury in 1920 were reduced to about 32,000,000 gold roubles, against expenditures extending to 303,000,000 gold roubles. The finances of Soviet Russia culminated in chaos, and since Communism had declared war on capital, and the possibility of getting credits abroad was totally excluded, the Government was compelled to have recourse to printing presses for the production of paper money. These presses also provided payment for the Army and Government officials, until the paper rouble, which was exchanged at about ten to £1 sterling in 1914 had ceased to possess any value after reaching grotesque quotations of 500 billions to £1 in the spring of 1924.

At the liquidation of the civil war a new economic policy (known as N.E.P.) was inaugurated early in 1922. Private enterprises were allowed to enter the lists as competitors in the open market, and the restrictions on hoarding of money by individuals and co-operative societies were abolished. The State retained the means of transport and all essential enterprises, and put them on the basis of economic management, *i.e.*, they were removed from the State budget as items of expenditure and had to be "self supporting." The system of taxes in cash, both direct and indirect, was also restored under the new policy. In October, 1921, the State Bank was re-established with a capital of 25,000,000 gold roubles. It obtained a monopoly of transactions in precious metals and foreign currency. All this contributed to the need for a stabilised currency, and the State Bank was authorised by a decree to issue (in 1922) banknotes known as the *Cherwonetz*, representing the value of the Tsarist 10-rouble gold coin. The decree provides that 25 per cent of the face value of the banknotes shall be secured by precious metals and stable foreign currency, and the rest by commercial short-term bills of exchange and other securities. The exchange of *cherwonetz* for their gold equivalent is to be inaugurated later on. According to the official figures of October, 1924, the State Bank issued 51,886,650 *cherwonetz* secured to the extent of over 50 per cent by precious metals, English pounds, American dollars, and Swedish crowns. The value of this monetary unit has hitherto fluctuated only insignificantly, and the *cherwonetz* are current throughout the Union. In February, 1924, the Government decided to discontinue the further printing of depreciated

Soviet paper currency, and to issue Treasury notes in denominations of 1, 3, and 5 roubles to an amount not exceeding one-half of the total amount of *chervontzy* in circulation. Since May 18, 1924, the money market disposes of three sorts of money. *Chervontzy*, Treasury notes, and silver and copper coins in circulation since the summer of 1924. It was announced that this new currency was to be issued solely in order to furnish a sufficiency of money for credit and circulation and not for covering the items of State expenditure, which was to be covered by regular revenues. But the Budget of 1923-24 shows an actual deficit of 433,000,000 gold roubles, which is converted into a surplus by "credit operations," &c

Revenue	In Millions of Gold Roubles
1. Taxes (in cash and in kind)	498
2. Incomes from properties and enterprises (excluding the Transport and Post and Telegraphs)	141
3. Transport	598
4. Post and Telegraphs	39
Ordinary Revenue	1,276
5. Credit Operations	253
6. Emissions	186
Total	1,715
Expenditure	
1. Transport, Post and Telegraphs	670
2. Army	313
3. General Administration	430
4. Industry	69
5. Agriculture	47
6. Electrification	39
7. Credit operations	20
8. Operations of the Treasury	130
Total	1,708

In October, 1922, was issued a 6 per cent. State Lottery Loan for a total amount of 100,000,000 gold roubles in bonds of 5r. each, redeemable within 10 years. The loan was taken up among the population after some measures of compulsion. A second 8 per cent State Lottery Loan for 100,000,000 gold roubles, and a special Peasantry Lottery Loan to the amount of 50,000,000 gold roubles were issued in 1924, and met with only a small measure of voluntary support.

Debt—The outstanding Foreign Debt of Russia on Jan 1, 1917 (before the Revolution), with the annual charge for Interest, may be stated as under:—

	Debt	Interest
To Great Britain	£569,674,406	£34,000,000
To France	Fr 2,950,000,000	Fr 265,000,000
To U.S.A.	\$225,000,000	\$10,000,000
To Japan	Yen 250,000,000	Yen 20,700,000
To Italy	Lira 36,123,836	
To Netherlands	Guilders	Guilders 59,200,000

All internal and external obligations have been (in 1918) proclaimed null and void, but the Soviet Government is inclined to acknowledge some part of the Tsarist debts in return for further credits abroad.

Defence.—The Red Army consisted in 1923 of about 780,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. The Red Air Fleet is reported to consist of about 250 aeroplanes, but it is stated that an organisation of 10,000 aeroplanes was aimed at for the year 1924. The Red

Navy is believed to consist of 4 capital ships and about 30 destroyers and small fighting craft. The Budget item for Army and Navy expenditures made up (in 1923) 313,000,000 gold roubles. The number of the standing army was recently stated officially to be 562,000.

Agriculture—The average land allotments given to the peasantry in 1861 were about 4.8 *dessiatins* (1 *dessiatina* = 2.7 acres) per capita of male population, they failed to provide for the natural increment of the population and dropped to 2.6 in 1900, reaching in 1916-17 somewhere between 1.5 and 1.8. The situation was aggravated by the poor quality of the land allotted, inconveniences of scattered fields, overlapping strips, remote pastures, high instalments of payment, and the system of communal ownership. These drawbacks hampered the development of tillage, which continued to remain on an almost primitive level. In 1898 in 50 provinces of European Russia alone, about 8 million passports had been issued to individual peasants who were quitting their native villages in search of employment. The Duma's scheme of agrarian reform was repudiated by Nicholas II, and the Duma itself twice dismissed (1906 and 1907). The census of 1917 revealed the fact that out of 27,000,000 able-bodied male population 15,000,000 had been called to the colours, and during the first three years of war over 2,000,000 horses were requisitioned. These facts contributed to a further decay of agriculture. After the November Revolution the Bolsheviks abolished land-ownership. Land was to be taken by the local peasants for "seasonal tillage," and under no circumstances was the land so taken to become then property. The civil war called forth new mobilisations of men and new requisitions of horses and cattle, while the Government took charge of feeding large numbers of the civil working population, so that at one time, besides providing for 5,000,000 soldiers, it was supporting more than 25,000,000 people in the towns. Under these circumstances the Bolsheviks decreed a State monopoly of food-stuffs (grain, meat, butter, eggs, potatoes), so that it became compulsory for the peasants to deliver the whole of their surplus produce to the State without any compensation. This resulted in risings of the peasantry and in a reduction of cultivated area by about 32 per cent. The unparalleled famine of 1921, together with a complete exhaustion of food supplies, brought the Communist system to the verge of complete collapse. In the spring of 1922 the "New Economic Policy" (N.E.P.) was proclaimed. This opened the markets and allowed the peasants to dispose freely of their produce, while a decree of March, 1921, ensured regular and continuous land-tenure, preserving the prohibition of selling, buying, mortgaging and alienation of their allotments, and cancelling the law in virtue of which no more land was leased than could be tilled by the tenant and his family without the aid of hired labour. There was an increase of cultivated area in 1923 to 60,000,000 *dessiatins* against 49,000,000 in 1922. The irksome and multifarious taxes were replaced in the summer of 1923 by the "Unified Agricultural Tax," and by the end of 1923 80 per cent of this tax was paid in money and only 20 per cent in kind. Since January 1, 1924, the Unified Agricultural Tax is to be collected only in cash. The total amount of the revenue from this direct tax was in 1923 about 400,000,000 gold roubles. The

enormous rise in prices for manufactured articles is substantially equivalent to overwhelming indirect taxes, but the difference between the low prices for agricultural produce and the high prices for manufactures ("the scissors" problem), coupled with weakened paying capacity, discourages the peasantry and may result in a new reduction in the cultivated area. In 1924 a new famine gripped the hitherto fertile provinces of the Volga and of Southern Russia. The total harvest of cereals in 1924 amounted to (official figures) 2,600,000,000 pounds against 4,000,000,000 before the war, 1,900,000,000 in 1922, and 2,800,000,000 in 1923.

Agriculture outweighs in Russia all other industries in importance, the principal crop being rye, the food of the people, wheat, the second largest crop, was formerly exported in great quantities, and export has been revived during the last two years, though quantities have been comparatively small, barley, oats, millet, and maize are also important food crops, and potatoes are largely grown. Among the important industrial crops are flax and hemp and cotton.

Production of	Average 1921-25 Per annum Poods	1923 Poods	1924 Poods
Flax . . .	26,000,000	11,000,000	.
Hemp . . .	22,000,000	9,000,000	.
Cotton . . .	20,300,000	2,500,000	5,000,000

The livestock included (1923) 22,800,000 cattle, 30,400,000 sheep, 9,100,000 pigs, and 16,500,000 horses.

Industry.—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naphtha, and so on, are enormous. Russia represents a wide field for investing capital in industry, and in the last two decades before the war already attracted considerable internal and foreign capital. The November Revolution nullified all enterprises, and during the civil war only an insignificant number of factories continued to work (chiefly for the Army). The census in the autumn of 1921 gave the figure of 1,120,000 industrial workers against 2,700,000 in 1913. Under the New Economic Policy groups of homogeneous enterprises were united into trusts and syndicates, with a good deal of independence in regard to their management, and were removed from the State Budget and had to be "self-supporting." This resulted in an increase in the number of workers (1,600,000 in July, 1923) and in production. The average productivity of a worker in 1923 is estimated at 1.365 gold roubles per annum, against 528 gold roubles in 1920-21, and 2.163 gold roubles in 1913. The table below shows the development of large-scale State industry.—

Groups of Industry	Output in millions of gold roubles 1922-23	Percentage of the Output of 1922-23 to that of 1913	Output of 1922-23 to that of 1913
Mining . . .	207.7	36.4	113.4
Metal . . .	212.3	29.3	143.0
Textile . . .	339.9	41.0	189.7
Food . . .	96.2	13.5	145.3
Other . . .	470.2	51.3	150.8
	1,297.3	33.2	148.9

The quoted figures show an indubitable increase in production in 1922-23 in comparison with 1921-22, though it amounts to but one-third of the pre-war production. But this industrial

progress is not on a sound basis, contributions from the State Treasury in support of industry are still being made, in transgression of the "self-supporting" principle; in 1923 such contributions made up 20 per cent. of the total value of the produce.

The chief mineral is petroleum, the total in 1922-23 being nearly 6,000,000 tons, and in 1924 6,350,000 tons. The chief metals produced in 1922 were gold—318 poods (against an average output of 3,323 poods in pre-war days), and platinum—12 poods (against 352 poods in 1913). The output of coal was in 1924 540,000,000 poods.

External Trade.—In 1924 the Imports into Russia were valued at 1,100,000,000 roubles, and the Exports from Russia at 950,000,000 roubles, a total trade (at 9.48 roubles = £1) of £117,480,000, the chief imports from the United Kingdom being machinery and coal, the exports to the U.K. being principally cereals, timber, eggs and flax. The external trade of 1923 across the European frontier and the Caucasian border, but exclusive of the trade of the Trans-Caucasian Republics, is stated as under in gold roubles.—

Exports from Russia to	Countries	Imports into Russia from
11,257,000	Estonia . . .	5,217,000
7,980,000	Finland . . .	5,962,000
61,139,000	Germany . . .	49,707,000
16,541,000	Gibraltar
33,511,000	Great Britain . . .	36,597,000
6,364,000	Italy . . .	679,000
23,890,000	Latvia . . .	2,514,000
11,820,000	Netherlands
1,434,000	Norway . . .	3,274,000
491,000	Persia . . .	2,204,000
2,431,000	Poland . . .	7,749,000
10,222,000	Sweden . . .	5,772,000
.	Turkey . . .	593,000
.	USA . . .	18,595,000
205,818,000	Total . . .	144,056,000

British Trade with Russia (1923).—According to Russian official figures, the trade between Great Britain and Russia in 1923 was as under.—

Classification	Imports from Great Britain Gold Roubles	Exports to Great Britain Gold Roubles
Foodstuffs . . .	1,576,000	5,114,000
Raw Materials . .	25,866,000	28,228,000
Manufactures . . .	9,014,000	115,000

The chief import from Great Britain was coal; the principal export was timber.

According to British official (Board of Trade) figures, the trade of Great Britain and Russia in 1923 was as under.—

Imports consigned from Russia . .	26,308,123
Exports of United Kingdom produce and manufactures consigned to Russia . . .	2,462,205
Re-exports of foreign and Colonial merchandise consigned to Russia . .	1,950,178

Communications.—There were (1922) 45,987 miles of railway in use, and 9,090 post offices and radio stations, with 4,003 post boxes and 340,300 miles of telegraph wire. Under Soviet administration the financial deficit on the working of the railways has increased in proportion as transport conditions have deteriorated. In 1921-22 the deficit exceeded 120,000,000 gold roubles, in 1922-23 it was 224,000,000 gold roubles, against an average credit balance of 270,000,000 gold roubles for the years 1914-16.

	1913.	1922-23
No. of Locomotives :		
In full order . . .	19,866	8,500
Disabled . . .	840	11,000
No. of Wagons .		
In full order . . .	480,000	20,000
Disabled . . .	290,000	129,000
Total haul (miles) .	254,364,000	90,618,000
Freight (poods) . . .	16,135,300,000	2,800,000,000

In 1923 there were about 830,000 employes on the railways, but the number was reduced in 1924 to 650,000. The principal railway lines are the main European network from Leningrad, through Moscow to Astrakhan and across the Urals *via* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the *Trans-Siberian* line thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askaniya, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the *Trans-Caspian* system. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, *via* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *via* Eriwan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in the Soviet Union (1923) 164,793 miles of navigable rivers and canals and lakes, of which 103,935 miles are within European Russia, and 60,858 in Asiatic Russia; of the total about one-fourth of the distance is navigable by steam vessels, a further eighth by sailing vessels, and nearly one-half by rafts. In 1923 the ships and rafts carried over 10,000,000 tons of goods and 8,218,356 passengers. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterininsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1923 of about 1,600,000. **LENINGRAD** (before the war "St. Petersburg"), and until the death of Lenin, "Petrograd", the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1923 of about 800,000. Other centres are Saratov (188,000), Rostov (177,000), Tula (124,000), Nijni-Novgorod (123,000), Voronezh (100,000), Krasnaya, formerly Ekaterinodar (143,000), Astrakhan (123,000), Orenburg (109,000), Ekaterinburg (96,000), Tomsk (90,000), Omsk (144,000), Nikolaiisk (109,000), Tashkent

(300,000), Kokand (112,000), Samarkand (87,000), Vladivostok (100,000). Archangel had about 45,000 inhabitants in 1914.

II—THE UKRAINE. (Ukraine.)

President, V. J. Tchubar
Vice-President, M. J. Vladimirovsky
Chairman of Central Executive Committee, G. J. Petrovski
Ukrainian Representative in Moscow, A. T. Prikhodjko

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was invaded by Germany in 1917-18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between Soviet Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The total area of the Republic is about 283,655 sq. miles, with a population of about 28,000,000. The chief town and seat of government is Kharkoff (pop. 1923, 312,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 316,000), Kieff (pop. 1923, 406,000), Ekaterinoslav (pop. 1923, 127,000), Nikolayev (81,000), Poltava (88,000), and Taganrog (100,000). The Ukraine is the great cereal growing district of Russia, and before the Great War the harvests exceeded 1,000,000,000 poods, during the Civil War the production was reduced to 385 million poods, but in 1923 it had increased to 700 millions. In 1922-3 there were 112 sugar-beet factories (100 in 1921) producing 10,000,000 poods (500 millions in 1914-15). The Ukraine also contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, bistles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000. The Budget of 1922 showed a deficit of 124,800,000 gold roubles; in 1923 there was a surplus of 316 million gold roubles.

CAPITAL, Kharkoff. **Population** (1923), 312,000.

III.—WHITE RUSSIA (Byelorussia.)

President (and Chairman of the Central Executive Committee), A. G. Tchervyakov

The independence of White Russia was recognised by Soviet Russia in 1919, and a military and economic alliance was concluded Jan. 26, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghiler, and its area may be estimated at 23,022 sq. miles, with a population of about 2,650,000. The political neighbours are Lithuania and Poland, on the west, and the Ukraine, on the south. The capital is Minsk (pop. 150,000), where there is a University founded by the Soviet Government.

CAPITAL, Minsk. **Population,** 150,000.

IV.—TRANSCAUCASIA.

(Zakavkaskaya F.S.S.R.)

President of the Council of People's Commissars,
M D Orakhelashvili*Chairman of Central Executive Committee, MM*
Zkhakaya and Agamaly-Ogly*Plenipotentiary in Moscow, S M Ter-Gabrielyan*

The total area of the Transcaucasian Federal Socialist Soviet Republic is 74,105 sq miles, with a population of 5,769,400

Armenia, or Hyastan.

President of the Council, M Lukashin

Armenia (area 15,565 sq miles, population 1,300,000) occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq miles), Russia (20,587 sq miles), and Persia (6,518 sq miles). The rivers Euphrates, Tigris, Aras, Kur, and Tchorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy), more than half the supply of copper from Russia was derived in 1914 from Soviet Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 gold roubles. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kildish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Erivan. Population (estimated), 90,000.

Georgia, or Kakheti-vo.

(Gruzija.)

*President, M. Eliava.**Chairman of Central Executive Committee, M.*
Zkhakaya.

Georgia, a Kingdom in Transcaucasia, with a history of more than 4,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1782. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. Soviet Georgia is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. It includes the autonomous republics of Abkhazia and Ajaria and the autonomous area of Ossetia; the total area being about 25,470 square miles, with a population (1925) of 2,375,400. There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batum with Baku, on the Caspian. Batum and Baku are also connected by a petroleum pipeline. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Tchiatury mines (in the district of Sharopaulsky) in 1914. There are also abundant supplies of coal (5 million poods in 1924) and over 200 mineral springs partly unexploited. Wine is produced in considerable quantities, and the tobacco plants (chiefly in Abkhazia) yielded 800,000 poods in 1924, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shukh Steppe. The chief town and seat of government is Tiflis, population (1913) 400,000, the administrative centre of Abkhazia being Sukhum (60,000), and of Ajaria, Batumi (pop 70,000), other large centres being Kutais (93,000) and Poti (30,000).

CAPITAL, Tiflis. Population (1925), 400,000.

British High Commissioner at Tiflis, Com-
mander Luke, D.S.O., R.N.

Azerbaijan.

(A.S.S.R.)

Chairman of Central Executive Committee, M
Agamaly-Ogly

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south and from the Caspian on the east to Armenia and Georgia, with a total area of 33,570 square miles and a population (1916) of 2,097,000, of whom over 75 per cent. are Muhammadans. It includes the provinces of Baku, Ganja (Elisavetpol), and the districts of Zakatal and Nakhichevan. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1924, and 213,000,000 poods in 1925-26. Fishing is also important, and 18,000,000 poods of caviare were produced in 1922. The principal crop is cotton.

The CAPITAL is Baku (pop 255,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Rakhja (63,000), Derbent (35,000), Kuba and Shemakha.

V.—BOKHARA.

President, Khodjayef Feyzulla
Chairman of Central Executive Committee, Parsa Khodjayef.

Plenipotentiary in Moscow, Yusuf Zade

Bokhara is a Central Asian Republic with an estimated area of 85,000 square miles, and a population of about 2,000,000, the majority being Muhammadan Uzbeks. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway, and has a population of about 200,000, and a branch line (8 miles) connects with the new capital (Kahan). The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A Soviet Republic of Bokhara was established and its independence was recognised by Soviet Russia by treaty of March 4, 1921; and on Sept. 20, 1924, the Bokhara Kurultai (Congress of Soviets) declared a *Socialist Soviet Republic*, which may be understood as a first step towards entering the Soviet Union. CAPITAL, Kahan.

VI.—KHIVA.

(Khorezm.)

President, Bekhtan-Nazaroff
Chairman of Central Executive Committee, Sultan Kary.

Plenipotentiary in Moscow, Atadshanoff.

The National Soviet Republic of Khorezm, formerly the Khanate of Khiva, lies between Bokhara and Kirghiz, and has a total area of about 26,000 square miles, with a population of 850,000, of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp). The independence of the Republic has been recognised by treaty with Soviet Russia (Sept. 30, 1920). CAPITAL, Khiva (population about 20,000).

SARRE TERRITORY.

Under the Treaty of Versailles Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League. At the expiration of 15 years from Jan. 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 713,000. The chief towns are Saïrebruck (117,000), Neunkirchen (35,000) and Saint Ingbert (18,000).

SALVADOR.

República de El Salvador

President (1923-1927), Señor Dr. Don Alfonso Quiñonez Molina, assumed office March 2, 1923.
Vice-President, Señor Dr. Don Pio Romero Bosque.

Foreign Affairs, Education and Justice, Señor Dr. Don Reyes Arrieta Rosal

Interior and Public Works, Señor Dr. Don Rodolfo Schonenberg.

Finance, Señor Don Gustavo Vides.

War and Marine, S. 4or Dr. Don Pio Romero Bosque.

Envoy Extraordinary and Minister Plenipotentiary to St. Britain, Señor Dr. Don Arturo Arguello-Loucel (*resident in Brussels*)
Consul-General in London, Señor Dr. Don Antonio Reyes-Guerra, 7 Union Court, Old Broad Street, E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 13,276 square miles, with a population estimated at 1,555,926. It is divided into 14 departments. In 1921 there were 55,539 births (37 per 1,000) and 30,613 deaths (20 per 1,000), 10 per cent of the deaths being due to malaria.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The constitution rests upon the fundamental law of 1864 (revised in 1886), the President and Vice-President being elected for four years by direct vote of the people, the President being ineligible for a successive term in either office.

There are distinct areas in the low alluvial plains of the coast and the interior plateau, with a mean elevation of about 2,300 feet, broken in many places by volcanic cones, of which the highest are Santo Ana (8,300 feet) and San Miguel (7,120 feet). The lowlands are generally hot and unhealthy. There is a wet season (winter) from May to October, and a dry season (summer) from November to April. Earthquakes are frequent, and on June 8, 1917, a series of seven shocks nearly destroyed the capital, and ruined the towns of Santa Tecla, Armenia, and Apopa. The volcano on Mount Salvador was actually in eruption in Oct. 1917, and a severe earthquake was experienced on April 28, 1919, doing great damage to the capital.

The principal river is the Rio Lempa, which rises in Guatemala and flows into the Pacific, with tributaries in the Santa Ana, Asaguate, Sumpul and Torola, the Lempa being navigable for most of its course by small steamers. In the eastern districts the Rio San Miguel rises near the Honduras boundary and flows into the Bay of Fonseca. The western boundary crosses the Laguna de Guila, the greater part of which lies within the borders of Salvador, and in the centre of the Republic is the large volcanic lake Ilopango, with a smaller lake, Coatepeque, further west.

The chief industry is the cultivation of coffee; sugar is also grown, as well as indigo, rice, balsam, &c. Cotton-growing on an extensive scale was commenced in 1924. The principal exports are coffee (80 per cent. of total value), indigo, tobacco, sugar and gold. The chief imports are textiles, hardware and machinery, chemicals and drugs. About 69 per cent. of the imports are from the U.S. and 15 per cent. from the U.K.

The total length of the railways is 262 miles; a British railway nearly 200 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre, and a line from the port of La Unión to the capital was opened in 1922. The principal ports are Acajutla, La Libertad and La Unión. There is a good motor road between La Libertad and the capital, while motor transportation is usually possible between the capital and Guatemala City, over the International road opened in 1923.

There are 120 post-offices and 234 telegraph offices, with 2,400 miles of wire
The language of the country is Spanish

	1921	1922
Revenue	£1,295,510	£1,505,157

SAN MARINO.

Regents, Two "Capitani Reggenti"

Consul-General for San Marino in Great Britain, Commendatore Melville A. Jamieson, F.R.G.S., 17 Cockspur Street, S.W. 1

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 38 square miles, the population 12,036. There is an army of about 1,000. The city of San Marino (pop 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on 16th Oct., 1869.

FLAG Two horizontal bands, white, blue (with coat of arms of the Republic in centre)
British Consul-General, E. Mervyn de Garston (Leghorn, Italy).

SIAM.

(Muang Tai.)

King, Rama VI, G.C.B., G.C.S.I., G.C.V.O., born

January 1, 1880, succeeded October 23, 1910

Foreign Minister, H. H. Prince Traidos

Envoy Extraordinary & Minister Plenipotentiary, in London, Phya Prabha Kaia Wong, 23 Ashburn Place, S.W. 7

Consul-General (Vacant) *Temporary Offices*, 23 Ashburn Place, S.W. 7)

The Kingdom of Siam, or Muang Tai (area about 195,000 square miles, population, 1923, 9,513,000), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a Financial adviser (hitherto always of British nationality) and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. A number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats, compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,600 Europeans. The principal religion is Buddhism. There are 508 Government schools and 3,752 schools of all kinds, attended by 202,665 children. The Chulalongkorn University is organised with faculties of medicine, political science, engineering, and literature and science.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping, which had held the lead in tonnage for many years past, has ceased to visit Bangkok since August, 1914, and, as a consequence, there has been a large increase in Norwegian and British shipping. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1918-19 rice constituted 82 per cent and teak 3½ per cent of the exports from the port of Bangkok, while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent *ad valorem*. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 1,000 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Korat (165 miles N.E.), with an extension (73 miles) to Tha Chang, Chiengmai (466 miles N. of Bangkok), Petru (46 miles E.), the southern line to Trang, on the west coast of the Malay

Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border where junction with the Federated Malay States Railway system was effected. There is through railway connexion between Bangkok and Penang and Singapore, and the railway is being extended from Petrien to the Cambodian frontier. Good roads are few. There are 3,000 miles of telegraph lines.

King, Alfonso XIII., son of Alfonso XII and of Queen Maria Christina, *born* (and *acceded to the throne*) May 17, 1886, *married* May 31, 1906, H.R.H. Princess Victoria Eugénie Julia Ena Maria Christina of Battenberg (*born* Oct. 24, 1887).

Heir Apparent, H.R.H. The Prince of the Asturias, Don Alfonso, *born* May 10, 1907.

MILITARY DIRECTORATE (Sept 1923)

President, General Primo de Rivera, Marquess de Estella

Members, Generals Adolfo Vallespinosa, Luis Hermosa, Luis Navarro, Dalmiro Rodriguez, Antonio Mayandia, Francisco Gomez Jordana, Francisco Ruiz del Portal, Mario Muslera, Marquess de Magaz.

Ambassador in London, Excmo. Señor Don A. Merry del Val, Grosvenor Gardens, S.W. 1
Counsellor, Comte de Pradere

1st Secretary, Señor Don Manuel Inclán
and Secretary, Señor Don José Ruiz de Arana, Vizeconde de Mambias

3rd Secretary, Señor Don Luis de Silva
Attaches, Señores Don P. de Soto, Don P. J. de Zulueta, Don E. M. Peña, Marques de Murrieta

Military Attaché, Lt.-Col. Don P. Rich.
Naval Attaché, Lieut.-Comm. Señor Don Fernando Navarro.

Consul-General, Excmo. Señor Don Enrique Gaspar, 47 Bloomsbury Square, W.G. 1
Vice-Consul, Señor Don Pedro Lecuona.

A Kingdom situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.—5° 30' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay

and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—722 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 106,700 English square miles, and an estimated population, in Jan. 1924, of 21,763,000—120 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Miño. The Constitution upon which the present Government is formed is dated 30 June, 1876. Spain is rich in iron, copper, and lead, its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province, in the south-west, Jerez, the well-known sherry and tent wines are made, in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quick-silver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the war, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1923 there were about 10,000 miles of railway open, and 60,400 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1923, consisted of 1,198 steamers (1,008,890 tons) and 591 sailing vessels (97,492). In 1922, 19,500 vessels of 24,584,581 tons (displacement) entered and 16,913 vessels of 20,773,523 tons (displacement) cleared at Spanish ports.

Defence—The authorised peace establishment, including forces in North Africa, was, in 1923, 19,827 officers and 284,212 men, in 1924 these forces were increased by 100,000 men, and the army of occupation in North Africa reached the figure of 150,000 all ranks. War strength Field Army, first line, 300,000, second line, 450,000.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers, there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education, *Primary*, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. *Secondary* High Schools are in each province, but the curriculum is defective. *Universities* at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

	1924-25

9 Calle Marqués de Cubas, Madrid
Madrid, 1,150 miles, transit, 45 to 50 hours

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Ibiza, and Formentera, the total area is 1,935 square miles, with a population (1923) of 342,402. The archipelago forms a province of Spain, the capital being Palma in Majorca

CEUTA, which forms part of the Province of Cadiz, is a fortified port on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,119

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Tenerife.

Spanish Colonies.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part

of the kingdom) consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (*Fernando Póo*) lies in the Bight of Biafra in $3^{\circ} 12' N$ lat. and $8^{\circ} 48' E$ long, about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. Total population 20,650. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in $1^{\circ} 24' S$ lat. and $50^{\circ} 35' E$ long, population 1,391.

Corisco Islands, consisting of Corisco, Bata, Elobey Grande, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between $21^{\circ} 20' - 25^{\circ} N$ lat., and extending eastwards to about $13^{\circ} W$ long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs, population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo ($2^{\circ} N - 2^{\circ} 10' N$ lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MOROCCO—Spain exercises a protectorate over a part of Northern Morocco, where her armies of about 150,000 are engaged in a continuous struggle with the Rifians (see pp 806 &), and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Melilla is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is 50,170.

Alhucemas is a settlement on the bay of that name, and includes six islands. Population 322.

Peñon de la Guinera (or *Peñon de l'elez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay, population 328.

Spanish Southern Morocco—*Ifni*, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

The **Chafarinas** (or *Zifarrinas*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 318.

THE SUEZ CANAL.

The **Suez Canal**—The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1922, £19,740,125). Since 1922 each 500 franc share has been divided into two 250 franc shares. The Suez Canal was opened in 1869. The total

length of the canal is 102 miles, with a minimum width of 45 metres (147 ft 8 in.), having cost 827,256,931 francs to construct and enlarge, the maximum draught of water allowed for vessels using the canal is 9.45 metres (31 feet). The average time for the transit through the canal is 15 hours 20 minutes. By a convention, signed on Oct 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H M Government and seven the shipwining interest).

British Directors, The Lord Inchcape, P.C., G.C.M.G., K.C.S.I., K.C.I.E. (*Vice-President of the Company*), Sir Aubrey Broeklebank, Bart., Sir Fredk Green, K.B.E., Rt Hon Sir R. S. Horne, G.B.E., K.C., T. Harrison Hughes, Oswald Sanderson, Sir E. Wyld-boie-Smith.

Representing H.M. Govt, H. T. Anstruther, Sir Ian Malcolm, K.C.M.G., Sir J. T. Davies, K.C.B., C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1914, with the percentage of British vessels—

Year	No of Vessels	Net Tons	British Tonnage
			%
1914	4,802	19,409,495	66.5
1915	3,708	15,266,155	76.3
1916	3,110	12,325,347	79.6
1917	2,353	8,368,918	73.6
1918	2,522	9,251,601	79.5
1919	3,986	16,013,802	70.9
1920	4,009	17,574,637	61.7
1921	3,975	18,118,999	62.9
1922	4,345	20,743,245	64.5
1923	4,621	22,730,162	62.8

The tonnage of the *merchandise* carried was 25,776,000 tons in 1913, 17,047,000 tons in 1920, and 22,777,000 tons in 1923. Details of the nationality of the vessels passing through the Canal in 1923 are appended—

	No of Vessels	Net Tons	Per cent (Tonnage)
British	2,839	14,264,214	62.8
Netherlands	451	2,178,058	9.6
French	259	1,294,400	5.7
German	247	1,213,621	5.4
Italian	256	1,042,754	4.6
Japanese	172	980,223	4.4
United States	114	614,128	2.7
Norwegian	87	335,597	1.5
Danish	64	299,695	1.3
Swedish	60	275,264	1.2
Russian	23	73,896	0.3
Greek	20	61,031	0.3
Spanish	13	36,718	0.2
Finnish	6	20,855	0.09
Yugo-Slav	3	11,605	0.05
Egyptian	2	2,335	0.01
Syrian	2	1,276	0.006
Monagasque	1	604	0.003
Totals	4,621	22,730,162	100

The transit receipts in 1920 were 8,718,765 fr., and in 1923, 175,770,268 fr.

The rate of transit dues as from Jan 1, 1924, is 7 fr 50c per ton, and 5 fr for vessels in ballast. The net dividends for the year 1923 amounted to 120 fr on the ordinary 500 fr shares, and 97'915 fr on the Actions de Jouissance. In 1923, the dividends were 430 fr and 401 21 fr, respectively.

The 2,839 British vessels included in the total for 1923 are grouped under the following categories—

	No	Net Tonnage
Merchant vessels	2,038	10,125,208
Mail steamers	223	1,544,025
Warship and transports	165	847,410
Government chartered vessels	40	223,347
Vessels in ballast	373	1,524,224
	2,839	14,264,214

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,105 square miles, and a population, Dec. 31, 1923, of 4,005,759, nearly all Protestant. This area includes the great lakes of Hjälmaren, Mälaren, Vänern, and Vättern. Nearly 44 per cent. of the population are devoted to agriculture,

about 208,000 being owners and 50,000 tenants of the land they cultivate. The country for the most part is flat with pleasant undulations, rising in the north-west to the Kolen Mountains, which separate Sweden from Norway, and may be divided into three separate districts—the northern, forest; central, mining; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir. These are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich in iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions, copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gällivare and Kiruna to Lulea on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, skins, manila, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. In 1923 the exports of wood pulp and paper were 1,320,561 tons.

Railroads, 9,690 miles in length (of which 3,856 are the property of the State) were open on Jan 1, 1924, and 50,584 miles of telegraph wires (inclusive of 22,364 railroad telegraph wires), 146 coastal stations, and 1,914 railroad and 1,449 other telegraph stations. There were at the same date 440,945 miles of telephone wires.

Defence—Service in the Army is universal and compulsory. The peace effective is about 95,000 trained men, which can be raised to war strength of about 380,000. The Navy consists of 57 fighting vessels (290 guns), 12 being iron-clads, with submarines, submarines, and some training ships, &c.

Education—(i) *Primary*: Compulsory and free. Illiteracy rate maintained by local taxation, with State grants. Attendance good. (ii) *Secondary*: Well-developed, schools numerous and efficient. (iii) *Special schools* make a feature of technique and navigation. (iv) *Universities*: Lund, Upsala, and private faculties in Stockholm and Gothenburg.

The Helvetia of the Romans, a Federal
Republic of Central Europe, situated between
45° 50'—47° 48' N lat and 5° 58'—10° 30' E long
It is composed of 26 Cantons, of very dissimilar
size, united under a Constitution dated 29 May,
1874, and comprises a total area of 15,950 square
miles, with a population of 3,888,320 in 1920,
who are divided between Roman Catholics, 40
per cent, and Protestants, 59 per cent, Jews
numbering 7,400, and others 11,000 The popula-
tion is formed by three nationalities, distinct by
their language, as German 71 per cent, French
22 per cent, Italian 6 per cent, and Romansh
(Grisons), 1½ per cent It is the most moun-
tainous country in Europe, having the Alps,
covered with perennial snow and glaciers, rising
from 5,000 to 15,213 feet in height, not only along
its southern and eastern frontiers, but through-
out the chief part of its interior, and the Jura
mountains in the north-west Agriculture is
followed chiefly in the valleys, where wheat,
oats, maize, barley, flax, hemp, and tobacco are
produced, and nearly all English fruits and
vegetables are grown The forests cover about
one-sixth of the whole surface. The chief
industries comprise the manufacture of silks,
artificial silks and silk ribbons, wool, cotton and
cotton ribbons, linen, strawplait, machines,
paper, chemicals, chocolate, condensed milk,
dyestuffs, and tobacco, while the metallurgical,
electrical and pharmaceutical industries are
also extensive, clocks and watches have long
been the staple products of Geneva and
Neuchâtel In 1923 there were 3,720 miles of
railway in working order, 27,121 miles of
telegraph line, 410,312 miles of telephone line,
and 3,925 post-offices

The legislative power is vested in a Parliament,
consisting of two Chambers, a National Council
of 198 members, and a Council of States of 44
members, both Chambers united are called the
Federal Assembly, and the members of the
National Council are elected for three years, an
election taking place in October The executive
power is in the hands of a Federal Council of 7
members, elected by the Federal Assembly, pre-
sided over by the President of the Confederation
The President has a salary of 27,000 francs, the
Vice-President and other members of the Federal
Council 25,000 francs each The members of the
Federal Council are elected for three years, each
year the Federal Assembly elects from this council
the President and the Vice-President, they are
elected for one year, the five other members for
three years Not more than one of the same
canton may be elected member of the Federal
Council

Defence Militia Active Army, 22 yrs; initial
trg, 65—90 days Subsequently 12 days per ann.,
then Landwehr, 3 yrs, 1 trg, 22 dys for dismtl
branches only; then (Landsturm to age 48) War
Strength, 140,600, Landwehr, 65,000; Landsturm,
57,000

Education.—Control by cantonal and com-
munal authorities No central organ. Illiteracy
rare in Protestant cantons (1) *Primary* Free
and nominally compulsory, but attendance is
not strictly enforced in the essentially Roman
Catholic cantons School age varies. (2) *Second-
ary* Age 12—15 for boys. Schools numerous and
well-attended, and there are many private in-

stitutions. (ii) *Special schools make a feature of commercial and technical instruction* (iv) *Universities* Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel

Public revenue *Francs, 256,850,000
Public expenditure 294,670,000
Debt (Jan 1, 1924) 1,570,000,000

1924
Total imports £78,954,000 £92,133,000
Total exports 72,704,000 73,077,000
Imports from U K 5,828,000 7,216,000
Exports to U K 13,798,000 14,408,000

CAPITAL, Berne Population (1920), 104,656
Other large towns are Zurich (207,162), Bâle (135,976), Geneva (135,059), St. Gallen (70,437), and Lausanne (68,533)

SYRIA AND LEBANON.

French High Commissioner, Général Weygand.
Syria—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned

* Estimated.

King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (q.v.). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation has now been abolished. Damascus and Aleppo have been amalgamated into a single State (the details of the amalgamation have not yet been worked out), and the State of the Alaouites again becomes independent. The actual form of government differs in each of the States, but the guiding principle in each is real and effective French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, and its Northern limits are still undefined. The present temporary Northern boundary between Syria and the territory occupied by the forces of Mustafa Kemal Pasha (the leader of the Nationalist movement in Asiatic Turkey) was defined in the agreement between France and the Kemalists, and is roughly as follows:—From a point immediately S of Fayas (on the Gulf of Alexandretta) to Melden Ekber (the railway station and environs remaining in Syria), thence S E to the railway station of Tchoban Bey, leaving the districts of Maras to Syria and of Karnaba and Killis to the Kemalists; thence along the Baghdad Railway to Nussebin and along the old highway to Jizreh ibn-Omar on the Tigris (the districts of Nussebin and Jizreh ibn-Omar remaining in Kemal territory, with the roadway between these two places). The E boundary separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jebel Druze to a point 15 miles S.E. of Jezreh ibn Omar (60 miles E. of Mardin); the S boundary follows a line from Ras el Nakoura on the coast, N of Akka, and running S E to the Hedjaz railway line S of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits, the estimated area is 100,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier, running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hama (60,000). The administrative capital is at Beyrout (Grand Lebanon). Damascus contains the Mosque of the Omayyades (where is the tomb of Saladin), and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca passes annually, while the "street called Straight" (Acts ix, 12) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are

metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At Baalbek (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world ($60 \times 17 \times 14$ feet), weighing 1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *via* Homs, was re-opened in 1921. A narrow-gauge tramway runs from Mameltein along the coast. From Damascus there is railway communication with Palestine, and with Transjordan (Kerak), and with the Hedjaz, *via* Deraa, and the Syrian railways link up with the Baghdad railway at Aleppo. Road communications between Beyrout and Baghdad, *via* Damascus, have been recently developed by the opening up of the desert motor routes. Baghdad is now within 24 hours of Beyrout.

Beyrout is the residence of the French High Commissioner and the capital of the Great Lebanon. Damascus was the Federal capital, and will probably become that of the new Unified State.

The Great Lebanon (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Great Lebanon is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry-trees, the live stock are numerous and one of the principal sources of wealth. The Capital is Beyrout (pop. 91,498), which is the chief seaport and also the administrative capital of Syria. Tripoli is the next important town and seaport. Minor ports are Junieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Governor of the Great Lebanon, Général Vandenberg.

Pro-Consul, A. Akras.

Alexandretta—Vice-Consul, J. A. Catoni.

Damascus—Consul, W. A. Smart.

TAURIDA.

In March 1918 the former government of Taurida declared its independence as the *Taurida Republic*. The area is 13,312 sq. miles, with a population (1914) of 2,000,000, and the Republic is bounded on the N. by the Dnieper river and the Province of Ekaterinoslav, on the W. and S. by the Black Sea, and on the E. by the Sea of Azov. The soil is very productive, especially in its southern peninsula, known as the *Crimea* (the ancient Tauric Chersonese). The capital is SIMFEROPOL (pop. 1914, 65,000), other towns being Sevastopol (pop. 1914, 62,000), Kertch (pop. 1914, 60,000), Theodosia (pop. 1914

44,000), Berdiansk (pop. 1914, 41,000), Yalta (pop. 1914, 31,000), Eupatoria, Melitopol, and Perekop.

TURKESTAN.

In Jan. 1918 the former Russian Provinces of Ferghana, Syr-Daria, Amu-Daria, Samarkand and Semirvichensk, with a total area of about 420,000 sq. miles and a population of about 7,000,000, declared their independence as the *Republic of Turkestan*. The territories of this Republic extend from the Aral Sea in the W. to the boundaries of the Chinese Republic in the E, and between the River Chu and Lake Balkash on the N. and Khiva, Bokhara and Afghanistan on the S. The capital is TASHKEND (pop. 1914, 275,000), other large centres being Khokhland (pop. 1914, 125,000), Samarkand (pop. 1914, 100,000), Adjan (pop. 1914, 90,000), and Namangan (pop. 1914, 80,000).

The Ottoman Turks are derived from Central Asian tribes, who were converted to the Muhammadan faith in the seventh century. These Muhammadan tribes attacked and conquered the Asiatic Provinces of the Byzantine (Eastern Roman) Empire, and by the middle of the fourteenth century they had spread from Asia Minor into South East Europe. In 1453 they captured Constantinople, and spread over the whole of the Balkan Peninsula, their name of Osmanli, or Ottoman Turks, being derived from Othman, or Osman (1299-1326), a notable Turkish leader in the fourteenth century. Early in the sixteenth century the Ottoman Empire was spread over Egypt and northern Africa, and penetrated northward into Hungary, a great part of which was incorporated with the Turkish dominions until 1699, when the *Peace of Carlowitz* freed the country from Turkish rule. In the nineteenth century the outlying African dominions, with the exception of Tripoli, broke away from their suzerain, or were occupied by other Powers, and in the latter part of the century the northern states of the Balkan Peninsula asserted their independence, under guarantees of the Christian Powers. The outcome of these political upheavals was a demand

for better government in the remaining dominions of the Sultan. During the process of constitutional reforms, which drove the Sultan Abdul Hamid (1876-1908) from the throne, war broke out between Italy and Turkey, and Tripoli and Benghazi were ceded to Italy under the *Treaty of Lausanne* (Oct. 12, 1932). These events were followed in the autumn of 1912 and the early months of 1913 by a disastrous war with the states of the Balkan League (Bulgaria, Montenegro, Serbia and Greece). At the outbreak of hostilities the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria), thus including the districts known as Macedonia, Thrace, and Albania. By the *Treaty of London* (1913), the north-western boundary of European Turkey was a line drawn from Enos, on the Adriatic coast, to Midia, on the Black Sea, thus excluding Adrianople, which had capitulated (after a long siege) to the Bulgarian forces. At the outbreak of the second Balkan war (in which Serbia and Greece were aided against Bulgaria by Rumania), Turkey re-occupied Adrianople, thus recovering a part of the lost dominions. In the Great War of 1914-1918, Turkey threw in her lot with the Central Powers and made unsuccessful attacks on Egypt and South Russia. Great Britain sent an expedition to Gallipoli (which was withdrawn) and to Mesopotamia and Palestine, which freed those countries and Syria from Turkish rule, while various tribal revolts in Arabia ended the Turkish suzerainty in that peninsula. On Oct. 30, 1918, Turkey surrendered unconditionally before the conquests of the various Anglo-Indian and Imperial British columns and their Arabian allies. The final peace settlement with Turkey was the subject of protracted negotiations. The first definite proposals were embodied in the *Treaty of Sevres*, which was signed on Aug. 10, 1920, but was never ratified. The rise of the Turkish Nationalist movement in Asia Minor, which brought into existence a *de facto* Government at Angora, and the defeat of the Greek armies in August-September, 1922, finally destroyed any possibility of the *Treaty of Sevres* being brought into force.

Treaty of Lausanne.—As a result of the Peace Conference, which met at Lausanne from November, 1922, until February, 1923; and again from April to July, 1923, a treaty was signed there on July 24, 1923. This treaty has been ratified by Turkey and Greece, and came into force as between Great Britain and Turkey on Aug. 6, 1924. The main provisions of the treaty and various instruments annexed to it are that Turkey retains Eastern Thrace, including Adrianople, while ceding Syria, Palestine, Mesopotamia and the rest of Arabia. The northern boundary of Mesopotamia is to be settled by negotiation within nine months, or failing that by reference to the League of Nations. Italy is confirmed in possession of the Dodecanese, and Greece in possession of the islands formerly held by Turkey in the Aegean, except Imbros and Tenedos. Turkish rights over Egypt, the Sudan and Cyprus come to an end. A special convention demilitarises zones on either side of the Bosphorus and Marmora, and lays down rules for preserving the freedom of the Straits in peace and war. These rules are to be applied under the auspices of the League of Nations by a commission composed of representatives of Turkey, France, Great Britain, Italy, Japan,

Bulgaria, Greece, Rumania, Russia, Serbia and, in the event of her accession, the United States. The minorities clauses are the same as in recent European treaties. Turkey cedes ground for military cemeteries at Anzac and elsewhere. The old extraterritorial privileges of foreigners ("Capitulations") are abolished, but a special convention concluded for seven years provides that foreigners residing or trading in Turkey are to be subject to no taxes or disabilities not imposed on Turks. A commercial convention concluded for five years establishes an import and export tariff and lays down that there shall be no discrimination against foreign shipping and trade.

Turkey in Europe (10,000 sq. miles, estimated population 2,000,000) thus consists of Eastern Thrace, including the cities of Constantinople and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (200,000 sq. miles, estimated population 11,000,000) comprises the whole of Asia Minor, and extends from the Aegean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria, Arabia and Iraq. This area corresponds approximately with *Anatolia* ("Land of the Rising Sun," or Orient) and includes *Cilicia* round the Gulf of Alexandretta, assigned to France by the Allies, but restored to Turkey by the French. Cilicia is generally fertile and produces wheat, cotton, wool, sesame, &c., and is capable of considerable agricultural development. Alexandretta or Iskanderun, the chief port and an important strategic centre, secures the command of the Belling Pass. Cilicia was handed over to the Kemalist forces by the French on Jan. 4, 1922. The district is now part of the Turkish Republic, and is under the control of the National Assembly at Angora.

Government.—Sultan Muhammad VI. fled to Malta on Nov. 20 without, however, abdicating, and the Heir Presumptive, Abdul Mejid Effendi, succeeded, after election by the Grand National Assembly at Angora, without any temporal functions and with the title of Caliph. Abdul Mejid was a direct descendant from Othman, and bore the "sword of Allah" girded upon Sultan Selim in 1517. On October 29, 1923, the Grand National Assembly proclaimed Turkey a republic and elected Ghazi Mustafa Kemal Pasha President of the Republic, on March 2, 1924, the Grand Assembly passed a law abolishing the office of Caliph and ordering the Caliph and the other members of the dynasty to leave Turkish territory. The Caliph and his family, from which for over four centuries the "Commander of the Faithful" had been drawn, were expelled from Turkey on March 4, 1924, and the remaining members of the dynasty within the next few weeks. The *Grand National Assembly* is a single chamber legislature, which delegates its executive power to ministers acting in its name and responsible to the Assembly for their actions.

Religion.—The religion of the State is by law Muhammadan, and the majority of the inhabitants are Muhammadans, but there are large numbers of Christians (of the Latin and Eastern rites) and Jews. Education is nominally compulsory and free. There are primary schools,

training schools for teachers, and at Constantinople a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, nuts, olives, baloons and liquorice root, and many varieties of fruit are grown. Samsoun is the chief centre of the tobacco growing industry, which is also of importance at Smyrna, Ismidt and Broussa. The export of merchandise was considerable before the War, and consisted principally of coffee, opium, tobacco, cotton, carpets, gums, mohair, wool, raisin and figs. The forests should be a source of wealth, but scientific exploitation is disregarded, beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Broussa and Ismidt. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver, and arsenic are among the minerals produced. The principal manufacture is carpet-weaving. Before the War the total exports were valued at about £725,000,000 annually, and the imports at about £745,000,000 (£711 = £10). In 1913 the share of Great Britain in the import trade of Turkey was 40 per cent. in 1900 it had fallen to 29 per cent., and in 1912 to 27 per cent.

Communications.—About 300 miles of railway remain to Turkey in Europe. In Asia Minor there are 1,860 miles, consisting of the Anatolian Railway (645 miles), Baghdad Railway (393 miles), Smyrna-Aidin (376 miles), Smyrna-Cassaba (400 miles), and Mudania-Brussa (26 miles). There are electric trams in Constantinople and Smyrna.

Turkish Finances.—According to the Budget estimates for 1924-25, as published in the Press, the expenditure was placed at £140,423,369, exclusive of the portion of £125,000,000 (to be spread over 5 years), which was reported to have been voted on the last day of the session for reconditioning the Anatolian Railway. On balance the Budget of 1924-25 shows an admitted deficit of £111,000,000 (exclusive of the proportion for the Railway), and no provision was made for the service of the Foreign Debt.

The General Debt of the Ottoman Empire amounted on March 1, 1925, to £7190,048,107. New loans, advances, &c., issued during the War increased the total to £7488,115,647 on March 1, 1921, exclusive of indemnities or reparations due to Allied subjects. These figures are subject to modifications, no accurate accounts being available under present conditions. The Ottoman Debt is administered by a Council: Sir Adam Block, K.C.M.G. (Deputy of British and Netherlands Bondholders), M. F. de Clouetres (French), M. B. Nogara (Italian), Dshid Bey (Turkish), A. H. Reid (Imperial Ottoman Bank), Imperial Commissioner, Zekai Bey; General Manager, M. Graesset. Sir Adam Block and M. de Clouetres preside alternately.

	1923	1922

* 3 months only

CAPITAL OF TURKEY, ANGORA, the headquarters of the Republican Government, an inland town of Asia Minor, about 200 miles E.S.E. of Constantinople, with a population in 1923 of about 65,000. Angora (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. It is reported that a new city is to be laid out, on the lines of Washington, D.C. **CONSTANTINOPLE**, the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 325, and renamed by him; it became capital of the Eastern Roman Empire, A.D. 364, population estimated at 1,000,000. Other cities are Smyrna (70,000), Broussa (50,000), Scutari in Anatolia (50,000), Casserea (50,000), Marash (50,000), Sivas or Sebastia (45,000), Adana (45,000), Trebizond (30,000), and Alexandretta (10,000). The population of Asia Minor has been greatly reduced by the exodus of Greeks and Armenians following upon the Turkish capture of Smyrna; the preceding figures are estimates of Oct., 1923.

The smallest Republic in South America, on the east coast of the Río de la Plata, situate in lat 30° – 35° S and long 53° – 57° W, containing an area of 72,180 square miles, and a population on Dec 31, 1923, of 1,662,116.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Trenta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept 10, 1830. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the Río de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguarón, Santa Lucía, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Mirim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (7,802,450 in 1916) and sheep (11,472,900 in 1916), the wool of which is of excellent quality. Gold mines exist at Cuapirí. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woolen and cotton goods, hardware, and

coals. There are 1,499 miles of railway open (1922), all in British hands, and three short lines owned by the State; and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 101,638,265 letters and packets. The language spoken is Spanish.

	1922–23.	1923–24.

The most northerly Confederation of South America, situated approximately between 1° – 40° S lat and 12° – 26° N lat and 59° – 73° W long. It consists of 20 States and 4 federal territories. The best authorities calculate the actual present area to be approximately 353,728 square miles. The census of 1920 gave the population as 2,412,952.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Marigarta*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. *Marigarta* has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vesputi, the former naming the Gulf of *Maracaibo* Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of *Caracas*, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of *Caracas*, who defeated the Spanish forces in the battles of *Las Guaymas* (1813) and *Carabobo* (1821), and thus secured the independence of the country. *Bolivar* was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant *Sucio*) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at *Caracas* in 1842. Venezuela formed part of the Federal Republic of Colombia from 1823-1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1880, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President *Falcon* divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1919, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of *Paria* on the north-east. The main range is known as the *Sierra Nevada de Merida*, and contains the highest peaks in the country in *Picacho de la Sierra* (15,400 feet) and *Salado* (13,878 feet), the maritime ranges containing the *Silla de Caracas* (8,531 feet). Near the Brazilian border the *Sierras Parima* and *Pacaraima* and on the eastern border the *Sierras de Rinconete* and de *Uaupamo* enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The *Sierra Parima* contains *Yapara* (7,175 feet) and *Duida* (8,100 feet), and *Para* *Caima* contains *Maraguaca* (8,200 feet) and *Boruma* (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in

the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The *Orinoco* is navigable for large steamers from its mouth for some 200 miles, and by smaller vessels as far as the *Maipures*, *Catawac*, some 200 miles further up stream. Among the many tributaries of the main stream are the *Ventura*, *Caura* and *Cauri* from the south, and the *Apure* (with its tributary the *Portuguesa*), *Arauca*, *Meta*, and *Guaviare* from the west, the *Meta* and *Guaviare* being principally Colombian rivers. The upper waters of the *Orinoco* are united with those of the *Rio Negro* (a Brazilian tributary of the *Amazon*) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are *Zulia* (200 square miles), south-west of *Maracaibo*, and *Valencia* (126 square miles), about 1,400 feet above sea level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are coffee (81,552 metric tons in 1919), cacao (19,833 metric tons in 1919), goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

Spanish is the language of the country.

The Kingdom of the Serbs, Croats, and Slovenes is an outcome of the War of 1914-1918, through the fusion of the Kingdoms of Serbia and Montenegro with the Yugo-Slav districts of Austria-Hungary. The area and population of the new kingdom are approximately as under:—

District	Sq. Miles	Est. Pop.
Serbia	34,500	5,000,000
Montenegro	5,800	500,000
Croatia and Slavonia	16,418	2,700,000
Banat (part)	6,000	800,000
Bosnia	16,233	1,630,000
Herzegovina	3,527	270,000
Carmola (part)	2,500	350,000
Styria (part)	1,900	350,000

Total .. 86,878 11,600,000

Montenegro (*Zerna-Gora*) was formerly a province of the old Serbian Empire. On Nov. 29, 1918, the National Skupshchina deposed King Nicholas, and a decision was made to reunite Montenegro with Serbia. King Nicholas died on March 21, 1921, and the union of the country with Yugo-Slavia is now an accomplished fact. The chief town is Cetinje (pop. 5,000) and the ports are Antivari and Dulcigno.

Old Serbia has no seaboard, but the whole coast of Croatia, Dalmatia, and Montenegro is included in the Yugo-Slav Kingdom, and access is thus possible to the Adriatic at any point of the littoral of these territories. By a convention with Greece of May, 1914, similar access is obtained to the port of Salonika, on the Aegean; this convention was renewed in another form in 1923, a free zone in Salonika harbour being thus secured to the S.C.S. Kingdom. In 1922 there were about 6,000 miles of railway in operation. The Danube forms a great commercial highway, the Save and Tisa being also extensively used by river steamers. In January, 1923, a French

company secured a contract for an aerial passenger and mail service between Faria and Belgrade.

The Army on a peace footing consists of 130,000 officers and men, the war strength being about 250,000.

The religion of the state is Greek-Orthodox and Roman Catholic. Primary education is free and nominally compulsory, but the attendance does not exceed 25 per cent. of the young. The State also maintains Secondary and Girls' High Schools. The University is at Belgrade.

The principal industry is agriculture, and the crops of 1922 were of average quality, enabling a considerable surplus of wheat, barley, oats, rye and maize (over 600,000 tons of last named) to be exported. The product of the vines also permitted a surplus to be exported. Of the exports of all kinds in 1922, Italy took 22 per cent and Austria 23 per cent.

Revenue, 1924-25 Dinars 10,405,000,000
Expenditure do. 10,405,000,000

National Debt (Dec. 31, 1922).—

THE INTERNATIONAL TRADE OF THE WORLD IN 1922 AND 1923.

By J. I. CRAIG, M.A., F.R.S.E., F.R. Econ. Soc.

THE accompanying tables have been drawn up as those given last year in WHITAKER'S ALMANACK, p. 514, to which reference may be made for particulars. Data have been obtained in the most important cases from the diplomatic or consular services in this country, and from the Department of Overseas Trade, to all of whom the thanks of the author are due. Unfortunately, the data for many countries for 1923 are not yet published, and to some extent the figures given under 1923 in Tables A & B are conjectural. But those known accurately represent 90 per cent and 85 per cent of the totals in the respective tables, and the totals cannot be wide of the truth. Gold is included in nearly every case.

Prices in 1922 and 1923 as compared with 1913 taken as 100 were as follows.—

	1922	1923
United Kingdom (average of Economist and Board of Trade)	159.2	160.6
United States	149	154
Average rate of exchange on New York	\$4.42	\$4.57
British index number reduced	143	151
Average, U.K. and U.S.A.	146	152.5

There was a slight fall in world's prices from the 1921 level (148.5), but an appreciable rise between 1922 and 1923. As might be expected

this increase in price (of 4 per cent) produced an increase in the volume of trade amounting to about 2 per cent. The monetary value rose by 6 per cent. The occupation of the Ruhr (which was at one time invoked as the cause of a diminution of international trade) was not a sufficiently powerful factor to prevent a slight stimulation in general commerce.

The import trade of the British Empire, which had fallen from 1,748 millions sterling in 1921 to 1,600 millions in 1922, recovered in 1923, to 1,733 millions. For the export trade the corresponding figures were 1,396, 1,500, 1,631. There was thus a steady rise in the value of the exports. That the value of the imports did not rise to the same extent, as might be expected, was due to a heavy slump in freight rates, which at one time in 1923 equalled those prevailing in 1913.

The difference between the value of the exports and imports gives an approximate measure of the earnings from freight and insurance. In 1922 and 1923 these earnings were £468 millions and £473 millions respectively, and since some 30 per cent of the shipping of the world is British, the gross earnings of British cargo shipping and insurance may be estimated at £140 millions and £142 millions. The Board of Trade has estimated the net earnings from shipping at £120 millions in 1922.

ROYAL SOCIETY MEDALS.

THE King has approved of the following awards by the President and Council of the Royal Society :-

A Royal medal to Sir Dugald Clerk, K.E.R., F.R.S., for his application of scientific principles to engineering problems, particularly to the development of the internal-combustion engine.

A Royal medal to Dr. H. H. Dale, F.R.S., for his researches in pharmacology and physiology

The following awards have also been made by the President and Council :-

The Copley medal to Sir E. Sharpey-Schafer, F.R.S., for his valuable work in physiology and histology.

The Rumford medal to Mr. C V Boys, F.R.S., for his invention of the gas calorimeter

The Davy medal to Professor A. G. Perkin, F.R.S., for his researches on the structure of natural colouring matters.

The Darwin medal to Professor T. H. Morgan, Foreign Member R.S., for his valuable work in zoology, especially his researches on heredity and cytology.

Patron, His Majesty the King.
President, H.R.H. the Prince of Wales.
Patron (Women's Section), H.M. the Queen.
President (do.), H.R.H. the Duchess of York

Chairman of Executive Council, His Grace
the Duke of Devonshire, K.G.

The Board Lord Stevenson, G.C.M.G. (Chairman); Lt.-Col. Sir A. Henry McMahon, G.C.M.G., G.C.V.O., K.C.I.E., C.S.I.; Sir Charles McLeod; Colonel the Hon. Sir James Allen, K.O.B.

Chief Administrator, Lieut.-Gen. Sir Travers Clarke, K.C.B., K.C.M.G.

Registered Offices, 16 Grosvenor Gardens, London, S.W. 1.

THE Great Exhibition at Wembley was opened by their Majesties the King and Queen on Wednesday, April 23, and the date of closing was Saturday, November 1, 1924. It has been the outstanding event of the year, and the opinion seems to be generally held that both in conception and in achievement it surpassed all previous Exhibitions.

Three-quarters of a century ago, the Great Exhibition of 1851—of which the Crystal Palace still remains with us as a souvenir—attracted all visitors by the bold intermingling of iron and glass. The British Empire Exhibition of 1924 was equally impressive and novel in the employment of concrete. The massive buildings, together with the vast foundation work involved in their construction, the bridges, gateways, emblematic lions, roads, towers, and architectural features innumerable, constituted in the aggregate one great exhibit of Concrete. That the Exhibition gave a most instructive display of what can be done with that material was a fact patent to all who visited Wembley. Many of the displays were of permanent interest and of exceptional educative value, and it is to be hoped that a more or less complete re-opening in 1925 may be possible.

At the Guildhall Banquet (Nov. 10, 1924) the Prime Minister stated the intentions of H.M. Government in the following terms:—"We are determined that the great enterprise of Wembley shall not come to an untimely end. Next year we shall ask Parliament for a sufficient guarantee, in addition to that already promised, provided we get the support of all parties concerned, as well as the Dominions Overseas."

THE BRITISH GOVERNMENT PAVILION—Severely plain, but dignified in general aspect, this building was appropriate to its contents. Six huge lions, very successfully modelled in concrete, guarded the portals; the national flags flew overhead; and special apartments were here reserved for the use of their Majesties the King and Queen during their frequent visits to the Exhibition. The contents of the building illustrated very fully the various activities of Government service. A specially appropriate item, calculated to bring very forcibly home to every visitor the world-wide scope of the British Empire Exhibition, was the great relief map of the World which was here displayed on the floor of the central hall, and which by ingenious lighting and other arrangements conveyed in a very impressive fashion information regarding the various portions of the Empire and the trade routes connecting them. An equally instructive large-scale model of the Home Country, illustrating its industrial and other features, was

also shown here, and in the theatre which formed part of the building was a stage ingeniously equipped with various arrangements and devices for giving vivid representations of remarkable episodes which occurred by land and sea in the Great War. The contents of no building amongst the assemblage at Wembley were more calculated than those of this Government Pavilion to impress the visitor with the world-wide range and the importance of the responsibilities devolving upon the Home and other Governments concerned. A brief summary of a few sections will emphasise this.

The Admiralty contributed a most interesting display, illustrating in a most complete way the development of British naval matters from very early days. A most interesting section was that devoted to the Hydrographic Department of the Admiralty, many of the old maps and charts shown being of historic value. The War Office came equally to the front with most instructive exhibits, and a good idea of the history of this country from Saxon days onward could be obtained by an inspection in sequence of the remarkable collection of weapons, armour, pictures, relics, clothing, and models displayed. The Air Ministry had, too, a section of great interest, the panoramic views and models being most ingeniously contrived to illustrate special features relative to aeronautics. The Post Office and the Royal Mint had excellent displays, the latter with a coining press in actual operation and a very full display of the coins of the British Empire. The Public Record Office contributed some items too of vast interest, as did also the Victoria and Albert Museum. The Ministry of Health had a comprehensive exhibit dealing with the numerous public services coming within its purview, and the Ministry of Agriculture and Fisheries had a display of instructive variety illustrating the treatment of various soils and many other aspects of agricultural research. Evidence of the work of the Royal Society was to be seen in the Pure Science Exhibits shown on one of the higher floors in the building. These were of special interest, as they tended to show that many discoveries and inventions of great value commercially and industrially were undertaken in the first place without any special utilitarian motive. Incidentally, too, the exhibits emphasised the important part that works in lines of scientific research play in the industrial development of the nation. Other sections of interest were those devoted to the Board of Education, the Royal Botanic Gardens, Kew; the Ordnance Survey Office; the Department of the Government Chemist; the Department of Scientific and Industrial Research; the Imperial Institute; the Imperial

Mineral Resources Bureau; and the section devoted to Tropical Health.

THE PALACE OF INDUSTRY—This immense building housed an Exhibition in itself, and a most attractive one. Each of the many sections into which its interior was divided was devoted to a special branch of British Industry. The *Chemical Industries* had a wonderful display, thanks to the co-operation of numerous firms through the Association of British Chemical Manufacturers. Fine and heavy chemicals for all kinds of industrial purposes, essential oils, drugs, perfumes, dyes, solvents, and trade requirements of every conceivable kind in the chemical line were here displayed in infinite variety, and in connection with the dyeing industry the exhibits in this and other sections were a revelation both in regard to British dyes and British textile skill. The section devoted to *Rubber* was organised by the Rubber Manufacturers' Association, and was a very complete display of the manifold uses to which rubber is now applied. As might be expected, the *Domestic Utilities* and *Fancy Goods* section included many lines of industry, and the *Sports* section, including the firearms department, had also a display of great variety. The halls devoted to the industries of *Usteri* merited special attention, as in them were given interesting displays of Northern Ireland's commercial activities. Those activities comprise, amongst others, the linen industry, shipbuilding, the production of mineral waters and Irish whiskey, rope and twine, and tobacco, and there were many interesting exhibits relative to these industries. The Scottish linen industry had no display in this Palace, but it was well represented in a separate building in the grounds outside. In the section devoted to *Miscellaneous Textiles* some of the largest manufacturing firms in the country were represented and had excellent displays. The section devoted to *Wool* and *Allied Textiles* did special service for the mills in the Bradford, Leeds, and Huddersfield districts, and in the section *Cotton Textiles* there was a wonderful display of textile machinery and of the products emanating therefrom. The exhibits in all the textile sections bore eloquent testimony to what this country can do both in regard to spinning and weaving machinery of all kinds and the products therefrom. In the *Jewellery, Clocks, Watches and Cutlery* section there were many high-class horological exhibits, and a fine display of jewellery and plate. In the *Pottery and Glass* section British craftsmanship showed some excellent productions in all branches of their respective arts. Some of the examples of glass-work were indeed wonderful in regard both to the weight of material handled and the high quality of the results obtained. The sections devoted to *Leather* and to *Boots and Shoes* showed that on the one hand there was wide range in the material offered, and that on the other there was equally great variety in the articles produced. As might have been expected, a large area was occupied by *Food Products and Beverages*. Bread-making was shown in full operation on a commercial scale, as were also the production of biscuits, pastry, chocolates, and confectionery. The departments devoted to beverages were also very complete, ranging from milk and mineral waters to liqueurs and spirits. The *Tobacco* section was of special interest, historical and otherwise. The

section devoted to *Gas* was a notable one, worthy of a great industry. The general arrangement was excellent, the section being divided into two main halls, one fitted as a lounge room, and the other devoted to the display of industrial appliances and to cookery demonstrations. Around each hall were smaller rooms in which were displayed special applications of gas in regard to lighting, heating, cooking, and industrial purposes generally. Incidentally, the value of sulphate of ammonia and other by-products was duly emphasised, as were also the merits of gas from the smoke-abatement point of view. Another remarkable section was that devoted to *Silk*, in which many most wonderful samples were displayed of both the real and the artificial. The *Building* section was a very comprehensive one, as it included not only building materials and metal-work, but also heating, lighting, ventilation, and the construction of strong-rooms. Some of the doors and locks in connection with the last mentioned were amongst the most striking exhibits in this section. Displays of great interest and beauty were made in the section occupied by *Furniture and Decorative Textiles*. The variety of carpets, tapestries, damasks, brocades, and other high-class furnishing textiles produced in British mills must have surprised many visitors to this section. The *Paper* section was an excellent one, and the exhibits covered the whole range of activities from the pulp to the printed sheet. Ink, pens, and stationery were also very adequately dealt with in this section. *Music* had a section to itself, and the exhibits displayed the history of music from very early days up to the latest modern developments. *Scientific Instruments and Photography* made a very interesting show, with much that was instructive respecting the by no means small part played by well-constructed apparatus in the progress of Science. Specially interesting to ladies was the *Lace* section, in which a very full display was made of lace, embroideries, nets, and curtains, representative of the Nottingham district.

THE PALACE OF ENGINEERING—This building was described by the Exhibition authorities as covering an area more than six times as large as Trafalgar Square. Like its companion building—the Palace of Industry—its contents formed a complete exhibition and a large one, in themselves. The marshalling in such orderly array of exhibits, the size and weight of which were in many instances colossal, was of itself a triumph of no mean order, and one which could not fail to appeal to observant visitors. Amongst the main sections into which the building was divided were the *Electrical and Allied Engineering*, which was organised by the Incorporated British Electrical and Allied Manufacturers' Association, the *Shipbuilding, Marine, Mechanical and General Engineering*, organised by the British Engineers' Association, the *Transport* section; and the *Motors and Cycles* section.

In these sections were to be found practically everything that was representative of the particular branch of engineering concerned, this success being due in no small degree to the very effective way in which firms co-operated. A most impressive feature of this Palace of Engineering, and an example too of successful co-operation, was the great *Power Station* which supplied electrical power and light to the whole assemblage at Wembley. The equipment was

by members of the British Electrical and Allied Manufacturers' Association, and the manner in which demands were met was a tribute to the organised skill of the firms concerned. An interesting exhibit, dealing with the application of physics to engineering, was that arranged by the *National Physical Laboratory* (Department of Scientific and Industrial Research), and it is noteworthy too that the research side was being developed very keenly by many of the firms exhibiting. In the Transport section all phases of transport—by rail, road, and water—were represented. The great railways contributed an interesting display of rolling stock, whilst the exhibits of various shipping companies illustrated the latest developments of cargo-carrying and passenger vessels of all types. Many problems have been presented of late years by the introduction of liquid fuel, the use of turbines, internal-combustion motors, and other innovations, and the exhibits bearing on these matters were numerous and of high practical interest.

The Port of London Authority, and the great provincial cities of Liverpool, Manchester, and Bristol, showed plans and models which displayed in a most effective way the various dock and other shipping facilities they possess, and the extensions and improvements they have in hand. The section *Motors and Cycles* was organised by the Society of Motor Manufacturers and Traders, Ltd., and the British Cycle and Motor Cycle Manufacturers' and Traders' Union, Ltd., and they succeeded in getting together a collective display of British productions which reflected the highest credit on themselves as organisers and on the firms exhibiting.

THE PALACE OF ARTS.—This building sheltered selected specimens of all branches of Art, and in it the visitor could see, under admirable lighting conditions, a collection of Art objects as comprehensive as it was wonderful. Various sections were devoted to loan collections illustrating both modern British painting and earlier periods, to sculpture, and to applied art in a multitude of directions. Ecclesiastical art, as well as the art of the Theatre, had most interesting displays, and the rooms representing various periods in British history and British taste called for much attention. In a special gallery was shown the *Queen's Dolls' House*, which was a most popular exhibit—a palace in miniature, full of craftsmanship of all kinds in exquisite detail. A specially prepared copy of **WHITAKER**, one-twelfth natural size, reposed on the writing table in the palace library.

AUSTRALIA (with TASMANIA).—The Australian Pavilion and the grounds surrounding it formed one of the largest displays at Wembley. All the great industries of the Australian continent were therein well represented, and many of the exhibits were object-lessons of great educative value. Panoramic scenes of a most realistic character illustrated the various industries of the great continent at our antipodes, and conveyed in a most impressive way information regarding pastoral and agricultural life, the wool, timber, meat, dairying, mining, cotton, tobacco, and other activities. The fruit exhibits were of a specially notable character, as were also those representative of Australian wine production. Possibly one of the most impressive features of the whole display was the evidence afforded of the growing development of factory life in

Australia. The variety and high quality of the exhibits in the manufacturers' section showed most clearly that in this direction there had been during recent years most remarkable progress.

SEKOTUA.—The pavilion was a copy of a well-known house in the island which was at one time the home of Thomas Moore, the Irish poet. The exhibits illustrated the geographical and industrial features of the island, and included also some interesting historical items.

BRITISH GUIANA.—These exhibits were housed in the pavilion of the West Indies, and gave abundant evidence of the resources of the colony not only in such forest products as hardwoods and balata, but also in sugar, rice, and other field produce, to say nothing of gold and diamonds from the back-lands.

BURMAH.—The Burmah display, both as regards actual exhibits and the buildings which housed them, were remarkable for their beauty and their general excellence. Wood carving in bewildering intricacy was a feature of the main pavilion and its appurtenances, and the artistic work in textiles, lacquer, ivory, and the metals attracted attention that was well merited. The forest department contained an excellent display of teak and other woods, and as regards precious stones, oil, and minerals generally, the exhibits bore ample testimony regarding activities in Burmah.

CANADA.—The huge building occupied by Canada contained an exhibition in itself, and moreover a large one. The main building was flanked by subsidiary pavilions devoted respectively to the Canadian Pacific Railway and the Canadian National Railways, and the displays of these great concerns, with their wonderful panoramic expositions of Canadian scenery, formed fitting introductions to the main edifice. In the latter all the great Canadian industries were dealt with in the most complete and graphic manner. Maps in relief, and most realistic models, enabled visitors to see Canada in miniature from the Atlantic to the Pacific. The country's vast resources in timber, minerals, agricultural and dairy produce, fish, fur, and other directions were displayed in all possible ways, and the highly important exhibits of manufactured goods in wide range showed that Canada possesses in no small degree facilities for converting the raw material into the finished product.

CEYLON.—In a building the architecture of which was characteristic, Ceylon had a display worthy of the island. Tea, rubber, rice, spices, tobacco, and other agricultural products were in strong array, as were also many exhibits showing the wealth of Ceylon in gem-work of various kinds, and its industrial enterprise in textiles and other lines.

CYPRUS.—This pavilion contained an interesting exhibit of pottery, carpets, and other native arts and crafts, whilst the Government exhibits showed that fruit culture was receiving special attention.

EAST AFRICAN GROUP.—In this were included the exhibits furnished by *Nyasaland* (tobacco, cotton, tea, and sisal), the *Seychelles*, and *Zanzibar*—the clove industry being especially prominent in the display of the last-named.

FIJI—A small pavilion which contained many exhibits of copra and other island products.

HONG KONG—A native street, in full detail, enabled the visitor to sample most realistically this outlying station of the Empire. Hong Kong being an emporium for Eastern trade, the exhibits here were of vast variety.

INDIA—The exhibits illustrating India formed a very large exhibition in themselves. The buildings covered an immense area, and the various courts and halls were most picturesque and interesting examples of Indian architecture and workmanship. In this very appropriate setting were displayed choice specimens of produce and work from all parts of India. Practically all the States, as well as the various Government Departments, the Railways, and numerous trading associations and private firms, co-operated in bringing about this vast assemblage of representative details. All features of Indian life were represented. There were wonderfully realistic jungle scenes, and panoramic views of various districts. Forest produce and the products of mines, textiles of all kinds, with the achievements of craftsmanship in all sorts of material, were to be seen here in marvellous variety, and, in short, it may be said that, from the Punjab in the north to Travancore in the south, all India contributed to make a magnificent display.

MALAYA—An attractive pavilion, with banded minarets, housed a wide variety of exhibits from this great Asiatic peninsula, with its neighbours—Borneo and Labuan. The great industries—rubber-growing and tin-mining—were admirably illustrated, as were also many other lines of activity in forestry, agriculture, and native arts and crafts.

MALTA—This pavilion contained a most interesting series of exhibits. There were archaeological items which carried the history of the islands back to centuries before the Christian era, and there were other exhibits which brought it through the Middle Ages up to the present time. The industrial side was also admirably represented.

NEWFOUNDLAND—The pavilion of the "oldest British Colony" contained an excellent show, illustrating not only the developed resources of the island, but also its vast potentialities for future exploitation. Its mineral wealth was shown by numberless specimens to be most comprehensive in variety and promising in quantity. The great sealing and fishing industries and their subsidiaries held naturally a premier position. The timber trade and its offshoot, the paper industry, had remarkable exhibits.

NEW ZEALAND—Very typical buildings housed the wonderful display made by New Zealand, one of the items being the historical Maori House, "Mata Atua," with its elaborate carvings. The mineral wealth of the islands, their timbers, their wool, meat and dairying trades, and their manufactures were represented by a multiplicity of most interesting exhibits.

PALESTINE—The industrial development of the country, as well as its antiquity, was well illustrated by the exhibits in this pavilion.

SARAWAK—The excellent models illustrating the growing oil industry in Sarawak were of special interest in this pavilion. The important

sago industry, for which the State is celebrated, was also well represented.

SOUTH AFRICA—A large building, in the old Dutch style of architecture distinctive of South Africa, with various subsidiary buildings and paddocks around it, sheltered a wonderful assemblage of South African exhibits. Very realistic impressions of scenes and life in the various States included in the Union of South Africa were conveyed by the excellent tableaux, panoramic views, and models herein displayed. The great gold and diamond industries furnished exhibits of special interest, and business activities in wine, tobacco, ostrich feathers, hides, fruit, and many other lines formed the themes of most interesting exhibits. Room was found too in these courts for displays representative of those far-distant islands—*St. Helena, Ascension, and Tristan da Cunha*.

WEST AFRICAN GROUP—This group included *Nigeria, the Gold Coast, and Sierra Leone*. In each section the buildings were representative of the country—in the Nigerian unit they took the form of a portion of a native walled-town with the Emir's compound, in the Gold Coast section, of one of the old trading forts, complete with tower and massive gate; and in Sierra Leone the style adopted was that of a native rest-house. Palm oil, cotton, and timber were the outstanding features of the Nigerian display. Cocoa, gold, and native work from Ashanti and other districts appealed to the visitor to the Gold Coast section, whilst Sierra Leone made a noteworthy display of nuts, fibres, spices, gums, timbers, and native textile work.

WEST INDIAN AND ATLANTIC GROUP—This included *Barbados, British Honduras, the Falkland Islands, Jamaica, the Leeward Islands, Saint Lucia, and Trinidad*, with *Tobago*, and the group might well be proud of the display its components made in the attractive building they occupied. Produce of the most varied kinds was shown in profusion, and it would be difficult to think of a tropical or sub-tropical product of any commercial value that was not represented amongst the rich variety displayed. The petroleum exhibit of Trinidad was a noteworthy one.

MISCELLANEOUS BUILDINGS—In the smaller buildings throughout the grounds there were many exhibits of interest. Amongst them were a Model Coal Mine, Cigarette, Confectionery and other factories, and interesting displays relative to British Timber, Poultry Farming, the Milk Trade, the Oil Trade, Book and Newspaper Production, Horticulture, and many other industries. There were also in evidence in the grounds many societies and philanthropic bodies whose functions and interests appealed to the Empire at large. Needless to add, the Amusement side was well developed in a separate *Amusement Park*.

ATTENDANCES—The following are the official figures as to visitors to the Exhibition—

Month	No.	Month	No.
April . . .	347,078	Sept . . .	3,404,430
May . . .	1,761,143	Oct. . .	1,811,035
June . . .	3,443,934	Nov. 1 . .	97,647
July . . .	3,223,411		
Aug. . .	3,444,589	Total . .	17,493,267

The total area of the Exhibition grounds was officially given as 216 acres.

AGRICULTURAL WAGES.

WITH the object of improving the conditions of agricultural workers, the Agricultural Wages (Regulation) Act was passed in 1924 establishing an Agricultural Wages Board for England and Wales and an Agricultural Wages Committee for each administrative county, or for two or more counties if desired by the County Representative Committees and approved by the Minister of Agriculture and Fisheries. In a few specified cases one Committee is obligatory for certain combinations of counties. A county borough which is surrounded by an administrative county is for the purposes of the Act deemed to be included in that county. The Agricultural Wages Board is to consist of members representing employers and workers in equal proportions, together with such number of members as the Minister of Agriculture may think fit to appoint, these latter appointed members not to exceed one quarter of the total members. At least one member of the Board is to be a woman. Each Agricultural Wages Committee is to comprise equal numbers of employers' and workers' representatives and two impartial members appointed by the Minister and a chairman appointed by the Committee. The *Agricultural Wages Committees* are empowered to fix minimum rates for workers employed for time work and may, if they think it necessary, fix minimum rates for workers for piece work. Such minimum rates may be fixed so as to apply universally to all agricultural workers in the county, or to any special class of workers, or to any special area in the county. The Committees must, so far as is reasonably practicable, secure a weekly half-holiday for workers. In the case of any worker employed or desiring to be employed on time work who is incapable of earning the minimum rate, owing to any physical injury or mental deficiency or infirmity, the Act provides that the Committee shall, if an application is made to them, grant to the worker a permit exempting his employment from the provisions of the Act, subject to such conditions as may be specified in the permit, including if the Committee think fit a condition as to the wages to be paid to the worker. In fixing minimum rates, Committees must, so far as practicable, secure for able bodied men such wages as in the opinion of the Committee are adequate to promote efficiency and to enable a man in an ordinary case to maintain himself and his family in accordance with such standard of comfort as may be reasonable in relation to the nature of his occupation. The *Agricultural Wages Board* are to make such orders as may be necessary for the purpose of carrying out the decisions of the Committees, and are given power to fix, cancel or vary minimum rates in certain cases. Penalties are specified in the Act in cases where employers fail to pay not less than the minimum rates.

BEST BOOKS.

AN interesting scheme has been submitted to the League of Nations by Dr Hagberg Wright of the London Library for the establishment of a Sub-Committee on Intellectual Co-operation which would compile an annual list of books, limited to 600, representing the greatest books of the world. It is contended that such a list would help materially to draw the nations of the world together in closer intellectual contact

and that only by some such means is it possible to become acquainted with the thoughts and opinions of other countries. The League Committee on Intellectual Co-operation has given its approval to the scheme, which proposes that the countries forming the League of Nations should be invited to name representatives, preferably National Librarians, who could consult with experts or a representative body, to draw up the lists of books to be submitted to the Sub-Committee for the purpose of making the final selection. The number of books a country would be allowed to name would depend on the number of books it publishes, e.g., countries publishing 50,000 books and upwards would be allowed to name 40 books each, and so on in proportion down to those publishing 5,000 books which would be allowed to name 10 books each. The subjects covered by the books in the lists would include history, economics, political science, art, science, topography and travel and literature, theology and philosophy, and works of reference. The lists would be sent in to the Sub-Committee not later than March 1 in each year, and the selected list of the 600 best works would be printed and published each year on June 1 at a price of 2s 6d to cover expenses. Several nations have expressed their approval of the scheme, and sample lists of books have in some cases been submitted by the National Librarians to the Committee.

BROADCASTING.

THE popularity of broadcasting continues to grow, and it would seem probable that the number of wireless receiving licences will, during 1925, increase to over 1,000,000. The amount payable to the British Broadcasting Company in respect of licences issued during the 12 months ending March 31, 1925, is expected to be about £400,000. The fee for constructors' licences, which form the bulk of the licences hitherto issued, was reduced from 15s to 10s per annum on July 1 last, with the consequence that the Company's share was reduced from 12s 6d to 7s 6d. Several additional relay stations have been opened, thus considerably enlarging the "listening-in area." In addition to the 9 main stations there are now relay stations at Plymouth, Nottingham, Stoke-on-Trent, Sheffield, Hull, Leeds, Bradford, Liverpool and Edinburgh. Further relay stations are proposed for Swansea and Dundee. The experimental high-power station at Chelmsford started transmitting in July last and, so far as the reception of its programmes (relayed from the London station) is concerned, would appear to be a success. It is reported that reception at distances up to 100 miles on a crystal set seems generally effective. It was announced at the end of September last that the Government had sanctioned the erection of a permanent high power station, which will probably be completed during the spring of 1925. Interesting experiments in transmission have been carried out during the past year. Programmes from the wireless station at Pittsburg, U.S.A., and the Radiola station in Paris have been received at the London station and broadcast to other stations in the country, and it would seem probable that these experiments will be extended to include other foreign stations. Another interesting and novel experiment was the broadcasting of the nightingale's song from a garden at Oxted in Surrey. Simultaneous broadcasting from all the stations has

been frequent, and is now utilised in connection with all important transmissions. Notable broadcasts during the year have been the King's speech at the opening of the British Empire Exhibition and speeches by the Prince of Wales, the Duke of York, the Duke of Connaught, the Prime Minister and other Cabinet Ministers, Mr. Lloyd George and Mr. Baldwin. Operatic performances from the Opera House, Covent Garden, and the "Old Vic" have been broadcast, in the case of the latter without the aid of telephone lines. The value of broadcasting as a means of education is being explored, wireless sets have been installed in a number of schools and a series of lectures organised by the Broadcasting Company. In this connection the Board of Education have lent to the Company for one year one of H.M. Inspectors. Further interesting developments in the transmissions will doubtless take place during 1925.

THE CAMPBELL PROSECUTION.

THE series of events which, nominally at all events, were responsible for the downfall of the Labour Government was initiated early in August when John Ross Campbell, the editor of *The Workers' Weekly*, a Communist organ, was charged at Bow Street Police Court with having feloniously, maliciously, and advisedly endeavoured to seduce divers persons unknown then serving in the Navy, Army, and Air Force from their allegiance to His Majesty. The charge was framed under the Incitement to Mutiny Act, 1797, and arose out of the publication in *The Workers' Weekly* of an open letter to soldiers and sailors inviting them to have nothing to do with the fighting in the event of another war, but to fight on the side of the working-men. At the second hearing counsel for the Director of Public Prosecutions told the magistrate that it had been represented that the intention of the article was not to endeavour to seduce men in the fighting forces from their duty and allegiance, but was comment upon armed military force being used by the State for the suppression of industrial disputes. No further evidence was offered and Campbell was discharged.

When Parliament reassembled the Government were hotly questioned regarding this procedure, and the replies of the Attorney-General were regarded as raising such grave constitutional issues that the Conservative leaders gave notice of a vote of censure, while the Liberals put down an amendment asking for a Select Committee to be appointed to investigate and report upon the circumstances. The Government met the challenge by giving a day for the discussion, intimating that the passing of either motion would involve their resignation, and on October 8, after a lively debate, the House of Commons passed the Liberal amendment by 364 to 198. Mr. MacDonald announcing the dissolution of Parliament on the following day.

CHANNEL TUNNEL.

THE Channel Tunnel Scheme has once again occupied a prominent place as a subject of public debate. It is over 50 years since the Channel Tunnel Company was formed; but no actual progress has been made beyond the headways bored over 40 years ago for about 2,000 yards under the sea from the two ends, near

Dover and Calais. The scheme has been considered by several governments since it was rejected by Lord Landsdowne's committee in 1882, and each government has decided against it. At the end of June last the Prime Minister received a deputation of members of the House of Commons Channel Tunnel Committee, who urged on the Government the desirability of sanctioning the construction of the Tunnel. This deputation represented some 400 members of Parliament of all parties. It was contended that the arguments in favour of the Tunnel had been very much strengthened and those against it very much weakened by what had happened during the last 40 or 50 years. In a memorandum submitted to the Prime Minister it was estimated that on the construction of the Tunnel about 2,500 men would find employment on the English side and an equal number on the French side of the Channel. There would in addition be consequential employment in various trades elsewhere, and it was estimated that work would be provided for 22,000 men in this country and 22,000 men in France for nearly 5 years. As to the cost of the scheme, it was calculated that reckoning from the Tunnel mouth in England to the Tunnel mouth in France, including all necessary outlay in respect of (1) two interchange stations; (2) drainage headings; and (3) incidental equipment, the total cost would be about £29,000,000. It was contended that after paying working expenses, &c., the net receipts from passenger and goods traffic would enable satisfactory dividends to be paid on this capital expenditure. The Government attached great importance to the question, and it was referred for consideration to a special meeting of the Committee of Imperial Defence under the Chairmanship of the Prime Minister. Four former Prime Ministers, who had been Chairmen of the Committee (Lord Balfour, Mr. Asquith, Mr. Lloyd George, and Mr. Baldwin), were also invited to attend the meeting, which had before it communications from the House of Commons Tunnel Committee, notes on French official opinion, the verbatim notes of the deputation to the Prime Minister, exhaustive notes of the earlier history of the subject and a series of papers prepared in several of the Government Departments in 1920. The Committee after examining the civil and defence aspects of the question unanimously recommended that at the present time the Tunnel ought not to be proceeded with, and the Government had no alternative but to accept this advice.

CIVIL AVIATION PROGRESS

CIVIL aviation has shown very satisfactory progress since the scheme for subsidised services was sanctioned to be put into operation in October 1923. The scheme allowed for the operation of services as follows: Handley Page (London-Paris) and Instone Air Line (London-Brussels-Cologne), to maintain a minimum of 300 services in each direction, Daimler Hire (Manchester-London-Amsterdam-Hamburg-Berlin) and British Marine Air Navigation (Southampton-Cherbourg-Havre-Channel Islands), the former to reach a minimum mileage of 253,846 miles and the latter of 60,000 miles, the annual maximum subsidies being respectively £55,000, £55,000, £125,000 and £10,000. The report of the Directorate of Civil Aviation for the year ended March 31, 1924, states that all the above services were regularly operated during the year, with

the exception of those scheduled for the British Marine Air Navigation Company, which were confined to the route Southampton-Guernsey. All of the above four operating companies terminated their individual existence on March 31, 1934, when they were combined into a new company—Imperial Airways, Ltd. Under an agreement with the Air Council this Company undertakes during the first four years from April 1, 1934, to complete an average annual mileage of 2,000,000 miles on air services, and a minimum annual mileage in each of these years of 800,000 miles, and of 1,000,000 miles per annum afterwards until the Government subsidy of £1,000,000 shall have been repaid. During the year 1933-4 the total air transport flying amounted to 2,004,000 miles flown in 5,012 flights, as against 778,000 miles in 4,000 flights in the previous year. Passengers carried in the course of those flights numbered 15,013 compared with 11,460 in the previous year, and goods carried totalled 437 tons as against 216 tons. Other flying, mainly "joy riding," amounted to 230,000 miles flown and 39,257 passengers carried, as against 109,000 miles and 25,353 passengers in the previous year. British companies received an increasing proportion of the total passenger traffic on the cross-channel aeroplane routes, the British share being 79 per cent of the total as compared with 76 per cent in the previous year. This increase was not the result of a proportionately greater number of flights, the British flights remaining at the previous year's figure of 58 per cent.

CLAIMS AGAINST GERMANY

CONSIDERABLE progress in the settlement of British and German debt claims under the Peace Treaty is recorded by the Controller of the Clearing House Of 102,000 British claims, amounting to £76,000,000, cases representing £64,250,000 have been finally disposed of, and of £205,000 German claims, totalling £63,000,000, claims amounting to £48,500,000 have been settled finally. The residue still to be dealt with comprises the more complicated claims involving inquiry into the facts, which are largely in dispute, and the determination of abstruse questions of commercial and treaty law. Property claims lodged with the department amounted to £67,000,000, of which £43,000,000 have been either agreed as to amount by the German authorities, adjudicated upon by the Mixed Arbitral Tribunal, or withdrawn by the claimants. The remainder, amounting to £24,000,000, are still under discussion. The total sum paid by the Clearing Office to British creditors and claimants up to Sept. 16, 1924, in respect of their claims against German nationals or the German Government amounts to £71,222,558, distributed as follows: Debts, £47,862,403; proceeds of liquidation, £19,644,941; compensation, £3,704,154.

COAL PRICES

PUBLIC dissatisfaction with the course of retail prices of domestic coal in recent times led to an investigation by the Secretary of Mines during the past year. A meeting between representatives of the Mines Department of the Board of Trade and the Coal Merchants' Federation was arranged at the suggestion of the Secretary, who expressed a wish that a full and frank discussion should take place covering the price of coal to the domestic consumer and the question of quality, on both of which points his Department

ment had received a large amount of correspondence and many complaints. It was agreed that the Secretary for Mines should put a series of questions to the Federation, and a list of 18 questions was accordingly drawn up by the Mines Department dealing with the method of regulating retail coal prices, the quality of coal supplied to consumers, increases in prices of coal between the summer of 1923 and the spring of 1924, contract purchases by coal merchants, retail distribution costs and the coal merchant's trading margin. After the replies had been examined, the Secretary of Mines in a letter to the Federation pointed out that the suspicion in the mind of the public is that excessive prices are charged and high profits made in the winter months. Whether or not this is so is a question which could only be determined by a comparison of merchants' costs and profits, that is to say by the production of the facts and figures asked for in four of the questions. These four questions asked for the following information:—(1) A comparative statement of the pit-head increases and retail increases in coal prices at five specified dates between September, 1923, and March, 1924. (2) Details from each of the merchants present at the Conference as to deliveries under contract and typical purchases at market prices in respect of house coal obtained by them during the month of November, 1923. (3) What percentage of the total coal delivered in November, 1923, to each of the coal merchants was purchased under contract. (4) The difference at the time the questions were formulated between the cost of coal at the merchant's depot and the retail price charged to the consumer. The Federation took exception to the second and third questions as being directed to each individual, and stated that they could not in any event furnish particulars in the form required as the merchants did not communicate them to each other. Other objections were raised to the other questions, to which direct answers were not given, and the Secretary for Mines expressed his fear that as the Federation had not seen their way to furnish the desired facts and figures the public would not be reassured by the answers given. Up to the time Parliament was dissolved, no further action had been taken by the Government to secure the desired facts and figures.

COMMUNISM.

It is hard to draw a dividing line between the Communist and the Socialist in the Labour Movement. At the same time it is difficult to get any real statistics of the number of Communists. A table given by *Justice* (organ of S D F) in Sept., 1934, placed the strength of the Communist Party in England as 3,000 as compared with 10,000 in 1930. The writer's belief is that members and sympathisers reach nearly six figures. With the exception of Russia, *Justice* stated that the European members of the Communist Party totalled 500,000, of whom 240,000 were Germans. Communists are disguised under several names. There is the *Red International of Labour Unions*, of which Mr. Tom Mann is President in the British section. This body held a "National Minority Conference" of 200 delegates at Memorial Hall, London, Aug. 3, 1934. Resolutions were passed in favour of 44-hours working week, establishment of factory and workshop committees, and building up of a revolutionary industrial organisation with in-

tention of smashing capitalism. Next day, the Conference moved to Battersea Town Hall, when resolutions were carried in favour of revision of educational facilities to teach the class struggle, condemning the Dawes Agreement, &c. Considerable publicity was given to the weekly organ of the Communist Party, *The Worker's Weekly*, by the prosecution of John Ross Campbell, the editor, for having published an article contrary to the Incitement to Mutiny Act, 1797. He appeared at Bow Street on Aug 6 and was remanded until Aug 13, when the charge was withdrawn. The article dealt with the position of the Army during an industrial dispute, and practically repeated the old proposals of the Labour Leaders that in time of a strike the soldiers should not be used or work against the strikers. The Campbell Case was taken up by the Conservative and Liberal Parties, and made the test of a Vote of Confidence in the Government (Oct.)

The Communist Party held its annual Conference at Salford, May 18-19, with W. Gallacher (Glasgow) as President. The Party criticised the Labour Government as not being advanced enough in its proposals, and declared that a real Government "must realise the dictatorship of the working class, founded not in Parliament, but in the mass organisations of the workers." Affiliation was demanded with the Labour Party, the intention being to "get in and steal the leadership from the present leaders." During the conference, Mrs. Crawford, Chairman of the Women's Section, was arrested by the police and afterwards released. Tom Mann represented the British Bureau at the Communist International Congress at Moscow, July 1-8. See also "Labour Party."

CO-OPERATION.

THE 56th Annual Congress of the Co-operative Movement was held at Nottingham, June 9-14, 1924, with 2,000 representatives present. The official figures then circulated showed an aggregate membership of 4,580,623 (an increase of 61,461 on the year), with a share capital of £75,219,903 (an increase of £2,148,305). The total of the year's sales was £165,427,590 (a decrease of £4,154,767). The small turn-over of capital is somewhat remarkable. Mr. C. A. W. Saxton, President, complained that an average family expenditure of 14s 3d weekly was a poor support by members, and urged the need for more purchasing within the movement. He went so far as to say, "I make bold to say that it is owing to a lack of efficiency that a large percentage of the trade passes our doors, and I submit it is time for a searching enquiry to ascertain the causes of this want of efficiency."

The project of a national daily newspaper owned by the Co-operative Movement was again discussed. A resolution welcoming a daily, but adding that for the present the circulation of the present weekly publications must be pushed for that end, was carried by 2,108 votes to 1,436. An amendment suggesting common ownership of the Labour Party's *Daily Herald*, jointly by the Co-operative Movement, Trades Union Congress, and Labour Party, was defeated by 2,270 votes to 1,514. Amongst other resolutions passed were those in favour of permanent legislation to compel sale of bread by weight, labelling of imported produce, abolition of indirect taxation on articles of food.

An International Co-operative Exhibition was

held at Ghent, June 15 to Sept. 15, in honour of fifty years of Co-operation in Belgium. Thirty-two countries were represented by exhibits, the Ministry of Health had an exhibit in the British Pavilion.

The Co-operative Wholesale Society sent quantities of goods into Southern Russia in 1919 and indebtedness was subsequently repudiated. The Russian Co-operative Organisation (Centrosoyuz) eventually acknowledged the debt, and in Oct., 1924, it was stated that the sum of £64,000 had been received by the CWS in settlement from Russia.

CO-PARTNERSHIP.

ACCORDING to the reports of the Ministry of Labour, only a net gain of two schemes for the year 1923 can be claimed. Eight new ones were established and six old schemes discontinued. Seven schemes are in abeyance, whilst four others are believed to be in operation, though details are not available. The actual total, including these four and omitting the seven mentioned, is 238. For the 172 schemes in regard to which statistical details are forthcoming, the number of employees concerned is 121,022, and the amount of bonus or profit divided between them for the past year is given as £883,355. This total is equivalent to 5.1 per cent of the wages bill, so it may be assumed that Co-partnership as at present applied gives the workman an increase of 12 in the £ on his wages. How slow is the progress made in spreading the benefits of Co-partnership can be seen from the figure of 96 as the net gain of schemes since 1913. Up to 1880, 35 schemes had been established, of these only six were in operation in 1923.

Viscount Cecil had a Bill before Parliament in the 1924 Session to give a statutory and permissive right to a company to adopt Co-partnership, and subject to certain safeguards in the interests of ratepayers for extending the powers to Local Authorities. At the end of April, the Council of the Labour Co-partnership Association instructed its officers to bring before the International Labour Office the principles of Co-partnership with a view to obtaining the support of the Office. It was stated at the 1924 annual meeting of the shareholders of Lever Brothers, Limited, that in 15 years the sum of £1,723,000 had been divided as profit-sharing amongst the company's employees.

COST OF ELECTIONS.

THE cost of the General Election of 1923 exclusive of returning officers' charges, was £982,340. The aggregate expenditure of the 1,446 candidates in Great Britain and Northern Ireland was distributed as follows:—

Agents	£124,631
Clerks, &c.	167,296
Printing, &c.	436,411
Meetings	58,529
Committee Rooms	52,647
Miscellaneous	82,334
Personal expenses	60,492

In the London boroughs 152 candidates spent £81,768, in English boroughs the total for 480 candidates was £313,671, and in the counties 535 candidates returned an aggregate of £425,959, giving a total for England of £823,123. The corresponding figures for Wales (87 candidates), were £59,162, for Scotland (170 candidates), £66,998, and for Northern Ireland (27 candidates), £3,087. In numerous cases, especially

in seventy divisions, expenses ran into four figures. The unsuccessful candidate for the Altrincham Division of Cheshire, headed the list with £1,400; General Seeley's expenses in the Isle of Wight were £1,407, and those of his opponent £1,488; and in the Walsby Division of Northumberland the unsuccessful candidate disbursed £1,453. Lady Torrington's outlay in the Wycombe Division was £1,425, and that of her opponent £1,474. In London the largest expenditure was £1,072 by the successful candidate for North Islington. Mr. Ramsay MacDonald spent £1,052, Mr. Baldwin £844, and Mr. Asquith £733.

Of the 21,283,085 electors on the register, 11,643,398, or approximately 55 per cent. recorded their votes.

CURRENCY REFORM.

PROPOSALS have again been made for a reform of the British Currency and for the institution of a Decimal Penny. The Currency, as reformed, would comprise the following units:—

BANK NOTE—	Name	Decimals
10 royals (£5) ...	Imperial.....	100·00
TREASURY NOTES—		
20 shillings ...	Sovereign ..	20·00
10 shillings ...	Royal	10·00
SILVER COINS—		
2 shillings ...	Florin	2·00
Shilling ...	Shilling	1·00
Half-shilling (6d.)	Tester	50
BRONZE COINS—		
10 mills (or decims)	Penny	10
5 mills...	Halfpenny ..	5
2½ mills...	Farthing	2½

MONNY TABLE—10 mills (or decims)=1 penny; 20 pence = 1 shilling; 20 shillings = 1 royal; 2 royals = 1 sovereign.

The following changes are thus proposed:—
(1) The penny token to be increased in value one-sixth or approximately 20 per cent., and thus become one-tenth of a shilling and one-hundredth of a royal or half-sovereign sterling. It would be sub-divided into 10 mills (or decims), the halfpenny representing 5 or .05, and the farthing or quarter-penny, 2½ or .025. The popular shilling—the present unit of trade—could thus become the decimal unit, with two pieces for the fraction (the farthing being the negligible quantity in a total sum). (2) The silver half-shilling of 6d to be replaced by one of 5d., and the superfluous quarter-shilling of 3d. to be permanently withdrawn. One penny d (5g) would thus exactly = 3 low value (or 1½ high value) d., 5 (50) = 5, and 7½ (75) = 7. The old names "Royal" for half-sovereign, and "Tester" for half-shilling, might be usefully revived as being more serviceable than the longer relative names. It would also be a convenience to give a name, such as "Imperial," to the royal or 100-shilling denomination. It is claimed that no appeal to Parliament is necessary but merely a proclamation of an Order in Council—as provided by Sec. 11 of the Coinage Act, 1890—to "determine the ... denomination of any coin," in this instance the token value of the penny; to "call in coins of any date or denomination," in this instance, the 6d and 3d silver coins; and to "regulate any matters relative to the coinage," under which, provisions would be made for the exchange of the called-in coins through the Post Offices and Banks; and for the holders of large stocks of bronze coins collected up to the date of the proclamation, to render

account of such, and to surrender (as unearned increment) one-sixth of such sum collected, to the Assessor of Income Tax. Such Order to "come into operation on the date therein mentioned." To prevent deliberate hoarding of bronze coins in anticipation of their increase in value, the date of the proclamation would not be previously announced. The advantages claimed by the reformers are:—(1) Simplicity of decimal notation: 6 8g = 6s. 8½d. (2) Substitution of simple addition for compound arithmetic. (3) Increase of foreign trade by use of decimals. (4) Fewer bronze coins required for circulation. (5) The value of the penny brought more into accord with modern needs. (6) No (material) interference with the existing coins, the quarterly division of the penny, or the gold standard. (7) Early return to 1d stamps, 1d a word telegrams, &c. facilitated.

DEATH RAY.

MUCH publicity was given during the past year to the popularly called "death ray," and many remarkable claims were made in the Press as to the possibilities of the invention. The Air Ministry in the early part of the year offered an opportunity to the inventor, Mr. Grindell-Matthews, to give a demonstration of his apparatus to their representatives, and after considerable delay representatives of the Admiralty, War Office and Air Ministry visited the inventor's laboratory to witness a demonstration of the possibilities of the ray. The demonstration consisted in lighting an Osclim electric lamp and in stopping at will a small motor-cycle engine from a distance of about 15 yards. All the apparatus was provided and arranged by the inventor. The Air Ministry afterwards stated that the departmental representatives were shown nothing which would lead them to credit the statements which had appeared in the Press as to the possibilities of the invention, and the conditions under which the demonstrations were made by the inventor were such that it was not possible to form any definite opinion as to the value of the device. Mr. Matthews was accordingly offered an immediate opportunity to demonstrate the stopping, by means of his ray, of a small petrol motor (such as an ordinary motor-cycle engine) to be provided by the Government. The Ministry stated that he was not asked to disclose any information as to the means by which the ray was produced or the nature of the rays themselves. If the test proved successful the inventor was to be paid £2,000 immediately, the only condition being that he would allow the Government 14 days to consider the basis of further financial negotiations for the purchase or development of his invention. This offer was declined and negotiations ended. Following this action of the Air Ministry, Mr. Leach, Under-Secretary for Air, in answer to a question in the House of Commons, stated that the Departments had been placed in a difficult position in dealing with the matter, partly because of the vigorous Press campaign conducted on behalf of the inventor, and partly because this was not the first occasion on which he had put forward a scheme for which extravagant claims had been made. In answer to a further question, Mr. Leach stated that every phenomenon produced by Mr. Grindell-Matthews at this trial could readily be produced by the people in his own Department.

DISARMAMENT.

FOREMOST amongst matters of international concern and discussion have been the questions of disarmament and universal peace. Progress in dealing with these vast problems is necessarily slow, but hopes are high that the deliberations of the League of Nations at Geneva will result in the holding of a general Disarmament Conference in the summer of 1925. Such a Conference would appear to have been in the mind of President Coolidge when in March last, in a speech at New York, he expressed himself in favour of calling a new conference similar to the Washington Conference "when a certain and definite settlement of German reparations had been finally established." The Draft Treaty of Mutual Assistance drawn up by the League in 1923 was rejected by the Government on several grounds. It was contended that its adoption would cause a general increase rather than a decrease of armaments, and it might result in a reappearance of a system of rival alliances which in the past had constituted the greatest danger to the peace of the world. It was opposed also because it appeared to involve an undesirable extension of the functions of the Council of the League. Only a small number of States expressed unqualified acceptance of the Draft Treaty, and Lord Parmoor stated that every single Dominion had expressed opposition to it. Following the rejection of the Draft Treaty hopes were centred upon the meeting of the fifth Assembly of the League which opened in September last. The British, French and Belgian Prime Ministers attended, and Mr Ramsay MacDonald placed before the Assembly his proposals for international peace and national security. He advocated a wide system of arbitration and the calling of a world conference to deal with disarmament. The proposals of the French Premier differed from Mr. Ramsay MacDonald's in some respects, but after a long debate the two Prime Ministers drafted a joint resolution which was carried by the League Assembly without a dissentient vote. The Assembly "with a view to reconcile in the new proposals the divergencies between certain points of view which have been expressed, and when agreement has been reached, to enable an International Conference on Armaments to be summoned by the League of Nations at the earliest possible moment," requested the First (Constitutional and Legal) and Third (Disarmament) Committees to consider all the material in possession of the League with a view to formulating definite proposals for the consideration of the Assembly. The protocol dealing with arbitration and sanctions was drawn up and passed unanimously by the Assembly in October last. States which are not members of the League may be invited to accept the procedure laid down. If the treaty is ratified by the Governments of the various States belonging to the League, a Disarmament Conference to which all States will be invited will be held in Geneva in June, 1925.

DORMANT FUNDS.

INCLUDED in the increment which falls to the Crown are the estates left by intestates when there is no next-of-kin to claim them. There are many such estates standing unclaimed, either because there are no legitimate claimants in existence, or because the claimants have never heard that the estates have become divisible.

Such estates are advertised, and if no next-of-kin appear, the estate is administered by the Treasury Solicitor on behalf of the Crown. A list of such intestates' estates appears in the *London Gazette*, and anybody claiming to be of kin to the deceased person should communicate with the Treasury Solicitor, at Storey's Gate, Westminster, S.W. 1.

EMPLOYMENT.

VERY unsatisfactory is the record for employment. The figures for registrations at the Labour Exchanges and those of persons in receipt of poor relief do not in themselves give full measure of the numbers of unemployed. The highly skilled and control workers can gain nothing by registration at the Exchanges, and their extent can only be guessed. Little encouragement exists for trade with Europe, whilst disturbing factors of threatened strikes make speculative work by employers dangerous. Moreover, there is a tendency on the part of countries that used to buy manufactured goods from us establishing their own industries, and the raw material, instead of coming to the U.K. first, goes direct to the new manufacturing country. Figures of our export and import trades will be seen to vary in accordance with our unemployment figures. The following are the official figures for unemployment and relief—

Last Monday of	Insured Workpeople Unem. in '000's	% to No Registra- tions	% of Un employed Persons in T U's	No of Persons in Poor Re lief in '000's
Dec 1923	1,226	10.7	9.7	848
Jan. 1924	1,322	11.9	8.9	908

EVEREST EXPEDITION.

THE third Mount Everest expedition left Darjeeling towards the end of March last on the long journey through Sikkim and Tibet to their base camp at the foot of the Rongbuk Glacier. General C. G. Bruce, who commanded the expedition of 1921, was again in charge, but almost as soon as the Tibetan tableland was reached he was forced to return to Darjeeling owing to severe malaria, and the leadership devolved upon his second in command, Colonel Norton. With him were four other members of the 1922 expedition and six new members, all skilled mountaineers. Perfect weather was experienced in the early stages of the march, which followed generally the route taken by the previous expeditions, and the base camp was reached according to plan on April 29, two days ahead of the 1922 time. No difficulty was experienced in obtaining local labour for transporting supplies to the camps higher up. Camps 1 and 2 were established early in May and stocked without much difficulty, the latter with all stores for the higher camps. The task of establishing Camp 3 close under the wall of the North Col and stocking it with stores for itself and the higher camps brought the first check to the expedition. Unexpectedly low temperatures—as low as -22° Fahrenheit—were experienced, with

hail winds which caused the retreat to Camp 2 of the first party to ascend; and then a blizzard which lasted continuously for 48 hours further delayed the establishment of the camp and forced the climbers to return to the base camp for rest and recuperation. Fine weather returned on May 17, when the advance was resumed and Camp 4 established at Chang La, on the site of the 1922 camp, at an altitude of 23,000 feet. Bad weather followed, and the lowest temperature recorded by the expedition—56° of frost—was experienced on the night of May 22-23. On June 2, Mr. Mallory and Captain Geoffrey Bruce, with eight porters, established Camp 5 (two fragile 10 lb tents) at a height of 25,300 feet, and on June 3 Colonel Norton and Dr. Somervell with three porters established Camp 6 at 26,700 feet. These two started for the summit on June 4 without the aid of oxygen, but were forced to turn back exhausted at a height of about 28,000 feet. Four days later Mr. Mallory and Mr. Irvine with oxygen made the final attempt from Camp 6, which was to end tragically. They were last seen climbing steadily for the summit at an altitude of over 28,300 feet, as determined by the theodolite, some hours behind their scheduled time. Search was made for them at Camp 6 on June 10, but no trace of them was found. The question as to whether they reached the summit has been much discussed, but with the exception of Mr. Odell, who was the last to see them, the members of the expedition incline to the view that the gallant climbers failed to reach the top.

F.I.D.A.C.

THE *Federation Inter-Allees des Anciens Combattants* (Inter-Allied Federation of Ex-Service Men) held their fifth International Congress (for the first time in England) in London, Sept. 15-20, 1924, when 80 delegates, representing 5,000,000 members in Belgium, France, Great Britain, Poland, Italy, Roumania, Serbia, Czechoslovakia and U.S.A. attended. M. Bertrand was in the Presidential Chair. The L.C.C. permitted use of and formerly welcomed delegates to London County Hall. The Conference divided into four Committees, who worked in private on Peace, Organisation, Propaganda and Pensions. On evening of first Conference day, Earl Haig made a broadcast speech to over 1,000,000 listeners in asking or work to be found the 800,000 ex-Service men who were unemployed. The great aim of the F.I.D.A.C. is universal peace. Its other objects include the welfare of the ex-Service men. Next year, women delegates will be present at the Congress.

HOUSING.

PROGRESS AND FUTURE SCHEME.

ON March 31, 1924, the effect of the Housing Act of 1923, according to the Ministry of Health, had been that 41,859 houses were to be provided under approved housing schemes of local authorities, 73,777 houses by private enterprise financially assisted under the Act, and 3,681 houses by public utility societies, etc., similarly assisted, making a total of 121,317. Of these 8,120 were completed and 30,408 were in course of construction. On the same date 208,712 houses had been completed under the Housing Act of 1923, 124,085 by local authorities, 20,186 by private builders, and 4,541 by public utility societies. The estimated final cost of the schemes of local authorities under these Acts is

£170,000,000. The number of houses known to the Ministry to have been provided during the year 1923-24 by private enterprise without assistance from public funds was 67,546; in addition 37,953 houses were under construction recently completed but not occupied at the end of the year. It is evident from the above figures that up to the present there has been no reduction of the shortage of houses which can be rented by the working classes. With the aid of the provisions of the Housing (Financial Provisions) Act of 1924, and an agreement arrived at between the Government and the building industry, it is hoped the building of houses for letting at reasonable rents will be carried out on a much wider scale than in the past four years. The object of the Government is that with the help of increased State subsidies 2,500,000 houses of the type required will be completed in the next 15 years, according to the following programme—

1925.....	90,000	1933 ..	210,000
1926	100,000	1934 ..	225,000
1927	110,000	1935 ..	225,000
1928	120,000	1936 ..	225,000
1929...	135,000	1937 ..	225,000
1930	150,000	1938 ..	225,000
1931	170,000	1939 ..	225,000
1932...	190,000		

The representatives of the building industry consider that it may not be possible to reach these numbers owing to circumstances over which they have no control, e.g. the efficiency of the additional labour to be obtained; but they undertake that the minimum production shall be at least two-thirds of the above totals. The amount of the State contribution is to be increased to £5 per house per annum for 40 years, or if the house is situated in an agricultural parish £12 10s for 40 years. The contribution from local rates remains at £4 10s per house. Assuming that the full programme of 2,500,000 houses is carried out, and that 7½ per cent of the houses are built in agricultural districts, the Government estimate that the total cost of the scheme will be 1,375 millions, of which 450 millions will fall on the rates and 925 millions on the exchequer.

RENT RESTRICTION AND EVICTIONS

THE Rent Restriction Bill introduced in February, 1924, was a private Member's Bill, which had for its object the amendment in the interests of tenants of the Rent Restriction Acts of 1920 and 1923. Its chief proposals were (1) to continue full control of houses till June, 1928, (2) to narrow down the grounds on which a landlord could obtain possession, and to provide that even in the case of a landlord requiring a house for his own use he should find alternative accommodation for the tenant, (3) to reduce the 40 per cent increase allowed on standard rents to 25 per cent; (4) to put back into control all houses which were covered by the 1920 Act. The Bill was read a second time in the House of Commons and referred to a Standing Committee. It was thought that the Government might adopt the Bill as a basis for their rent policy, but no Government support was given, and after a number of meetings the Committee reported that they could not proceed further with the consideration of the Bill. The dropping of this Bill was followed by a Government measure, the principal clauses of which proposed (1) that a Court should not make an order for possession of

a house or for the ejectment of the tenant on the ground of non-payment of rent due to the inability of the tenant to obtain employment, unless the Court was satisfied that greater hardship would be caused by refusing to grant such an order than by granting it. (a) That a landlord might recover possession without providing alternative accommodation only where the house was desired for his personal occupation, and the Court thought that the hardship of keeping the landlord out would be greater than the hardship of ejecting the tenant. Strong opposition was shown to the first proposition, and after an amendment had been proposed by the Government the Bill was rejected on second reading by a majority of 9 votes. After their defeat the Government decided to adopt and amend a Bill introduced by Mr. E. Simon, the member for Withington, "to prevent unreasonable evictions of tenants." This Bill was finally passed in July last. It substitutes for certain clauses in the 1923 Act which enabled a landlord to obtain possession without showing alternative accommodation the following provision—that possession of a dwelling house reasonably required by the landlord (excluding one who has become landlord by purchase after May 5, 1924) for occupation by himself, or for a son or daughter over 18 years of age, shall be given only if the Court is satisfied, having regard to all the circumstances of the case, including any alternative accommodation available for the landlord or tenant, that greater hardship would be caused by refusing than by granting an order for possession.

BUILDING MATERIALS AND PRICES

A FACTOR seriously affecting the success of the Government's housing scheme has been the rise in the price of building materials. Steps to deal with this question were taken in the early part of 1924 by the appointment of an Inter-Departmental Committee to survey the prices of materials, and following the understanding between the Government and the building industry, and the introduction of the Housing (Financial Provisions) Bill, the Minister of Health introduced a Bill "to prevent excessive charges for building materials, and to make provision for securing an adequate supply of such materials, and for other purposes incidental thereto." The Bill proposes that if the price of any article used in the building of houses for the working classes appears to the Minister of Health to be excessive, power shall be given to the Board of Trade to investigate prices, &c., and, if considered desirable, to fix and regulate prices and conditions of supply. For the purpose of this investigation the Board of Trade may require the books of a firm to be produced for examination. If it be found that the production or supply of any building materials is being unreasonably prevented by any person, the Minister of Health may (a) require the offender to place at his disposal the whole of the materials held by him or the whole output of his business, (a) take possession of the property where the materials are produced and carry on the business for as long as he considers necessary. For failure to comply with any order fixing prices or conditions of supply, or withholding books or furnishing false information, the Bill proposes a fine not exceeding £100, or imprisonment for a term not exceeding three months, or both. In the case of an offending company, the

chairman and every managing director and every officer concerned in the management of the company, will be liable to the fine and imprisonment unless they can prove that the act or default took place without their knowledge. At the time Parliament was dissolved the Bill had not reached the Committee stage. It has often been suggested that building costs might be reduced by the adoption of new methods of construction and the use of new materials. With a view to obtaining authoritative advice on these questions the Minister of Health in September last appointed a strong Committee under the chairmanship of Sir Ernest Mon with the following terms of reference—"To enquire and report as to new materials or methods of construction which are, or may be, available for the building of houses for the working classes, and to make recommendations as to the organisation required for securing the adoption and use of approved new materials or methods by local authorities and other bodies or persons providing such houses."

IMPERIAL WIRELESS SERVICE

A GREAT scheme of Empire Wireless communication has at last been decided on and work is already in progress on the new stations in this country and the colonies. So long ago as 1911 the Imperial Conference resolved "that the great importance of wireless telegraphy for social, commercial and defensive purposes renders it desirable that a chain of British owned wireless stations should be established within the Empire." Several schemes have been discussed, but owing to various causes no adequate facilities for wireless communication with the Empire have hitherto been provided. A station has been erected at Leafeld, Oxfordshire, but this is not powerful enough to send messages with regularity and certainty to India, or Australia or South Africa. It communicates with Cairo daily and carries on a successful service with Canada. A new medium power station at Northolt also transmits a certain number of Press messages during the night hours to Halifax, Nova Scotia. When it was found that the original all-Empire wireless policy would not be carried out the chief self-governing dominions took independent action, with the result that a complete State-owned all-Empire chain is not now possible. The Committee under the chairmanship of Sir Robert Donald appointed to inquire into the subject of wireless control reported that they were unanimously of opinion (1) that the State through the Post Office should own all wireless stations in Great Britain for communication with the overseas Dominions, Colonies, Protectorates and territories, and (2) that the Post Office should operate directly, under an improved business organisation, all the Empire stations in Great Britain. They thought, however, that an exception might be allowed in the case of Canada, as an Anglo-Canadian service was already being operated by the Marconi Company in addition to the Post Office service. The Government decided to adopt these recommendations and further to co-operate with the Marconi Company in the trial of the new system of wireless communication popularly known as the "beam" system. The advantages over the ordinary wireless system claimed for this new development are that only a fraction of the electrical energy hitherto used is required; it increases

the secrecy of wireless communication by reason of its directional characteristics, it eliminates to a large extent atmospheric disturbances, and in capital cost and in operating charges is far more favourable than the old system of super-stations working on long wave lengths. The Marconi Company are erecting a trial station in this country for communication with Canada and capable of extension so as to provide "beam" communication with South Africa, India and Australia. The erection of reciprocal stations in Canada, South Africa and Australia will be completed by the Marconi Company early in 1925.

INTERNATIONAL LABOUR OFFICE.

THE sixth session of the General Conference of the International Labour Organisation of the League of Nations (Art. 389 of the Treaty of Versailles) met at Geneva, June 16 to July 5, 1924, with Mr. Hjalmar Branting of Sweden in the Presidential chair. Recommendations passed included preservation and investigation of spare time of working people, equality of terms of workmen's compensation to be the same for aliens as for nationals in a country (to be finally confirmed in 1925), suspension of work for one whole day of twenty-four hours every week in glass manufacturing where tank process is used (to be confirmed in 1925), abolition of night work in bakeries with the exception of biscuit factories (to be confirmed in 1925). A convention was adopted for future consideration dealing with disinfection of articles made from bones and skins of animals, and one also for safeguarding transport workers from infection when handling goods. An attempt is being made to speed up the work of the office, but the routine causes many delays, example being that of the Eight-hours Day. The convention draft was voted almost unanimously at the Washington Meeting of 1919. It has been ratified by only five Governments, whilst Germany has plainly stated that she could not permit any outside institution arranging the hours of work in her own country. The highest number (fourteen) of ratifications for any Convention is that dealing with unemployment in the establishment of free exchanges, treating all residents alike, immaterial of nationality, and sending quarterly reports to the Labour Office. The latest figures show that 136 ratifications of Draft Conventions have been formally registered with the Secretary-General of the League of Nations, while 23 have been authorised but not yet formally communicated. In 135 cases ratification has been recommended by Governments to Parliaments but approval has not yet been signified, while 103 measures have been finally adopted by legislative authorities to give effect partially or wholly to the provisions of the Draft Conventions and Recommendations, and 76 others have been proposed and are before different Parliaments. The estimated cost of the Office for the year 1925 was nearly £390,000, of which Great Britain bears a share.

THE LABOUR PARTY.

AS most of the leaders of the Labour Party were in Office, the Annual Conference was postponed from May to October, 1924, in the hope that the rest time of the Parliamentary recess would be available. The first week of October eventually clashed with the re-assembly of

Parliament and the closing day of the Conference coincided with the dissolution of both Houses. What happened at the Conference was mainly preparation for the General Election. The most important resolution from the Party's point of view was that dealing with Communism. The application of the Communist Party to be affiliated with the Labour Party was defeated upon a card vote by 3,185,000 votes to 193,000. Two other resolutions on the same subject were passed as follows: No member of the Communist Party be eligible for membership of the Labour Party (by 1,804,000 votes to 1,540,000) and no member of the Communist Party shall be eligible for endorsement as a Labour Candidate (by 2,456,000 votes to 654,000). The report of the Labour Party showed that there were 2,967 divisional and local Labour Parties and Trades Councils throughout the country, showing an increase of 300 in the year. Out of 602 constituencies in England, Scotland and Wales, only three remained without some form of Labour Party organisation. The women's section has 1,332 parties allied with local labour parties with a membership of 150,000. Mr. G. B. Shaw claimed on May 6 at Norwich that he and Mr. Sidney Webb were the fathers of the Labour Party, having invented the Plan of Campaign for Labour thirty years ago.

The Scottish Labour Party held its Annual Conference in March, 1924, with Mr. W. Shaw in the chair. A resolution for the affiliation of the Unemployment Committees to the Party was rejected by 69 votes to 45. A resolution suggesting further negotiations between Communist and National and local Labour Parties was carried by 66 votes to 22, and it was announced by the Secretary that twenty delegates present were Communists.

I. L. P.

DOUBT seems to exist on the numerical strength of the *Independent Labour Party*. It was represented at the Labour Party Conference of 1923 on a basis of having 26,000 members, a rather small number in view of the 421 delegates who attended the Annual Conference of the I. L. P. at York, April 20-24, 1924. The Treasurer (G. Benson) stated that in the year the number of branches had increased from 637 to 772, and the affiliation fees paid totalled £2,587, said to be nearly double the sum of the previous year. The President (Clifford Allen) mentioned the function of the I. L. P. as propagandist socialist organisation. It was in almost entire support with the Labour Government as every Minister was a member of the I. L. P. The Conference passed off calmly with the usual socialistic resolutions, but there was obvious a wide difference of opinion between the left and right in the I. L. P. More light was thrown upon the objects and methods of work of the I. L. P. by the Summer School that was held during the closing days of August 1924. Though not binding the Party, the opinions expressed left no doubt that it was desired to nationalise the banks and the land. An economic, as well as a political, League of Nations was the suggestion of the Party's Secretary (Fenner Brockway). Oxford and Cambridge were regarded as decadent centres of learning. Property was to be confiscated. If there was to be any compensation in the case of dire necessity it should be small and for one life-time only.

THE SOCIAL DEMOCRATIC FEDERATION

Little progress is made by the oldest Socialist Party in the United Kingdom, and except for the efforts of a few enthusiasts it would pass away. The Annual Conference was held during the first week of August, 1924, at Aldersgate Street, London, with Mr W Cluse, M P, in the Chair. A resolution was passed after a speech by a Russian visitor, Mr A Baikaloff, declaring the intention of the Social Democratic Federation to carry on its propaganda against Bolshevism. Objection was taken to the wholesale relief of the unemployed on the ground that a new "parasitic" class was being created, and a motion was passed calling upon the Government to prepare a constructive policy for dealing with unemployment in which agriculture, electrical power, afforestation and housing should be undertaken by the State for furnishing the country with national utilities of the greatest service to future generations.

LONDON TRAFFIC.

FOLLOWING the London tram and bus strike in the spring of last year, the Court of Inquiry held to inquire into the dispute reported, *inter alia*, that "all parties express the view, with which we concur, that without some co-ordinating control of passenger traffic within the metropolitan area, there is little, if any, prospect of improvement in the condition of the industry." The Government thereupon introduced a Bill "to make further provision for the control and regulation of traffic in and near London and for purposes connected therewith." The Bill, which followed largely the recommendations of the London Government Commission of 1922-23, met with a mixed reception, but after some amendment was placed upon the Statute book in August last. The chief effect of the measure is to make the Minister of Transport, the supreme authority for the control of traffic in the "London Traffic Area" which comprises London and the surrounding districts set out in the First Schedule to the Act. A Committee, to be called the London and Home Counties Advisory Committee, is to be set up for the purpose of giving advice and assistance to the Minister in connection with the exercise of his powers and duties. This Committee is to comprise representatives of the local authorities in the area, the metropolitan and city police, the Home Office and the Ministry of Transport—12 in all—and for certain purposes 3 representatives of the transport workers and 4 representatives of the persons providing means of transport and users of road vehicles. It will be the duty of the Advisory Committee to consider and report to the Minister of Transport on such matters as works involving the breaking up of streets, the co-ordination of the various forms of transport services with a view to the combined operation of all means of transport in the best interests of the public, the causes tending to hinder the free circulation of traffic and the measures to be adopted to remove those causes, the development, improvement or extension of the existing system of road communication; new transport services, or developments or extensions of existing systems proposed to be established in the Traffic Area. Wide powers are given to the Minister of Transport, e.g., the power to limit the number of omnibuses plying on certain streets in London and the metropolitan police district, to pre-

scribe the routes to be followed by all classes or any particular class of traffic, and the streets to be or not to be used for traffic of any specified class, to regulate the relative position in the roadway of traffic of different speeds or types, to prescribe the conditions under which, and the times at which, vehicles delivering or collecting goods may stand in the streets, &c.

PENSIONS

OLD AGE PENSIONS

An important amendment of the law relating to Old Age Pensions came into force in August, 1924. The new Act deals with the calculation of means for pensions, but does not alter other conditions, e.g., age for receipt of an old age pension. Its object is to meet the complaint that the previous Acts discouraged thrift by requiring practically all means of whatever kind to be taken into account in determining the amount of pension to which a person was entitled. The old basis of calculation of means is to be continued, but it is now made subject to the proviso that means derived from any source, other than earnings, are to be subject to a deduction of £39 per annum. The total means left after this deduction has been made is to be taken as the yearly means for the purpose of fixing the rate of pension. The following table shows the pension payable in respect of yearly means after the deduction of £39 has been made.

Yearly Means		Weekly rate of Pension
Exceeding	Not exceeding	
£ s d	£ s d	£ s d
26 5 0	31 10 0	10 0
31 10 0	36 15 0	8 0
36 15 0	42 0 0	6 0
42 0 0	47 5 0	4 0
47 5 0	49 17 6	2 0
49 17 6	—	Nil

Thus the maximum income a pensioner can have from private means and the pension is approximately 35s per week, or £92 per annum, e.g., yearly means £65 5s and pension at 10s per week, yearly means £70 10s and pension of 8s per week, yearly means £75 15s and pension of 6s per week, &c. The total population above the pension age of 70 is roughly 1,600,000, of whom 917,000 were in receipt of old age pensions prior to the passing of the 1924 Act. Of these 854,000 were receiving the full pension of 10s per week. The effect of the new provisions will be to increase the pensions of the 63,000 pensioners who now draw less than the maximum pension of 10s per week, and to enable pensions to be given to a large number of persons—officially estimated at about 170,000—who are not now entitled to any pension at all. The cost of these provisions is estimated at £4,150,000 in the first full financial year, rising to £7,000,000 per annum. This is regarded by the Chancellor of the Exchequer as a first instalment, his expressed intention being to introduce another measure to reduce the pensionable age to 65. In connection with the demand from some quarters for universal old age pensions the Chancellor stated that the abolition of the

means limit would cost at once an additional £18,000,000 a year, rising to £29,000,000 a year, and this at present is prohibitive. The total cost of old age pensions in the financial year 1934-5 is estimated at 24 millions, in 1930, 27 millions, in 1940, 35 millions, and in 1945, 40 millions.

WIDOWS' PENSIONS

The principle of pensions for widows with children and mothers whose family breadwinner is incapacitated was unanimously approved by the House of Commons in the early part of last year, on a motion "that in the opinion of this House pensions adequate for the proper upbringing and maintenance of children should be paid to all widows with children or mothers whose family breadwinner has become incapacitated, such pensions to be provided by the State and administered by a committee of the municipal or county council wholly unconnected with the Poor Law." The motion was not intended to cover the unmarried mother, the deserted wife, or the divorced woman. The Chancellor of the Exchequer, in supporting the motion, stated that nothing would give him greater pleasure than to include in the financial provisions for 1925 even the very considerable sum which the adoption of this proposal would involve. Estimates of the cost of the scheme vary considerably, the approximate figure suggested by the mover of the resolution, Mr. C. Dukes, the Member for Warrington, being £20,000,000. The estimate of Miss Eleanor F. Rathbone, the President of the National Union of Societies for Equal Citizenship, of the cost of widows' pensions only, based on the Census figures of 1921, is as follows:—Excluding 103,000 war widows with children already in receipt of pensions, there are in Great Britain 245,000 civilian widowed mothers with 464,000 children under the age of 16. In addition there are some 50,000 total orphans. A pension scale of 16s. per week per widow, 6s. 6d. per child, and 12s. 6d. for total orphan, would give a total annual cost of roughly £19,500,000. To arrive at the cost of the scheme proposed in the motion carried in the House of Commons a deduction would have to be made from this figure in respect of money at present spent on the widows and children in out-relief, and an addition made to cover pensions for the wives of totally incapacitated men. The Chancellor of the Exchequer stated that the question would be considered in all its details by the Government's experts, and as soon as the Government were in a position to deal with the question by legislation that would be done. The election manifestoes of the Conservative, Labour and Liberal Parties contained favourable references to the subject of widows' pensions, so it would seem that there is a prospect in the near future of this country following the lead of New Zealand, Denmark, Germany, and many of the American States in adopting this desirable reform.

THE RUSSIAN TREATY

FOLLOWING the recognition of the Soviet by the Labour Government, negotiations took place in London between representatives of the two Governments, and on August 6 it was announced that an agreement had been reached with the Russian delegation. A general treaty and a treaty of commerce and navigation were signed at the Foreign Office two days later despite

strong protests in the House of Commons against the signature before the treaties had been placed before Parliament, Mr. MacDonald declaring that the House would be absolutely free to exercise its discretion. The most controversial matter was the promise of the guarantee of a loan to Russia conditional upon the settlement of various claims. This was to be the subject of a further treaty, the amount and conditions not being stated, and it was upon this vague proposal that criticism was mainly directed by Conservatives and Liberals and business men.

The question played a prominent part in the general election, particularly in the final stage, when a bombshell was thrown into the political arena by the Foreign Office in the form of a letter alleged to have been written by Zinovieff, on behalf of the Executive Committee of the Communist International, to the British Communist Party, inciting the latter organisation to stir up revolution in Great Britain. With the text of this letter was issued a protest to M. Rakovsky, the Soviet Chargé d'Affaires in London, signed "in the absence of the Secretary of State" by Mr. J. D. Gregory, a high Foreign Office official. Zinovieff promptly disclaimed the letter, and M. Rakovsky declared it to be a forgery. There is little doubt that the letter had a great effect upon the electors—as well as upon the ratification of the treaties—and before resigning Mr. MacDonald appointed a Cabinet Committee to inquire into the matter, but this body found it impossible to obtain evidence throwing further light upon the authenticity of the letter, only a copy of which had been seen. Mr. Baldwin's cabinet also went into the subject in order to reply to M. Rakovsky.

SEVERN BARRAGE

THE Government have come to a decision to revive the Severn Barrage Scheme, by far the most ambitious scheme ever proposed for the generation of electricity in this country. A Committee has been appointed by the Board of Trade to make geographical and hydrographical investigations in connection with the construction of the barrage, and the Government have sanctioned the necessary expenditure. It is estimated that this preliminary inquiry, which will take some considerable time to complete, might cost about £95,000. Apart from the engineering problem of finding satisfactory sites for the foundations of the barrage, it is stated that it will be necessary to investigate and take note of the tides in the Severn estuary probably over a period of two years. The outline of the scheme was drawn up by the Ministry of Transport in 1920, when it was proposed to combine a scheme for a suggested railway bridge for the Great Western Railway across the Severn with a great dam or barrage and a road for vehicular traffic. The site chosen for the barrage was near the Severn Tunnel, and above it was planned a huge locked basin over 27 acres in extent, a large portion of which would accommodate ocean-going vessels of the largest size. In order to provide a constant rate of generation of power the scheme provided for two separate installations—a concrete dam with sluices and turbines for utilising the tidal flow, and an artificial storage lake in the valley of the river Wye above Tintern Abbey, with a pumping and turbine house on the tidal portion of the river. It was claimed by the Ministry that it would be possible by means of this scheme to provide over 500,000 horse power during a 20-

hour day with a peak-load capacity of 1,000,000 horse power, at an estimated cost of a little over one halfpenny per Board of Trade unit. In addition to the industrial areas of South Wales and the Midlands, the supply of power to London was proposed by a transmission line capable of carrying 500,000 kw. with 20 per cent. loss in the line. The cost of the line, which was estimated at 1½ millions, and the transmission loss taken together would therefore add only a fraction of a penny to the cost of the Board of Trade unit delivered in London. No official estimate of the total cost of the scheme was published. The Ministry of Transport stated of the scheme that "its prospects would appear to be limitless. They open up a vista which is little short of a revolution in the industrial life of the West and Midlands of England. It effectively solves the problem of congestion of all traffic between South Wales and the West of England both by road and rail, and brings within the reach of all classes of the community the blessings of light, purity and power."

TOWN PLANNING.

CONSIDERABLE activity in connection with the preparation of town planning schemes is now taking place among local authorities throughout the country. Up to 1909 the question of town planning had received no legislative notice in this country, and prior to that time towns were allowed to grow without any attempt being made to control or direct their growth. In 1909 the Housing, Town Planning, &c., Act gave local authorities—borough, urban and rural district councils—the power to prepare town planning schemes after obtaining the consent of the Local Government Board. The exercise of this power was optional, but many authorities took action and prepared schemes. The procedure for making town planning schemes was simplified by an Act passed in 1919. A local authority may now prepare a scheme for any area within their district without the necessity of obtaining the consent of the Ministry of Health, except where they wish to include in the scheme land outside their own area. The preparation of schemes is now compulsory on all boroughs and urban districts with a population exceeding 20,000, and these schemes have to be prepared by 1 January, 1929. In London the London County Council is the town planning authority. The land which may be included in a scheme may include (a) any land which is in course of development, or appears likely to be used for building purposes, and (b) land already built upon, or land not likely to be used for building purposes, where it is so situated with respect to land likely to be used for building purposes that the general object of the scheme would be better secured by its inclusion. The town plan may provide for the situation and width of roads, the fixing of building lines, the reservation of land for parks and open spaces, the height, character and density of buildings, and the proportion of the site to be built on. No compensation is payable to owners of land in respect of reasonable provisions prescribing the space about buildings, or limiting the number to be erected to the acre, or prescribing the height or character of buildings. Where property is increased in value by a scheme the local authority is entitled to recover one-half the amount of the increase. The number of local authorities in England and

Wales on whom town planning is compulsory is 257. Up to June, 1924, 113 of these had passed resolutions, or received authority, to prepare 221 town planning schemes. In addition, 111 other local authorities, on whom town planning is not compulsory, had passed resolutions, or received authority, to prepare 145 schemes. 13 schemes covering a total area of nearly 19,000 acres had been finally approved. A number of authorities in the Greater London area have schemes in course of preparation, and the London County Council have resolved to prepare a scheme for an area of about 7,000 acres in South-East London, which contains the largest and most compact portion of undeveloped land in the County of London.

TRADE DISPUTES.

IN 1924, a general step forward has been taken on the question of wages. Practically every trade union has made an application to the employers concerned for an increase in basic rates. The excuse has not been the rise in cost of living, already covered by sliding scales of bonuses, but that labour deserved a better standard of living. Generally, the increases have been obtained, but both employees and employers are to blame for the strikes that have taken place, for, with the exception of the foolishly conducted strike of porters in Covent Garden, settlements have been made eventually through negotiation. The public is getting accustomed to the disorganisation caused by big disputes. A noticeable method of the Ministry of Labour has been to appoint a Court of Enquiry under the authority of the Act of 1919, but the Courts have usually been too late to stop a strike. Details of the more important disputes follow. It will be observed that the agreement has been reached to settle the strike soon after the Court has finished its work. An obvious development of the 1919 Act is a standing Committee to settle employment conditions and so prevent strikes. But it is to be noted that the Labour M.P.s in the course of Parliament have refused to consider any compulsory settlements. The nation has been threatened with a coal stoppage for some time—there is constant friction in the mines on employment conditions that involve small and sectional troubles—but the leaders recognise that wages cannot be increased whilst coal remains at its present price.

DOCKERS

The Delegate Conference on Nov. 29, 1923, of Transport and General Workers' Union decided to apply for a wage increase of 2s. per day. Formal claim was lodged with the employers on Dec. 15, and subsequently notice was given to

terminate the wages agreement. On Jan 16, 1924, at the National General Council for Dock Labour, the employers refused the application of the union. A further delegate conference was held on Jan 29, when instructions were given for withdrawal of all labour on Feb 16, unless all demands were granted. Conferences were held Feb 5 and 11 between both sides. The Ministry of Labour intervened on 12th, and two days later employers offered 1s increase at once and arbitration on the balance. The offer was not considered acceptable and strike began on 16th. Meantime, lightermen and watermen demanded additional 2s 6d a day, and on 17th union instructed members not to work overtime. A Court of Inquiry was instituted by Minister of Labour on 18th and heard evidence. Negotiations had meanwhile been taking place, and on Feb 21 Delegate Conference accepted 1s immediately and 1s in June, plus other concessions in regard to working conditions.

MINERS

On Jan 17, 1924, The Miners' Federation of Great Britain gave three months' notice to the Mining Association of G B to terminate the National Wages Agreement of July 1, 1921. Meetings were held between both sides, and on March 27 employers made a general offer including increase of 12½ per cent on minimum wage and reduction of 4 per cent in the percentage of surplus to be taken as profits. The M F G B recommended rejection of offer in submitting to a vote, in which figures were—

For acceptance

322,392

Rejection of offer coupled with application to Govt for full wages enquiry

338,650

The Executive of the M F G B discussed the matter with the Minister of Mines, who set up an Inquiry under the Industrial Courts Act, 1919. The men remained at work under a temporary agreement. As at present worked, it is admitted by both sides that any practical increase in wages is out of the question, and all parties concerned are tinkering with methods to re-organise employment of coal as raw material.

RAILWAYS

Though a National Wages Board is in existence, its decisions are not compulsory. The 1923 awards were accepted by the Nat Union of Railwaymen and Railway Clerks Assn, but the Assoc Soc of Locomotive Engineers and Firemen refused to do so, notwithstanding the signature of the Society's representatives on the awards. The result was that nearly 70,000 drivers, firemen and minor workers tried to put the railways out of action from Jan 21 to 29, 1924. The dispute concerned a few special workers who might have been badly treated under the award. The Locomotive Engineers and Firemen members were on strike *en masse*, the other two societies ordered their men to remain at work, and with few exceptions reported daily at the stations and depots. Internal jealousy between the N U R and L E & F is probably responsible for most of the friction on the lines.

During July, 1924, a ballot was taken of the members of the L E & F on the question of a strike to press home the demands concerning classification and guaranteed pay for Sunday duty. The figures were 18,298 against and 15,708 for a strike. A further ballot question was that of submitting matters to Wages Board, this re-

ceived 14,763 votes. Altogether 33,061 were against a strike in a ballot of 51,787, of which 3,018 were spoilt papers. About 16,000 did not trouble to vote. Eighty delegates representing about 400,000 members of the N U R held their annual conference at York July 7-12. The President (J Maichbank) condemned sectional organisations and strikes. A proposal to condemn the Labour Government for refraining from putting the whole socialist programme into force was rejected. A resolution was passed welcoming the Group Railway System and ordered the union executive to press a Bill for nationalisation of Railways. Leave of absence to the Gen Sec (J H Thomas) was granted whilst holding a Cabinet post. The new President was elected in W. Dobbie (Lord Mayor of York). N U R had in hand (Oct., 1924) new national programme of general wages increases to be submitted to National Wages Board.

SHIPYARD WORKERS

On Feb 11, members of the Amalgamated Engineers Union in Southampton "downed tools" contrary to union instructions and to the spirit of the 1923 agreement. Men demanded an immediate increase of 17s 6d weekly, to which the employers replied with an offer of 2s 6d at once, and whatever extra was the outcome of the negotiations between employers and employed in the industry generally in regard to the national demand of 10s weekly. The employers refused to consider the national question until the men returned, and as the latter remained out a lock-out was threatened for April 5. On April 7 a Southampton mass meeting refused to submit the matter to Joint National Executive Committee. The Unions concerned ordered their men back to work and the Ship Constructors and Shipwrights expelled from membership those who would not return to duty. The lock-out that took place on April 12 put 20,000 out of work. By this time the Transport Union Committee officials had become interested in the dispute and managed to obtain the men's acceptance to an immediate conference on the matter. The lock out was lifted on April 23 and work was resumed.

TRAMWAY STRIKE

On Dec 19, 1923, the Transport and General Workers gave notice to Employers' representatives on the Joint Industrial Council that they claimed an advance of 8s weekly for all tramway workers in the London area. Failing to obtain agreement, the Council reported to Minister of Labour on March 13. A strike was fixed to begin on March 15, but at the request of the Minister was postponed until March 21. Employers suggested arbitration but men refused. On March 21, Court of Inquiry was ordered by Ministry and on same night strike began. There were 16,000 tram and 23,000 omnibus workers on strike. The Court reported on March 24 that need for increase was not questioned. The Government announced that a Bill would be introduced to control transport in the London area. A definite offer of 5s increase with arbitration on the balance was rejected. On March 25, A S L E & F instructed members on Tube railways to strike. Provisional offer of new terms of 6s weekly, with other minor arrangements, was submitted to vote and accepted on March 28 by 9,428 votes to 4,377.

TRADE INQUIRIES.

A strong Committee under the Chairmanship of Sir Arthur Balfour has been appointed by the Government "to inquire into and report upon the conditions and prospects of British industry and commerce, with special reference to the export trade, and to make recommendations in regard thereto." Investigation is specially desired by the Government with regard to the following questions:—(1) The present position of British overseas trade, and the prospects of British participation in the markets of the world being such as to ensure sufficient and continuous employment and a satisfactory standard of living in this country. In this connection the examination of tendencies and developments in the markets of the world and also in the chief competing countries will be involved, together with an inquiry into the growth of competition with British goods in these markets, the likelihood of its continuance and its probable consequences. (2) The ability of British industry to meet competition under the conditions thus determined and to adapt itself to changes in the nature of overseas demand. This will involve an inquiry into our productive capacity and organisation, including the supply and efficient use of capital, labour and management, the present and future adequacy of raw materials and possible improvements in their utilisation, and the part played by the United Kingdom in new developments of industry, particularly those which are the outcome of scientific research. Matters to which attention might be directed are the present extent of large scale production its possibilities and limitations, the efficiency of plant and equipment, power supply and transport as factors in cost of production, marketing organisation at home and abroad, and the current methods of industrial and commercial finance. (3) The relations between those engaged in production. This will involve inquiry into methods of industrial remuneration, the main causes of unrest and disputes, and the methods of avoidance or settlement of disputes, as for example, co-partnership, co-operation, wages boards, voluntary arbitration, State regulation of wages, and compulsory arbitration and compulsory enforcement and extension of agreements. In view of the very wide scope of the inquiry it is anticipated that the Committee's investigations will take a considerable time—two years has been suggested—but it is possible that a series of interim reports will be published before the final report is completed. The *Census of Production* to be taken in 1925 is the third of its kind in this country, the first having been taken in 1907 and the second in 1922. Owing to the War, examination and tabulation of the results of the 1922 census were not completed sufficiently to allow of the publication of a report. The present census will cover Great Britain, and although its scope will not be so wide as that of the United States censuses, much valuable information will be obtained. Some of the inquiries must be answered compulsorily, and in accordance with the Act governing the taking of the censuses, other voluntary questions are asked. The information required is in respect of the calendar year 1924, but in cases where the financial year ends on some date other than December 31, then information will be accepted for a year ending not earlier than June 30, 1924, or not later than June 30, 1925.

TRADES UNION CONGRESS.

THE fifty-sixth Trade Union Congress was held at Hull, Sept 1-6, 1924, under the presidency of Mr A. A. Purcell. A gradual falling off in support was again reported, the comparative figures being:

	Organisations	Membership	Delegates
F 1923	702	4,369,268	167
1924	724	4,328,235	170

The "Charter" was passed unanimously. This embodies a long series of claims annually put forward, such as—44 hours working week, legal minimum wage for each industry, adequate maintenance of unemployed, improved housing pensions at 60 and to widowed mothers and orphans, full educational facilities from elementary schools to university, extension of training facilities to unemployed, &c. More power was given to the General Council of the T.U.C. in dealing with trade disputes. In future, trades unions will have to keep the Council fully advised of all disputes in which they may be concerned, and the Council is to have permission to advise unions likely to be concerned in such disputes what is taking place. In the case of negotiations breaking down the Council is to step in at once and give the advice and assistance advisable. Compulsory arbitration was to be met with determined opposition, whilst a motion in favour of the legislation of agreements made through Joint Industrial Councils was shelved by means of the previous question vote. Motions in favour of 15 as minimum school age, continuation schools up to 18, of the Russian Treaty, and of the Dawes Plan were passed.

The old Industrialists' plan of one union for one industry was advanced another step. A resolution was passed by a card vote by 2,503,000 to 1,428,000 to the effect there were too many trade unions, organisation should be by industry and for the establishment of a united front in the labour movement to improve working conditions. The Council was to draw up a scheme for organisation by industry and a plan to secure unity of action without any merging of unions.

Mr A. B. Swales of Amalgamated Engineering Union is the new Chairman. Messrs. F. Bramley and W. McL. Citrine are secretary and assistant secretary. A delegation of seven are to represent the General Council at the annual Conference of the All Russia Trade Unions.

TUTANKHAMEN'S TOMB.

WORLD-WIDE interest was aroused in the early part of 1924 by the opening of the sarcophagus of King Tutankhamen and the discovery of the magnificent coffin which had remained untouched since the Royal burial was carried out, considerably over 3,000 years ago. This is the first time that such a discovery of an undisturbed coffin of one of the ancient Kings of Egypt has been made, and the importance of this unique discovery, with its wealth of historical and archaeological facts, is considerably enhanced by the fact that the reign of the King fell at a time of marked transition in the history of this ancient kingdom. For about 16 years the late Lord Carnarvon and Mr Howard Carter had been carrying out excavation work on that part of the site of ancient Thebes on the west bank of the Nile where many valuable discoveries have been made, and for eight years they had

been working in the area where they discovered the Royal tomb, in November, 1922. On the opening of the tomb it was found that most of the movable gold and silver articles had been stolen by ancient grave robbers, but a multitude of wonderful objects remained—statues of the king, the state throne and couches, chariots, boxes of exquisite workmanship, alabaster vases, beautiful pottery, provisions for the dead and a great number of other articles of a kind which had never before been found. The inner sepulchral hall, opened in February, 1923, disclosed many more artistic objects, and a shrine of great beauty with doors bearing the original necropolis seals. Owing to the lateness of the season further work on this shrine was then impossible and the tomb was closed till November, 1923. When the work was restarted three other shrines were successively revealed, the roof of the last enclosing the sarcophagus with the king's coffin. Unfortunately Lord Carnarvon did not live to see the opening of the sarcophagus, he having succumbed to an insect bite whilst in Egypt in April, 1923. Following the opening ceremony in February, 1924, Mr Howard Carter in a public notice stated that owing to impossible restrictions and discourtesies on the part of the Egyptian Public Works Department and its Antiquity Service, all his collaborators, in protest, had refused to work any further upon the scientific investigations of the discovery. He therefore decided to close the tomb and cease work. Further causes of friction were questions concerning the ultimate ownership of some of the treasures found in the tomb and the publication rights of the Countess of Carnarvon. Eventually the Ministry of Public Works cancelled Mr Carter's authority for excavation and the Director General of the Antiquities Service was ordered to resume work on the tomb at the earliest possible moment. At the time of going to press there had been no further developments.

UNEMPLOYED INSURANCE.

CONSIDERABLE alteration has been made in the law relating to unemployed insurance. The rights of insured persons to unemployment benefit, the rates of benefit, the amount of the State contribution, refunds of contribution and other important matters are dealt with by the Unemployed Insurance (No. 2) Act, 1924. With regard to the period of benefit, the Act provides that up to a limit of one week of benefit for every six contributions paid, or of 26 weeks of benefit during a "benefit year" (whichever is the less), benefit is to be paid on conditions which, with certain specified modifications, are the same as those applied by the old law to covenanted benefit. Further benefit for an additional period is payable in certain cases. The waiting period during which benefit is not payable has been reduced from a week to three days of continuous unemployment. The weekly rates of benefit under former Acts and those laid down by the new Act are as follows—

	Old Rate	New Rate
	s. d.	s. d.
Men	12 0	18 0
Women	12 0	15 0
Boys (16 to 28)	7 6	7 6
Girls (16 to 28)	7 0	6 0

The maximum rates of contribution for employers and employed are unaltered, but the Exchequer contribution will, after the end of

the deficiency period, become one-half of the aggregate amount contributed by employers and employed. The "end of the deficiency period" is the date to be certified by the Treasury as the date when the unemployment fund is solvent. An important amendment is made by the new Act of the provision in the Act of 1920 relating to the disqualification for benefit on account of a trade dispute. Under the 1920 Act, persons thrown out of work owing to a stoppage of work due to a trade dispute at the premises at which they were employed were in general disqualified for benefit so long as the stoppage continued. The new Act provides that the disqualification is not to apply where the insured worker proves that (a) he is not participating in, or financing, or directly interested in the trade dispute which caused the stoppage of work, and that he does not belong to a grade or class of workers members of which are participating in, or financing, or directly interested in the dispute, or, (b) that the stoppage is due to an employer acting in a manner so as to contravene the terms or provisions of any agreement existing between a group of employers where the stoppage takes place, or of a national agreement, to either of which the employers and employees are contracting parties.

UNEMPLOYMENT—GOVERNMENT SCHEMES

THE abnormal unemployment from which the country has been suffering for the last three years shows no signs of rapid abatement. Although the past year has shown some improvement over the previous year, the number of unemployed at the time of going to press amongst the workpeople insured against unemployment under the Unemployed Insurance Acts in Great Britain and Northern Ireland was considerably over a million. The principle of the Labour Government's proposed schemes for directly providing work, which, whilst not regarded by them as a means of solving the unemployment problem, would have a considerable effect upon the volume of unemployment, are outlined below—

Roads.—A road programme involving an estimated expenditure of £13,500,000 has been approved, to which the Government contribution will be £10,000,000. The Government has also agreed to spend £5,000,000 on the reconstruction of main trunk roads. A scheme for a tunnel under the Thames has been considerably advanced in spite of many engineering difficulties, and engineering investigations are to be made in connection with the suggested construction of a tubular bridge over the River Iav, the preliminary expenses for which the Government have undertaken to pay. The Government have also under consideration the question of a big road to the London Docks.

Electrical Development.—Greatest importance is attached by the Government to the possibilities of electrical development, which directly and indirectly would help very considerably in dealing with the unemployment problem. It is proposed to introduce legislation to give the Electricity Commissioners the compulsory powers proposed in, but struck out of, the Bill introduced in 1929, and to empower the Government to carry out the work of standardizing the frequency of current and providing inter-communication between the large stations throughout the country. The cost of this work,

according to the Chancellor of the Exchequer, might amount to £10,000,000 spread over a period of three years. See also 'Savern Barrage Scheme'.

Sugar Beet Industry.—It is hoped to build up a flourishing sugar industry in this country by State assistance. The Government propose that a subsidy should be given for a period of ten years. **Reclamation of the Wash.**—It is stated that nearly 5,000 acres are ready for reclamation, but it is intended to reclaim only about 500 acres during 1925. The reclaimed land will be laid down to grass for two years, after which it will be specially ploughed and will then be available as arable land.

Railways.—Communications between the Government and the Railway Companies led to the announcement that the Great Western Company would spend £13,000,000 on capital account, the London and North-Eastern Company £19,000,000, the London Midland and Scottish Company £13,500,000 and the Southern Company £10,000,000, together a total of £55,500,000.

Housing, &c.—Other factors which will have an effect on unemployment are the Government's Housing programme, the increased guarantees under the Trades Facilities Act and works to be carried out by municipalities with Government assistance.

UNITED SERVICES' FUND

ACCORDING to the report issued at the end of February, 1924, for the year ended Sept. 30, 1923, the sum of £422,382 12s 11d had been distributed during the year, thus bringing the total net expenditure since the inception of the fund to £2,924,080 3s 7d. The fund is to continue working until 1938—a date settled upon by the committee to estimate in equal amounts the annual rate of expenditure and income. A special sum of £500,000 has been set aside for additional expenditure during the next five years. Cards announcing the work of the fund hang in 1,400 post offices and 500 labour exchanges. In the year's work 6,414 sick ex-Servicemen had been relieved at a cost of £28,779, 12,713 wives, widows and dependents had been assisted to the extent of £25,163. During the year 729 children had been taken into the homes, making a total of 2,095. A large scheme is also being undertaken for the benefit of ex-Service men suffering from tuberculosis.

WAGES.

As mentioned under Labour Disputes, there has been a rise in most standard wages in addition to the usual changes consequent upon the rise or fall of the Cost of Living Index Figure of the Ministry of Labour. It was hinted in last year's "Whitaker" that 70 per cent. above the 1924 figure of 100 might be considered as settled, but conditions are becoming worse, and it is not unlikely we shall have to base our requirements on 10 points higher. The official figures are

Month (1st day)	Cost of Living Index Figure	Workpeople concerned	Net weekly Wages Incidence in 000's £
Year 1922	Varied between 92 and 78 (continuous fall)	7,633	-4,211
" 1923	Varied between 78 and 77 (lowest 69)	4,225	-309

Month (1st day)	Cost of Living Index Figure	Workpeople concerned	Net weekly Wages Incidence in 000's £
1924			
Jan	77	1,480	+ 63
Feb	79	740	+ 87
Mar	78	780	+ 22
April	73	320	+ 23
May	71	1,400	+271
June	69	745	+ 92
July	70	1,280	+ 32
Aug	71	1,368	- 59
Sept	72	958	+ 2
Oct	76		

Chief wages alterations were —
 Jan Miners and Railwaymen
 Feb Builders and Dockers
 Mar Miners
 Apr Steelworkers and Transport Services
 May Miners and Shipworkers
 June Dockers and Shipyard workers
 July Railwaymen and Textile workers
 Aug Miners, Steelworkers and Dockyard employees
 Sept Miners, Transport and Engineering.

WOMEN POLICE

THE Departmental Committee appointed to review the experience available in regard to the employment of women police in England and Wales and to make recommendations as to their future organisation and duties have now made their report to the Home Secretary. At the end of July, 1924, policewomen were employed in the Metropolitan Police District and in 6 County forces and in 27 City and Borough forces, the total strength being 110. In a few forces their employment has been discontinued, or their numbers reduced during the last few years, partly for reasons of economy and partly because, owing to the change in local conditions, such as the removal of troops from the neighbourhood, the continued employment of policewomen was considered unnecessary by the Police Authority. In a few cases the employment of women has been discontinued because the Police Authorities were not satisfied that their employment had been a success. On the general question of the employment of policewomen, the Committee found that there was considerable diversity of opinion. So far as the investigation of crime is concerned, they think that every police authority should provide, so far as is practicable, for policewomen to take the statements of women and children who can give information or evidence where sexual crimes are in question, but, though they are satisfied that women can be usefully employed in the investigation of crime generally, they feel that their employment in criminal investigation beyond this particular duty must be definitely left to the decision of the local authority according to local circumstances. As to preventive work, whilst it was recognised by practically every witness who gave evidence before the Committee that there is a great deal of preventive work which can be better performed by women than men, there was a great difference of opinion as to whether the work can be better done by policewomen than by members of voluntary organisations. The Committee are of opinion that the efficiency of the police service has been improved by the employment of policewomen, but the question whether there is in any police district sufficient work to justify their whole-time employment, the exact duties to be performed, and

whether the duties can be better done in plain clothes or uniform, are matters which must be left to the discretion of the local police authority. The Committee recommend that policewomen should receive the same training as men, they do not think it desirable to lay down any definite age for recruits, but think that women above the age of 25, whether married or single, should not be debilitated from joining. With regard to the Metropolitan Police District, the Committee recommend that at least as many women as were employed before the reduction in 1922 should again be appointed, and that when these numbers are reached, or sooner if the necessity for the appointment is recognised, a woman should be attached to Headquarters to advise the Commissioner on matters connected with their employment.

WORLD FLIGHTS.

To the United States has fallen the honor of making the first journey round the world by air. Four machines piloted by Major Martin and Lieutenants Nelson, Smith and Wade, of the U. S. Army Air Service, left Seattle, in the State of Washington, on April 6, 1924, to fly westward on their world flight. Careful preparations had been made in advance for the flight by the U. S. Army Air Service and the Aeronautical Chamber of Commerce, and stores and an abundance of spare parts had been placed at various places along the route. An early disaster put Major Martin out of the flight, his machine crashing in fog against a mountain near Port Moller, Alaska. The North Pacific was crossed by the other three airmen by way of the Aleutian Islands, and the south coast of Kamtschatka was reached in the middle of May. The 900 mile journey across the sea was made in very bad weather, and the airmen were forced down by storms off Behring Isle and delayed for 3½ hours. Japan was crossed and Hong Kong reached on June 8. The journey continued *via* Saigon, Bangkok and Rangoon, and before reaching Rangoon the fliers passed but did not see Major MacLaren on his flight eastward. Karachi was reached on July 4. The journey to Constantinople and across Europe was ineventful, and the airmen arrived at Croydon on July 16. After their machines had been thoroughly overhauled at Hull the flight was resumed by way of the Orkneys and Iceland, which was reached on August 2. Lt. Wade's machine was wrecked en route, and he was forced to abandon the flight. Bad weather delayed the other two airmen, and the flight from Iceland to the coast of Greenland, which lasted 11 hours, could not be undertaken till August 21. From here good weather conditions prevailed, and the rest of the journey *via* Labrador, Nova Scotia, Boston, New York, Chicago, Omaha, was safely accomplished, and their starting point at Seattle reached on September 29. The total distance covered by the airmen was over 27,500 miles, and their average flying speed was 76 miles per hour. Squadron Leader MacLaren was in command of the British machine which left Calshot near Southampton on March 23, 1924, on an unofficial flight eastward round the world. With him were Flying Officer Plenderleith acting as pilot, and Sergeant Andrews as engineer. Misfortune dogged them throughout their journey—at Corfu they were forced to land with a damaged engine, and it was necessary to send a new engine from England. Between Karachi and Nasirabad

another forced landing with the engine damaged was made at Paru in the Sind Desert. A new engine was sent from Baghdad and this was replaced by another engine at Calcutta. At Akab in Burnah the machine crashed and was wrecked. U. S. naval officers kindly transported Major MacLaren's spare machine from Tokio by one of their destroyers to enable the flight to be resumed. Japan and Kamtschatka were reached without further serious mishap, but between Kamtschatka and the Aleutian Islands the airmen were forced by fog to land in a heavy sea and the machine was so seriously damaged that the flight had to be abandoned. Other unsuccessful attempts to fly round the world were made by Portuguese and Italian airmen.

WORLD "POWER" CONFERENCE

GREAT success attended the first World Power Conference, which was held at the British Empire Exhibition at Wembley in July, 1924. The Conference, which was called to consider the further development, conservation and most economical use of the power resources of the world, was inaugurated by the British Electrical and Allied Manufacturers' Association in co-operation with technical and scientific institutions and industrial organisations in Great Britain and other countries. Representatives from 40 countries were present. The Conference was opened by the Prince of Wales, who in welcoming the delegates said: "I feel this to be an occasion of great importance, for it may prove the beginning of a series of conferences whereby the combined knowledge and judgment of the world may be devoted to the solution of the many difficulties confronting, not only science and research, but also economic progress throughout the world. We have become accustomed to the idea of an international clearing house for many things, and in the League of Nations, with its Labour Office and International Court of Justice, have seen international co-operation at work in political and labour questions, and in law, but the deeper questions connected with industrial progress and equipment, with natural resources, with the conservation of energy and of fuel, and with standardisation in design and manufacture, have hitherto, I believe, been examined by every country in isolation, with results that are apparent to everyone. In the effort to create for industry, and especially power, what the League of Nations intends for politics, lies, I think, the true significance of the World Power Conference." Between three and four hundred papers were contributed by the delegates, and among the wide range of subjects covered by them were the following: the potential resources of each country in hydro-electric power, oil and minerals, and the means of their industrialisation; the development of scientific agriculture, irrigation and transportation by land, air and water; the financial and economic aspects of industry, nationally and internationally; the standardisation of voltages and frequencies especially in regard to traction, the generation, application and transport of power; natural steam power, problems of lighting, advances made in the efficiency of the steam turbine for land and marine work, &c. There was also discussed the establishment of a permanent world bureau for the collection of data, the preparation of inventories of the world's resources, and the exchange of industrial and scientific information.

Public and Private Wealth.

CONTINUAL DECLINE IN REVENUE.

THE decline in the National income—to which reference was made in WHITAKER'S ALMANACK last year—has its inevitable sequence in a decline in the Revenue from taxation during the current year 1924-1925. The Budget was framed on the anticipation of a decline in receipts, as compared with the previous year, of about £9,000,000, but which, with adjustment of expenditure, should produce a "surplus" for the year of just over £4,000,000. During the first half of the financial year which ended September 30, 1924, the receipts showed a decline, as compared with the corresponding period of the previous year, of 17 and one-third millions, and a net deficit of income as compared with expenditure of £12,000,000, as against a net surplus of £3,000,000 for the corresponding period of 1923-1924. The decline would have been considerably greater but for an unexpected increase in the yield during the half-year from Estate, etc., duties of about £4,800,000, and from super tax of nearly £4,000,000. The increase from super-tax does not imply the enjoyment during this period of a larger income, as the payments received from this source are in respect of assessments on income enjoyed nearly two years previously.

The net reduction in Government Expenditure during the six months was only two and one-third millions as against a reduced income of 17 and one-third millions, a deficit on budgeting of £15,000,000, or a net deficit of £12,000,000, as there was a surplus on the same period in the preceding year of £3,000,000. Unless there be some pronounced improvement in receipts and reduction of expenditure during the remaining six months of the year, it appears probable that there will be a deficit to be faced at the end of the financial year. Usually the receipts during the second half of the year are greater than during the first half, but as the repeal of the "McKenna Duties" did not become operative until one-third of the year had passed, there will be a full half year's loss to be reckoned for these duties during the second half as against one-third for the first half of the year, and a full half year's loss from the reduction of Entertainment tax, as against two-thirds of the half-year to September 30.

For the year ended March 31, 1924, there was a realised surplus on the Budget of £48,300,000, of which £20,000,000 was devoted to redemption of National War Bonds and £15,750,000 to the redemption of outstanding Treasury Bills. For the year prior to that the realised surplus was £101,500,000—the surplus on these two years being approximately equal to the total Government Expenditure a few years prior to the Great War. Expenditure by Local Authorities in Great Britain out of rates amounted to £161,600,000 in addition.

The estimated Expenditure for the current year on the introduction of the Budget was £790,000,000, increased by supplementary expenditure sanctioned to nearly £794,000,000, as compared with an actual expenditure during the preceding year of nearly £789,000,000, so that, notwithstanding the certainty of a decreased revenue, an increased expenditure already more than absorbing the Estimated Surplus is engaged to be incurred. A definite

proportion of this sum (£56,000,000) is found by trenching on capital in the form of Death Duties, which must still further reduce the prospects of receipts from taxation of income in subsequent years, while it also reduces the capital available for profitable investment in industry, the provision of employment, and the maintenance of the "purchasing power" of the population at large. The continuation of such a course can eventually have only the same result on the National Finances as it would on private or business affairs, although the full effect may not become apparent so quickly.

A PROSPECT OF RETURN TO SOUNDER FINANCE.

Fortunately, although somewhat tardily, there appear to be signs of a return to a more sane outlook on the National Financial situation, not only amongst politicians, but amongst the nation at large. For some years past, dating from the famous "Limehouse Campaign," and before the upheaval caused by the Great War, even responsible politicians have appeared to be satisfied that so long as increasing sums could be obtained by taxation—on however steeply rising a scale—the National prosperity could be assumed to be increasing in the definite ratio of the rise in the taxation receipts. Reasoned warnings to the contrary fell upon persistently deaf ears. The intervention into this period of the Great War, while it overshadowed the issue, and to some extent complicated, and later, accentuated it, did not divert the inevitable, logical result, although it provided a convenient peg to which to attach the blame. The tragedy of rising unemployment has shown that unproductive expenditure by the State is in no sense even a partial or temporary cure, but tends to perpetuate and to increase the trouble it is intended to alleviate.

The number of registered unemployed rose to 1,162,700 on September 1, 1924, a summer period during which unemployment is usually lowest, and an increase since mid July of 14.7 per cent. In other words, a bread-winner in every ninth family was "registered" as unemployed. The actual number is considerably higher, as the "registered" figures do not include those "out of benefit" under the "dole" scheme, those not covered by the scheme, and those whose self-respect will not permit them to notify or advertise their misfortune, these latter in much larger proportion than is realised by the political theorists. Coupled with this are reports of further closing down amongst the more basic industries (iron, steel and coal) upon which other industries depend largely, owing to their inability to compete in the world-market whilst hampered with the excessive national and municipal taxation and the semi-legalized artificial restrictions upon output.

The surprising turn-over of votes at the last General Election (October, 1924) would appear to indicate that the Public at large was not satisfied with the position from both a personal and a national financial point of view, and is disposed to revert to a more conservative policy than has been the vogue for some years past.

In France, Belgium and Germany, countries which suffered most severely during the War,

unemployment is practically non-existent, in that it is reduced to that residuum always present (and due to the personal element) and impossible of elimination even in the periods of greatest industrial prosperity

INCOME TAX.

No detailed returns are available for the last financial year, the latest issue dealing with the period April, 1922-March, 1923. A fresh complication in the matter of accurate comparison now appears in the Inland Revenue Commissioners' accounts due to the elimination from these accounts (commencing with the year 1922-1923) of Southern Ireland, now the Irish Free State, and the accounts which have hitherto given the figures for the United Kingdom now relate only to Great Britain and Northern Ireland as from this date. As regards Income Tax, the receipts from what is now the Irish Free State amounted to less than 1 per cent of the receipts from the United Kingdom as a whole. The effect, therefore, is not serious, but has to be borne in mind in making accurate comparisons.

Income Tax and Super Tax, although treated by the Income Tax Commissioners as separate and distinct taxes, are in practice one tax levied upon income, and the serious nature of the increased burdens upon industry due to this source alone can be gauged from the following table, which gives the receipts from the last financial year, and from each of the ten years preceding. The figures are given to the nearest £1,000.

The gross income for the year coming under the notice of the income tax authorities was estimated at £2,900,000,000, and the net taxable income, after allowing for exemptions, reductions and allowances, at £1,320,000,000. This shows a decline since 1919-20, for which year the figures were £2,970,654,000 gross and £1,416,223,000 net, as compared with £3,447,058,000 gross and £1,356,628,000 net for 1920-21, and £3,214,829,000 gross and £1,308,278,000 net for 1921-1922.

Salaries of Government Officials at £88,068,000 showed a decline from £98,821,000 as compared with the preceding year, due to the automatic reduction in the "cost of living bonus" rather than to any drastic curtailment of expenditure in this respect.

INCOME FROM HOUSES

"Landlord's Income," i.e., the income from the ownership of lands, houses, &c. (Schedule A) has been almost stationary for some years past, showing a total rise of slightly over 6 per cent in 10 years. Income from lands has fallen slightly (about one-half per cent), while that from the ownership of houses only has increased during the decennial period by barely 7 per cent. Allowing for the very heavy inflation of prices since 1914, with the consequent increased assessments and rentals amounting in all but the large properties of the "mansion" type to not less than 40 per cent, there is, instead of an increase, a serious reduction in "real" income from this source. This is not principally due to

COMPARATIVE STATEMENT OF RECEIPTS FROM INCOME TAX AND SUPER TAX FOR THE YEARS 1912-13 TO 1922-23, WITH PERCENTAGES OF INCREASE

Year	Exchequer Receipts			Increases per cent	
	Income Tax	Super Tax	Total	On Preceding Year	On 1912-13.
	£	£	£	Per cent	Per cent
1912-13	41,206,000	3,600,000	44,806,000		
1913-14	43,929,000	3,320,000	47,249,000	5.4	5.4

1919-20	316,926,000	42,173,000	359,099,000	23.3	713.8
1920-21	338,865,000	55,281,000	394,146,000	9.7	779.7
1921-22	337,027,000	61,730,000	398,757,000	2.2	790.0
1922-23	314,836,000*	64,209,000	379,045,000	-4.9†	746.0

* Great Britain and Northern Ireland only

† Reduction of one shilling in the rate of Income Tax

‡ Decrease

The Rates of Tax applicable to the above periods were as follows —

Years	Income Tax	Super Tax
1912-14	1s 2d in the £	6d in the £ over £3,000 on incomes exceeding £5,000
1914-15	1s 8d in the £	From 6s 3d in the £ over £2,500, on incomes over £3,000 up to 1s 9½d on excess over £8,000
1915-16	3s in the £	From 10d in the £ over £2,500, on incomes over £3,000 to 3s. 6d in the £ on the excess over £10,000
1916-18	5s in the £	Ditto
1918-20	6s in the £	From 1s in the £ over £2,000, on incomes over £2,500 to 4s 6d in the £ on the excess over £10,000
1920-22	6s in the £	From 1s 6d in the £ over £2,000, to 6s on the excess over £30,000
1922-23	5s in the £	Ditto

the "housing shortage" as there is a considerable increase from properties of this type (although not a sufficient increase to overtake the demand), but is mainly accounted for by the closing of large houses whose owners are unable to maintain them, in days of high prices, from what is left of their income after heavy taxation has been met, especially as most of these estates are now heavily encumbered by charges incurred to meet the excessively heavy death duties in force for several years.

The Commissioners' Return for Inhabited House Duty is entirely factual, as the numbers and classification of these properties for each year since 1914-1915 are marked "not available." This is not only trifling with a very serious social problem, but is incorrect, as every property is scheduled in the books of the Income Tax authorities, and assessments made and tax collected thereon. The information is in fact given as regards new buildings brought into assessment during the year in the detailed particulars of Income Tax under Schedule A. This shows that during the year 1922-1923 new buildings numbering 152,313 of a total annual value of £4,755,824 were brought into assessment, as compared with 87,032 of an annual value of £3,087,196 in 1921-22, and 30,489 of an annual value of £1,333,721 in 1920-21. The number of new dwelling-houses was 132,723 in 1922-23, 72,647 in 1921-22, and 19,191 in 1920-21, and of the number first brought in in 1922-23, 121,708 were under £40 in annual value, due principally to building under the housing schemes, either through municipal authorities or through the subsidizing of approved houses built by private enterprise. A large proportion of these were naturally in the Greater London area, although the largest individual county contribution was from Lancashire with 14,743 new dwelling-houses, of an annual value of £475,195.

Income from Foreign Government Securities (other than those of British Possessions) amounted to £8,119,000 as compared with £11,660,000 in 1913-14.

AN OLD TAX TO DISAPPEAR.

A tax that has been imposed in one form or another since 1662, of late years known as Inhabited House Duty, is to disappear as from April 1, 1924. The reason given by the Chancellor in his Budget Speech was that the tax was "irritating" and "little more than a sham." It is doubtful if any tax was less "irritating," it was graded to fall lightly on small incomes and not heavily on larger ones, and it produced roughly £2,000,000 per annum. Its cost of collection was negligible, as it was collected with the "King's Tax"—that portion of Income Tax levied upon house property. It is fairly certain that the elimination of this tax will not reduce the cost of collection of the balance of the tax hitherto collected with it, and it therefore seems to have been a needless surrender of £2,000,000 per annum without any corresponding saving in expenses. This tax was originally a "Hearth Tax," when imposed in 1662 in the form of a tax of 2s on each "hearth," or stove, in a dwelling house. It continued to be imposed with various intervals in varying forms (of which the best known was the "Window Tax") until it became stabilised, more or less in its present form, in 1851. Income Tax is its junior by 136 years, as the latter was first imposed as a war measure

in 1798 (being discontinued from 1801-1803, and from 1816-1842) at rates varying from 2d to 8d in the £, until the South African War (when it jumped to 1s, then 1s 2d, and later, 1s 3d, to recede in the following year to 1rd) with the exception of the period 1854-1856, the years of the Crimean War, when the rate varied from 10d to 1s 4d in the £.

"Corporation Profits Tax" also disappears. This tax has had a very short life, as it was first imposed under the 1900 Budget. It was unsatisfactory in its incidence, it was additional to other taxes, and reacted directly and immediately upon industry, and was in practice found to be difficult of definition, and its assessment and collection was costly, both to the Department and to the payer of the tax.

STAMP DUTIES.

The yield of the Stamp Duties showed a marked increase from £18,991,000 to £21,851,000, due to the increased duties on Stock Exchange Transactions. The "Slump" in shipping and freight values is reflected in a decline of over 27 per cent on the receipts from stamps on Marine Insurance Policies, although an improvement in the carrying trade is indicated by a rise of nearly 34 per cent in the yield from stamps on Bills of Lading, that is to say, more voyages have been made, but with a lessened value of ships and cargoes.

ESTATE, ETC., DUTIES

High Yield Maintained

The Estate, Legacy and Succession Duties levied on property passing by reason of death and generally collectively referred to as the "Death Duties," not only continues to produce a high yield, but, with the exception of a slight set-back in 1918-19, have for several years past regularly resulted in a considerable surplus over the Budget Estimate.

This is the most difficult of all forms of revenue to estimate, as while it, of course, to some extent depends upon current valuations and prices, otherwise it is not dependent upon fluctuations of trade or even of the death rate, but almost entirely upon the incidence of death amongst rich people. The estate duty on small estates (up to £500) is from 1/2 per cent to 1 per cent (estates valued at under £100 being entirely exempt) and the yield of legacy duty negligible, whereas on very large estates the estate duty is as high as 40 per cent, and the legacy duty in addition varies according to degree of consanguinity from 1 per cent to 10 per cent. The falling in of only one large estate may make all the difference between a deficit on the Estimate or a large surplus. The average number of millionaire estates falling in is slightly under 10 per annum, but during recent years the number has been as low as 3 and as high as 20 in one calendar year. On the latter occasion (1922) one estate—that of Sir Ernest Cassel—of the 20, paid nearly 2½ millions (£2,442,000) in duties on the provisional valuation alone, and these 20 estates contributed almost one-half of the duties collected from nearly 99,000 estates during the year.

During the current year 1924-25, the Chancellor of the Exchequer in his Budget Speech estimated for a yield from these Duties of £56,000,000, based, no doubt, upon the results of the two years preceding. This estimate, optimistic as it seemed, bids fair to be exceeded by a considerable

BUDGET ESTIMATES, EXCHEQUER RECEIPTS

Net surplus in eleven years £31,919,000

sum, as the yield for the first half of the financial year (to Sept 30) amounted to £31,520,000, or an excess over the estimate for the half-year of £3,520,000, or for the year, at the same rate, of £7,040,000. The amount collected as compared with that in the corresponding half-year showed an increase of £4,790,000.

It is quite possible that this high rate of yield may not be maintained for the remainder of the financial year, but it is fairly certain that a considerable surplus will be shown, as the remaining half of the year covers the autumn and winter months, during which the mortality amongst aged persons is considerably higher than in the warmer weather. Very wealthy people usually live to rather more than the Psalmist's "three score years and ten," for statistics over a long period give an average age at death amongst this class of almost exactly 75 years. In any case, it will require an exceptionally strong combination of circumstances to so reduce the lead already established as to bring down the yield for the year to the sum estimated in the Budget.

The gross capital value on which Estate Duty was levied in the year 1922-23 was £472,388,195, and the net £421,198,000, of which £96,472,000 was freehold and leasehold property. Fifteen Millionaire Estates out of a total number of 98,000 contributed 25 per cent of the duty on 6.8 per cent of the Capital value, while estates not exceeding £1,000 in value, which numbered 64,164 (two thirds of the whole), contributed only 0.8 per cent of the duty on 6.6 per cent of the capital. Those between £1,000 and £5,000 numbered 23,766, and contributed 3.9 per cent of the duty on 14.6 per cent of the capital.

Insolvent estates, which numbered 899 in 1920-21, rose to 1,045 in 1921-22, and further to 1,331 in 1922-23, although the net deficiency in the latter year was less than in the year preceding, viz £1,217,000 as against £1,286,000.

CLASSIFICATION OF CAPITAL.

The capital upon which estate duty was paid is classified under 14 different headings. This table is of particular interest in view of its representative character, as it involves 98,002 estates from all classes of the community, selected without any discrimination, solely by the incidence of death within the period, and may therefore be taken as typical of the allocation

tion of the national capital between various forms of investment.

Classification.	Capital Value. £	Per centage
British Government Securities issued since 1914	64,877,394	13.73
Other British and Foreign Government and Municipal Securities	33,593,354	7.11
Stocks, shares, &c., of Joint Stock, &c., Companies	133,651,306	28.28
Cash	33,387,433	7.06
Money lent on mortgages, bonds, bills, &c.	34,610,980	7.32

Land, freehold, copyhold, or leasehold	29,044,060	6.15
House property and business premises, freehold, copyhold or leasehold	68,422,637	14.48
Ground rents and tithe rent charges	7,572,953	1.60
Mines, mineral and quarries	4,138,052	0.88
Other personal property	12,155,434	2.56
Other real estate (including timber, manorial rights, &c.)	3,202,874	0.68

Total £472,585,719 100.00

The Valuation Department dealt with rather more than one-half of the cases brought in for estate duty, viz 52,090. In these cases the department succeeded in increasing for taxation purposes the valuations brought in by the parties to the extent of £6,135,247, a percentage increase on the amounts dealt with of 5.96.

The total cost of the collection of the Revenue coming under the notice of the Inland Revenue Services amounted to £7,252,000, at the rate of 1.23 per cent of the amount collected. This is a decline of 0.12 per cent from the preceding year, mainly due to a decrease in the "cost of living bounties," and not to economies effected by the department. This compares with a percentage cost of collection of 0.59 in 1919, when rather more revenue was collected, or an increase of over 100 per cent in the cost of collection in four years.

CHARITABLE BEQUESTS.

On pages 467-473 will be found a list of the principal charitable bequests of the year, which has been an exceptional year for the number of charitable bequests that have been made and in the total amount bequeathed. There is a distinct falling off in the amounts bequeathed for purely religious and sectarian purposes. On the other hand, institutions for the relief of suffering, hospitals, orphanages, and charity trusts have been more widely remembered than usual. The publicity given to the urgent need of funds by large public Hospitals and the restriction of the activity of these institutions seems to have made its mark on the minds of testators with results that are now becoming apparent in bequests. There are some exceptionally large bequests for educational purposes, especially for the newer Provincial Universities, by local testators who are proud of their local institutions.

A rather curious bequest is that of Mr Gustav Adolf Koettgen, who left the reversion of about £70,000 for works of public utility or charitable purposes, preference being given to those for the

* Decrease

benefit of loyal British subjects of German birth, and Sir Henry Lucy perpetuates his pen-name of "Toby, M P" by a bequest of £1,000 for a trust to bear that name, of which the income is to be applied for the relief of members of the Press Gallery in the Houses of Parliament. War Charities continue to be well supported, especially the St Dunstan's Hostel, which is perhaps the most fortunate of these institutions as regards the number and amounts of the bequests.

Under the will of Sir Claude Phillips there are some exceptionally valuable art bequests to the National Gallery, the National Portrait Gallery, the Victoria and Albert Museum, the Royal Gallery of Belgium at Brussels, the National Art Gallery of Scotland, and Art Galleries at Dulwich, Brighton, York and Glasgow. These items do not appear at a valuation in the list, as works of art so bequeathed are not liable to duty, and are therefore not valued for estate duty purposes. The movement to similarly exempt from either estate or legacy duty, or both, of bequests to public Hospitals and well-known Orphanages and Charitable Trusts has not yet been successful. It does not seem logical that pictures and other works of art and collections of various sorts, when left, not merely for public uses, but for retention in a

family with certain access by the public, should be exempt from both Estate and Legacy Duty, while bequests to approved institutions for the relief of human suffering and misery should not only have to pay Estate Duty, but 10 per cent Legacy Duty in addition. Any loss by the Revenue by the remission of such duty would be more than counterbalanced by reductions in Government expenditure on "health services," both National and Municipal, and in the expenditure by Poor Law Authorities, not only in monetary grants, but also in the maintenance of infirmaries and similar services. A curious appeal was issued some time ago by Lord Knutsford on behalf of the Hospitals, in which he pointed out that a testator would "make a profit" by leaving a Hospital £900 free of legacy duty, instead of leaving the institution £1,000 without any such qualification, as in the first instance his estate would pay £90 in Legacy Duty, whereas in the other case the Hospital would pay £100, in each case the net benefit to the Hospital being £900. The testator in this way would "make a profit" of rather over one per cent for the same benefit to the Hospital.

A list of the principal large estates proved during the year with the amounts at which the estates were sworn appears below and on the following pages.

Large Estates.

	Gross Value £		Gross Value £
Acton-Adams, William, J P (80), of Tipapa, Christchurch, New Zealand, and of Park Mansions, Knightsbridge, hairrier (net personality, £198,305) (English estate)	202,862	Bullantane, George (78), of St Blanes, Dunblane, N B, retired wine and spirit merchant (personal estate)	118,771

GRAHAMSTOWN (St. Andrew's College)—*Rev Canon P W H. Kettlewell.	
RONDEBOSCH (Diocesan College)—*Rev. R. H. Birt.	

The Year's Weather.

(1923) October was characterised mainly by unsettled boisterous weather, with south-westerly winds and heavy rainfall. The temperature was moderate. There were, however, considerable bright periods, with the result that some parts of the country experienced an excess of sunshine as well as an excess of rain. The strongest winds occurred mainly towards the end of the month, especially the 25th to 27th, but gales occurred throughout the month. A gust of 80 miles per hour was recorded at Lyme Regis on the 31st, considerable damage being done at Arlington Court (Devon) on this date, at Severn Beach on the 17th, and at Folkestone on the 12th. On the evening of the 24th a small tornado passed over Solihull near Birmingham, causing 3 casualties and widespread destruction over a track 50 yards wide.

With the exception of the north-east coast of Britain the mean temperature was slightly above the normal, but the range of temperature was very small, a range of 7° F at Southport constituting a record for 52 years observations. The week October 21-27 was the warmest period. The highest temperatures recorded were (England and Wales) 74° F at Long Ashton on the 1st, (Scotland) 64° F at Wick and Edinburgh, (Ireland) 66° F at Lisburn on the 7th. The lowest temperatures were (England and Wales) 27° F at Marlborough on the 15th, (Scotland) 24° F at Wollace on the 14th, (Ireland) 28° F at Kilkenny on the 15th. A number of ground frosts occurred, especially in Scotland, the largest number being 18 at Leuchars. The lowest readings were 19° F at Rhayader and Waleys on the 5th, and 20° F at Wisley on the 15th. Rainfall was in excess of the normal everywhere except in the north-east of England, some places having an excess of more than 50 per cent in the west of Great Britain, north west of Ireland, and the south-east of England, while the coast of Scotland in the neighbourhood of Loch Linnhe, the greater part of Westmorland, and parts of London had twice the normal amount. On the other hand the north-east coast of Britain had less than the normal, whilst a small area in the neighbourhood of Spurn Head had less than half the normal fall. The fall at Kew (5.33 ins) was the largest total for any month since December 1915, whilst in the last 20 years there have only been 6 wetter Octobers. Little snowfall occurred at any station. A moderate amount of thunder was reported, and a storm of considerable local intensity occurred in the west and south of Scotland on the 27th. One of the Reculver Towers (Kent) was struck by lightning on the 22nd. Sunshine was in excess of the normal in Ireland and the north-east of Great Britain, elsewhere there was a slight deficiency. At Aberdeen the month was the sunniest October on record, with an average daily duration of 4.48 hrs. The last two weeks were sunnier than the first two, Ross-on-Wye had 10.3 hrs on the 4th, the largest amount registered in October since 1918. At 17 hr on the 12th a waterspout was seen off Aberystwyth. Aurora was seen about the middle of the month at several places in Scotland and the Zodiacal Light in the south-east of England on various occasions.

November weather was unusual in being in excess with sunshine, rainfall, cold and fog.

The mild weather of October continued for the first few days, but afterwards, with the exception of a short period about the middle of the month, the weather was cold, with much frost at night but many sunny days. From the 12th to the 18th gales and heavy rain were experienced generally, and floods occurred in Lancashire, North Wales and Cheshire. Subsequently showers of hail, sleet and snow fell repeatedly in the northern and western districts. There was intensely cold and foggy weather about the 25th. Gales occurred most generally on the 15th. Southport reported a gust of 82 miles per hour on this date and experiencing a total duration of 46 hours of gale during the month. Temperature was below the normal, that of the south-east of England being 5.8° F below it for the month as a whole, while for the week from the 25th to the end of the month the temperature of this area was 10.8° F below the normal. At Kew so long a period of frost in this month had not been experienced since 1890, and at Copdock (Suffolk) the screen and grass minima of 17° F and 12° F respectively were the lowest in 22 years. The extreme temperatures for the month were (England and Wales) 62° F at Worsop and Lepton Fields on the 31st, 12° F at Rothamsted on the 27th, (Scotland) 60° F at Dunrobin on the 11th, 10° F at Braemar on the 24th and 25th, (Ireland) 58° F at Killarney on the 2nd and 31st and Mullaranny on the 11th, 17° F at Kilkenny on the 25th. Ground frosts were very numerous, Hull recording 28, the lowest reading recorded being 8° F (over snow) at Balmoral on the 15th. An excess of more than 50 per cent in rainfall was experienced over a wide area in Northern England and around the North Welsh coast, and over a small area in North-eastern Scotland. Leyland (Lancs), total fall 5.22 ins, remarked that it was the wettest November on record, while Meltham (Yorks) with a total fall 8.63 ins had the wettest November since 1888. Floods were very severe in some parts, that at Sale on the Mersey was the worst within memory, the water being 11 ft deep at Sale Priory. At Portmadoc rain is said to have fallen continuously for 48 hours. Snow fell generally at West Linton on 18 days. A severe snowstorm occurred on the 15th, 20 ins falling at Braemar. The fall of the 26th in South-eastern England lay on the inland hills for 3 days. Thunderstorms occurred in west and south Scotland on the night of the 3rd and 4th, and local storms in various parts of the British Isles. Hail was frequent. The duration of sunshine was in excess all over the British Isles, the week 4th to 10th being the sunniest generally. At Torquay the total of 124 hours was the highest in November for 32 years. Fog was prevalent generally, especially on the 6th, 9th and 24th to 27th. The fog on the 25th, over the south of England, stopped all shipping movements in the Thames and Southampton Water, and prevented the landing of aeroplanes from the Continent. Aurora was observed on various occasions, as was the Zodiacal Light.

December was variable, cold and milder weather alternating. At the beginning of the month the conditions were some what less severe than those of November, snow still lying in many parts of the country, whilst mist and fog were prevalent. During the second week a

more southerly current of wind set in and gave rise to milder conditions, though much rain was experienced in the north and west. From the 15th to the 22nd cold northerly winds predominated accompanied by snow. The remainder of the month was very variable, mild periods alternating with cold ones, though the eastern part of Great Britain was generally cold. Strong southerly winds and gales were experienced on the 2nd and 7th and strong winds about the end of the month. A gust of 80 miles per hour was recorded at Lerwick on the 18th. Temperature was below the normal over Great Britain, but a slight excess was recorded from Ireland. The coldest week was the 23rd-29th, and the warmest 16th-22nd. Temperature changes were violent, at Ross-on-Wye a temperature change of 20° F in 14 hours happened on the 25th. The extreme temperatures for the month were —(England and Wales) 56° F at several stations from the 16th to 23rd, 17° F at Tenby on the 25th, (Scotland) 55° F at several stations from the 10th-17th, 6° F at Braemar on the 25th, (Ireland) 55° F at Killauey on the 26th and 27th, 22° F at Kilkenny on the 1st. Ground frosts were very numerous, Eskdalemuir (Dumfries) reporting 8° F on the 25th. Central Scotland from Inverness and the Isle of Skye to Dumfries, South-western England, Southern Wales and Ireland had a deficit of rainfall, elsewhere rainfall was slightly in excess of the normal. Extensive floods occurred in South Lincolnshire on the 28th. A large amount of precipitation was in the form of snow, London experiencing from 2 to 6 days. A heavy fall occurred in the north in the evening of Christmas Day, 8 inches at Galashiels and in parts of the Glasgow area. The Glasgow snowfall was said to be the heaviest for 33 years. A thunderstorm was experienced in Sutherlandshire on the 19th, and at one or two stations on the east coast of England. Some hail showers occurred, but not extensively. With the exception of the east of England and south of Ireland the duration of sunshine was above the normal, the extreme south western counties of England enjoying the largest amounts. Calshot recorded 7 hours on the 23rd. Fog was prevalent as a rule, the week 2nd-8th being very foggy, a sudden dense fog descended on London on the evening of the 7th. Glazed frost occurred in many parts of the country, especially on the 5th. An aurora was seen at Gordon Castle (Elgin) on the 19th. Zodiacal light was observed from the South-east of England on a number of occasions.

(1924) *January.* Mild, dull and rainy weather characterised the opening days of the month, but by the 5th thick fog occurred in many parts of the country with a decided fall of temperature, some places reporting hard ground frosts. By the 8th easterly and south-easterly gales were blowing in many parts of the British Isles, accompanied by snow. This was followed by a spell of mild unsettled weather from the 10th to the 17th, when a spell of cold easterly winds was experienced, mild weather then again set in until the 26th, when mainly fair conditions were experienced until the end of the month. A gust of 86 miles per hour was reported from Lerwick on the 25th, whilst on the 8th Scilly recorded a gust of 79 miles per hour and Valencia one of 70 miles per hour. Mean temperature was above the normal all over the British Isles. The week ending on the 23th was the coldest,

whilst that ending the 26th was the warmest. Low day maxima were recorded on the 9th and 17th, when at some places the thermometer remained below 32° F. all day, at Leadhills (Lanaik) it did not rise above 25° F. Extreme temperatures for the month were —(England and Wales) 57° F at Llandudno on the 26th, 14° F at Garforth on the 10th, (Scotland) 47° F at Gordon Castle on the 29th, 6° F at Wolfelee on the 10th, (Ireland) 55° F and 24° F at Dublin (Phoenix Park) on the 14th. Precipitation was above normal except for two large areas, the north of Scotland and north-west of England. In the south-east of Ireland rainfall was about twice the normal. Owing to heavy rain, floods occurred in several parts of the country, much inconvenience being caused in the upper reaches of the Thames, while the flood at Cloumel (Sui Valley, Ireland) rose to the 1840 flood level. Snow fell over the greater part of the country on the night of January 8th-9th and the two following days. In North-East Yorkshire the fall is reported to have been the heaviest of the winter. Thunderstorms occurred at a few places in the south on the 19th, and in Scotland sporadically on the 11th, 12th, 24th and 26th. Sunshine was slightly in excess of the normal generally except in the west of Scotland, south-west of England and in Ireland. A number of stations registered amounts of more than 7 hours on the 25th. Fog occurred at Southampton on 29 days and at Lincoln on 20 days. On the 23rd it was exceptionally dark in London without appreciable fog. An aurora was seen in Scotland on the 3rd, and a particularly brilliant display was witnessed over a large area in the north of Scotland on the evening 29th-30th. A slight earthquake shock was reported from Hereford just after 12th hour on the 26th. Zodiacal light was seen at Oxford and Wadhurst (Sussex) on various occasions.

February. Mild weather with westerly winds prevailed over the British Isles for the first week of the month, then became dull. On the 8th light southerly winds and gales with heavy rain locally were experienced in Ireland. From the 10th to the 14th cold easterly winds with local gales prevailed. Subsequently cold westerly to northerly winds set in accompanied by snow or sleet at times. High winds or gales occurred generally on the 29th. A gust of 73 miles per hour was recorded on this date at Fleetwood, whilst a gust of 72 miles per hour was recorded at Lerwick on the 5th. Mean temperature was below the normal with the exception of Scotland and northern Ireland. The middle of the month was coldest, and on the 12th the maximum temperature recorded at Balmoral was only 30° F, and there were several other days there when the thermometer did not rise above 32° F. Extreme temperatures for the month were —(England and Wales) 54° F at a number of stations from the 4th to the 10th, 13° F at Cirencester on the 17th, (Scotland) 54° F at a number of stations, mainly on the 2nd and 21st, 14° F at Dungavel on the 14th, (Ireland) 54° F at Foynes on the 3rd, 23° F at Kilkenny on the 17th. A number of readings of 10° and 15° F were recorded on the 15th, the reading at Bhayader on the 15th being only 8° F. Precipitation was deficient from the normal in all parts of the British Isles, with the exception of small areas in the north and north-east of Scotland and in East Anglia. The rainfall at Ross-on-Wye, 0.28 in., was the lowest fall in February since

1896, with the exception of 1921. At Totland Bay (Isle of Wight) a partial drought of 35 days (Jan 25-Feb. 29th) gave precipitation of only 0.28 in. Snow fell in many parts of the country, mainly from the 10th to 16th, and from the 24th to the end of the month. There was practically no snow in the south of England. On the 29th a severe blizzard occurred in Northern Scotland. At Gordon Castle (Elgin) it was said to be one of the worst blizzards for 20 years, a serious drifting occurred in north and north-east Scotland, and many trains were snowbound and roads were impassable. Hail occurred in North-east England and Scotland. Thunder was reported at some western stations. The duration of sunshine for the month was below normal all over the British Isles, but in the last week the duration exceeded the normal everywhere except in Northern Scotland. A number of daily records of between 8 and 9 hrs were obtained. The greatest amounts of sunshine occurred in the extreme south-west. Fog was not very prevalent at the majority of stations. An exceptionally fine sunset was reported over a large area in Southern England. On the 5th Zodiacal light was observed at several stations.

March. During the first five days of the month the cold northerly winds continued, and temperature was lower even than in February. About the 6th, however, there was a quick change to fine, sunny conditions and a gradual increase of day temperatures, the nights still remaining cold. The weather remained dry until the 20th when mild rainy conditions set in in the south, but snow or hail fell in the north. During the last week the wind was between east and north-east, and cold, cloudy weather, with local showers of hail or sleet was experienced. Some high winds occurred mainly on the 1st, but gales were few. A gust of 71 miles per hour was reported from Scilly on the 2nd, and one of 62 miles per hour at Pendennis Castle, Falmouth, on the same day. Temperature was below the normal over the whole British Isles. The first week of the month was coldest, whilst the second week was warmest generally. The highest day temperatures were recorded about the middle of the month, but the nights remained cold, so that very large ranges of temperature were experienced. On the 15th South Farnborough had the remarkable range of 40° F. Frosts on the ground were numerous, readings being often below 20° F., Balmoral reporting -2° F. on the 3rd. At Copdock (Suffolk) the readings on the grass were below 32° F. every night from February 12th to March 21st inclusive, a record since the observations were started. Extreme temperatures were—(England and Wales) 63° F. at Reading on the 12th, 3° F. at Garforth on the 3rd, (Scotland) 62° F. at Liberton and Ruthwell on the 13th, 2° F. at Balmoral on the 3rd, (Ireland) 63° F. at Killarney on the 15th, and 11° F. at Lisburn on the 3rd. There was a remarkable deficit of rainfall over the whole British Isles, except the Channel Isles and Scilly, where amounts were normal. An absolute drought was experienced at some stations between the 6th and 20th. The month's total was only 0.28 in. at Ilberton (Northumberland). Isolated instances of fairly large daily falls occurred. Snowfall was general over all parts, few stations reporting none at all; it occurred as a rule in the first half of the month. Hail was reported from several places. Thunder

was practically absent, it was reported at a few English stations, and at Malin Head. Sunshine was above the normal except in the north and east of Scotland and Southern Ireland, the brightest parts being the south-east of England. During the week, 5th to 15th, many places had twice the normal amounts, while Westminster had three times the normal. The total of 187 hrs. at Teggumouth was a record for the month. There was a considerable amount of mist and fog. Sun pillars were seen over a wide portion of southern England on the 13th. Aurora was reported from Scotland on several occasions, while the Zodiacal light was observed in places as far apart as Wadhurst (Sussex) and Deerness on different occasions.

April was generally cloudy and cool, with the exception of a warm sunny spell about Easter. During the first week, cool light northerly winds with but slight precipitation were experienced. On the 7th the weather was warmer, but subsequently the cold weather again resumed its sway. Rain fell repeatedly from the 8th to the 14th. From the 16th to the 21st warm sunny weather set in, but deteriorated gradually, and the last few days were rough with rain, local gales and thunderstorms. Gales occurred mainly on the 27th. On this day the wind at Fleetwood (Lancs) maintained an average speed of 50 miles per hour for 60 minutes, with a gust of 64 miles per hour. A gust of 68 miles per hour was recorded at Southport on the 30th. Temperature was again below the normal in all parts. Easter Sunday and Monday, 20th and 21st, were the warmest days in most places. At Hodsock Priory (Notts) there was a very rapid fall of temperature on the afternoon of the 21st. After a fine hot morning with a maximum of 72.6° F. shortly before 14 h. the sky clouded quickly and by 15 h. temperature was down to 53° F. Ground frosts were general. At Rounton (Yorks) a reading of 11° F. was recorded on the 9th. Earth temperatures were low, at Dumfries the 4 ft. thermometer was lower than in any April during the last ten years with the exception of 1917. The extreme temperatures for the month were—(England and Wales) 76° F. at Greenwich on the 21st, 19° F. at Garforth on the 10th, (Scotland) 68° F. at Kelsae and Ruthwell on the 20th, 14° F. at Wollcote on the 11th, (Ireland) 69° F. at Lisburn and Donaghadee on the 20th, 23° F. at Markree on the 2nd. Precipitation was below normal in the east and north of Scotland and north-west of England, normal in the north-east of England and in excess elsewhere. There was a complete absence of rainfall at Easter at Kew, and apart from this year, this had only occurred 5 times in the past 25 years, the total for the month, however, was 3.39 ins., a figure which has only been exceeded once (in 1876) since 1866. Snow fell at places in all parts of the country. On the night of the 8th-9th 3 ins. of snow fell at Achinashellach (Ross), followed by 2½ ins. on the night of the 10th-11th. Thunder occurred mainly in Southern and Eastern England particularly between the 8th and 12th and on the 26th. There was a storm of considerable extent in Scotland on the 15th. Sunshine was below normal in all parts except the north of Scotland and the north of Ireland. A number of daily records exceeding 12 hrs were obtained. Harrogate receiving 13.6 hours on the 17th. Occasions of fog were not numerous, but a thick sea fog covered parts of the Channel Islands on

the 22nd and 23rd, seriously delaying steamship traffic, it was said to be the densest for many years. A waterspout was seen seaward from Stonoway on the 16th and a double one at Armagh on the 23rd. Aurora was seen from Southern England and in Scotland on two occasions. Zodiacal light was seen several times.

May commenced with rain, and thunderstorms occurred locally on the 3rd, dull, cold, showery conditions lasted then until the 6th, when rainy and fine weather alternated. Thunderstorms were again experienced on the 14th, but conditions improved and temperature rose. Fine conditions had set in by the 17th, but it was not long before unsettled weather interrupted. Fairer weather prevailed from the 25th to the 28th, but a well-developed line squall accompanied by widespread thunderstorms and darkness passed across Southern England on the evening of the 29th. Heavy rain and thunderstorms were again experienced on the 31st. Strong winds to gales were experienced at places in Southern England on the 24th. Mean temperature was above normal, except in Scotland and in Northern Ireland, for though day temperatures were low the night temperatures were high. Ground frost occurred in all parts, the thermometer at Renfrew reading as low as 18° F. on the 6th. Extremes for the month were—(England and Wales) 79° F. at Greenwich, Southend-on-Sea and Sheerness on the 19th, 29° F. at Leyland (Lancs) on the 29th, (Scotland) 72° F. at Dumfries, Ruthwell and Cargen on the 29th, 24° F. at Ford on the 9th, (Ireland) 72° F. at Mountmellick, Foyines and Bnr Castle on the 29th, 27° F. at Markree (castle) on the 4th. Rainfall was above the normal in all parts, heavy rains associated with thunderstorms being a noticeable feature. In the Severn Valley and part of Kent the rainfall was 3 times the normal. The thunderstorms of the 19th and 20th were accompanied by sudden short heavy falls of rain which caused considerable flooding and damage to crops in Bedfordshire, Hertfordshire, Buckinghamshire, Essex and Suffolk. Damage by lightning occurred in many parts of the country. The heaviest rainfall of the month occurred on the 31st, and floods occurred in Worcestershire, Shropshire, Herefordshire and round Sunderland. The most remarkable fall occurred at Humber Rectory, Leominster, where 2.99 ins. out of a total fall of 3.74 ins. fell in 14 hours. Many places had the wettest May for a long period of years—back to 1866 in some instances. Duration of sunshine was below normal in all districts, except England south-east where it was slightly above. Records exceeding 14 hours were obtained at several stations, especially on the 16th and 28th. The week ending the 17th was the sunniest week. The number of foggy days was small. Zodiacal light was seen on several occasions. A waterspout was seen at sea on the 5th from Morwenstow.

June opened with dull unsettled rainy conditions, which continued until about the 14th when warmer, drier weather set in. On the 17th thunderstorms and heavy rain occurred in places, but from the 19th the weather in the south-east remained fair and warm with little rain, but in the west and north rainy conditions continued. On the evening of the 24th a tornado-like disturbance pursued a narrow track over parts of Belfast, doing a considerable amount of structural damage and some minor injuries to a number of persons. A few gusts of 50 miles

per hour were recorded on the 28th and 29th, and Rosyth experienced one of 51 miles per hour on the 29th. Temperature was below the normal with the exception of that of the south of Ireland which was normal, and the east and north-east of England which was above the normal. A considerable number of ground frosts were reported, though many stations were quite free from them. The lowest reading was 24° F. at Dunham on the 14th. Extremes for the month were—(England and Wales) 82° F. at Camden Square (London) and Enfield on the 26th, 30° F. at Comondale (Yorks) on the 5th, (Scotland) 81° F. at Wolfelee (Roxburghshire) on the 17th, 26° F. at Braemar on the 4th, (Ireland) 75° F. at Kilkenny on the 23rd, 36° F. at Lisburn on the 3rd. Precipitation was normal in south-west England and the Midlands, above normal in the south-east of England, the north of Scotland and Ireland, and below normal elsewhere. The first half of the month was the wetter, and the floods of the end of May lasted a few days and then abated gradually. Some large amounts of rainfall were reported. At West Kirby (Cheshire) 3.58 in. fell during the 24 hours ending 9 a.m. on June 1st, the previous 24-hour record for more than 60 years being 2.05 ins. The great majority of stations reported thunder during the month. Thunderstorms were widely experienced in the Midlands and Southern England on the 12th, and were general in Scotland on the 11th and 21st and in Ireland on the 17th. A few stations had one or two days of hail. At Inveraray (Argyll) on the 20th an exceptionally heavy storm of hail, yielding as much as 2.44 ins. flooded the streets and fields within a very short time, whilst no hail fell 3 miles away. The duration of sunshine was below normal in all parts of the British Isles. The third week was the sunniest. A number of records of over 12 hours were reported, Tunbridge Wells having 15.1 hours on the 26th. At Forquay the total sunshine for the month was the lowest for June since 1912, and a total of 91 hours at Valencia (Ireland) was the lowest in June for more than 40 years. Many places were entirely free from fog, but a very dense fog in the English Channel on the 25th and 26th caused considerable delay to shipping, solar and lunar halos were unusually frequent during the month.

July was wet, thundery and generally cool, severe local thunderstorms and heavy rain being the most striking features of the month. During the first week the weather was generally cool and unsettled over the northern and western parts of the British Isles. By the 5th the high pressure system in the south spread northwards over Great Britain and the North Sea and a spell of fine warm weather set in, except over the western parts of Scotland and Ireland, where the conditions remained unsettled. Temperature gradually rose until the 12th, which in many places was the hottest day of the year. Maximum temperatures of 85° F. were registered at a large number of places, the thermometer reaching 90° F. at Camden Square. This spell of fine weather broke up about the 16th or 17th, and from thence until the end of the month conditions were cool and unsettled.

On the 3rd and 4th, and again between the 18th and 26th, thunderstorms were experienced in very many places. In the late afternoon or early evening of the 12th, a thunderstorm of unusual severity visited the greater part of Scotland, and on the next day another fairly

widely spread storm occurred. Associated with a thunderstorm at Falmouth on the 21st, 2.91 ins of rain fell in the 24 hours ending at midnight. This was the greatest amount ever measured there during a similar period. Connected with a thunderstorm next day at the Royal Horticultural Society's Gardens at Wisley, 4.06 ins of rain was recorded. This was not only the largest amount reported from any one place on any one day, but was well in excess of twice the average monthly fall. In the afternoon of this day (22nd) there was a thunderstorm in London during which ball lightning was seen at South Kensington. In this storm an inch of rain fell at Hampstead in 16 minutes, and 1.26 ins in 25 minutes at South Kensington, of which 0.39 in fell in 3 minutes. Another severe storm visited London on the afternoon of the 29th. On this occasion more than 2 ins of rain fell at Hampstead. There were only a few places from which thunder was not reported during the month.

Rainfall was very generally above the normal. The only places which received less than the average was an area surrounding the Wash, and one or two restricted areas in Scotland and Ireland. At Aberdeen the fall of 5.38 ins for the month was nearly twice the normal, and was, with the exception of 1928 the wettest July since 1866. The July total of 7.60 ins at Hampstead was the greatest recorded in any month since observations began there in 1858. Among the daily falls of over an inch were 1.61 ins at Molepeth (Northumberland), 1.81 ins at Hawarden Bridge (Flintshire) and 2.05 ins at Petersfield (Hants), each on the 28th.

The rainfall of the month expressed as a percentage of the normal was, England and Wales 152, Scotland 152, Ireland 142. Although there was not much hail, that at Hampstead during the thunderstorm of the 22nd was very heavy, the hailstones measuring from 0.5 to 1.0 in in diameter and those at Kingsway 0.8 in. Taking the country as a whole the second week was the driest, the third week was the sunniest, and the last week was the dullest. In the forenoon of the 22nd a waterspout was seen off the Needles, Isle of Wight.

August was mainly dull and cool with frequent rain. At the beginning of the month rain fell generally over nearly the whole country. There was a short spell of fine weather from the 6th to the 10th, during which time many places enjoyed from 13 to 14 hours bright sunshine. On the 11th there was a renewal of unsettled conditions in the west, which subsequently spread south-eastwards, and for the remainder of the month the barometer was low in the north and north-west, rain falling repeatedly over the whole country. With the exception of the north of Scotland where there was a slight excess, the mean temperature of the month was below the average, the largest deficiency being in the Channel Isles. The deviation from the normal being much more marked by day than by night, gave a comparatively small range of temperature. The night of the 4th-5th was very warm in many parts of England, and in some places the night temperature did not fall below 60°. The coldest week of the month was that of the 17th to 23rd. The extreme screen temperatures for the month were — England and Wales 79° F. at Camden Square (London) on the 11th, and 33° F. at Commodale (Yorkshire) on the 28th. Scotland 73° F. at Gordon Castle (Elgin) on the 30th, and 32° F. at West Linton (Peebles) on

the 17th. Ireland 72° F. at Lisburn (Antrim) on the 4th, and 40° F. at Ballinacurra and University College (Cork) on the 6th. Rainfall was below the average in the north of Scotland, the north-east and east of England, the south of Ireland, and the Channel Isles. It was also below in several small and two relatively large areas, the first of which was an irregular section extending from northern England to central Scotland, and the second embracing a considerable part of central and southern Ireland. The heavy rain to the east of the Quantock Hills on the early morning of the 19th was remarkable and gave the second largest fall on record for the British Isles in one rainfall day. At Bymore House near Bridgewater the amount for the 24 hours ended at 8 a.m. (G.M.T.) on the 19th was 9.06 ins. The rate of fall at Bymore House was well over an inch per hour between 3 a.m. and 7.30 a.m. At Logie Coldstone (Aberdeen) it was the coldest August since 1878. At Ailington Court (Devon) the wettest August since 1912. Thunderstorms were frequent and very few places on the eastern side of England or the Midland counties were entirely free from them. Both Worksop (Notts) and Aldershot had 9 days on each of which thunder was heard. The most widespread thunderstorm in Scotland occurred on the afternoon of the 22nd.

The duration of bright sunshine was below the average in every district. The greatest deficiency was in the east of Scotland, and the least deficiency in the north of Scotland. The least sunny week of the month was that between the 24th and 30th, and the most sunny week that between the 31st and the 6th. Glenusey had a daily mean of 6.9 hours per day, the greatest on any one day being 14.2 hours on the 2nd. A waterspout was seen at Ventnor (Isle of Wight) about 10 a.m. on the 20th.

September was windy and very wet. Although not without some fine periods, unsettled weather with heavy rain at times prevailed throughout the greater part of the month. From the 2nd to the 6th conditions were fine and sunny in the northern parts of the British Isles, but in the south the weather was cloudy with rain on most days. On the 6th, consequent upon the approach of a depression from the Atlantic, conditions changed. Heavy rain was general from the 6th to the 8th. Thunderstorms occurred in many parts of England between the 7th and the 9th. From the 10th to the 19th winds were mostly south-westerly, and blew strongly at times, with frequent heavy rain. From the 19th bright sunshine alternated with heavy rain. As showing the general character of the month it may be stated that it was disastrous for the crops in Scotland. At Copdock (Suffolk) corn crops were damaged by persistent rain. At Isleworth the weather was most unfortunate for the fruit harvest, 30 to 40 per cent. of the crop being spoiled. Gales were general on the night 20-21. At Dublin it was of sufficient violence to cause much destruction of trees. At Southport in the early hours of the 21st a storm force of 65 miles per hour was recorded for two hours, and a gust of 87 miles per hour was recorded. A gust, also of 87 miles per hour was felt at Quilly (co. Clare) and gusts of 79 miles per hour occurred at Valencia, Holyhead and Fleetwood on the same date. The mean temperature of the month was below the normal in Scotland, Ireland and the Channel Isles, but above it in England. The deviation ranged from a deficiency of 1.2 in the

east of Scotland, to an excess of 1.3 in the east of England. The first week of the month was the warmest, during which the nights were warm, and in some cases the temperature did not fall below 55°. Rainfall was nearly everywhere above the normal, the only parts in which there was a deficiency being the eastern part of Kent and Sussex. Over three small areas in Scotland, a large area in the southern part of England and Wales and the south-eastern part of Ireland the amount exceeded twice the normal. Among the daily falls exceeding 2 ins was 2.95 ins at Dungeon Ghyll (Cumberland) on the 16th. A fall of 2.09 at Selsey Bill on the 25th was the heaviest fall since January 1908. A total of 4.65 ins at Telfnsmouth was a record for that town in September. There were serious floods in the northern part

of Scotland on the 9th. At Forglie Castle (Banffshire) the River Deveron rose to within 4 inches of the level in the historic "Moray floods" of August 1829. Snow fell on many of the higher Scottish mountains on the 9th and 10th. Thunderstorms occurred over considerable areas on the 17th and 23rd. During a thunderstorm in the early morning of the 8th, accompanied by high wind, some oak trees in the neighbourhood of Tunbridge Wells had their tops completely twisted off by the force of the wind. With the exception of Scotland north and east the amount of sunshine was below the normal. In Scotland there was more sunshine in September than during August. There was 13 hours sunshine at Caithness on the 4th and nearly the same amount at Lerwick (Shetlands) on the following day.

Storms and Floods in 1923-24.

(1923) October 3. Hurricane over Nova Scotia and Newfoundland, 7 lives lost and 250,000 barrels of apples destroyed. Great storm in English Channel, several small ships lost. 16 Dam burst in Oklahoma City owing to swollen river, 25,000 persons rendered homeless. 19 Gale in the North Atlantic, 14 persons injured owing to lurching of R M S *Aquitania*. 24-25. Panama Canal closed owing to floods.

November 4. Hurricane in Denmark, many shipwrecks and much damage in Schleswig. 14 Floods in Rhone Valley owing to 4 days' rain. 18 Floods hold up Madras-Calcutta mail. 20 Typhoon in Philippines, Manila under water. 27 Floods in Seville. 29 Railway line north of Aswan (Egypt) flooded.

December 1. Dam at Lake Gleno (Italy) burst owing to heavy rains, several hundred lives lost, much material damage. 6 Many floods in Italy owing to fortnight's incessant rain. 25 Storm in Denmark, trains stopped in snowdrifts, many vessels driven ashore. A violent hailstorm at Pretoria, many hailstones weighed over 1 lb, much damage to property. 27 River Seine in flood and rising rapidly. Avalanches in Switzerland and Alps owing to exceptional gale and snowfall. Traffic dislocated and widespread damage.

(1924) January 1. Danzig suffering from severest snowstorm since 1888. 6 Some floods at their height in Paris. 9 Severe storm at Biarritz, thousands of pounds' worth of damage done to new baths. 22 60 mile an hour blizzard in New York with 14 inches of snow, roads impassable and trains delayed. 29 Gale off Froien, Norway, when a number of fishing smacks were lost. 31 Heavy gales in North Atlantic, liners delayed.

February. Unprecedented storm at Gibraltar, rock covered with hail for the first time in 50 years. 6 Blizzard in the middle West States of U.S., about £200,000 damage.

March 11. Bad storm with 80 mile per hour gale on Atlantic seaboard of U.S. Liners delayed and 3 people killed. 16 A train was struck by a cyclone when crossing a bridge near Bareilly, United Provinces, India. A large number of deaths reported. 29-30 Severe storm over wide area of United States. Damage to property \$10,000,000, several deaths reported. 30 A bridge over the Guadalquivir at La Algaba near Seville collapsed owing to floods, and more than

20 people drowned. 31 Floods in Poland caused widespread damage.

April 1. During a blinding snowstorm in New York two trains collided and 13 deaths resulted. 14 Upper part of structure of an old Flemish Belfry near Dunkirk blown away in a violent snowstorm. 25 Tornado at Rihaim Oudh killed 46 persons and did much damage. 30 106 killed and 400 injured in tornadoes which swept over the south-eastern United States, damage amounted to several million dollars.

May 12. Worst floods for 50 years in Virginia. 27 Many deaths caused by wind storm in Southern States of U.S.

June 9. Hurricane in Dusseldorf, several deaths and much damage done. 13-15 Cloud-bursts in Tennessee, about 50 persons killed in resulting floods.

July 10. Lorain, Ohio wrecked by tornado, 300 deaths and about £2,500,000 damage. 17 Severe floods in Tientsin, China, 10,000 square miles flooded. 22 In the afternoon a terrific thunderstorm, accompanied by wind, rain and hail, swept suddenly over Switzerland. 23 Extensive damage and bridges destroyed in floods in Southern India, many deaths reported. 29 Floods in Southern India still rising. Awful devastation reported from Travancore and Malabar, where hundreds of houses have collapsed and thousands of people are starving.

August 6. Exceptionally violent thunderstorm broke over Constantinople. 7 Violent thunderstorm at Dijon (France) caused considerable damage in the district of Valgiers in the Ardennes. 26 The *Arabic*, bound from Hamburg to New York, ran into a hurricane and injured 24 of her passengers. 28. In a hurricane which swept across the Leeward and Virgin Islands 80 persons were reported killed and several hundreds rendered homeless.

September 4. The French fishing schooner *Raymond* was wrecked in a hurricane at Miquelon, 24 out of a crew of 35 were drowned. 6 Typhoon at the port of Talhokn (Formosa) caused enormous damage, 18 people were killed, 300 seriously injured, over 3,000 houses destroyed. 10 Severe storm swept over Denmark. 24 Much damage was done in Switzerland, and particularly in the Canton of Ticino, by a violent storm accompanied by torrential rain. 30. Severe storm swept over the seaboard of the Eastern States of America. Floods and high winds caused considerable damage.

BRITISH ASSOCIATION—The ninety-second annual meeting of the British Association for the Advancement of Science was held at Toronto, Ontario, on August 6-13. Sir David Bruce, who succeeded Sir Ernest Rutherford as President, dwelt in his address on "The Prevention of Disease." He emphasised the importance of preventive work in its bearings on human happiness and efficiency, and gave an account of the three principal classes of diseases, namely, infectious diseases, diseases due to deficiency of diet or insufficiency of light and air, and diseases due to the action of the ductless glands, and described the methods employed in their prevention. As an illustration of the importance of preventive work, he quoted a statement of the British Minister of Health that 20,000,000 weeks of work were lost every year through sickness among insured workers in England, which meant that the equivalent of the work performed by 375,000 people during the whole year was lost to the nation. The direct loss in England and Wales from sickness and disability amounted to £750,000,000 annually. In reference to diseases caused by a defect or excess of secretion in the ductless glands, the President said that the best known of the ductless glands was the thyroid, an active principle of which had recently been shown to be iodine. Minute doses of iodine had been successful in preventing goitre. A few generations hence, goitre and cretinism would be eliminated in every civilised nation. During the comparatively few years that had passed since the Association first met in Canada enormous advances had been made in the prevention of disease. "But let there be no mistake," he concluded, "much has been done, but much more remains to be done. Mankind is still groaning and travelling under a grievous burden and weight of pain, sickness, and disease."

The following were the Presidents of the various sections.—A, Mathematics and Physics, Sir William Bragg; B, Chemistry, Sir Robert Robinson; C, Geology, Prof. W. W. Watts; D, Zoology, Prof. G. Elliot Smith; E, Geography, Prof. J. W. Gregory; F, Economic Science and Statistics, Sir William Ashley; G, Engineering, Prof. G. W. O. Howe; H, Anthropology, Dr. F. C. Shrubsole; I, Physiology, Dr. H. H. Dale; J, Psychology, Prof. W. McDougall; K, Botany, Prof. V. H. Blackman; L, Educational Science, Principal Ernest Barker; M, Agriculture, Sir John Russell. The Meeting in 1925 will be held at Southampton, under the Presidency of Prof. Horace Lamb, and in 1926 at Oxford.

ÆGEAN POTTERY DECORATION—Mr. S. Casson has discussed in *Man* the origin of the compass-drawn concentric circle and semicircle, one of the earliest decorations in the geometric period of Ægean pottery. He has figured vases from Gosing, on the Danube near Wagram, and Sommerau in Lower Austria, and cited other examples, belonging to the earliest Hallstatt culture, which have this design engraved on them. Mr. Casson suggests that these designs may have come down to the Hallstatt potters from the earliest culture of the copper and salt miners of the Salzammergut. The connexion between the Danube and the Ægean in the Iron Age (as well as in the Bronze Age) is clear. When the Hallstatt culture of the north came in touch with the culture of the Macedonian plain, fine wares replaced the crude Danubian vessels, but the designs and some elements of

the shapes survived. The earliest probable date for geometric ware in Greece proper is about 1000-900 B.C., whereas the Hallstatt A period is fixed at about 1100-900 B.C. Therefore the Gosing and other examples would antedate the Ægean, and would suggest a Danubian origin for this persistent design.

ANCIENT MAN IN CALIFORNIA—Dr. John C. Merriam has contributed to *Science* a survey of the investigations, lasting over twenty-five years, carried out by the University of California into the antiquity of man. He points out that the Californian coast region has been in almost constant movement during the later geological periods, and it thus affords a continuous record of the processes of erosion and deposition. The life of the region during these times. The shell-mounds were examined from the deposits of known culture to those of the earliest times. Cave deposits were explored. Pleistocene and recent land, stream, lake and marine deposits in which human remains are likely to be found were studied. The evidence relating to the occurrence of human remains of implements in gold-bearing gravels or other ancient deposits was reviewed. All human remains discovered belong to the type which has been recognised as "modern" and none to a geological formation older than the Recent period.

APPE FARM IN FRENCH GUINEA—The Pasteur Institute has set up, on a large, well-watered, woody and fertile tract of land on the Island of Los, near Konakri, in French Guinea, a "farm" for the breeding and preservation of apes and monkeys required for medical experimental purposes. It is situated near a forest inhabited by chimpanzees and several species of monkeys. The necessary outbuildings include accommodation for sick animals. The *Tropical Diseases Bulletin* remarks that chimpanzees are the "most suitable of our relatives for pathological study." They are also capable of affording material for experimental psychology. The baboons are far less easily managed, but very intelligent. There are many human diseases, including measles, scarlatina, typhus, yellow fever, and influenza, which cannot be transmitted to ordinary experimental animals such as rabbits and guinea pigs. The study of these must be abandoned altogether unless the "nearest relatives" of man can be utilized.

AUTOMATIC SUB-STATION ON THE TUBES—At Burnt Oak, on the extension of the London Electric Railway from Hendon to Edgware, a completely equipped automatic sub-station has been established, the first of its kind to be used for traction purposes. The sub-station gets a 10,500-volt three-phase supply from the Lots Road Generating Station at Chelsea, the frequency being 33½. To start a rotary converter at Burnt Oak, it is only necessary to close a switch at Golden's Green, all the subsequent operations being automatic. When the load is too heavy the circuit breaker opens and a resistance is inserted in the machine circuit and the rotary is disconnected from the supply mains. After a short interval the circuit breaker closes again and connexion is re-made. If the fault has been cleared, normal operation is resumed, but if not, the same sequence of operations happens again. If this happens a fixed number of times, the breaker is automatically locked and an engineer must be sent to investigate the fault.

BIRD LIFE IN BELGIUM—An international experimental station for the protection of birds has been established in Belgium. It has the treble purpose of serving as a wild bird reserve, a zoological garden, and a museum. The station consists of a large mansion, set in the midst of park land containing avenues, undergrowth thickets, and sheets of water here and there. Birds on the verge of extinction, or foreign birds which it is thought desirable to acclimatize, will be accommodated in the zoological garden. Flight aviaries enable the birds to live in as natural a manner as possible. In the museum portion of the institution will be found a collection of materials from all countries illustrating the various methods employed for the protection of birds.

BIRDS AT GREAT ALTITUDES—Members of the Mount Everest expedition last year encountered many birds and fishes at great heights which had previously been impossible of sustaining life. Herds of the bharal, a species of Himalayan wild sheep, were found to ascend the mountains to the farthest limits of vegetable growth, frequently reaching 17,000 ft. Many marsh birds were found as high as marshes exist. The barhead goose and the ruddy sheldrake were collected in flocks on the Tibetan swamps at an altitude of 14,000 ft.; snipe were flushed from an upland pool at a height of 15,000 ft. Birds of the mountain stream were found to send representatives as high as streams exist. The dipper, which inhabits every Himalayan torrent, follows up stream almost to the junction of stream and glacier—perhaps to an altitude of 16,000 ft. The redstart ascends even further, and has been seen as high as 18,000 ft. on ice near the foot of Everest. Other birds ascend to even greater altitudes, but they are mere casual visitors. The lammergeier frequently soars around the flank of a mountain at over 20,000 ft. Choughs were seen flocking round the summit of a peak at almost 24,000 ft.; these same birds followed the climbers in their ascent to the immense height of 27,000 ft. At a height of 15,000 ft. mayflies were found near the edge of a pool, and mosquitoes sheltering beneath the stones.

BRICKWORK DAMAGED BY MOLLUSCA—The interesting fact has been disclosed by Dr. Annandale that the Pholad, *Martrona luminaria*, is the cause of certain damage to the brickwork at Calcutta. The entrance to one of the dry docks at Calcutta. The molluscs had only been able to attack those parts of the wall at which the glaze on the bricks had been worn away or abraded, and had fortunately all been killed off after penetrating to a depth of about half an inch. Dr. Annandale believes that these molluscs would ultimately have destroyed all the brickwork, and that the larvae were assisted in getting a hold in the first place by the inequalities produced on the surface of the bricks by the falling out of small pieces of under incorporated in their substance, thereby exposing a small unglazed area. The burrows made by the borers were rapidly inhabited by other lamellibranchs, for which they formed suitable shelter, the presence of the latter helping in the destruction already started by the Pholad.

BROADCASTING THE SOUNDS OF A BEETLE—The sounds produced by the Dor beetle, an insect less than half an inch in length were for the first time successfully broadcast from the

London Station in August. The sounds were audible to listeners-in throughout the British Isles. The insect played its part by producing close to the microphone the grating noises or stridulations by which it communicates with its fellows. The sounds when broadcast were louder than those produced when the insect was held close to the ear. Special arrangements for the transmission were made, and two microphones were employed. The lecturer on the habits of the beetle spoke into one of the great studio microphones. The beetle "spoke" from the control-room into a small microphone specially designed for the purpose. At the desired moment this microphone was switched into circuit, and the beetle, prompted, began transmitting. The sounds, were simultaneously broadcast on nine or more different wavelengths. Immediately after the transmission reports came in from every part of the country telling of successful reception.

CANADA'S WATER POWER—The water power resources of Canada were described by Mr. J. B. Chellis, Director of Water Power and Reclamation Service, at the British Association meeting at Toronto. The modern water power industry of the Dominion began about 1895, and has shown a steady growth which promises to be even more rapid in the future. The total water power throughout the Dominion is estimated at over 18,000,000 horse power, of which 3,227,414 horse power is now developed, and 750,000 additional horse power is under construction. The capital invested in water power development, transmission and distribution has grown from \$121,000,000 in 1910 to \$688,000,000 in 1923. The greater part of the undeveloped water powers of Canada belong to the Crown, either in the right of the Dominion, as in Alberta, Saskatchewan, Manitoba, and the Territories, or in that of the Provincial Governments as in the other provinces.

COLOUR-BLINDNESS TESTS—Professor H. E. Roaf has described a new method for the investigation of colour-blindness. It consists in finding the wave length of light by which a colour-match given by a colour blind person appears also to match for one of normal vision. It is evident when this has been found that the region of the spectrum in which the defect lies must also have been removed. The problem therefore is one of cutting off different regions of the spectrum, and finding the wave-length limits of the smallest decrease in the spectrum for which the original and the comparison colour match to a normal person. In 28 cases it was found that the defect is always in the red end of the spectrum.

COPPER ESKIMO—Mr. Jenness, in the course of a further study of the Copper Eskimo, based on material gathered during the Canadian Arctic Expedition, 1913-18, concludes that there is strong support for the view that Indian admixture in Alaska has increased the stature and produced a marked tendency towards brachycephaly, and that, while the Copper Eskimo show more resemblance to the Eastern Eskimo than to the Alaskan, they differ from most other Eskimo in that the head is slightly longer and broader, although the cephalic index is virtually the same as among the pure-blooded tribes to the eastward. Mr. Jenness finds no evidence in support of Dr. Stefansson's theory of European admixture among the Copper Eskimo. Of the

features principally relied on by Dr. Stefaansson, he holds that the proportion of face breadth to head breadth is illusory, and the blue or grey tinge of the eye is pathological in origin and common elsewhere.

EARTHQUAKE PROOF BUILDINGS.—Mr. W. H. Thorpe has discussed in *Engineering* proposals for reducing the damage to a building subject to earthquake shock. He suggests that the building should be supported in such a manner that it does not of necessity move as the earth moves. In regard to horizontal movements this may be secured by suspending the building by tension rods from stable steel frames, or, in the case of light structures, from flexible steel uprights, or by supporting the structure on balls of cast-iron, steel, or granite. Mr. Thorpe says that an office building 160 ft. by 80 ft. by 60 ft. high, might be carried by a steel platform suspended at twelve points. The total weight would be about 5,400 tons, and the suspension rods would be about 20 ft. long and attached to the top of wide-based towers housed within the building. The towers would be well founded, and these would be the only part of the structure required to move with the earth movement. The increase in cost would be about 20 per cent over that of an ordinary building.

EARTHQUAKE WAVES THROUGH THE EARTH.—Mr. Rokuro Yamamoto has developed the mathematical theory of the passage of earthquake waves through the interior of the earth, and then refraction in passing from one layer to another of different density. There is nothing to show, he says, that there is a sudden discontinuity in the density at a certain depth, such as was deduced by Wiechert, who assumed a central nucleus of iron, with a surface layer of lower density. No mathematical treatment applied to the available observations shows that good agreement is obtained by assuming a gradual alteration of density with depth, and a calculation of the time of propagation of the Japanese earthquake of September 1923 to Paris, made on this basis, gives very good agreement with observation. It was shown in 1887 that the theory of density distribution then held was difficult to reconcile with the phenomena of precession and nutation, and Veronet in 1912 showed that a continuous variation in density accounts for astronomical and geological observations.

ELECTRICITY FROM THE AIR.—At Pabna, a remote village in Bengal, a successful beginning has been made in the extraction of commercial electricity from the atmosphere. The preliminary experiments were made with large paper and linen kites, wound with a network of copper wires connected to tufts of pointed wires, and communicating with the ground by means of silk-covered copper wire. It was found necessary later to replace the copper wire by silver, owing to the rapid oxidation of the copper surface and the formation of a non-conducting film. The kites rose to 800 or 900 feet, when sparks were drawn at short intervals from an insulated rod attached to the lower end of the metal kite-string. The sparks varied in length with the condition of the atmosphere, but were always obtainable, day and night, in good and bad weather. The intermittent sparks were made to yield a continuous alternating current by means of a special transformer device. The results were encouraging enough to lead to develop-

ment on a larger scale, in which the kites are now replaced by aluminium balloons fitted with hydrogen gas, and floating at a height of 1,000 feet. On their outer surfaces there is a network of thin pointed silver rods attached to the metal cable and conductor.

ELECTRIC PASSENGER LIFTS.—In a paper on electric passenger lifts, read by Mr. Mariyat to the Institute of Electrical Engineers, he pointed out that on the whole electric lifts are more economical and convenient than hydraulic lifts. In modern buildings the impulse of the electric lift is so great that the staircase becomes little more than an emergency fire escape. In London offices the records show that the "rush" hour is from 12 till 1 o'clock, and that 30 seconds represents the limit of the patience of the average City man when waiting for a lift. It was found by elaborate tests that the unpleasant physical sensations experienced by the passengers were due mainly to sharp change of acceleration, the result of imperfect control. By a careful correction of the acceleration curve, it was found possible to accelerate to a maximum speed of 600 feet per minute in 48 inches without discomfort to the passengers. The average speed of the lifts of the London Electric Railways is only 180 feet per minute. Express lifts, however well run, compare unfavourably with an escalator service at tube stations, the depths of which are 60 feet or more. There is no lift running at more than 400 feet per minute in Great Britain. Mr. Mariyat advocates lifts for speeds of 600 feet per minute, which is quite feasible.

EOTVOS TORSION BALANCE.—The Eotvos Torsion Balance is an instrument of foreign invention, designed to detect the presence beneath the earth's crust of minerals, oil, water, or other valuable deposits. It is operated solely by the force of gravity. The balance consists essentially of a beam suspended by a delicate wire a little more than one thousandth of an inch in diameter. To each end of the beam a gold weight is attached, but one is carried on the beam itself while the other is suspended by a fine wire two feet long, and is therefore nearer to the centre of the earth. Though both are equal the lower weight is acted on by a slightly greater force than the upper one. The presence underground of any material having a greater or less density than the normal soil affects the perfect balance of the beam and causes a twist or torsion of the filament suspending it. This is magnified by a mirror carried on the filament, which reflects a spot of light on to a scale, and thus the slightest disturbance in the delicate balance is rendered apparent to the observer. The vital parts of the instrument are enclosed in triple-walled brass cases in order to protect them from temperature and electrical disturbances. Problems arising from the sun's radiations are overcome by using the instrument only at night. While the instrument can detect a deposit of salt, it is also sensitive to a hole or an underground cave. A tomb such as Tutankhamen's would afford a clear indication that the subsoil was not uniformly solid ground.

FARNE ISLANDS SANCTUARY.—Farne Islands, off the Northumbrian coast, have been handed over to the National Trust for preservation as a bird sanctuary. The islands number fifteen, and have an area of eighty acres. The regular breeding population includes gulls of three species, terns of four, auks of three, cormorants

of two, waders of two, and one species of duck. The islands form one of the most southerly stations in the breeding range of the elder duck. The most interesting species, perhaps, is that of the roseate tern, now found in only a few British localities. As a breeding-place for sea fowl the Farne Islands, in fact, have no equal round the British coasts, and even the great bird stations among the Scottish Isles lack one or two of the species represented here.

FATIGUE IN METALS—Professor Jasper and Professor Moore, of the University of Illinois, have continued their researches into the fatigue of metals. They find, on re-testing wrought specimens of iron and steel which have been subjected to many millions of stress alternations without failure, that their endurance has been increased. The strengthening effect was greatest in steel which had been hardened by cold-working. The static strength is also increased. Alternating stress above the endurance limit weakens the metal, although the bad effect may be partly removed by polishing. Reversed axial stresses give an endurance limit which is only about 64 per cent. of that found by alternating bending tests. The authors take the view that fatigue failures do not take place by slip, but by the tearing apart of minute portions of crystals and spreading of the fissures so formed.

FOSSIL MAN IN CHINA—Father Lacent, who has spent a considerable period in exploring the fossiliferous deposits of Northern China, and Father Teilhard de Chardin, made an important discovery of human remains at a depth of sixty metres in a river deposit in Northern Kansu, through which the river Shara Osso Goh has cut a deep gorge. There seems to be evidence of six individuals, including one well-fossilised skull with retreating forehead and large orbits. No lower jaw was found. With the human remains there occur numerous bones of rhinoceros, horse, bison, camel, deer, elephant, and other mammals. One horse was found to be no larger than a collie dog. At least ten well-preserved skulls of rhinoceros were obtained, they closely resemble the skull of the ordinary woolly rhinoceros. With the human and other remains there were numerous small rude implements of quartzite.

GOLD FROM MERCURY—Professor Miethe and Dr H. Stammreich, two German scientists, have, it is announced, produced gold by artificial means. While making special experiments they were struck by the unusual behaviour of a mercury vapour lamp which would become prematurely "aged," its inside walls being covered by a black deposit which reduced its illuminating power. The maker of the lamp was unable to account for the phenomenon, or to ascertain by chemical analysis the composition of a certain residue left by the mercury coating. Thereupon Professor Miethe and Dr Stammreich conducted another series of experiments, the invariable result of each of which was that the presence of minute though perfectly measurable quantities of pure gold could be found in the residue though the original mercury had not contained the smallest trace of it. The quantities of artificial gold so far obtained have been very small, and the cost has been far more expensive than the natural metal.

GYPSY BURIAL CUSTOMS—In the *Journal of the Gypsy Lore Society*, Mr T. W. Thompson gives a long account of the customs observed at

the burials of English gypsies. In fear of pollution it is very unusual for a gypsy to take part in laying out a dead body. Any food in a tent where a death has taken place is buried. Until the actual burial a fast is always observed, and, with the Boswells, this takes the form of a red-meat taboo. The coffin is made large enough to hold a great part of the dead man's personal possessions, and anything not so included is burned. Among the objects usually placed in the coffin are the clothes, watch and other jewellery, a knife, fork, and plate, a hammer, and sometimes grain and bread, the latter a potent influence against evil. The clothes are turned inside out. Some gypsies place a tuft of grass or a sod of turf on the breast and in Scotland at one time a knot of red and blue ribbons was used. Annual gatherings at the grave were in some cases made the occasion of offerings, such as beer, poured on the soil, tobacco, sugar and even, in one instance, a Christmas pudding.

GYPSY IMMIGRATIONS—Dr J. Sampson, in a paper on the gypsy problem, points out that the separation between the western and eastern groups of the gypsy language took place in Persia, when the gypsies entered from India before 600 A.D. It appears from a study of loan words in their vocabularies that after a stay of some duration in Persia one group, called the "Ben" group on phonetic grounds, travelled south into Syria, becoming the ancestors of the Nawar of Palestine, the Kurhat of Syria, the Karati of modern Persia and Transcaucasia, and the Helebi of Egypt. The other, the "Phen" group, after settling for a time in Armenia, migrated westward through Kurdistan and Byantine Greece, and reached the Peloponnese before the end of the eleventh century, whence, about the middle of the fifteenth century, they overran Europe.

ICEBERGS OFF NEWFOUNDLAND—The origin and distribution of ice in the vicinity of the Newfoundland Banks, is discussed in the *Marine Observer*. "Field-ice," the name given to Arctic pack-ice, causes the greatest obstruction on Atlantic routes from early in February till May, when it may be found between the south coast of Newfoundland and the forty-third parallel, and between the forty-fifth meridian and the coast of Nova Scotia. Off the east coast of Newfoundland, field-ice may be met late in summer, but rarely south of Newfoundland after the early part of May. Winter conditions in the Gulf of St. Lawrence and towards the close of April, and the pack-ice moving out of the Gulf often causes a block in Cabot Strait which may last three weeks. At the Tail of the Bank the cold Labrador current which hugs the bergs, impinges on the northern edge of the Gulf Stream, and at times is split into an east and west branch. The stronger branch determines the course of the bergs. After passing the Tail of the Bank, beyond the region of contact with the cold current, the Gulf Stream swings sharply to the north and north-west.

INSECT LIFE IN THE DESERT—In the course of investigations in Palestine on the relations of temperature and moisture to animal life in the desert Mr P. A. Buxton found that the soil surface often reached 60 degrees C. at midday, and that certain insects were active upon it. Their body temperature was lower, owing probably to loss of water during respiration. It was noted that the black form of a dimorphic grasshopper had a body temperature 4-5 degrees higher than the

buff form, when exposed to the sun. It appeared that the desiccated fragments of the annual vegetation are hygroscopic that they take up a considerable proportion of water from the moist night air and hold it for several hours after the sun has risen. Mr. Buxton believes that this property of the dried pieces of grass and herbage is one of the foundations which support all animal life in deserts during summer. These fragments, with the moisture absorbed over night, are eaten by certain insects which in turn become a source not only of food but also of water, for the birds, lizards, predaceous insects, and other carnivorous animals.

INHABITANTS OF GREAT LAKE REGION.—Canon Roscoe, in the course of the Fraser Lecture at Cambridge, reviewed the evidence for racial immigration into the Great Lake Region of Central Africa, and expressed the view that at least three races had occupied that area. The earliest inhabitants, a race of considerable intelligence, left behind them megalithic monuments, built up of boulders to represent a great figure four times the height of a man, stone implements, and traces of buildings with stone enclosures. There are also holes of considerable depth which are held to be the remains of iron-stone workings. Their knowledge of stone working far surpassed that of the people whom the first European travellers found in the country. They were followed by an agricultural negro people, whose descendants inhabit the land to-day. The most primitive are found on the ridges of Ruwenzori and Elgon, and live in family groups without common ruler or chief. The later pastoral tribes, the Baganda, Banyankole and Bakitara entered the country from the north or north-west and assumed the lordship of the agricultural peoples. Among the Baganda the fusion of pastoral and agricultural is now complete.

IODINE FROM SEAWEED—A paper dealing with the carbonization of seaweed as a preliminary to the extraction of iodine and potassium salts has been issued by the Fuel Research Board. The old method of kelp-burning is very inefficient. The paper describes investigations along the lines suggested by Stanford, and an endeavour has been made to provide data which will be useful in devising a method of carbonization of the weed in which there would be no loss of iodine and in which the gaseous products could be used for firing the retorts. A detailed description of the types of weed utilised, principally *Laminaria*, which contains about 0.5 per cent. of iodine, and of experiments on carbonization, carried out on a small manufacturing scale, is given. During the nineteenth century the industry provided not a little employment, especially in the west of Scotland and in Ireland.

JAVA SEA FLOOR.—The researches of Mr. K. M. van Weel in the Java and South China Seas has filled a gap in our knowledge of the waters of the Malay Archipelago. In a long memoir he shows that the floor of the Java Sea slopes gently downwards from Sumatra towards the east, reaching a depth of not more than 100 metres to the west of the Macassar Strait. East of the 100 metres line the depth increases suddenly. A remarkable feature is a deep channel in Sunda Strait between Sumatra and Java. Mr. van Weel puts forward the theory that it represents the sunken valley of a large river, which existed in the time of a paleocene continent on the site of the Java and China seas.

KRISHNARAJA DAM—Work is steadily progressing on the Krishnaraja Dam, situated on the River Cauvery about nine miles on the upside of Seringapatam. It is intended to intercept a catchment of 4,100 square miles. The dam will be 124 feet in height above the river bed, and capable of storing up to the high-water mark 44,827,000 cubic feet of water above the high-level canal sluices. One-fourth of this huge quantity of water will be used for power generation, and the remainder for irrigation. When completed the reservoir will be the largest of its kind in India, and will be the second only to the famous dam at Assuan. The total length of the Krishnaraja Dam will be 8,600 feet, including the waste weir, and it will bring under submersion an area of 49.5 square miles. The estimated cost of the dam, the canals, and the connected works will be 50,000,000 rupees.

MARINE BIOLOGICAL LABORATORY.—The first laboratory for marine biological research near the equator has been opened at Batavia, which will be available for all naturalists desirous of studying marine life near the tropics. Five visiting naturalists can be accommodated at one time. The station consists of two main buildings, the laboratory facing the sea, and the aquarium being behind it. The water for the aquarium is brought in by lighters from the open sea and stored in underground reservoirs. It is kept circulating through the tanks at an even temperature by continuous pumping, the whole contents being renewed, if necessary, eleven times in twenty-four hours. Zoologists may study the river fauna of the Tji Ljung, the brackish life of the estuary, and the varied marine fauna of the Sea of Java, while the botanist has access to the East Indian beach and coast plants and to the botanical gardens at Buitenzorg.

MESOZOIC DINOSAURS—The American expedition to Mongolia, organised by Professor Osborn and led by Mr. R. C. Andrews, had a rare find in the Gobi Desert, about 300 miles south-east of Urga. Excavations there resulted in the discovery of 70 skulls and 12 complete skeletons of Mesozoic Dinosaurs. 14 fossil reptile eggs were also found, one of which contained the embryo of an unhatched Dinosaur. 5 eggs were in a nest close beside the skeleton of the parent reptile. The shells had been cracked, and gradually filled by fine wind-blown dust. Professor Osborn regards the skeletons as those of the ancestors of the fossil, horned reptiles of Montana. The Dinosaurs, he says, developed in the northern plains of the Old World, and thence crossed to America by way of Northern China.

METAL SPRAYING—At a meeting of the Institute of Metals Mr. T. H. Turner and Mr. W. E. Ballard gave a detailed description of the methods and advances made in metal spraying. The process consists of treating metals as if they were soot in a soot spray, and depositing them on any desired object in the form of a fine adherent dust. The spray is produced and projected by an instrument resembling a large automatic pistol, but the magazine is loaded with a reel of wire in place of cartridges, and the propulsive charge is composed of oxygen, hydrogen, and compressed air. As the wire reaches the muzzle it is converted into a cloud of tiny metallic particles, which, travelling at a very high speed, become molten on striking the target, and form a solid coating. In spite of the

great heat of the oxy-hydrogen flame used in vaporising the metal, the most delicate, as well as the most robust, materials are undamaged by the process. Designs may be sprayed on silk and cotton fabrics with brass and copper alloys. Even thin paper is not scorched, and the palm of the hand may be plated with pure metal without discomfort. A coating of non-corrosive metal can be applied to any structure, thus preserving it from the action of the weather or chemical fumes, and it is possible to spray a non-ferrous coat of tin, lead, or zinc on any object, and to preserve wood by spraying it with rustless iron.

METRIC SYSTEM IN RUSSIA—The metric system will be officially established into Russia on January 1, 1927. In the meantime it is gradually introduced, according as the public can be persuaded to employ it in the purchase and sale of articles of every day use. Since March, 1923, the manufacture, sale, and purchase of old weights and measures have been prohibited. Milk is retailed in litres, tea by metric weights and other goods according to the new system.

PAPUAN ROCK PAINTINGS—Dr Marsh Strong has published in *Man* a number of tracings and photographs of rock-paintings from the central district of Papua. The paintings were done by a preparation of iron oxide on a whitish rock, and the designs included the figure of a man, a man's face, a hand, a crescent, a double chevron, and a cassowary. The present natives have no knowledge of the artists. Dr Strong thinks that the face design suggests the face *motif* of the Papuan Gulf, but he insists that the centre of the cult is at a point 300 miles west of Port Moresby.

PEARL ORGANS IN GOLD FISH—An experimental study of the so-called pearl-organs of the gold-fish has been made by Mr T. Tozawa. These organs appear as small white conical warts, on the male only, on the operculum, or gill-cover, and on the dorsal, pectoral and anal fins. Mr Tozawa found that they increase in number and size until the fish is six years old, after which there is a decline. They appear during the breeding season from March to September, are most numerous in April, and are periodically shed and reformed at the same spots after an interval of from three to ten days. Their formation is due to a thickening of an area of epidermal cells, the result of hypertrophy, over which the pearl organ itself is formed by cornification of the superficial cells.

PLANTS TO RESIST PARASITES—Sir John Russell, in his presidential address to the Agricultural Section of the British Association, suggested the possibility of breeding plants capable of resisting the attacks of pests and parasites. The damage done by pests, he said, amounted in Great Britain to probably at least 20 per cent of the total value of the crops and entailed a loss of about £12,000,000 a year. If only plant breeders could alter existing plants or build up new ones well adapted to existing soil and climatic conditions, all agricultural land would become fertile and plant diseases would become ineffective. The study of soil micro-organisms had advanced considerably with the solution of the problem of the inoculation of leguminous crops, the control of organisms affecting decomposition and the process of partial sterilisation.

ROTSKOPE—The rotskope, which was shown at last year's exhibition in London of the Institute of Patentees, is a device to enable the eye to follow the details of any moving object, which, to the unaided vision, would appear indistinct on account of the motion. The mechanism employs a shutter which allows the eye to get a full view of the moving object and obscures it again in one five-thousandth of a second. Thus a cylinder, on which was pasted a white slip of paper with a word printed on it in bold type, was made to rotate at such a high speed as to appear motionless to the eye while nothing could be seen of paper or word. Through the rotskope the printed word could be seen moving slowly round with a jerky motion, thus showing that the cylinder was not running true. The value of the instrument is that when the part observed is given the appearance of being motionless the speed of the rotskope shutters bears a certain definite relation to the speed of the moving object. As the speed of the shutter is known, this automatically registers the observed speed, and speeds up to 40,000 revolutions per minute can be accurately registered. It is capable of showing the speed of a dragonfly's wings, of a 10,000-kilowatt generator, or the rotations of a gramophone record. It can be applied to fans, propellers, magnetos, sewing machines, dropping of water, and insect wing movements.

SEVERN BARRAGE SCHEME—The possibility of utilising the tidal power of the River Severn is revived once more by the inquiry placed by His Majesty's Government in the hands of a body of scientific experts. When the Ministry of Transport took up the matter five years ago it was suggested that the scheme of building a barrage across the Severn would provide over 500,000 horse-power over a ten-hour day at a cost of a little over a halfpenny a unit, supply power for the industrial centres of the West and South Wales and possibly for London, give employment for an army of men for seven years, save yearly between three and four million tons of coal, which would thus be available for export, create a new vast pool for shipping, and provide a road and railway across the Severn, thus bringing South Wales nearer to London and abolishing the long detour by Gloucester. The scheme embraces the construction of a great concrete dam or barrage across the Severn, with sluices and turbines; and an energy storage plant, with a high-level lake and tunnel, in combination with an immense pumping and turbine power house on the tidal part of the River Wye.

SILVER FROM PHOTOGRAPHIC WASTE—In the sensitisation of plates and films nitrate of silver is used, and in the process of developing and fixing the surplus silver is washed off by the hypo. An American inventor, by collecting the waste hypo in precipitating tanks, has found it possible to free the silver contents, and with the aid of furnaces to turn in into ingots of pure silver. About half the original silver nitrate used on a film or plate is brought off by the hypo in the form of metallic silver. At Los Angeles, the home of the film industry, it has been found possible to recover silver to the value of £2,000 a month.

SODIUM AND CALCIUM DUST—Mr. Plaskett, Director of the Canadian Astro-Physical Observatory, has announced, as the result of three years continuous investigations, that minute

particles of the metals sodium and calcium are scattered like fine dust through the realms of space. Mr. Plaskett says the spectroscopic pictures through a 72-inch reflector at the Observatory have shown outstanding lines of sodium and calcium which are gaseified in the vicinity of big stars, forming an all-pervailing atmosphere which is no part of the composition of the stars themselves.

SOUNDINGS BY SOUND—Dr. Harvey C. Hayes, a research physicist in the United States Navy, has described the methods recently employed for sounding the harbours and rivers of that country by means of an echo from the bottom. One plan is to determine the delay in the arrival at a point in the bow of a vessel and at a point between the bow and the stern, of the sound of the propeller reflected from the bottom. Another plan is to determine the interval between two short signals such that the echo of the first arrives at the sender at the instant that the second is emitted. Depth curves obtained by these means during the voyages of several American ships agree closely with those obtained by direct soundings. It is proposed to use the method in the harbours and rivers, and then explore the surrounding sea.

STONE IMPLEMENTS IN CORNWALL—In some respects the people of Cornwall are living in the Stone Age, as one may gather from the article by Mr. Morton Nance in the annual report of the Royal Cornwall Polytechnic Society. Flat stones with "jaws" knocked out one on each side are used by the fishermen for ballasting crabpots, and for mooring lines and fishtraps. Sometimes the stones are oval with a groove round the centre to take the rope fastening. Circular stones but of a larger size are used as killicks or anchors, sometimes in combination with a bar of iron twisted to form a ring and flukes, but more commonly the simple rope or twisted with fastening alone is used. The Cornish killicks illustrate some of the stages of the development of the anchor from the stone killick, which by the addition first of one or more wooden crooks, then of timbers to form a four-armed grapple, finally became the half-killick with two arms and a stone "stock," actually a stone and wood anchor, to which type the Cornish boat anchors belong.

SYDNEY HARBOUR BRIDGE CONTRACT—The New South Wales Government has accepted the tender of Messrs. Dorman, Long and Co., of Middlesbrough, England, for the construction of the Sydney Harbour Bridge, at the cost of £4,200,000. The design is that for an arch bridge whose principal opening is a single arch of 1,650 feet span with heavy decorative granite abutment towers. The total length of the arch and of the approach spans will be 3,770 feet, and the head room for vessels passing in or out of the harbour will be 170 feet at high water. The height to the top of the arch will be 450 feet. This will be far the largest arch bridge in the world, the nearest to it having a span of about 1,000 feet. It will also rank among the largest of any type of bridge, being exceeded only by the Forth and the Quebec cantilever bridges. The unusually heavy rail and roadway accommodation will necessitate a total width of 130 feet. The main span is, therefore, of extraordinarily massive dimensions, and it is believed that it will be the heaviest single span in the world. The bridge will be six years in building.

TATTOOING IN TUNIS—Dr. Gahert has contributed to *L'Anthropologie* an account of the tattoo designs of the natives of Tunisia, and their relation to other forms of decorative art. Tunisian tattooing, he finds, is magical in origin, being connected with the protective letting of blood, of which it preserves the record and influence. But this is forgotten by the people themselves, and the great importance attached to it now is based solely on its effect as a personal ornament. The designs are entirely rectilinear, as a result partly of the use of a kind of knife or lancet instead of a needle, but more particularly because of the native bent towards the rectilinear in all forms of decorative art. The principal elements in the designs are the date palm, the tortoise, generally on the external surface of the arm, and horns, which, being on the hand, serve as a protection against the evil eye. Outside tattooing, symbolic designs have only a restricted distribution, while the purely geometric designs are common to all forms of North African decorative art.

WALCHENSEE LAKE DIVING—A new diving apparatus, constructed by Messrs. Neufeld and Kuhnke, has been successfully tested to a much greater depth than has hitherto been possible. On July 21, 1924, on the Walchensee Lake, a diver went down to a depth of 450 feet. The greatest depth hitherto at which any work has been carried out is 210 feet. The diver reported that the apparatus was water-tight and that the moving joints worked satisfactorily. At this depth he could see about 18 inches, a further 60 feet resulting in total darkness. He was able to walk on the lake bottom without exertion.

WEATHER MAPS BY WIRELESS—Sir Napier Shaw, formerly Director of the Meteorological Office, while on his way across the Atlantic to attend the Meeting of the British Association at Toronto, discovered that from the deck of the *Caroma* it was possible by means of wireless to make a meteorological map of the northern hemisphere, this was the first time such a thing had been done on board ship at sea. It showed the possibility of getting information about the weather from both sides of the Atlantic, as well as from ships crossing the ocean, and until then he says, it is idle to talk of the causes of bad weather. In the absence of complete maps showing the weather experienced in Polar regions, it was impossible to ascertain the cause of wet weather.

WHITE INDIANS—Mr. Richard O. Marsh has issued a detailed account of the "white Indians" discovered in the district of Darien in Panama. The expedition, of which Mr. Marsh was leader, made friends with the Indians of the district by giving medical aid in an epidemic of small-pox. They were then induced by an offer of the assistance of the white man against the surrounding "negroid" tribes to end their feud with the "white Indians," who, it is said, were either killed or driven to the mountains at the time of the Spanish occupation in the sixteenth century, owing to the hatred of all white people which had been aroused by the cruelties of the Spaniards. Notwithstanding a ban on their marriage and an order that all their children should be killed, the type has survived ever since. As a result of Mr. Marsh's intervention, the "white Indians" have been re-admitted to full tribal rights. They have golden hair, blue eyes, white skins, and round skulls unlike the San Blas Indian type.

IN January an exhibition of Swedish art was held in the galleries of the Royal Academy at Burlington House. It was organised under the patronage of the Crown Prince of Sweden, by the members of the Anglo-Swedish Society of London, and was representative of the art of the country between 1880 and 1900. The exhibition was well received by English critics and attracted many visitors. It included sculpture as well as painting, and among the works in the last named section were the "Midsummer Dance," and some fine portraits by Anders Zorn, the most eminent of Swedish artists. The Swedish pictures formed only a part of the winter exhibition at the Royal Academy. At the same time with them, but in separate galleries, was held the exhibition of the Royal Society of Portrait Painters.

The number of works submitted to the Selection Committee for the Summer Exhibition at the Academy, which had been larger in 1923 than in 1922, showed a decrease of several hundreds in 1924. The committee by which they were judged was composed of the President, Sir Aston Webb, Mr. Clausen, Sir J. Lavery, Sir William Goscombe John, Sir E. L. Lutyens, Mr. Solomon, Mr. Greiffenhagen, Mr. Priestman, Mr. Dick, Sir J. J. Burnet, and Sir F. Short. About two thirds of the submitted works were rejected, and from the remainder—the accepted and the doubtful classes—the Hanging Committee chose those that figured in the exhibition with the pictures and sculpture contributed by members. The oils and water colours were arranged by Sir J. Lavery, Mr. Greiffenhagen, Mr. Solomon, Mr. Clausen, and Mr. Priestman, the miniatures and works in black and white by Sir Frank Short, the architecture by Sir E. L. Lutyens, and the sculpture by Sir W. G. John and Mr. Dick.

Picture sales at the Academy, though not equal to those of the pre-war years, were perhaps as good as could be expected, considering the condition of trade and the fact that fewer works are exhibited nowadays. The principal of those sold included "A River in France" (£500), and "Spring on Wimbledon Common" (£250), by Mr. Philip Connard, "The Resting Acrobats" (£500), by Mr. Glyn Philpot, "The Grey Horse" (£1,000), by Mr. A. J. Munnings, "The Hollow" (£265 10s.), by Mr. Arnesby Brown, "Leda" (£500), by Mr. W. G. de Glehn, "My Lady Nicotine" (£210), by Mr. Stanley Thompson, "Going out with the Cow in Provence" (£300), and "A Provencal Road" (£200), by Mr. H. H. La Thangue, "Cypress and Olive" (£200), by Mr. Adrian Stokes, "The Top of the Pass" (£350), by Mr. Sydney Lee, "The Corridor" (£250), by Mr. L. Campbell Taylor, "Early Winter" (£350), by Mr. Joseph Farquharson, "The Old Watergate" (£450), by Mr. Tom Mostyn, "The Damozel of the Lake" (£525), by Mr. F. Cadogan Cowper, "Quiet Evening, Honfleur" (£300), by Mr. Terriek Williams, "Winter's White Silence" (£420), by Miss Lucy Kemp-Welch, "Harvesters, Aragon" (£200), by Mr. W. Russell Flint, "This Girl with her Dreams" (£250), by Mr. W. Reynolds Stephens, and "This Little Pig went to Market-group, marble" (£750), by Mr. Herbert Hampton. The unpriiced works sold included pictures by Mr. Clausen, Mr. Oliver Hall, Mr. Arnesby Brown, Mr. A. Chevallier Taylor, Sir Luke Fildes, Sir A. S. Cope, Sir David Murray, Mr. H. S. Tuke, and Mr. Joseph Farquharson.

The Chantrey purchases, unusually numerous

this year, were as follows:—"New Risen Hope" (£250), by Mrs. A. L. Swynnerton; "The Princess Sadroulbador" (£500), by Mr. William Rothenstein; "Pastoral" (£450), by Mr. F. Cayley Robinson; "Among the Dolomites" (£450), by Mr. Sydney Lee; "Apollo and Marsyas" (£175), by Mr. Harry Morley; "A Smiling Woman" (£157 10s.), by Mr. Francis Dodd; "The Jockey's Dressing Room at Ascot" (£350), by Sir John Lavery; "The Infant Christ-bust, bronze" (£150), by Mr. Charles Wheeler, and "Ju-Jitsu-group, bronze" (£120), by Mr. Kellock Brown.

At the National Gallery the centenary of the opening of the institution in 1824 was celebrated by a reception by the Trustees at which a number of the pictures in the Angerstein collection, which formed the nucleus of the Gallery, were shown together in one room. Some of them had not been seen by the public for a great many years. Pictures were presented in connection with the centenary by Mr. Wagner and Mr. and Mrs. John Lane. In October the Sargent portraits of the Wertheimer family were temporarily removed from Room XXVI in order to display a selection of Italian paintings which formed part of the Mond bequest, one of the most valuable ever made to the National Gallery. These paintings were collected by Dr. Ludwig Mond, who bequeathed them to the nation subject to the life interest of Mrs. Mond, who died in 1923. The principal picture is an important early Raphael "The Crucifixion," and there are Italian works besides by Botticelli, Bellini, Crevelli, Boltraffio and others, and an interesting Titian of a late period. The Mond collection at the National Gallery includes besides, two Graeco-Roman portraits, a singular picture by Lucas Cranach, "Jealousy," and a "St. John the Baptist," by Murillo, which is interesting from its connection with Galushborough, to whom it once belonged.

French painting of the nineteenth century was seen to advantage at the National Gallery of British Art, in a fine collection of pictures lent by Mr. Burrell, of Glasgow, a collection that also contained some good work by modern Dutchmen, and a few old Masters. At the Victoria and Albert Museum a return was made to the pre-war practice of opening on certain evenings each week. Among the numerous additions to the Museum made during the year were a very rare panel of thirteenth century glass, presented jointly by the National Art Collections Fund and Sir Otto Beit, and a fine silver gilt Tudor cup from the Swathing collection. A large and representative collection of pictures by British and Colonial artists was shown at the exhibition at Wembley, and the retrospective group included good examples of Reynolds, Gainsborough, Romney, Raeburn, Hogarth and many others.

The art of Mr. Frank Brangwyn was illustrated with much fulness in an exhibition held at Queen's Gate, South Kensington, in the galleries built for his collection by the late George McCulloch, and lent for the exhibition by Mrs. Coutts Michie Messrs. Agnew, in addition to their usual spring exhibition of water colours, showed in June a remarkable collection of Old Masters, on behalf of Lord Haig's appeal for ex-service men. Another interesting exhibition held in the summer was that of Modern British art at the Goupil Gallery, the particular attraction of which was a group of paintings of various periods by Mr. Sargent. Exhibitions at

the Leicester Galleries included one of paintings by Gauguin, both European and Tahitian, and another of landscapes by Mr Algernon Talmage, A.R.A. At the Fine Art Society's Gallery were held the memorial exhibition of pictures by E. Reginald Frampton, and others of water-colours by Mr Talbot Kelly, etchings by Mr R. W. Allan, and sculpture by Ivan Mestrovic, the Serbian artist, of whose work a large collection was shown in the Victoria and Albert Museum in 1915. The New Forest Group of Painters held its first exhibition at the Mansard Gallery, and Messrs Lefevre showed a number of interesting sea-pieces by Boudin at their rooms in King Street.

Although numerous valuable pictures changed hands at Christie's and other auction rooms, there were no great sales during the season. The announcement of the approaching dispersal of the Duke of Westminster's collection raised anticipations, but only a certain number of the Duke's pictures came under the hammer, and none fetched very high prices. Nicolas Poussin's "Repose of the Holy Family" went for £6,510, and Vandyke's "Holy Family" for £3,150. One of the most important sales of the season at Christie's was of the late Lord Swathling's

collection of silver, which realized altogether about £90,000. One item, a Tudor cup of silver gilt, fetched £9,500. In the sale of the Benson collection of Chinese porcelain a pair of blue bottles, as sold for £6,720, and a gourd-shaped bottle for £3,625. High prices were paid for panels of tapestry, one of which was bid up to £3,150, and in the Mulliner collection of furniture a commode was sold for £3,625. The extremely high price of £2,457 10s was paid at Christie's for a print, an engraving by William Ward, after Hoppner's "Daughters of Sir Thomas Frankland." A portrait by Hoppner of Mrs. Phipps fetched £2,940, one by Reynolds, of Lady Mary Coke, sold by the Princess Royal, £5,040, and another by Raeburn, of Miss Read, £3,645. For a picture by Quentin Matsys £4,905 was given, and for a Sargent, "Hospital at Granada," bought for the Melbourne Gallery, £2,205. Other good prices realized for modern works were £1,522 for the late J. M. Swan's "Orpheus", £2,250 for Turner's "Lucerne from the Walls", £2,310 for Corot's "Rond des Nymphes", £1,942 10s for Birket Foster's "Greenwich, Sunset", £1,556 for the "Ulverstone Sands" of David Cox, and £2,730 for a flower-piece by Fantin Latoui.

The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Governments throughout the Empire has been regularised (a) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3, (b) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Colonial Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1921 an Imperial Conference of Teachers' Associations was held in Toronto; in 1924 another was held in London. An annual meeting of the Imperial Union of Teachers takes place each July. The League, through the liberality of the late Mr Louis Spitzel, has published a series of text-books

on the Empire, under the editorship of Professor A. F. Pollard (1) "The British Empire—Its Past, Its Present, and Its Future" (a book of reference), (2) "The British Empire and Its History" (for Secondary Schools), (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. With the co-operation of the Overseas and Home Education Authorities a Scheme for the interchange of Teachers throughout the Empire is now in active operation, over 400 interchange appointments have already been arranged. Visits to historical places in England and on the Continent are planned for overseas teachers. The School Affiliation and Comrades' Correspondence Sections were established in 1901-2. Other work undertaken are the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day.

During the War the League distributed from its depot over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and shields to all the overseas contingents who fought for the Empire.

Hon. Pres., H. R. H. The Duke of Connaught, K.G.
Acting Chairman, 1925, The Vice-Chancellor
London University, Dr. E. A. Gardner
Chairman, Executive Committee, M. J. Rendall,

The Old Bachelor*, Congreve's comedy (Messrs D. Hay Petrie, William J. Rea, Roy Byford and Esme Percy and Mesdames Isabel Jeans and Laura Cowie).

THE REPERTORY PLAYERS produced at the Regent on *Nov. 4, 1923. Havoc*, a war drama by Harry Wall (Messrs John Howell, Henry

Kendall and Richard Bird and Mesdames Norah Robinson and Ethel Griffies), at the New on Dec 9, *Bungo*, a comedy by John Kendall (Messrs Felix Aylmer and William Kershaw and Mesdames Olga Lindo and Nora Nicholson), at the Court on Jan 27, 1924, *Three Days*, a comedy by C E Openshaw (Messrs H G Stoker, Frank Voepel and Leo Carroll and Mesdames Irene Holmes-Kelly and Rita John), at the Aldwych on May 11, *A Marriage of Inconvenience*, a play by "Henry Lussac" (Messrs Henry Kendall, Algenon West and Foirester Harvey and Mesdames Isabel Jeans and Ethel Griffies), at the Strand on Sept 21, *It Doesn't Matter Which*, a farcical comedy by James Sabben (Messrs Eric Cowley and J W Austin and Mesdames Heleua Picard and Nadine March)

THE PLAY ACTORS produced at the Court on Nov 25, 1923, *Thirtiedown*, a play by George Woden (Messrs Lawrence Anderson, Fawcass Lewellyn and Campbell Gullan and Mesdames

Mary Merrall and Dorothy Hall), at the New on Jan 13, 1924, *The Stepmother*, by Githa Sowerby (Messrs Campbell Gullan, Hubert Harben and Tristan Rawson and Mesdames Jean Cadell and Gitzelda Hervey), at the Aldwych on March 23, *The Conquering Hero* (Messrs Nicholas Hannen, Reginald Dance and Claud Allister and Mesdames Florence Buckton and Joyce Kennedy), at the Aldwych on May 25, *Two Women and a Telephone*, one act play by Rica Bromley Taylor (Mesdames Sybil Thorndike and Irene Rooke) and *Wife to a Famous Man*, translated by Mr and Mrs Granville Barker from the Spanish of Martinez Siera (Messrs J Sebastian Smith, Milton Rosmer and H R Hignett and Mesdames Mary Clare and Florence Wood), at the Aldwych on Oct 26, *The Hayling Family* by Allan Monkhouse (Messrs Herbert Waring, John Wyse and Frederick Cooper and Mesdames Edyth Olive and Valerie Taylor)

The Year's Music.

OPERA—Seldom has London made so bold an attempt to carry on the traditions of opera as during the past year. Covent Garden, rising to the occasion, undertook a summer season of German and Italian opera, the British National Opera Company gave performances both at Covent Garden and at His Majesty's, and the Carl Rosa troupe occupied the Scala Theatre for some weeks, besides appearing in the suburbs. The Old Vic management endeavoured to instil into the artisan class a liking for lyric drama, "The Marriage of Figaro" having been creditably given. The students at the music-schools, as usual, faced criticism, but, in several instances, without suggesting that they had been taught aright. Nor were the voices of outstanding merit.

Covent Garden contributed satisfying performances of "Die Rosenkavalier," as well as of the unequal "Ariadne auf Naxos," in which Madame Marie Ivoigne greatly distinguished herself as Zerbinetta, her *coloratura* being wondrously neat. "Der Ring des Nibelungen" was included in the scheme, much to the joy of the "Wagnerites," who, attending in force, applauded frantically. The Italian part of the programme served to reintroduce "La Traviata," in which Madame Selma Kurz, though failing to sing with her former brilliancy, afforded an object-lesson in the necessary art of saving the voice. "Rigoletto" (now seventy-three years old) showed no signs of waning popularity, "La Bohème," "Madame Butterfly" and "La Tosca" drew enthusiastic audiences, "L'Heure Espagnole" had its admirers. "Don Giovanni," though promised (by the music critics), did not mature, to the intense disappointment of those who revere Mozart's splendid genius and endless fund of exquisite melody. Perhaps this year will prove kinder?

Mr Joseph Hislop, who was extremely fortunate in gaining the good word of the Press, proved disappointing to those who understand the niceties of singing, his work, in their view, lacking distinction and style. Much the same may be said of Mr Alfred Picaver, though it must be confessed that the volume and quality of his *tenore robusto* produce thrills. Madame Yvonne Gall, a dramatic soprano from Paris, justified her engagement, as also did Signor

Formichi. Indeed, the last named is an artist of the first rank.

The Carl Rosa efforts afforded much pleasure to those whom they were designed to please, and the British National Opera Company gained success in the same direction. The "Rosa" introduced Mr de Lara's somewhat uninteresting "The Three Musketeers," of which there are no fewer than five acts. As a sop to the classics, Beethoven's "Fidelio" was revived—with performers who depended upon voice rather than singing. Artistically the revival proved unsatisfying, though the audience lost no opportunity of showing its approval. By way of contrast, the British National Opera Company produced Dr Vaughan Williams' "Hugh the Drover," the plot of which hinges on a prize-fight between a cow-herd and a butcher, the hand of the village constable's daughter and a purse of twenty pounds being the stakes. It is difficult to prophesy anything even approaching immortality for this pugilistic work.

Sir Alexander Mackenzie also has paid attention to Opera, his "Eve of St John" having been produced by the enterprising British National Opera Company. The harmonic methods employed suggest Weber, whose music has not worn particularly well.

LONDON CONCERTS—As important as any have been the re-appearances of Signor Battistini, whose marvellous technical equipment, coupled with a voice which retains its freshness, delighted beyond measure the *cognoscenti*. The ease of his emission, the volume, the carrying-power, the carefully thought-out effects, the beautiful *legato*, the clearness of the runs, the smoothness of the turns, all were unforgettable. May he be spared for years to come that our ears may be enchanted. Chaliapine also re-appeared, singing certain music, which, in the opinion of many, was unworthy of his art, interpreting the Schubert "Ständchen" in a manner which struck one as being more original than correct, and failing to realise the vocal significance of the "Calumnia" air from "Il Barbiere." John Coates, on the other hand, at his very welcome Chelsea Town Hall recitals, rose to the heights, for his voice-management was a model to the student, while each interpretation

reached perfection. A thing apart is the art of Costes . . .

Amongst others who gave vocal and instrumental recitals are Miss Maggie Teyte, whose singing has gained weight, Miss Dusolina Giannini, an American mezzo-soprano of Italian extraction, who delighted all ears with the beauty of her voice, and Herr Emil Sauer, whose reading of Mendelssohn's "Rondo Capriccioso" was a lesson to many a pianist. Herr Josef Hoffmann again proved highly satisfying as a Chopin player, when he avoided excessive individualism. M. Solito de Solis displayed exceptional dexterity in all that he undertook; and M. Louis Vierne, the distinguished French organist, drew a large audience to Westminster Cathedral. Special mention should be made of Mr. Ingo Simon, for his singing is so intelligent and tasteful, and his voice so correctly used, that one feels he must have devoted many years to perfecting an art which is based on the rapidly vanishing *bel canto*. Incidentally, Mr. Simon's programmes are a joy to the listener who prefers music to the modern substitute. Madame Galli-Curci, coming up to expectations, also enchanted those who understand perfect singing.

Unlimited were the activities of the various musical societies, the usual proportion of novelties having been accorded a hearing. Few of these got beyond the customary *success d'estime*, their interest being limited. Fortunately, conductors brought forward music to which one always is glad to listen. True, there were malcontents who found fault with this choice, arguing that young British composers received scant encouragement. But why encourage mediocrity.

THE PROVINCES—Both in large and small towns innumerable concerts have taken place, at some of which more or less important works were given. At reconquite Cwmaman, for example, the "St. Matthew Passion" was successfully attempted. Derby has exploited oratorio, the Birmingham Festival Choral Society, in conjunction with the City Orchestra, performed "The Messiah," the rarely heard "Their Sound is Gone Out" and the bass solo "Thou Art Gone up on High" having been restored to the score.

The Bognor Bach Choir gave a concert which included a group of folk songs; the Bristol Philharmonic Society celebrated its twenty-fourth season; Mr. Hugh Fowler's Budleigh-Salterton Musical Society exploited unaccompanied part-songs and madrigals of the 16th and 17th centuries. At Chatham the Royal Marines Band showed its quality in compositions by Coleridge-Taylor, Rimsky-Korsakov, Tchaikovsky and Meyer Helmund, and greatly to the bandmaster's credit. The Royal Engineer's Band gave highly successful orchestral concerts.

The Bary County School Orchestra did well in Mozart's "Jupiter" symphony, Böellmann's "Symphonic Variations for Cello and Orchestra" and Mendelssohn's "Fingal's Cave" overture. The public schools also have made progress in the domain of music, especially Hailebury, the delightful "Arlésienne" suite of Bizet and the gay overture to "The Merry Wives of Windsor" having been added to the *répertoire*. The School Hall at Eton, by the way, rejoices in a new organ, the Musical Society's midsummer concert inaugurating it, while the orchestra was heard to good effect in Haydn, Wagner, and Grieg. Marlborough, which has ever been a musical school, maintained its high standard. Time was when Marlburians were satisfied with mid-Victorian ballads and similar things, but those unlighted days are long past, "a feast of reason and a flow of soul" having superseded them. Other schools, both major and minor, distinguished themselves.

Soloists and choirs, like the meistersingers of the middle ages, have competed with each other, and—so far as time and expression are concerned—with gratifying results. The emission of the voices, however, often left something to be desired, the tenors in particular suffering from "throatiness," a circumstance which suggests that capable teachers are as rare in the provinces as in London. This is all the more to be deplored when it is remembered how keen the performers are on music.

The past year has been unpleasantly notable for the activities of titled amateur singers, who, not content with drawing-room successes, must needs try conclusions with the paying public. They did not show to advantage.

THE WORLD'S LITERATURE.

BOOKS.—It is estimated that over 155,000 books, pamphlets and magazines are published annually in the various countries of the world, and that over 14,000,000 separate works have been published since printing was invented in the fifteenth century. The three largest libraries in the world are the *Bibliothèque Nationale*, Paris, which contains over 5,000,000 volumes, the *British Museum Library*, London, where there are 40 miles of shelves, and an estimated total of about 5,000,000 volumes, and the *Library of Congress*, Washington, D.C., which contains 2,000,000 volumes. A copy of every book published in Great Britain must be sent to the British Museum, London, the Bodleian, Oxford, the University Library, Cambridge, the Advocates' Library (Scottish National Library), Edinburgh, the

National Library of Wales, and the Library of Trinity College, Dublin, the Copyright Act, which gives Dublin this privilege, still remains in force, and there is a reciprocal provision in the Free State Act by which Free State publishers supply the British copyright libraries with copies of the works they publish. The five last-named "Copyright Libraries" collectively employ an agent to secure newly published books, the agent makes no selection in claiming. The "best selling" book in 1922 was *If Winter Comes* (A. S. M. Hutchinson), published in England by Hodder & Stoughton and in America by Little, Brown & Co., upwards of 175,000 copies of this novel were sold in the British Isles between the date of publication (August, 1921) and October, 1922.

Premiers, Principal Secretaries,

Premiers and Secretaries of State—The inability of George I to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1702 the office of Prime Minister was officially recognized. The first men-

tion of a King's Secretary of State is under Henry III. In 1423, owing to press of work in France, two Secretaries were appointed, and until 1794 two seems to have been the normal number. From 1688 to 1794 one of the two dealt with matters pertaining to the Northern States of Europe the other with matters pertaining to the Southern States, Home, Irish, and Colonial business. In

and other Officers of State.

901

1798 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business and in 1801

he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed, and in 1918 the Royal Air Force was constituted, with a Secretary of State as President of the Air Council.

LONDON TRAVEL STATISTICS.

Record totals of passengers carried in 1923 on the railways, omnibuses, and tramways connected with the London Underground group, and of car miles run, are issued from Electric Railway House, Westminster. The passengers carried numbered no less than 1,630,000,000, an increase of 288,000,000 over 1922. They were apportioned as follow:

Railways	306,000,000
Omnibuses	1,134,000,000
Tramways	190,000,000

The total number of car miles run was 27,000,000, or 27,000,000 miles more than in the previous year. The details are

Railways	69,000,000
Omnibuses	129,000,000
Trams	19,000,000

The journeys per head of the population upon the vehicles averaged 217, an increase of twenty-five over 1922. The reduction in fares at the commencement of 1923 reduced the average fare paid per passenger to 2d., a decrease of about 1/2d. over 1922. New rolling stock provided an additional 47,000 seats over 1922. The total number of seats now provided is 282,000, an increase of 86,000 over 1919.

THE GIRL GUIDES.

A movement, incorporated by Charter in 1915, founded by Sir Robert Baden-Powell in 1910, and incorporated by Royal Charter, 1923. *President* (since 1920), H. R. H. the Princess Mary (Viscountess Lascelles), *Chief Guide*, Lady Baden-Powell. The aim of the movement is to develop a better practical knowledge of housekeeping, mothercraft and citizenship in the girl of to-day. The method of training is to give the girls pursuits which appeal to them, such as games, recreative exercise and badge tests which lead them on to learn for themselves many useful crafts, training them in habits of observance, obedience and self-reliance, promoting their physical development, and inculcating loyalty and thoughtful ness for others. The movement is non-military, non-political, non class and interdenominational. Its desire is to co-operate with educational and other bodies working to the same end, and holding the same principles. The number of Girl Guides is approximately 400,000 in the British Empire, and the movement has spread to nearly every civilized country throughout the world, its total membership being approximately 600,000. *Imperial headquarters*, 25 Buckingham Palace Road, London, S. W. 1.

CENTENARIANS

In 1921 the deaths were recorded of 59 persons (22 males and 37 females) aged 100 years and upwards, in England and Wales. The ages recorded were—

Age	Males	Females	Total
100	9	16	25
101...	6	8	14
102	2	6	8
103	2	3	5
104	1	3	4
105	—	2	2
106	1	—	1
Total	21	38	59

LONDON FIRE BRIGADE CALLS.

	1923.	1922.
Number of calls	7,227	7,027
Fires (including serious outbreaks)	3,863	3,790
Serious outbreaks	33	42
Chimney fires	961	1,030
False alarms	1,871	1,788
Malicious false alarms	532	499
Lives lost (Males 19, females 52; in 1922, males 27, females 62)	71	89
Lives endangered (males 36, females 61)	97	68
Persons injured (males 329, females 115)	444	370
First aid rendered (males 138, females 63)	201	171

The estimated monetary fire loss within the County of London was £727,901. In response to requests for assistance the London Brigade attended seventeen fires outside the county area, at which the estimated loss was £1,529,288.

SUPER-TAX PAYERS, 1922-23.

INCOME	Number of	Total
Exceeding	Individuals	Income
£	£	£
2,000	19,756	44,729,621

50,000	278	16,865,005
75,000	127	10,776,263
100,000	137	26,671,371
Totals	84,589	497,741,225

Similar information for 1923-24 is not available, but it is not anticipated that the distribution for that year will differ materially from that for 1922-23.

The totals for 1921-22, when the whole of Ireland was included, were 89,062 individuals and £559,565,417. In 1922-23 the returns apply to Great Britain and Northern Ireland only.

LUNACY.

On Jan. 1, 1923, the number of notified insane persons under care in England and Wales was 126,279, an increase of 2,565 since Jan. 1, 1922. The relative percentage distribution of the sexes (males 43.8, females 56.2) shows a slight reversion towards the proportions which obtained immediately prior to the Great War (males 46.2, females 53.8). The average weekly cost of maintenance was—

In County Mental Hospitals	s. d.
In Borough " "	26 1
	29 6 1/2

Mental Deficiency.—On Jan. 1, 1923, the mentally defective patients under care numbered 15,786 (males 7,283; females 8,503).

IN the first half of the 17th century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the wagons in the vicinity of some of the coal-mines at Newcastle, and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails, and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nantpantane line. James Watt had conceived the idea of utilising steam for locomotion, and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line $9\frac{1}{2}$ miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of wagons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise."

Up to 1840, inclusive, 299 Acts, authorising the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature, but in the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorised, in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania."

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening, for returns of traffic to be made by the companies, as also of accidents involving personal injury, for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulations, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. The Cheap Trains Act, 1853, amended by the

Finance Act, 1921, provides that fares not exceeding the minimum fare shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. On all other fares a duty of 1 per cent is charged between stations within one urban district. Such district shall contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character. Outside this area the duty payable is 5 per cent. The expression "minimum fare" means the lowest fare normally charged to an adult or a child, as the case may be, for a single, a return, or a periodical ticket, as the case may be, for any journey, and the expression "normally charged" means charged otherwise than to a special class of passengers or on a special occasion.

Officers or men in the military or police forces, when travelling on public service, are charged three-fourths or one-half of ordinary passenger rates, according to number travelling. The Act does not extend to Ireland.

Hiring of Special Trains—The charges per mile for hire of special trains are 10s. Single and 15s. Return, plus the ordinary fare for each passenger according to class of vehicle hired. Minimum £6.

The Workmen's Compensation Act, 1897—This Act, which received the Royal assent on Aug. 6, 1897, came into operation on July 1, 1898.

THE RAILWAYS ACT, 1921

The Railways Act, which received the Royal Assent on Aug. 29, 1921, contains 86 clauses, and is divided into six parts, to which are added nine schedules. Under the Act railways in Great Britain are formed into groups. Before Jan. 1, 1923, the constituent companies in any group may submit to the Minister of Transport an agreed amalgamation scheme, and the amalgamated companies may submit agreed schemes for the absorption of the subsidiary companies in their groups. Failing agreement, schemes for amalgamation and absorption are to be settled by the amalgamation tribunal set up under the Act. The date tentatively fixed for the completion of grouping is July 1, 1923, the amalgamations of constituent companies preceding the absorption of subsidiary companies. Agreed amalgamation or absorption schemes must be submitted to the stock and debenture holders concerned before being referred to the tribunal. In the event of postponement later than July 1, 1923, in the case of any group, during the period of postponement the undertakings concerned "may, and shall if the amalgamation tribunal so direct, be used, worked, managed, maintained and repaired as one joint undertaking" and the net receipts shall be distributed as agreed or as may be decided by the tribunal. This tribunal will consist of Sir Henry Babington Smith, G.B.E. (President), Sir William Fleuder, G.B.E., and Mr. G. J. Talbot, K.C., and will be a court of record. The remuneration of the members of the tribunal and their clerks, &c., must not exceed in the aggregate £35,000 and this and any other expenses have to be defrayed by the Amalgamated Companies. The decision of the Court of Appeal or of the Court of Session on a special case stated by the amalgamated tribunal shall be final, except with leave of such Court. Except for any adjustments that may be necessary from decisions of the Court of

Appeal on "cases stated" on points of law in connection with a few subsidiary companies, the work on the Railways Amalgamation Tribunal is practically over. Sections 11 and 12 deal with the payment of £60,000,000 in settlement of the "Railways Compensation Account" in two instalments of £30,000,000. Part Two deals with the protection of the public inasmuch that the railway companies may be required by the Railway and Canal Commission, on a proper complaint being made, to afford reasonable services, facilities and conveniences. The Minister of Transport may require railway companies to conform gradually to measures of general standardisation of ways, plant and equipment, and to adopt schemes for the co-operative working or common use of rolling stock, workshops, manufactories, plant and other facilities. Under Section 18 the Minister has power to confirm agreements between companies for the purchase, lease or working of railways.

Part 3. Section 20 to 26 deals with the constitution and procedure of Rates Tribunal. They establish a court of record styled the Railway Rates Tribunal, consisting of three permanent members, and the staff attached to it must not exceed 20 persons. Permanent members of the tribunal will be appointed by the Crown on the joint recommendation of the Lord Chancellor, the President of the Board of Trade, and the Minister. In November, 1921, the following appointments to Rates Tribunal were made—(the late) Sir F. Gore-Browne, K.C., President, succeeded by Mr. W. B. Clode, K.C., Mr. W. A. Jepson, late assistant to General Manager of L. & N.W. Ry., as the railway representative, and Mr. G. C. Lockett, of Messrs. Gardner, Lockett & Hinton, Ltd., London, as the commercial member. The appointments are for a period of seven years, and the members will be paid whole-time officers. The Registrar is Mr. T. J. D. Atkinson, Secretary, Mr. S. J. Page, and the Offices, 2, Clement's Inn, W.C.2. The Minister is entitled to be heard in any proceedings before the tribunal which must make an annual report to him for laying before Parliament. Expenses of Amalgamation and Rates Tribunals form an item in the working expenses of each of the four amalgamated companies for 1923. The aggregate for the four companies under this heading is £60,350, allocated as follows—Southern, £28,200; Great Western, £8,486; London Midland & Scottish, £27,085; London and North Eastern, £6,588. With reference to charges for competitive traffic, Section 32 provides that within a prescribed time the companies shall submit schedules of rates where the distance is 30 per cent. or more in excess of the shorter route, and that these schedules shall be referred to the rates tribunal, which will settle the schedule of equal rates by the alternative routes. In the case of new "circuitous routes" (i.e. routes longer by 30 per cent. or more than the shortest route between the two places) the company must submit the route, and the Minister may refer the matter to the tribunal if the difference is above 30 per cent. If it exceeds 50 per cent. the route must have the consent of the tribunal before the equal rates are applied.

The following are the four railway groups:
1. North Western, Midland and West Scottish Group, and contains the following Railways—
L. & N.W. Furness Maryport & C.
Mid. Highland Cookermouth K. & P.

L. & Y. Caledonian S. on A. & Mid. J.
North Staffs G. & S.W. Other Companies
2. North Eastern, Eastern and East Scottish Group, and contains the following railways—

N.E. G.N. G.N. of S.
G.O. Hull & B. Other Companies
G.R. N.B.

3. Western Group, and contains the following railways—

G.W. Mid. & S.W. Jct. Other Companies
Cambrian Local S. Wales

4. Southern Group, and contains the following railways—

L. & S.W. L.B. & S.C. S.E. & C. I. of W.

Section 34 orders that each Company shall at each station keep available for public inspection a copy of the general classification of merchandise. These books are to be available during all reasonable hours without fee. Each company must also keep available for 10 years at its head office all documents specifying the rates and conditions in use on Jan. 14, 1920, and a sub-section requires the proportion of any rate appropriated to conveyance by sea to be stated. Part 4 deals with wages and conditions of service, Part 5 with Light Railways, and Part 6 includes sections dealing with facilities and the allocation of receipts of worked railways.

RAILWAYS IN 1923*

Total capital expenditure was £1,181,200,000 in 1923, as compared with £1,174,480,000 in 1922, and £1,141,543,000 in 1921. On revenue account, net receipts from the working of railways and ancillary businesses were £42,000,000 in 1923, as compared with £47,149,000 in 1922 and £46,114,000 in 1921. Miscellaneous receipts, exclusive of appropriations from reserve and from compensation account under the Railways Act, were £8,300,000 in 1923, as compared with £6,216,000 in 1922 and £3,827,000 in 1921, making totals for these years, respectively, of £51,200,000, £53,365,000, and £48,941,000. In 1922, however, sums amounting to £1,153,000 were appropriated from compensation account under the Railways Act, and in 1923, £1,200,000 was taken from that account and from reserve, making, with these additions, the total net income available, £52,400,000 in 1923, as against £54,518,000 in 1922 and £48,941,000 in 1921. Rentals and fixed charges required £2,000,000 in 1923 as against £2,041,000 in 1922 and £1,696,000 in 1921; interest and dividends on capital took £50,000,000 in 1923, compared with £51,974,000 in 1922, representing 4.43 per cent. upon the receipts from capital issued, as compared with 4.62 per cent. for 1922. The amount distributed in 1923 in interest and dividends was £45,172,000; whilst appropriations to reserve were £300,000 in 1923, as against £614,000 in 1922 and £1,086,000 in 1921.

Ordinary and workmen's tickets (1,235,566,420) increased by 3.42 per cent. in numbers, but receipts, at £55,330,393, were lower by £5,276,437. Passenger fares were reduced generally on Jan. 1, 1923. Exclusive of season-ticket holders, the total number of passenger journeys on standard-gauge railways in 1923 was made up of 56.50 per cent. at full fares, 22.32 per cent. at workmen's fares, and 21.18 per cent. at other reduced fares, compared with 62.30 per

Railway Earnings and Working Expenditure.

905

cent., 25·33 per cent. and 12·37 per cent., respectively, in 1922.

Total passenger train receipts were £94,100,000 in 1923, against £101,996,000 in 1922 and

£54,526,000 in 1923. Compared with 1922, there were decreases under every head, except that third-class season tickets showed a slight increase. At the same time the number of

Note 1.—COMMISSION PAYABLE TO RAILWAY COMPANIES.—The sum receivable per annum by the Railway Companies as compensation during the period of Government Control is limited to the Net Receipts of the year 1913 with the addition of 4 per cent. upon Capital Expenditure brought into use since the beginning of that year.

Note 2.—ARREARS.—The figures for the year ended March 31, 1920, are subject to audit, and as regards Government Traffic, the rates at which the charges are to be raised are not finally agreed.

Note 3.—No sum has been allowed for any liabilities which may attach to the Government in respect of—(a) Replacement of stock of stores and materials, (b) Abnormal wear and tear, (c) Arrears of maintenance other than permanent way and rolling stock.

Note 4.—Arrears of maintenance—permanent way and rolling stock—are estimated at 1913 cost of ascertained arrears plus 75 per cent. for additional cost of labour and material. The actual cost is not yet ascertainable, but payments have only been made on the basis of a 15 per cent. addition.

Note 5.—There is a debit amount of £447,680 balance of expenditure over revenue for the year ended March 31, 1920, on Pass Road Vehicles, Steamboats, Canals, Docks, Harbours and Wharves, Hotels, Refreshment Rooms and Cars, &c., thus reducing the net balance to £7,141,070. The Government Guarantee is—

Standard year proportion of net Receipts £47,440,000

Interest on capital works brought into use 1,036,600

Total Government Guarantee £48,476,600

Less net Balance of Revenue over Expenditure 7,141,070

Net Government Liability for year ended March 31, 1920 £41,335,530

Control commenced Aug. 4, 1914, and ceased Aug. 15, 1919

STATEMENT OF CAPITAL, REVENUE, WORKING EXPENSES, NET INCOME, DIVIDENDS, LARGEST STATIONS, AND ROLLING STOCK OF THE PRINCIPAL RAILWAY COMPANIES OF THE UNITED KINGDOM FOR THE YEAR ENDED DECEMBER 31, 1903.

* Traffic temporarily suspended. † Estimate of amounts received under Section 2 of Railways Act, 1902. ‡ Includes £2,220 received under Section 2 of Railways Act. § Includes £2,220 received under Section 2 of Railways Act.

"originating" passengers (excluding the District Railway and the London Tubes) rose from 945,465,000 in 1922 to 1,000,741,000 in 1923. Total goods train traffic receipts were £109,700,000 in 1923, against £115,564,000 in 1922 and £64,255,000 in 1921. Compared with 1922, decreases were shown under every head, except that receipts from "other minerals" increased from £14,208,000 in 1922 to £15,800,000 in 1923. "Originating" tonnage of "other minerals" increased from 48,679,000 tons in 1922 to 61,983,000 tons in 1923, and of coal, coke and patent fuel from 200,102,000 tons to 222,239,000 tons, but coal, &c., receipts were only £40,100,000 in 1923 as compared with £40,515,000 in 1922. Though the tonnage of "originating" general merchandise increased from 52,844,000 tons in 1922 to 58,773,000 tons in 1923, general merchandise receipts fell from £65,201,000 in 1922 to £58,300,000 in 1923. The total freight tonnage originating on the railways of Great Britain was 342,995,000 in 1923, as compared with 301,625,000 in 1922 and 364,444,000 in 1921. Coal, &c., tonnage in 1923 was only some

3,362,000 short of that of 1923, but general merchandise and "other minerals" are, respectively, 8,982,000 tons and 9,084,000 tons short of the 1923 figures.

Railway traffic expenditure in 1923 was generally down as compared with 1922, except for increases of about £700,000 in locomotive running expenses, and of about £50,000 in compensation (accidents and losses). Total railway traffic expenditure was £165,500,000 in 1923, as against £174,410,000 in 1922 and £75,456,000 in 1921.

Mileage of lines open for traffic, i.e., total single track, including sidings, was 51,782 in 1923, compared with 51,586 in 1922 and 50,604 in 1921. Total engine-miles in the three years were, respectively, 579,652,000, 541,088,000 and 601,224,000. The average receipt per passenger journey was 1s 3d in 1923, as compared with 1s 5d in 1922 and 9d in 1921. Excluding the District Railway and London Tubes, the corresponding figures were, respectively, 1s 7d, 1s 9d, and 1s 3d. For all descriptions of goods train traffic the average rate per ton was 6s 5d in 1923, as against 7s 6d in 1922 and

CAPITAL OF NEW RAILWAY COMPANIES

In place of the numerous separate railway companies, each with several descriptions of debentures, stock and shares, the Railways Act of 1922 has welded the whole of these railway companies, with a few minor exceptions, into four companies, each with its huge capital divided into but a few classes. The division of capital, with the approximate amount of each class, is given in the list below:—

SOUTHERN RAILWAY.

	Present Price	
Ordinary "A" (ranking with Deferred, not exceeding 3½ per cent.)	£2,480,198	38
Ordinary "B" (participating with Deferred if over 3½ per cent on Deferred)	6,110,521	9½

Goods Guards	48s. to 60s.	Platelayers	40s. to 50s.

* Excluding War Bonus, if any.

3s 5 47d. in 1913. The average receipt per ton for general merchandise was 17s. 7d. in 1913, 22s. 1 61d in 1922, and 9s. 3d. in 1913, for coal, coke, &c., the corresponding figures were 3s. 7d., 4s. 9 59d., and 2s. 0 12d., and for other minerals, 5s. 12., 5s. 10 05d., and 2s. 6 26d.

Engine-hours in traffic were 67,806,000 in 1913 and 62,360,901 in 1922, train-miles per train-hour were 13 87 coaching and 8 49 freight in 1913, compared with 13 85 coaching and 8 85 freight in 1922; and train-miles per engine-hour were 10 79 coaching and 13 42 freight in 1913, compared with 10 72 and 13 51 respectively in 1922.

Wagon-miles in 1913 were 5,020,800,000, of which 3,355,100,000 (or 66 82 per cent.) were

loaded. Corresponding figures for 1922 were 3,045,704,900, 4,552,705,400, and 66 90 per cent. Total net ton-miles, including free-hauled traffic, were in 1913, 18,960,609,000, and in 1922, 16,798,715,000. Net ton-miles per engine-hour were 453 15 in 1913 and 447 55 in 1922. For general merchandise the average haul was 82 75 miles, for coal, &c., 42 91 miles, and for other minerals, 51 72 miles in 1913, the corresponding figures for 1922 being 85 10, 44 41, and 49 46. The average receipt per ton-mile was 2 50d. for general merchandise, for coal, &c., 1 02d., for other minerals, 1 13d., and for all descriptions of traffic, 1 47d. in 1913. Corresponding figures for 1922 were 3 048d., 1 088d., 1 390d., and 1 714d.

RAILWAY COUNCILS

Councils set up under Clause 63 of the Railways Act, 1922, provide for the following stages —

- (a) Local Departmental Committees (at stations and depôts). In operation April 3, 1922
- (b) Sectional Railway Councils (representing various groups of grades) In operation April 3, 1922.
- (c) Railway Council (representing all grades covered by the scheme) Partially in operation
- (d) Central Wages Board
- (e) National Wages Board

RAILWAY ACCIDENTS DURING THE YEAR 1923.

TRAIN ACCIDENTS

The following Table gives the number of casualties in the various classes of train accidents —

Class of Accident	A Passengers		B Servants		C Other Persons		Total all Persons	
	Killed	Injured	Killed	Injured	Killed	Injured	Killed	Injured
1 Collisions in which passenger trains were concerned	3	420	5	54		1	8	475
2 Other collisions		1	2	27			2	28
3 Derailments of passenger trains		10		2				12
4 Other derailments		1	2	8			2	9
5 Accidents due to failure of engines or rolling-stock		1		11				12
6 Fires in train
7 Other accidents		16		3	7	11	7	30
Total	3	449	9	105	7	12	19	566

Railway Accidents.

MOVEMENT ACCIDENTS.

The following table shows the number of passengers, servants of the Railway Companies and Contractors and other persons killed and injured during 1903 by accidents caused by the movement of railway vehicles exclusive of train accidents, as compared with the average for the preceding five years:—

	1903		Average of 5 years, 1918-1922	
	Killed	Injured	Killed	Injured
Passengers —				
Attempting to enter or alight from trains	24	799	27	716
Falling off platforms and being struck or run over by trains	7	10	13	7
While crossing lines at stations	6	8	9	8
Falling out of carriages during the running of trains	25	39	27	50
By the closing of carriage doors		1,093		587
Other accidents	4	313	14	208
Total ..	66	2,262	90	1,576
Servants of the Companies and of Contractors —				
Coupling or uncoupling vehicles	5	395	9	384
Other shunting accidents	38	1,600	53	1,362
Falling off or getting on or off vehicles in motion	8	122	8	142
Coming in contact with overbridges or erections at the side of the lines	4	24	4	36
Attending to engines in motion	1	537	2	517
Working on the permanent way	57	83	52	68
Walking or standing on the line on duty, or when proceeding to or from work	65	156	104	195
Other causes	23	554	42	506
Total	201	3,491	274	3,210
Other Persons —				
Passing over railways at level crossings	37	17	38	15
Trespassing on the line	137	59	153	59
Suicides and attempted suicides	185	9	161	16
On business at stations or sidings or in other circumstances	23	104	29	103
Total	382	189	381	193
Grand Totals	649	5,942	745	4,979

NON-MOVEMENT ACCIDENTS.

The following information concerning accidents on railway premises not connected with the movement of railway vehicles is given as regards the cases shown in Table I. These accidents, for the most part, are not attributable to railway working, and should not properly be classed as railway accidents.

(a) *Passengers*—By falling on steps or from platforms, &c., in station premises 7 were killed and 368 injured, and from other causes 2 were killed and 359 injured.

(b) *Servants of Companies or Contractors*—The fatalities and cases of injury to railway servants and servants of contractors have been classified in respect of primary cause, as shown in the following table:—

Cause	Fatal	Percentage	Non fatal	Percentage
1 Misadventure or accidental ...	34	89.47	14,727	95.22
2 Want of caution or misconduct on the part of the injured person	4	10.53	404	2.61
3 Want of caution or breach of rules, &c., on the part of servants other than the persons concerned	—	—	125	8.1
4 Defective systems of working, dangerous places, dangerous conditions of work, or want of rules or systems of working	—	—	11	0.7
5 Defective apparatus, appliances, &c., or want of sufficient appliances, safeguards, &c.	—	—	190	1.23
6 Neglect or non-observance of rules under the Railway Employment (Prevention of Accidents) Act, 1900	—	—	10	0.6
Total ...	38	100.00	15,457	100.00

(c) *Other Persons*—Twenty-eight persons other than passengers or servants were killed and 538 injured on railway premises, 13 of whom were killed and 308 injured while on business at stations or sidings. Of the fatal cases, 10 were due to persons falling off walls, bridges, &c., 4 to persons falling off wagons or trucks, 5 to persons being caught between or run over by road vehicles, 5 to persons coming in contact with electrically charged rails while trespassing, and 4 to other causes.

			(c) Staffs of Railway Clearing Houses not recorded in 1913		

THE RAILWAY CLEARING HOUSE

This Institution was opened in Jan ^y, 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c, are arrived at. *Chairman*, E R Tutton, M P, *Secretary*, P H Price, *Q R E*, *Solicitor*, Hon Edward Granville Ehot, *Offices*, Seymour Street, N W

IRISH RAILWAY CLEARING HOUSE

The Irish Railway Clearing House occupies much the same position to the railway system of Ireland as the (London) Clearing House does to the railways of Great Britain. It was established July 1, 1848. *Chairman*, Sir William J. Goulding, Bart., *Secretary*, Peter J. Kiernan, *Solvent*, Barrington and Son, *Offices*, 5 Kildare Street, Dublin.

Indian Railways.

THE construction of Railways in India commenced in 1853. New lines of an aggregate length of 381 miles were opened for traffic during 1922-23. Of this new mileage 192.90 miles belong to Class 1, 66.18 miles to Class 2, and 122.61 miles to Class 3 railways. The total route mileage at the end of the year consisted of 18,349.30 miles 5 ft 6 in. gauge, 15,507.65 miles metric gauge, and 3,720.96 miles narrow gauges. At the close of the year a total of 862.78 miles were under construction.

The number of staff employed on railways showed a slight decrease as compared with 1921-22—viz, from 759,846 to 753,472. No strikes or other serious unrest originated during the year under review, but a strike on the East Indian Railway which started in the previous year ended in April, 1923.

The stock of locomotives increased from 9,673 in 1921-22 to 9,740 during the year under review, passenger carriages from 18,934 to 19,663, and goods stock from 203,796 to 209,134. Considerable progress was made during the year towards the standardisation of locomotives and rolling-stock. As the result of the work of two special committees of the Indian Railway Conference Association standard designs for the various types of wagons and carriage underframes in common use, with detailed specifications, were issued in Sept. 1922.

Capital outlay during 1922-23 was Rs 25.58 crores, of which Rs 18.86 crores represented expenditure incurred on State-owned lines. Of this latter sum Rs 6.58 crores were spent on works (including stores), Rs 9.54 crores on rolling-stock, and Rs 2.74 crores on new lines. For various reasons given in the report less than two-thirds of the annual quota of the Rs 150 crores to be provided for expenditure on the rehabilitation of railways during the quinquennium commencing with the year under

review was actually expended. Partly also as a result of the report of the Incheape Committee the capital expenditure proposed for 1923-24 is being re-examined.

The year also marked a rise in the working expenses of all railways from Rs 70.80 crores in 1921-22 to Rs 72.99 crores in 1922-23. Passenger earnings increased by 9½ per cent. The net result for the year was a gain of Rs 1,21,99,000 as compared with a deficit of Rs 9,27,30,000 in the previous year. The enhancement of rates and fares brought into operation during the year was responsible for the substantial increase.

The following are the principal Officials of the Government of India Railway Department—

**Government of India Railway Department
(Railway Board)**

Chief Commissioner, C D M Hindley, M A, M I C E

Members, F Austen Hadow, C V O, M I M E, G Richards, B A, F C H

Government Director, *Sir Ernest Bell, Bt, C I E, F C H

Secretary, S C Tomkins

Chief Engineer, A J Chase, O B E.

India Office (Railway Department).

Whitehall, London, S W 1.

Secretary, W Stantiall, C I E

Government Director, Sir F. A. Bell, C I E

Consulting Engineer, Messrs Rendel, Palmer & Tritton

NOTE—At the standard rate of exchange of Rs 10 to the pound sterling, which has been adopted, with effect from the beginning of the official year 1920-21, in accordance with the proposals of the Currency Commission, a lakh of rupees (Rs 1,00,000) is equivalent to £10,000, and a crore of rupees (100 lakhs) to £1,000,000.

* Address—India Office, Whitehall, S W 1. All others at Simla, India.

FASTEST RAILWAY RUNS ON RECORD.

The fastest railway run on record in the British Isles was that made in November, 1904 by the "Flying Scotsman" from King's Cross, with a heavy load consisting of 12 vehicles weighing 356 tons and drawn by one of the new L & N E Rly. "Pacific" locomotives, covering part of the journey between Biggleswade and Sandy at 80 miles per hour, and the second fastest was that made by the Great Western Railway 4-2-2 engine No. 3065 *Duke of Connaught*, on May 9, 1904, with the Transatlantic mails from Plymouth to London, when the 128½ miles from Bristol to Paddington, via Bath, were covered in 99 min. 46 sec., start-to-stop, at an average of 71.3 miles per hour. But this time included a slow to 10 miles per hour through Bath station, and another to walking pace for the renewal of Cricklade bridge at Swindon. The 8½ miles from Wootton Bassett to Westbourne Park were covered in 6 min. 55 sec., also including the latter check, and the average speed for most of the journey beyond Swindon was about 80 miles per hour, with a maximum of 92.8 miles per hour near Slough. Earlier in the same journey the 4-4-0 engine No. 3440, *City of Truro*, had achieved another record in attaining a speed of 102.3 miles per hour in the descent of Wellington bank. In the United States, on July 20 of the same year, the "Atlantic City Flier" of the Philadelphia and Reading Railroad, booked to cover the 55½ miles from Jersey City to Atlantic City in 50 min., is reputed to have completed the trip in 43 min., at an average of 77.4 miles per hour; this is probably the "record" for the U.S.A.

IRISH RAILWAYS IN 1922

Not including the Belfast and County Down, the Northern Counties Committee, and other railways situate wholly within Northern Ireland.

Twenty companies work their own lines, and there are 18 worked lines. Of these 38 companies 24 are standard (3 ft. 3½ in) gauge, with a total length of 2,623 miles (first track), 12 are 3-ft. gauge, with 420 miles; and there is one monorail, 9 miles long, making a total length of 3,032 miles.

* Approximate estimate.

† Including railways of 1 440 m and 1 445 m gauges.

‡ From April 1, 1924, converted to metre gauge.

BRITISH SHIP-REPAIRING.

By Joseph L. Carozzi, Editor of "Syren and Shipping."

BY no stretch of imagination can it be claimed that 1924 has been a good one from the British ship-repairer's point of view. In previous years there has been a considerable amount of work involved in the conversion of steamers from coal to oil burners, but the reduction in the price of coal as compared with oil has to some extent checked the flow of such work. The higher wages paid in the industry relatively to those obtaining on the Continent resulted in work which, under more favourable circumstances, would have been carried out in British yards, being sent abroad—mainly to Holland and Germany. This tendency, regrettable as it must be regarded, was chiefly due to the depressed condition of the shipping industry, which necessitated owners practising every possible economy. Two factors, however, are now in operation which will materially reduce the volume of work sent abroad. There has been an upward wage movement in both the countries alluded to, and latterly the British worker has realised that in such cases time is the essence of the contract, and hence British ship-repairers have been able to carry out work in a more expeditious manner—naturally an extremely important consideration for the ship-owner. The outstanding repair job of the year fell to Messrs Harland and Wolff, who at their Belfast works reconditioned the White Star liner *Homeric*, 34,356 tons, the largest ship in the world propelled by reciprocating engines, and at the same time converted her to oil burning. Some idea of the magnitude of this task may be gathered from the fact that 720 tons of iron and steel were used and 37 separate tanks, with a capacity of 5,050 tons of oil, were built into the ship. The wing bunkers, port and starboard, extend for 242 feet, the full length of the four boiler-rooms, and a new cofferdam deck, 25 feet in length and the full width of the ship, was built over the new oil tanks in the reserve coal bunker forward. About 200 tons of new piping were used, and the pumps, refrigerating plant, ventilating trunks and various parts of the machinery were thoroughly overhauled. This ship was built by the Germans and was launched as the *Columbus*. This extensive overhaul, however, brought her completely into line with British naval architectural and engineering practice. The result of this work was eminently satisfactory—so much so, in fact, that her speed was increased; she was enabled to bunker in 25 hours instead of three days, and a reduction from 171 to 59 was made in the boiler-room staff. The cost of this work was £250,000. During recent years Messrs Harland and Wolff have laid themselves out to cater for ship and engine

repairing on a very large scale, the fundamental principle of their policy being to provide facilities for the repair and overhaul of the largest vessels centred on Liverpool, Southampton and London. The wisdom of such a plan is obvious when the part they have played in the construction of the largest class of ship is remembered. The builders of the vessel are thoroughly *au fait* with every detail of her construction, and therefore when repairs are necessary they are in a position to execute them expeditiously and economically. Their self-contained works at Liverpool and Southampton are equipped to undertake every class of overhaul work, whether it refers to the propelling machinery or to the passenger or catering departments. In such contracts the reconditioning of kitchen and cooking apparatus at the end of each voyage is a very important item. The latest phase of Harland and Wolff development in this direction is the establishment of new and extensive ship and engine repair works on the Thames. The nucleus of these were originally under the control of the Port of London Authority, who in 1921 leased their properties to Messrs Harland and Wolff. The existent works were then thoroughly modernised and supplemented by new shops on a very comprehensive scale and equipped with all the latest appliances. They are conveniently situated at various points between London and the Tilbury Docks, which are the most seaward section of London's dock system. The largest of these new works is located at King George V Dock, and some idea of their extent will be gained from the fact that they cover over 14 acres. Adjacent to each of these plants are graving docks, an arrangement which makes for cheap and rapid repairs and overhauls. The facilities for hull and engineering work to meet the requirements of the very largest ships are certainly not surpassed by any other plants of a like nature, either at home or abroad. Moreover, although these establishments were primarily designed for speedy and economical repairs, they can also undertake the construction of tugs, river craft, lifeboats, &c. With the steady increase in the number of motor-ships in service it is essential, when adjustments of their machinery are necessary, that these should be executed by specialists. As Messrs Harland and Wolff are builders of motor-ships and their engines, having constructed nearly all the British vessels of this type which make London their home port, they are pre-eminently qualified to undertake this highly specialised and important service to shipowners.

SEEDS INDUSTRY.

THE culture of seeds is an industry of both vital national concern and of individual interest. In one ramification or another it is a factor in the life of each and the lives of all. On an adequate and well-conditioned supply of agricultural and vegetable seeds depends the adequate and healthy supply of essential foods; thanks alone to the availability of flower seeds any man, however poor, can grow his own little Eden, by grass seeds bare wastes are transformed into green pastures rich with sustenance, lawns that delight the eye are created and maintained, spaces are carpeted that serve the ends of pleasant recreation and beneficial exercise. Royal appreciation of the importance of the subject under brief review has been twice signified in our time, the visit of Their Majesties King George and Queen Mary to the Royal Seed Establishment at Reading in 1918 having been preceded by a visit there of his august father when Prince of Wales, the public interest these visits aroused reflecting the interest in seed culture of all classes of the community.

For long the commerce in seeds lacked system and organisation, and many abuses flourished. Adulteration was the rule. Mechanical means were in use for killing the vitality of cheap seeds without affecting their appearance, guarantees being offered by the owners of the mechanisms that not a single seed subjected to the process could by subsequent germination betray the fraud in which it was to be an item. These killed cheap seeds were mixed and sold with dear seeds of a different species but of similar form and colour. For instance, killed rape at threepence a pound was mixed with cabbage, broccoli and other round seeds worth many shillings a pound. In the early years of last century the scandal of this and other malpractices became so great that an agitation was set afoot which resulted in a commission of inquiry, and ultimately to the passing of the Seeds Adulteration Act.

If genius be an infinite capacity for taking pains, seed culturers on a commercial scale are a race of geniuses, for in almost every detail of their work at its every stage meticulous care must be exercised, in conjunction with exhaustive knowledge and experienced judgment, which without painstaking would be wasted. They have to deal with numerous species and innumerable varieties of each. To illustrate the multiplicity of varieties in floriculture alone, of asters there are more than two hundred, of stocks almost as many, and of sweet peas at least one hundred and seventy, other species being equally diversified. This prodigality of variation is by no means confined to flower species. The ordinary person knows of only

one sort of blackberry—some few years ago four hundred new varieties were discovered in China. It is noteworthy that the tendency of varieties to revert to their original type, which all breeders of live-stock have observed, is equally persistent in the vegetable kingdom. The fertile seed of a variety germinates to species, but not with any degree of certainty to its own variety of that species. The peculiarities of varieties are perpetuated by other means.

In such qualities and characteristics as the longevity of their vitality, the duration of the period of germination, and their hardhood (there are some not injuriously affected by either boiling or freezing) the seeds of different species are in extreme contrast, but the conditions required for germination are in principle the same—exposure to moisture and a certain quantity of heat, communication with the atmosphere being also necessary for the maintenance of a healthy state. A seed, when fully ripe, contains a larger proportion of carbon than any other living part, and so long as it is thus charged with carbon it cannot grow. The only means of ridding itself of this element, essential to its preservation but an impediment to its development, is in the conversion of the carbon into carbonic acid, for which a supply of oxygen is necessary. This it procures from the water absorbed in germination, fixing hydrogen, the other element of water, in its tissue. With the carbonic acid thus formed it parts by means of its respiratory organs, until the proportion of fixed carbon is lowered to the amount suited to its growth.

The typical Seed Establishment of to-day is a colony of experts. Growing on their own lands for the sake and purpose of seed harvesting, the cultivators are sponsors for their produce when it passes into the hands of growers for other purposes. Farm seeds, grass seeds, garden and kitchen garden seeds must all be tested, the unfit and the unlikely be eliminated; means must be taken to preserve pedigree stocks from extinction or decadence. All this entails scientific, costly and elaborate equipments in some departments and an unerring discrimination and ceaseless watchfulness in all.

Since the reform and consolidation of the seed industry more than a hundred years ago, its history has been one of continuous extension and development. It has been, and is, importantly influential in advancing British interests at home and overseas, its export returns running into big figures, even in this age of big figures. British-grown seeds are in preferential demand all over the world. A feature of the trade is that the smallest customer may buy direct from the largest producers.

THE BISCUIT INDUSTRY.

"BISCUIT" being, lexicographically, dough twice baked, the making of biscuits is—in the indicated sense—probably older than civilisation, but as applied to the modern commodity with which we feed ourselves and the world, the word itself is by way of being a misnomer, for only one of the article's very numerous varieties—the rusk—goes a second time into the oven. The cracknel, however, is twice "cooked," being boiled before it is baked, and the cracknel is the oldest biscuit known by a distinctive name. It is mentioned in 1 Kings, xiv 3 "and take with thee ten loaves and cracknels." Biscuits have always been made, but it was only their comparatively recent manufacture by machinery that elevated biscuit making to the status of a great industry. It is an industry in which British supremacy is undisputed and indisputable. We make far more, and incomparably better, than any other country. The British biscuit is ubiquitous. A curious instance of its "peaceful penetration" into the least likely regions was mentioned by the commander of the British troops who entered Lhasa in 1904. In this sealed city of Tibet (in which, it is said, only one white man had ever been before) he was offered a biscuit made in Reading—where is situated the first-built and largest biscuit factory in the world, this ancient English town having been selected as its location partly because of its nearness to the finest and most suitable wheat-growing areas.

The magnitude of the modern British industry of biscuit manufacture represents, as already implied, an instance of rapid development, for its beginning synchronised with the cheapening in price and increase in quantity of flour and sugar that resulted from legislative action and other causes not longer ago than some eighty years, the invention and adoption of scientific mechanism being coincident. The primitive methods this mechanism superseded would generations ago have proved hopelessly inadequate, and to reflect on what a comparatively biscuitless England would now mean to us is to realise that of a truth the pioneer of the new system did "the State some service" to draw imaginary lines from the site of the works he established to the overseas sources from which they are to-day supplied with rice, mace, currants, sultanas and other fruits, almonds, nuts, spices, gingers—not to enumerate other ingredients of utility and luxury which enter into the composition of some of the products of any typical biscuit factory to-day, the making of cakes usually being combined with the making of biscuits—is to realise that the trade has played an important part in the promotion and consolidation of British commercial interests in our colonies and protectorates and in every civilised country, while at home it has permanently and expansively enlarged the market for British flour, British dairy produce and British eggs, increasing in addition the demand for timber and metal for the construction of packing-cases and tins, and of other goods for divers purposes.

Detailed statistical particulars would be bewildering rather than enlightening where so many items are involved, but the following facts will be sufficiently suggestive. The returns of the Great Western, London and South-Western,

and South-Eastern Railways show that the output of biscuits and cakes from one factory alone, and the delivery of materials for their manufacture, require annually more than 62,000 railway trucks.

In the beginning the export trade in biscuits owed much to the great Crystal Palace Exhibition of 1851, which was a means of spreading the knowledge of the proved superiority of the British comestible. Similar results followed other International Exhibitions—notably the Great Paris Exhibition of 1878.

To witness the process of manufacture in an English factory of the first class is to discern why the British biscuit has won the reputation it can never lose while those processes are conducted as they always have been and are to-day. In themselves, accomplished by the operation of the most ingenious machinery, supplemented by the labour of thousands of skilled hands, they are simple, but at every stage of each the most meticulous care is exercised, the most elaborate pains are taken to ensure that each finished article is individually flawless and faultless. The absence of any adulterant is not enough—every ingredient, separately examined, scrupulously tested, must be not only good but the best, not only pure but the purest, and free from acquired as well as native defect. As illustrative of the precautions taken, two examples will serve. The scrutiny of currants is so close that each currant out of millions of currants comes under it, and the methods by which they are cleansed and freed from even the tiniest of stalks, and the smallest specks of dirt and dust occupy 36 hours. Each egg out of millions of eggs is twice tested—first by electric light, unbroken, and then after it is broken. In composition, taste, size, shape and price the differences are many and great, but in the preparation of all descriptions, and in every department, the same rigidity of principle is strictly observed.

This high standard was originally set by the first firm to transform biscuit making from a casual occupation into an organised manufacturing enterprise of national and international service and importance. Consistently adhered to, it has become the accepted standard, and helped to put a reality of meaning into the familiar phrase "British and best."

It remains to refer to the dietetic value of the biscuit, which is greatly enhanced by the variety of its classifications. It is at once a food and a delicacy, a meal and a tit-bit, and in at least one form has medicinal virtues. It satisfies the hunger of the robust and tempts the appetite of the sick and convalescent. From the commissariat of no expedition is it ever omitted—it has helped to sustain life in Arctic cold and Tropic heat. During the Great War vast quantities were especially made for our soldiers on all the fronts and our sailors on all the seas. It is nourishment in the handiest and most portable of forms, and differs from many concentrated foods in that each one of its constituents has a dietetic value of its own, besides the value of them all in combination.

Although the ship or cabin biscuit is no longer the necessity that it used to be, no vessel ever sets sail biscuitless. It is a truism that trade follows the flag—the British biscuit goes with it.

BY APPOINTMENT

IN the science of economy there is an axiom that the best is the cheapest.

¶ Huntley & Palmers biscuits cost you no more than inferior kinds, yet their superiority is beyond all question.

¶ They are manufactured of only the purest materials, under conditions of most exceptional cleanliness, in buildings which are models of sanitation.

¶ By these methods, practised consistently for 100 years, Huntley & Palmers have won their great reputation.

¶ The millions who, in every quarter of the world, daily enjoy Huntley & Palmers biscuits need fear no modification of their quality.

¶ Those who have yet to try them may do so with confidence.

Huntley & Palmers Ltd.

LETTERPRESS PRINTING.

NO other trade or craft holds so high and honourable a position as that attained by printing in modern times. No other power is comparable to that of the printed word.

And no other name stands for sounder reputation and more solid achievement in the annals of British printing than that of Clowes.

The house of William Clowes & Sons was founded in 1803 by a young man, William Clowes, who was just out of his apprenticeship. He came from Chichester, but decided to make his adventure in London, and accordingly opened up on his own account in Villiers Street, Strand, with a capital of £350.

From the first the business was progressively successful. The just enough of type for one day's work, which compelled him at the beginning to run off on the hand press at night what he had set during the day, so as to release the type for further service, was very speedily multiplied. His single press and one journeyman punter as assistant were soon inadequate to the requirements of a rapidly growing business.

Before very long, larger premises in Northumberland Court, Charing Cross, were taken. The work turned out—small jobbing orders at the outset—came to include the printing of Government papers and of books and periodicals for such publishers as John Murray, Longmans, and the Religious Tract Society, for which the firm still print to this day.

The printing of newspapers by steam presses was introduced into the *Times* office in 1814. William Clowes & Sons were the first to adopt steam-driven machines for book and general printing. This new departure created a sensation, and a succession of distinguished visitors came to Northumberland Court to see the new mechanical wonder.

It was this first steam press that caused William Clowes to move to Blackfriars—for the Duke of Northumberland objected to its proximity—where in Duke Street, Stamford Street, he established himself at an address which is still the headquarters of this firm, though the premises occupied have of course multiplied and extended themselves amazingly since then.

Twenty years after its modest foundation the printing works of William Clowes had become one of the sights of London to all interested in industrial organisation. They even furnished material for a long and laudatory article in the exclusive *Quarterly Review*.

William Clowes & Sons were entrusted with the printing of the famous Mulready envelopes under the strict supervision of the Post Office.

In going through old files of the firm's correspondence there are many letters from Charles Dickens, whose novels were printed for Messrs Chapman & Hall by Clowes & Sons. When any of his books were in course of publication (and it may be recalled they were issued in fortnightly and monthly parts), Dickens visited and

spent long days at the Duke Street printing works correcting his stories in proof.

When the Great Exhibition of 1851 was being organised, Messrs Clowes were approached by the Commission to undertake the printing of catalogues and all other matter. The task was a tremendous one, involving as it did the printing of volumes of no fewer than 5,000 pages. It was necessary that the whole matter should be standing in type at the same time—a strain on their resources of type which few firms could withstand even to-day.

Besides the Great Exhibition, Messrs Clowes carried out the printing in connection with all the South Kensington Exhibitions.

When members of the legal profession—both barristers and solicitors—were extremely dissatisfied with the manner in which proceedings in Court were reported, the lawyers formed a committee with the object of providing their own reports, and Mr George Clowes, of William Clowes & Sons, was consulted. When the project seemed unable to be carried on through lack of capital, the firm offered to finance the publication to the extent of £10,000. The offer was accepted, and from the issue of the first volume the accuracy of the reports and excellence of printing assured the success of the scheme. Perhaps, however, the largest undertaking of all was the printing of the British Museum Catalogue, which took twenty-seven years to do, and was full of foreign type.

As long ago as 1878 the firm had so outgrown its premises in Duke Street (in spite of the fact that neighbouring warehouses were being rented for storing paper and printed sheets), that a branch works was established at Beccles, Suffolk. Equipped with the latest type of electrically-driven machinery, this now constitutes one of the largest book-printing establishments in Great Britain.

The relief of pressure on the London works was only temporary, and increasing business necessitated, in 1897, the renting of additional land at Duke Street, where another building was erected. On the expiry of the lease of the original premises in Northumberland Court, this branch of the firm was transferred to more commodious premises in Great Windmill Street, Piccadilly Circus, where the smaller orders from West End customers are executed.

In combination with its capacity to print in any language, the firm has proved itself of incalculable advantage to British merchants and manufacturers by enabling them to translate and produce catalogues, labels, price lists, etc., for any country.

Long ago as they were established, Clowes have never allowed themselves to become old-fashioned in ideas or equipment. They have always been among the first to utilise the intermittent stream of new mechanical and other devices that have from time to time revolutionised print-craft on its technical side; and to-day as modern printers their several establishments stand second to none.

BIBBY BROS. & CO., 38, CHAPEL STREET, LIVERPOOL, and 10 & 11, MINING LANE, LONDON, E.C.3. [261]

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals. A chronological list from 1707 to 1858 is given below.

For the establishment of lines from 1861 to 1888 and for further information see WHITAKER'S ALMANACK, 1913 edition, including the Evolution of the Steamship in the North Atlantic.

In 1824 ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

As the size of steamships increased the heavy cost of construction necessitated the establishment of Corporations, with great strength of capital, which control the principal ocean routes (see page 929).

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 2,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30, 1924, the steamship empire builders of Great Britain owned 10,078 vessels, 21,546,044 gross tons, exclusive of 930 ships (332,456 tons) belonging to the dwindling disciples of time-honoured canvas. The total for the world was—Steam, 61,514,140 tons, and sail, 2,509,427 tons.

Owing to recent inventions passengers enjoy greater immunity from accidents, the majority of passenger steamers being now fitted with installation of wireless telegraphy and with submarine signalling apparatus.

FIRST STEAMBOATS, PIONEER SAILINGS AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.

1736. Jonathan Hulls patented designs similar to modern paddle boat.

1759. James Watt invented a double-acting side-lever engine.

1783. Marquess of Jouffrey made experiments in France.

1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.

1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.

1787. Robert Miller of Edinburgh, tied primitive manual machinery.

1788. Miller, with Symington, produced a double hull stern-wheel steamboat.

1800. Charlotte Dundas, the first practical steam tugboat, designed by Symington.

1804. Phoenix, screw-boat designed by Stephens in New York, first steamer to make a sea voyage.

1807. Clermont, first passenger steamer continuously employed, built by Fulton in U.S.A.

1812. Comet, first passenger steamer continuously employed in Europe; built by Miller in Scotland.

1818. Rob Roy, first sea-trading steamer in the world, built at Glasgow.

1819. Savannah, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.

1821. Aaron Manby, first steamer (English canal boat) built of iron.

1823. City of Dublin Steam Packet Co. was established.

1824. General Steam Navigation Co. was established at London.

1824. George Thompson & Co (Aberdeen Line) were established.

1825. Enterprise made the first steam passage to India.

1825. William Fawcett, pioneer steamer of the P. & O. S.N. Co.

1830. T. & J. Harrison (Harrison Line) were established at Liverpool.

1832. Ellurkah, iron steamer, took a private exploring party up the Niger.

1834. Lloyd's Register for British and Foreign Shipping established.

1836. F. Green & Co established at London.

1838. Austrian Lloyd Steam Navigation Co. established at Trieste.

1837. Francis B. Ogden, first successful screw tugboat, fitted with Ericsson's propeller.

1838. Archimedes, made the Dover-Calais passage under two hours, fitted with Smith's propeller.

1838. R. F. Stockton, built for a tugboat, fitted with Ericsson's propeller, sailed to America, first iron vessel to cross the Atlantic, first screw steamer used in America.

1839. Thames, pioneer steamer of the Royal Mail Steam Packet Co.

1839. George Smith & Sons (City Line) were established at Glasgow.

1840. Britannia, pioneer steamer of the Cunard Line.

1840. Chile, pioneer steamer of the Pacific Steam Navigation Co.

1845. Great Britain, first iron screw steamer, precursor of modern Atlantic steamer.

1845. Thos. Wilson, Sons & Co, Ltd (Wilson Line) established at Hull.

1847. Pacific Mail Steamship Co. established in America.

1849. Houlder Brothers & Co established at London.

1850. Bullard, King & Co. (Natal Line) established at London.

1850. Messageries Maritimes de France established.

1850. Inman (now American) Line established at Liverpool.

1851. Tyber, first steamer of the Bibby Line, established 1841 at Liverpool.

1852. Forerunner, pioneer steamer of the African Steamship Co.

1853. Union Steamship Co. was established (now Union-Castle Line).

1853. Borussia, first steamer of the Hamburg-American Packet Co., established 1847.

1854. Canadian, first steamer of the Allan Line, established 1850.

1854. Donaldson Bros. established at Glasgow.

1855. British India Steam Navigation Co. was established.

1855. Tempest, first steamer Anchor Line.

1857. Waldenian, first steamer of J. T. Rennie, Son & Co (Aberdeen Line).

1858. Bremen, first Atlantic steamer of the Norddeutscher Lloyd, established 1857.

1858. Great Eastern launched into the Thames, Jan 31, commenced May 4, 1854.

1858. British and African Steam Navigation Co., Ltd., established at Liverpool.

ADVERTISEMENTS.

Applications for advertisement space in the 1926 Editions of WHITAKER'S ALMANACK should be made as early as possible in the year to The Advertisement Manager, WHITAKER'S ALMANACK, 12, Warwick Lane, E.C. 4.

PUBLIC SCHOOLS' SCHOLARSHIPS.

**BRADFIELD
COLLEGE,
BERKS.**

An Examination for Entrance Scholarships and Exhibitions (three £30, two £60, two £30), will be held in June. Particulars can be obtained from the BURSAR, BRADFIELD COLLEGE, BERKS

**KING'S SCHOOL,
CANTERBURY.**

Scholarships are offered for competition twice annually, in June and November. A King's Scholarship is tenable with an Entrance Scholarship, so that a boy may at entrance win scholarships to the value of £55 15s a year for five years. Full information from HEADMASTER, KING'S SCHOOL, CANTERBURY

**DOVER
COLLEGE.**

Three Entrance Scholarships for Boarders are awarded in July, value £70, £50, and £30, one of each. The Common Entrance Examination is used as a Preliminary Test and selected Candidates are asked to do higher papers. The examination can be taken at the Preparatory School.

**EXETER
SCHOOL,
EXETER.**

Entrance Scholarship Examination July 3rd and 4th, 1925. Four Scholarships, £40-10, may be offered, and one Honour Scholarship of £40 for the Sons of Officers who have fallen in the War. University Endowment, £600 a year. Apply to THE HEADMASTER, EXETER SCHOOL, EXETER

**SEDBERGH
SCHOOL.**

Entrance Scholarship Examination in May or June in London, after preliminary test at Preparatory Schools. Ten Scholarships (£100 to £40) are offered. House Exhibitions may be awarded to deserving candidates. Apply to the HEADMASTER'S SECRETARY.

UPPINGHAM.

An Examination will be held in May or June, 1925, for about Eight Open Scholarships, varying from £85 to £30 per annum. Allowance is made for age, but a candidate must be under 14 on May 1st, 1925. Apply to THE BURSAR, OLD SCHOOL HOUSE, UPPINGHAM.

**KING'S COLLEGE
SCHOOL,
WIMBLEDON COMMON,
S.W.**

An examination is held each Summer Term. Candidates for Senior Scholarships must be under 16, and for Junior Scholarships under 14, on May 1st. The value of the Scholarships depends upon the Standard attained, but never exceeds the amount of Tuition Fees (£39 per annum). See "Public Schools' Year Book."

EDUCATION.**MESSRS. GABBITAS, THRING & CO.,****86, Sackville Street, Piccadilly, W.,**Tel 4923
Regent

have a department specially organised for advising Parents and Guardians as to the best Educational Establishments for Boys and Girls in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for over fifty years, and during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all educational matters. They can give, FREE OF CHARGE, to the Parent or Guardian information and advice as to—

SCHOOLS FOR BOYS OR GIRLS. TUTORS' ESTABLISHMENTS. EDUCATIONAL HOMES. DOMESTIC ECONOMY, AGRICULTURAL AND SECRETARIAL COLLEGES.

**EITHER AT HOME
OR
ABROAD**

To enable the Firm to advise efficiently it is necessary that *full particulars should be given*, especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors and Governesses, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

Transfers of and Partnerships in Boys' and Girls' Schools are also negotiated. Masters, Tutors, and Governesses seeking Posts can have a Prospectus on application, free of charge.

Hockey. Cricket. Tennis. Swimming.

Fees.—£35 to £38 net. per term.

BRIGHTON.

The Medical Officer of Health writes.—“Brighton has the bracing qualities of East Coast resorts, with a larger amount of sunshine and more shelter during unfavourable weather. During 1920 the record of bright sunshine was 48 per cent in excess of London, in the winter months the excess was even more marked, being 88 per cent. Whilst Brighton has more sunshine than London, at the same time it is cooler in summer. There is an unlimited pure water-supply and perfect sanitary arrangements.”

With its two piers its immense promenade, its pavilion grounds, and numerous parks and recreation grounds, together with a fine municipal orchestra, Brighton offers attractions to meet the requirements of all tastes, and combines with the advantages of the seaside resort the amusements of the town. Sunshine (1923), 1,718 hours. See p. 979 for HOLIDAY GUIDE

BUCKHURST HILL.

The Medical Officer of Health writes —“Buckhurst Hill, which prides itself upon its local individuality and accessibility to London, is a modern residential district in Essex, 10½ miles from the Metropolis, well situated amidst healthy surroundings on the borders of Epping Forest.”

GIRLS

OKALEA, BUCKHURST HILL.

BUCKHURST HILL GIRLS' SCHOOL

Inspected and recognised as efficient by the Board of Education, 1921. The house occupies a high position overlooking miles of open forest land. Carefully graded education for girls 8 to 18. Large and highly qualified Staff. Programmes of the Parents' Union School are followed. Preparation for higher Examinations. Local centre for Senior Oxford Great attention is paid to health and individual physical development, outdoor life, games, gardening. Grounds nearly 7 acres. Home like holidays for pupils from abroad.

Principal—Miss BEATRICE GARDNER.

BROADSTAIRS.

The Medical Officer of Health writes —“Broadstairs is built on the cliffs half-way between Ramsgate and Margate. Aspect, S.E. The town, which is built upon high land on a sub-soil of chalk, thus enjoying the advantages special to this geological formation, has no northerly aspect and is sheltered from cold winds. It is peculiarly fortunate in climatic fluctuations. Remarkably free from fogs and mists. Unusually high record of bright sunshine. The climate is equable and dry, bracing in summer and mild in winter, suitable for invalids and delicate children throughout the year. The drainage system is excellent, and the water-supply pure and abundant.” Sunshine (1923), 1,804 hours. Pop 15,465. Southern Railway, 7½ miles from London.

[See p. 980 for HOLIDAY GUIDE]

HUNSTANTON-ON-SEA.

The Medical Officer of Health writes.—“Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water, combine to make it an ideal place for them. The number of schools and the wonderful physical progress of weakly children bear testimony to these advantages.”

This quiet East Coast health resort stands on the north-west coast of Norfolk, facing the Wash, between Cromer and King's Lynn Pier, 800 feet in length. Golf Links, 18 holes. Pop. 4,281. L & N E Rly. Sunshine (1923) 1,244 hours.

Physical Exercises, Games, and Daily Walks.

Fees.—From 70 guineas per annum.

MALVERN

(Worcester). The Medical Officer of Health writes — "Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water-supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. The average annual death-rate is 15 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Urban Council are provided with every means for promptly dealing with any case that may arise." Pop 17,809 [See p 988 for HOLIDAY GUIDE]

Fees—36-48 guineas per term.

SEAFORD.

The Medical Officer of Health writes—"Pop 5,358. On the Sussex coast, 58 miles from London, between Brighton and Eastbourne. Southern Railway. Climate of Seaford is equable, but bracing for south coast health resort. Never very cold in winter, and summer heat always tempered by cool sea breeze, so that hottest days in summer are not relaxing. It is a climate eminently suited to convalescents. The air has a true tonic effect on sick patients and produces a really marvellous improvement in a short time. The climate is dry, rainfall being small and, owing to chalky subsoil, quickly absorbed. There is a large amount of sunshine enjoyed, and nothing to intercept it." The prevailing winds are south and west, the Downs affording considerable protection from north and east. Elevation, 20 feet to 60 feet. Aspect, S.W. Water-supply constant. Drainage modern. Beach pebbly. Bathing. Golf, two clubs, each with gentlemen's links (18 holes) and ladies' course."

BOYS

NEWLANDS,
SEAFORD, SUSSEX.

Mr. WILLIAM A. WHEELER, B.A.

MALVERN,

WORCESTERSHIRE. U.D.C. 129 miles from London.

Pop 17,809. Means of Access—G.W. Railway and L.M. & S.

Railway Location—On the slopes of the Malvern Hills

8 miles from Worcester Elevation—300 to 900 feet above sea-level. Climate—Dry and bracing.

Water Supply—Pure constant Drainage—Modern. Soil—Gravel. Season—Summer and winter.

Annual Fixtures—Shakespeare week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place, important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotswold, Mendip and Welsh hills, and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel.

The Malvern Hills being a single chain there are no lateral intervening valleys in the range. This has much to do with the dryness of the climate. The Malvern district is rich in botanical, geological, entomological and ornithological specimens. Assembly rooms (high-class bands and theatrical companies), public library, three clubs, tennis, bowls, croquet, golf—gentlemen's course (18 holes), ladies' course (9 holes)—hunting, boating, fishing. **Places of Interest**—Rivers Severn (4 m.), Teme (6 m.), Avon (12 m.), boating, fishing, river scenery. Deerhurst (17 m.)—Saxon church. Tewkesbury Abbey (15 m.). Pershore Abbey (16 m.) Bosbury (8 m.)—Edna Lyall's tomb. Valley of the Wye—by rail to Liss, and boat down river to Chepstow.

WORTHING,

SUSSEX. M.B. Pop. 35,524. Southern Railway 6½ miles from London. Aspect—South. Climate—Dry, mild, equable. Sunshine (1923), 1,805 9 hours. Water Supply—Constant. Soil—Loam and marl. Beach—Safe level sands with plenty of shingle. A select seaside resort, residential town and winter haven for invalids, protected from the north by the South Downs, which rise in breezy uplands some little distance inland, its great charm being that it has developed into a modern seaside town without losing much of its rural aspect, much foliage and sylvan surroundings. Homefield Park, 16 acres (cricket, tennis, bowls). Steyne Gardens, 3 acres (promenade concerts). Broadwater Green, Victoria Recreation Ground, Beach House Park and Denton Gardens are recent additions to the list of pleasure grounds. Golf links (two 18-hole courses). Hunting, boating, fishing. Places of Interest—Arundel (10 m.), Bramber Castle (9 m.), Goring Woods (3 m.), Broadwater (1 m.), 13th Century Church, Chanctonbury (7 m.) (800 ft.), Clissbury, and other remains of Roman encampments.

Worthing is noted for the equability of its climate, which is largely due to its geographical situation. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large amount of sunshine. A palatial Pavilion at the Pier entrance, and a greatly improved Bandstand Enclosure on the Parade will be opened for the 1925 summer season.

EXPRESS SERVICE (PULLMAN CARS) to LONDON, 76 minutes.

O. MORGAN OWEN, *General Manager.* [76]

WHY BE CONTENT WITH 5% ?

You can get a Guaranteed 7%, 10%, 15%, or even 20%, according to Age.

WHY deprive yourself one day longer than necessary of comforts which this larger income will provide for you ? Why run the risk of a further depletion of your Capital and a further loss of Income ? Why not make your Income *surer* as well as larger, and thereby enjoy contentment of mind, with its beneficial effect on your health ?

Do what many others are to-day doing - sell your stocks and shares and buy a "Sun Life of Canada" Annuity with the proceeds. A retired professional man has just doubled his income by making this safe exchange. This "*two years' Income in one*" will be paid to him every year as long as he lives. It will never fail! No more worry, no more wondering how to make ends meet. Life now is a different thing for him.

Think what it would mean to you - a far *larger* Income ; an absolutely *safe* Income ; an *unalterable* Income for Life, Guaranteed by a Company with over £42,000,000 assets under very strict Government supervision.

Write for full details of our Annuities, so that we can show you how much better you can employ your capital - what a much larger income you can enjoy, and how much safer it will be. *Better terms are granted in cases of impaired health*, and there are many kinds of annuities, including a *guaranteed return of Purchase Price*. Please give exact date of birth and amount of capital at your disposal.

**J. F. Junkin (Manager), Sun Life of Canada,
20, Canada House, Norfolk Street, London, W.C.2.**

BRITANNIC ASSURANCE CO., LTD.

The "Britannic" Endowment Assurance Policy provides :

- ❑ A Capital Sum at the end of the term.
- ❑ Assistance (if desired) towards the purchase of a house.
- ❑ Full Cover against death.
- ❑ An Excellent Investment for your Savings.

Established 1866.

Funds £9,000,000.

REPRESENTATIVES IN ALL DISTRICTS

Chief Offices:

BROAD STREET CORNER, BIRMINGHAM.

DOUBLE YOUR INCOME ELIMINATE RISK.

Every person whose income is derived from investments knows how harassing is the anxiety entailed by the constant rise and fall in their value.

You can get a guaranteed income for life if you purchase a Canada Life Annuity. It is, humanly speaking, equivalent in safety to a Government pension. It cannot shrink. What you contract to get is paid you punctually. And you get a much larger income.

FOR INSTANCE

A man of 62 who takes out a Canada Life Annuity for £1,000 gets a yearly income of £106 3s. 2d. A woman of 64 gets a yearly income of £100 18s. 0d. for the same investment.

OVER 10% PER ANNUM.

Other ages pro rata, on equally generous terms. You can invest any amount from £100. The Assets of the Canada Life Company are over £19,000,000, and are under direct Government supervision. Write at once for full particulars to the Canada Life—the oldest Colonial Life Assurance Company and the office that gives the best value for Annuities.

Write to-night (stating age) to Annuity Department,

Director and General Manager — F. NORIE-MILLER, J.P.

FIRE BONUS POLICIES.

Many thousands of pounds have been returned to Insured by way of Bonus since 1908. The "General" is the only Office transacting business under such a large and extensive Fire Insurance Bonus Scheme.

Bonus Policies are issued for all Insurances on Dwelling Houses and Non-hazardous Properties, and also all Householders' Insurances on Furniture, &c. The Scheme is particularly attractive to those who have paid Fire Premiums year after year without having made a claim, and who naturally look for some reduction by way of Bonus.

EVERY CLASS OF INSURANCE BUSINESS TRANSACTED.

NOTE:—The Bonds of the Corporation are accepted by all departments of His Majesty's Government

£665 a Year for Life for YOU—from Age 55.

**Or—if you prefer it—a Cheque for £7568. Your
life, meantime, insured for £5000.**

Don't let 55 find you still under the necessity of working. Adopt this plan now and make sure that your later years will be free from financial care.

£665 a year for life is something to look forward to. It will make you independent just at a time when the daily routine of business becomes irksome. With the burden of making a living cast off, and leisure, amusement, and travel taking the place of work, 55 will find you a happy, contented man—happier, possibly, than you have ever been. Life will be a looking-forward and not a looking-back.

The plan is very simple. Each year, for a fixed number of years, you deposit an agreed upon amount with the Sun Life Assurance Co. of Canada. These deposits accumulate, and to them are added profits which also accumulate and become profit makers for you. Then when you are 55—if that is the age agreed upon—you will receive from the Company the full amount of the policy plus these considerable profits. No taxes are paid on these profits. Also you get a handsome rebate on Income Tax on every deposit. Assuming the present rate, you will save in Income Tax alone over £600 during the term of this £5000 policy. If you find you cannot keep up the deposits, there are numerous advantageous options at your disposal, and should illness or accident permanently prevent you from following any gainful occupation, a monthly sum of £50 will be paid to you until the capital amount becomes due—and you will not be called upon to pay another deposit.

Then there is the £5000 Insurance. Your family has the protection immediately you make the first deposit, so that if anything happens to you they are provided for. It is an increasing provision, because half of every deposit you make is immediately credited to the insurance value of the policy.

This plan of Investment-Insurance can be adopted at any age and for any amount. The man with a small income need not hesitate because he cannot arrange for so great a sum as the one mentioned.

The Sun Life of Canada (the great Annuity Company), which makes this opportunity for you, has assets of over £42,000,000 under strict Government supervision.

Let us know your name, address, exact age, and the approximate amount you can deposit yearly, and, without any obligation on your part, we will tell you exactly how you can apply this ideal Plan of Investment-Insurance to your own circumstances.

Address your inquiry to J. F. Junkin (Manager), Sun Life of Canada, 20, Canada House, Norfolk Street, London, W.C. 2.

ADDITIONAL CURATES SOCIETY

More than 700 Curates are serving in poor and burdensome parishes through the Society's help.

Every penny of the contributions received during the past 20 years has been paid out towards Curates' stipends, the contributions amounted to £862,506 and the payments were £900,816.

The Society pleads for generous support. Letters should be addressed to the Rev. Canon Paul Petit (Secretary),

A.C.S. HOUSE, 51, Belgrave Road, London, S.W.1.

For fatherless necessitous boys and girls from all parts of the country and the Dominions, from early infancy up to 11 years. They are retained till they are 15 years of age, and are given a practical and sound education. Full particulars of the

ALEXANDRA ORPHANAGE

(Incorporated as the Orphan Working School & Alexandra Orphanage)

may be obtained from the Secretary, who will be pleased to send the Annual Report. 300 children are now in the school, and the work has been carried on continuously for 166 years. It is dependent upon voluntary gifts, and further support is urgently needed.

Subscriptions, donations, and LEGACIES will be welcomed.

CHURCH MISSIONARY SOCIETY

SALISBURY SQUARE, LONDON, E.C. 4.

Vice Patron	-	-	-	THE ARCHBISHOP OF CANTERBURY
President	-	-	-	COL SIR ROBERT WILLIAMS, Bart
Treasurer	-	-	-	R L BARCLAY, Esq, C B E
General Secretary	-	-	-	HERBERT LANKESTER, Esq, M D

The Church Missionary Society works for the extension of Christ's Kingdom in Asia and Africa, where it holds wonderful strategic positions. There are on the staff 1,220 European missionaries and 14,515 native Christian workers. During the last year there have been 52,822 baptisms, 32,402 of those baptized being adults. C M S institutions, colleges and schools have been attended by 353,294 students, the mission hospitals have received 42,940 in-patients, and 862,582 visits of out-patients.

In October, 1923, word was sent to C M S missionaries in all parts of the field that the General Committee, believing God was calling them to go forward, had sanctioned an expenditure in 1924 of **£500,000**. The income for the year ending 31 March, 1924, was only **£460,000**.

And the world is "calling" for the Gospel message.

In INDIA a Hindu lecturer said to his students: "We want Christ, we cannot do without Him." In JAPAN a Christian, as he perished in the fire which followed the earthquake, proclaimed to the very last the Gospel of eternal life. In CHINA, amid chaos, brigandage, and terror, there is calmness among the Christians through the power of prayer, but the teeming millions of heathen need this assurance also. In AFRICA larger numbers than ever are pressing forward to hear the Word of life. **WILL YOU HELP THE C.M.S. TO CARRY TO THESE NATIONS THE MESSAGE OF PEACE THROUGH THE GOSPEL OF JESUS CHRIST?**

Gifts should be sent to the HOME SECRETARY, C M House, Salisbury Square, London, E C 4

COLONIAL AND CONTINENTAL CHURCH SOCIETY.

(Now in its One Hundred and Second Year.)

Patron - HIS MAJESTY THE KING.

Vice-Patrons: The Archbishops of Canterbury, York, etc.

The Society exists for the purpose of supplying the means of Grace to our fellow countrymen abroad, especially in those pioneer parts of the Empire where they are in danger of drifting into irreligion for lack of the Gospel.

Many Colonial Dioceses receive aid from the Society, including those in Western Canada, Australasia, British East Africa, and India. Many Colonial Bishops are applying for far more aid than the Society's Funds can meet.

316 Clergy and Lay Evangelists have been sent out. Assistance is also given to ministrations among British Artisans, Sailors, and others in Continental Cities, and Services (self-supporting) are organised for visitors at health resorts.

Bankers BARCLAYS BANK LTD., 54, Lombard Street, London, E C 3.

ESTABLISHED 1765.

Patrons—H.M. The Queen and H.M. Queen Alexandra.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss ROSE E. WHYTE, the Secretary, at the Hospital. [146]

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING Vice-Patrons—H.M. THE QUEEN and H.M. QUEEN ALEXANDRA

Chairman Executive Committee—H.R.H. THE DUKE OF YORK, K.G.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages of about 14 and 16, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air Force or Mercantile Marine.

CONDITIONS OF ADMISSION—1 The age for admission is from about 14 to 16½ years. 2 A boy must, in the opinion of the Committee, be really necessitous. 3 He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4 Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £25 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1 St. James's Square, S.W., and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT—MAJOR SIR T. E. S. PASLEY, BART.

GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,

NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1724 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii, and 61st Victoria, ch. vi, as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts

BEDS
616

IN-PATIENTS (1923)
9,761

OUT-PATIENTS (1923)
127,836

Expenditure: £153,767 :: Income from Endowments £66,063.

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is less than £5,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over £80,000 per annum.

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow, or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone Hop 1086.

**HAVE YOU EVER HELPED
THE GIVEN-WILSON INSTITUTE?**

It was founded by the late Rev. T. Given-Wilson, for many years Vicar of St. Mary's, Plaistow. We look after the old and feeble, the blind and the lame. We collect cast-off clothes, sent by our subscribers, and supply them to deserving poor. We teach the young to be good citizens. We help poor gentlefolk with clothes and money. Our departments are: Infant Health Centre, Self-Help Mission, Girl Guides, Boy Scouts, Cadets, Quiet Piece of Work (for helping poor gentlefolk), Holidays for poor mothers and little children, Clubs for Women, Regular Meetings for Aged Widows, Temperance Meetings, The Open Door—a rest room for old poor men. All our meetings are well attended, and able Lecturers, without fee, speak to the people—all very poor and all decent. We try to brighten their lives. The Committee of the Institute meets at regular intervals at the Office of the Honorary Solicitor, Mr. William Negus, J. P., D. L.

T. FERNIE, *Manager and Secretary,*
Given-Wilson Institute, London Road, Plaistow, E. 13.

THE HOSPITAL FOR DISEASES OF THE SKIN,

Telephone Hop 1021

70-71, BLACKFRIARS ROAD, S.E.

ESTABLISHED 1841.

Patroness—HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.*Treasurer*—THE RT. HON. THE LORD MORRIS, P.C., K.C.M.G.

This Hospital is the oldest in London specially devoted to the study and treatment of diseases of the skin. It is thoroughly equipped with the most modern therapeutic appliances.

Unfortunately, the present position of the finances of the Hospital will not permit the re-opening of the In-Patient Department, which was closed owing to lack of funds. Donations and more Annual Subscriptions are urgently desired.

The practice of the Hospital is open to all qualified medical practitioners and senior students.

Since the foundation of the Hospital in 1841, over 545,000 patients have been treated.

Patients are required to contribute towards the funds of the Hospital according to their means, and should attend daily at 1.30 p.m., or on Fridays at 6 p.m.

FREDERICK HAYTER, *Secretary*

Deputy-Secretary: BRIG.-GENERAL N F. JENKINS, C.M.G., C.B.E.

The Society for the Propagation of the Gospel in Foreign Parts is the oldest Missionary Society now existing in England which was founded with the express purpose of sending out missionaries, and for nearly a hundred years it was the only such Society connected with the Anglican Church.

"In the universality of its work the S.P.G. differs from every other missionary Society. It confines itself to no especial race or country, it works equally in carrying Christianity to the English settlers in Canada, Australia, and South Africa, amongst the Hindus and Mohammedans of India, Africa's negroes and Kafirs, in China, Japan, and Polynesia."—*Times Newspaper.*

SOCIETY FOR THE ASSISTANCE OF LADIES IN REDUCED CIRCUMSTANCES.

Under Royal Patronage.

Dear Friends

Once upon a time I used to say I should be contented if the receipts of this Society reached in one year the sum of £10,000. Now they have just exceeded £21,000 in twelve months, and I do not see why in the future they should not be £30,000 a year. Nothing succeeds like success, and with the success our ambitions rise and we expect more and more. I think £21,000 is simply wonderful, considering that the Hospitals and other Charitable Institutions are in such difficulties. I can only say to those who have given large sums and those who have given small ones, to those who give us work and those who get up entertainments and sales, "Thank you very much, and thank you also for what you are going to do in the future." For of course this success must mean another success next year, for we cannot go back. I like to feel that those who have passed beyond, and who have left money to the Society, know how much their gifts have been appreciated. Their works do follow them.

Thanking everyone for their goodness, and thanking God for putting it into the hearts of so many people to help in this country and in many other countries,

I am, Yours sincerely and gratefully,
EDITH SMALLWOOD,
Hon. Secretary.

UNIVERSITY COLLEGE HOSPITAL

GOWER STREET, W.C.

Founded A.D. 1833.

Incorporated 1907.

A General Hospital with Separate Departments for Special Forms of Disease, in which are incorporated the Royal Ear Hospital, Dean Street, and the National Dental Hospital, Great Portland Street

£15,000 required immediately in order to meet the prospective deficiency for the year.

OVER 60,000 PATIENTS TREATED ANNUALLY.

ANNUAL EXPENDITURE **£70,000**

INCOME FROM ENDOWMENTS **£ 6,000**

ANNUAL VOLUNTARY SUPPORT REQUIRED **£64,000**

[382]

HE proprietors of "Whitaker" desire earnestly to support the many appeals for immediate financial assistance made in this volume by Hospitals and Charitable Institutions all over the country.

The Voluntary System under which these Institutions are carried on requires unremitting effort on the part of those responsible for their finances, and subscribers, donors and testators are adequately rewarded by the progress in scientific research and in the alleviation of ~~suffering and distress which their contributions~~ enable the Institutions to achieve.

These Hospitals and Institutions deserve the heartiest and most generous support it is possible to give.

LIFE ASSURANCE AT REDUCED RATES

The reduced premium rates for Life Assurance now in operation for policies issued by the "British Dominions," together with the revision of the rates for Convertible Term Assurance, render these widely-acknowledged sound policies still more attractive.

Under the prevailing new rates you will be frankly astonished at the ease with which you can assure the future financial well being of your dependents in the event of your death. No man who has the interests of his family at heart should hesitate to send immediately for the Whole Life Assurance prospectus.

The "British Dominions" Convertible Term Assurance has been devised for the man who prefers to wait until he is enjoying a comfortable income before making provision for his own retirement.

Whilst this policy, at a low premium, allows him to assure his dependents

an amply adequate sum in the event of his death—in fact, the same annual outlay he would pay for an Endowment Assurance provides twice as much insurance for his dependents under the Convertible Term plan—at a later date, at any time during the term, he has the option of converting it to an Endowment Assurance providing funds for his own retirement without having to furnish further evidence of health.

In addition to the ultimate benefits derived from these policies, a generous rebate is allowed by the Income Tax Authorities in respect to premiums paid.

Prospectus sent promptly on application to Life Department, 32, Moorgate, London, E.C. 2

THE "ALL-IN" POLICY FOR HOUSEHOLDERS AND HOUSEOWNERS.

This Popular Insurance, The Householder's "All-In" Policy, devised and issued only by "British Dominions," covers practically every serious risk to the contents of the home for 5/- per £100 per annum (Minimum Premium 7/6).

The Houseowner's "All-In" Policy covers the building only for 1/6 per £100.

For full list of the many and varied risks covered, write to the "All-In" Policy Department 41, Threadneedle Street, London, E.C. 2
